CAUTIONARY STATEMENT FOR PURPOSES OF THE "SAFE HARBOR"
PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

Edgar Filing: TENNECO INC - Form 10-Q

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 concerning, among other things, our prospects and business strategies. These forward-looking statements are included in various sections of this report, including "Management's Discussion and Analysis of Financial Condition and Results of Operations" appearing in Part I, Item 2. The words "may," "will," "believe," "should," "could," "plans," "expect," "anticipated," "estimates," and similar expressions (and variations thereof), identify these forward-looking statements. Although we believe that the expectations reflected in these forward-looking statements are based on reasonable assumptions, these expectations may not prove to be correct. Because these forward-looking statements are also subject to risks and uncertainties, actual results may differ materially from the expectations expressed in the forward-looking statements. Important factors that could cause actual results to differ materially from the expectations reflected in the forward-looking statements include:

- changes in consumer demand, prices and our ability to have our products included on top selling vehicles, such as the recent shift in consumer preferences from light trucks and SUVs to other vehicles in light of higher fuel costs (because the percentage of our North American OE revenues related to light trucks and SUVs is greater than the percentage of the total North American light vehicle build rate represented by light trucks and SUVs, our North American OE business is sensitive to this change in consumer preferences), and other factors impacting the cyclical nature of automotive production and sales of automobiles which include our products, and the potential negative impact on our revenues and margins from such products;

1

- changes in automotive manufacturers' production rates and their actual and forecasted requirements for our products;
- the overall highly competitive nature of the automotive parts industry, and our resultant inability to realize the sales represented by our awarded book of business (which is based on anticipated pricing for the applicable program over its life, and is subject to increases or decreases due to changes in customer requirements, customer and consumer preferences, and the number of vehicles actually produced by customers);
- the loss of any of our large original equipment manufacturer ("OEM") customers (on whom we depend for a substantial portion of our revenues), or the loss of market shares by these customers if we are unable to achieve increased sales to other OEMs;
- general economic, business and market conditions, including without limitation the financial difficulties facing a number of companies in the automotive industry and the potential impact thereof on labor unrest, supply chain disruptions, weakness in demand and the collectibility of any accounts receivable due us from such companies;
- labor disruptions at our facilities or any labor or other economic disruptions at any of our significant customers or suppliers or any of our customers' other suppliers (such as the recent strike at American Axle, which disrupted our supply of products for significant General Motors platforms);
- increases in the costs of raw materials, including our ability to

Edgar Filing: TENNECO INC - Form 10-Q

- successfully reduce the impact of any such cost increases through materials substitutions, cost reduction initiatives, low cost country sourcing, and price recovery efforts with aftermarket and OE customers;
- the cyclical nature of the global vehicle industry, including the performance of the global aftermarket sector and the longer product lives of automobile parts;
 - our continued success in cost reduction and cash management programs and our ability to execute restructuring and other cost reduction plans and to realize anticipated benefits from these plans;
 - costs related to product warranties;
 - the impact of consolidation among automotive parts suppliers and customers on our ability to compete;
 - operating hazards associated with our business;
 - changes in distribution channels or competitive conditions in the markets and countries where we operate, including the impact of changes in distribution channels for aftermarket products on our ability to increase or maintain aftermarket sales;
 - the negative impact of higher fuel prices on discretionary purchases of aftermarket products by consumers;
 - the cost and outcome of existing and any future legal proceedings;
 - economic, exchange rate and political conditions in the foreign countries where we operate or sell our products;
 - customer acceptance of new products;
 - new technologies that reduce the demand for certain of our products or otherwise render them obsolete;
 - our ability to realize our business strategy of improving operating performance;
 - capital availability or costs, including changes in interest rates, market perceptions of the industries in which we operate or ratings of securities;
 - our inability to successfully integrate any acquisitions that we complete;
 - changes by the Financial Accounting Standards Board or the Securities and Exchange Commission of authoritative generally accepted accounting principles or policies;
- 2
- potential legislation, regulatory changes and other governmental actions, including the ability to receive regulatory approvals and the timing of such approvals;
 - the impact of changes in and compliance with laws and regulations, including environmental laws and regulations, and environmental

Edgar Filing: TENNECO INC - Form 10-Q

liabilities in excess of the amount reserved;

- acts of war and/or terrorism, including, but not limited to, the events taking place in the Middle East, the current military action in Iraq and Afghanistan, the current situation in North Korea and the continuing war on terrorism, as well as actions taken or to be taken by the United States and other governments as a result of further acts or threats of terrorism, and the impact of these acts on economic, financial and social conditions in the countries where we operate; and
- the timing and occurrence (or non-occurrence) of other transactions, events and circumstances which may be beyond our control.

The risks included here are not exhaustive. Refer to "Part I, Item 1A -- Risk Factors" in our annual report on Form 10-K for the year ended December 31, 2007, for further discussion regarding our exposure to risks. Additionally, new risk factors emerge from time to time and it is not possible for us to predict all such risk factors, nor to assess the impact such risk factors might have on our business or the extent to which any factor or combination of factors may cause actual results to differ materially from those contained in any forward-looking statements. Given these risks and uncertainties, investors should not place undue reliance on forward-looking statements as a prediction of actual results.

3

PART I.

FINANCIAL INFORMATION

ITEM 1. FINANCIAL STATEMENTS (UNAUDITED)

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

TO THE BOARD OF DIRECTORS AND SHAREHOLDERS OF
TENNECO INC.

We have reviewed the accompanying condensed consolidated balance sheet of Tenneco Inc. and consolidated subsidiaries (the "Company") as of March 31, 2008, and the related condensed consolidated statements of income, cash flows, comprehensive income, and changes in shareholders' equity for the three-month periods ended March 31, 2008 and 2007. These interim financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to such condensed consolidated interim financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public

Edgar Filing: TENNECO INC - Form 10-Q

Company Accounting Oversight Board (United States), the consolidated balance sheet of Tenneco Inc. and consolidated subsidiaries as of December 31, 2007, and the related consolidated statements of income (loss), cash flows, changes in shareholders' equity, and comprehensive income (loss) for the year then ended (not presented herein); and in our report dated February 29, 2008, we expressed an unqualified opinion on those consolidated financial statements and financial statement schedule and included an explanatory paragraph regarding the Company's adoption of the measurement date provisions of Statement of Financial Accounting Standards ("SFAS") No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans -- an amendment of FASB Statements No. 87, 88, 106 and 132(R)," on January 1, 2007. In our opinion, the information set forth in the accompanying consolidated balance sheet as of December 31, 2007 is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

(1) As you read the accompanying financial statements you should also read our Annual Report on Form 10-K for the year ended December 31, 2007.

In our opinion, the accompanying unaudited financial statements contain all adjustments (consisting of normal recurring adjustments) necessary to present fairly Tenneco Inc.'s financial position, results of operations, cash flows, changes in shareholders' equity, and comprehensive income (loss) for the periods indicated. We have prepared the unaudited condensed consolidated financial statements pursuant to the rules and regulations of the U.S. Securities and Exchange Commission for interim financial information. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America ("GAAP") for annual financial statements.

Our condensed consolidated financial statements include all majority-owned subsidiaries. We carry investments in 20 percent to 50 percent owned companies as an equity method investment, at cost plus equity in undistributed earnings since the date of acquisition and cumulative translation adjustments. We have eliminated intercompany transactions.

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement No. 158 "Employers' Accounting for Defined Benefit and Other Postretirement Plans." Effective January 1, 2007, Tenneco elected to early-adopt the measurement date provisions of SFAS No. 158. We previously presented the transition adjustment as part of other comprehensive income in our statement of comprehensive income and statement of changes in shareholders' equity for the three month period ended March 31, 2007. The transition adjustment should have been reported as a direct adjustment to the balance of accumulated other comprehensive income (loss) as of March 31, 2007. Comprehensive income for the three month period ended March 31, 2007 was previously reported as \$31 million. The amount of comprehensive income for the three month period should have been reported as \$17 million. The previously reported amount of other comprehensive income for the three month period ended March 31, 2007 was \$26 million and the amount that should have been reported is \$12 million. We have revised the presentation of comprehensive income and other comprehensive income for 2007 in the accompanying financial statements in this Form 10-Q. The statement of income, balance sheet and statement of cash flows were not affected.

(2) In September 2006, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 157 "Fair Value Measurement" which is effective for financial statements issued for fiscal years beginning after November 15, 2007. We adopted SFAS No. 157 on January 1, 2008, with the exception of the application of this statement to non-recurring, nonfinancial assets and

Edgar Filing: TENNECO INC - Form 10-Q

liabilities. The adoption of SFAS No. 157 did not have a material impact on our fair value measurements. SFAS No. 157 defines fair value as the price that would be received for an asset or paid to transfer a liability (an exit price) in the principal most advantageous market for the asset or liability in an orderly transaction between market participants. SFAS No. 157 establishes a fair value hierarchy, which prioritizes the inputs used in measuring fair value into the following levels:

Level 1 -- Quoted prices in active markets for identical assets or liabilities.

Level 2 -- Inputs, other than quoted prices in active markets, that are observable either directly or indirectly.

Level 3 -- Unobservable inputs based on our own assumptions.

The fair value of our recurring financial assets and liabilities at March 31, 2008 are as follows:

	LEVEL 1 -----	LEVEL 2 -----	LEVEL 3 -----
	(MILLIONS)		
FINANCIAL ASSETS:			
Interest rate swaps.....	\$ --	\$ 4	\$ --
FINANCIAL LIABILITIES:			
Foreign exchange forward contracts.....	\$ --	\$10	\$ --

10

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)
(Unaudited)

Interest rate swaps -- In April 2004, we entered into fixed-to-floating interest rate swaps covering \$150 million of our fixed interest rate debt. The fair value of our interest rate swap agreements are based on an internally developed model which incorporates observable inputs including LIBOR yield curves, the credit standing of the counterparties, nonperformance risk for similar cancelable forward option contracts, and discounted future expected cash flows utilizing market interest rates based on instruments with similar credit quality and maturities. The change in fair value of these swaps is recorded as part of interest expense and other long-term assets.

Foreign exchange forward contracts -- We use foreign exchange forward purchase and sale contracts with terms of less than one year to hedge our exposure to changes in foreign currency exchange rates. The fair value of our foreign exchange forward contracts is based on an internally developed model which incorporates observable inputs including quoted spot rates, forward exchange rates and discounted future expected cash flows utilizing market interest rates with similar quality and maturity characteristics. The change in fair value of these foreign exchange forward contracts is recorded as part of currency gains (losses) and other current liabilities.

Edgar Filing: TENNECO INC - Form 10-Q

(3) Our financing arrangements are primarily provided by a committed senior secured financing arrangement with a syndicate of banks and other financial institutions. The arrangement is secured by substantially all our domestic assets and pledges of 66 percent of the stock of certain first-tier foreign subsidiaries, as well as guarantees by our material domestic subsidiaries.

On November 20, 2007, we issued \$250 million of 8 1/8 percent Senior Notes due November 15, 2015 through a private placement offering. The offering and related transactions were designed to (1) reduce our interest expense and extend the maturity of a portion of our debt (by using the proceeds of the offering to tender for \$230 million of our outstanding \$475 million 10 1/4 percent senior secured notes due 2013), (2) facilitate the realignment of the ownership structure of some of our foreign subsidiaries and (3) otherwise amend certain of the covenants in the indenture for the senior secured notes to be consistent with those contained in our 8 5/8 percent senior subordinated notes, including conforming the limitation on incurrence of indebtedness and the absence of a limitation on issuances or transfers of restricted subsidiary stock, and make other minor modifications.

The ownership structure realignment is designed to more effectively align our domestic and foreign assets and revenues with expenses in the appropriate local currencies. Some of the desired results of the realignment will be to allow us to more rapidly use our U.S. net operating losses and reduce our cash tax payments. At present, the ownership structure realignment involves a new European holding company which will own some of our foreign entities. We may alter the components of the realignment from time to time. If market conditions permit in 2008, we may offer debt issued by the new European holding company. The proceeds of that debt would be used to repay any outstanding intercompany debt and, in turn, to fund the redemption of any remaining senior secured notes. This realignment utilized part of our U.S. net operating tax losses. Consequently, we recorded a non-cash charge of \$66 million in the fourth quarter of 2007.

The offering of new notes and related repurchase of our senior secured notes will reduce our annual interest expense by approximately \$3 million for 2008 and increased our total debt outstanding to third-parties by approximately \$20 million. In connection with the offering and the related repurchase of our senior secured notes, we also recorded non-recurring pre-tax charges related to the tender premium and fees, the write-off of deferred debt issuance costs, and the write-off of previously recognized issuance premium totaling \$21 million in the fourth quarter of 2007.

In March 2007 we refinanced our \$831 million senior credit facility. This transaction reduced the interest rates we pay on all portions of the facility. While the total amount of the new senior credit facility is \$830 million, approximately the same as the previous facility, we changed the components of the facility to enhance our financial flexibility. We increased the amount of commitments under our revolving loan facility from \$320 million to \$550 million, reduced the amount of commitments under our tranche B-1 letter of credit/revolving loan facility from \$155 million to \$130 million and replaced the \$356 million term loan B with a \$150 million term loan A. As of

Edgar Filing: TENNECO INC - Form 10-Q

March 31, 2008, the senior credit facility consisted of a five-year, \$150 million term loan A maturing in March 2012, a five-year, \$550 million revolving credit facility maturing in March 2012, and a seven-year \$130 million tranche B-1 letter of credit/revolving loan facility maturing in March 2014.

The refinancing of the prior facility allowed us to: (i) amend the consolidated net debt to EBITDA ratio, (ii) eliminate the fixed charge coverage ratio, (iii) eliminate the restriction on capital expenditures, (iv) increase the amount of acquisitions permitted to \$250 million, (v) improve the flexibility to repurchase and retire higher cost junior debt, (vi) increase our ability to enter into capital leases, (vii) increase the ability of our foreign subsidiaries to incur debt, (viii) increase our ability to pay dividends and repurchase common stock, (ix) increase our ability to invest in joint ventures, (x) allow for the increase in the existing tranche B-1 facility and/or the term loan A or the addition of a new term loan of up to \$275 million in order to reduce our 10 1/4 percent senior secured notes, and (xi) make other modifications.

Following the refinancing, the term loan A facility is payable in twelve consecutive quarterly installments, commencing June 30, 2009 as follows: \$6 million due each of June 30, September 30, December 31, 2009 and March 31, 2010, \$15 million due each of June 30, September 30, December 31, 2010 and March 31, 2011, and \$17 million due each of June 30, September 30, December 31, 2011 and March 16, 2012. The revolving credit facility requires that any amounts drawn, be repaid by March 2012. Prior to that date, funds may be borrowed, repaid and reborrowed under the revolving credit facility without premium or penalty. Letters of credit may be issued under the revolving credit facility.

The tranche B-1 letter of credit/revolving loan facility requires that it be repaid by March 2014. We can borrow revolving loans and issue letters of credit under the \$130 million tranche B-1 letter of credit/revolving loan facility. The tranche B-1 letter of credit/revolving loan facility lenders have deposited \$130 million with the administrative agent, who has invested that amount in time deposits. We do not have an interest in any of the funds on deposit. When we draw revolving loans under this facility, the loans are funded from the \$130 million on deposit with the administrative agent. When we make repayments, the repayments are redeposited with the administrative agent.

The tranche B-1 letter of credit/revolving loan facility is reflected as debt on our balance sheet only if we borrow money under this facility or if we use the facility to make payments for letters of credit. We will not be liable for any losses to or misappropriation of any (i) return due to the administrative agent's failure to achieve the return described above or to pay all or any portion of such return to any lender under such facility or (ii) funds on deposit in such account by such lender (other than the obligation to repay funds released from such accounts and provided to us as revolving loans under such facility).

We have three fixed-to-floating interest rate swaps that effectively convert \$150 million of our 10 1/4 percent fixed interest rate senior secured notes into floating interest rate debt at an annual rate of LIBOR plus 5.68 percent. Based upon the current LIBOR rate of 4.08 percent (which is in effect until July 15, 2008) these swaps are expected to decrease our interest expense by \$1 million in 2008 excluding any impact from marking the swaps to market. Since entering into these swaps, we have realized a net cumulative benefit of \$2 million through March 31, 2008, in reduced interest payments. The change in the market value of these swaps is recorded as part of interest expense with an offset to other long-term assets. As of March 31, 2008, the fair value of the interest rate swaps was an asset of approximately \$4 million which has been recorded in other long-term assets.

Edgar Filing: TENNECO INC - Form 10-Q

(4) We have an agreement to sell an interest in some of our U.S. trade accounts receivable to a third party. Receivables become eligible for the program on a daily basis, at which time the receivables are sold to the third party without recourse, net of a discount, through a wholly-owned subsidiary. Under this agreement, as well as individual agreements with third parties in Europe, we have sold accounts receivable of \$171 million and \$145 million at March 31, 2008 and 2007, respectively. We recognized a loss of \$2 million for each of the three months ended March 31, 2008 and 2007, on these sales of trade accounts, representing the discount from book values at which these receivables were sold to the third party. The discount rate varies based on funding cost

12

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)
(Unaudited)

incurred by the third party, which has averaged approximately five percent during 2008. We retain ownership of the remaining interest in the pool of receivables not sold to the third party. The retained interest represents a credit enhancement for the program. We value the retained interest based upon the amount we expect to collect from our customers, which approximates book value.

(5) Over the past several years we have adopted plans to restructure portions of our operations. These plans were approved by our Board of Directors and were designed to reduce operational and administrative overhead costs throughout the business. Prior to the change in accounting required for exit or disposal activities, we recorded charges to income related to these plans for costs that did not benefit future activities in the period in which the plans were finalized and approved, while actions necessary to affect these restructuring plans occurred over future periods in accordance with established plans.

Our recent restructuring activities began in the fourth quarter of 2001, when our Board of Directors approved a restructuring plan, a project known as Project Genesis, which was designed to lower our fixed costs, relocate capacity, reduce our work force, improve efficiency and utilization, and better optimize our global footprint. We have subsequently engaged in various other restructuring projects related to Project Genesis. In 2007, we incurred \$25 million in restructuring and restructuring-related costs of which \$22 million was recorded in cost of sales, \$2 million of which related to a charge for asset impairments for the plant closure in France, and \$3 million was recorded in selling, general and administrative expense. The majority of the 2007 charges were related to the planned closing of our emission control plant in Wissembourg, France. In the first quarter of 2008, we incurred \$4 million restructuring and restructuring-related costs of which \$3 million was recorded in cost of sales and \$1 million in selling, general and administrative expense. Since Project Genesis was initiated, we have incurred costs of \$159 million through March 31, 2008.

Under the terms of our amended and restated senior credit agreement that took effect on March 16, 2007, we are allowed to exclude \$80 million of cash charges and expenses, before taxes, related to cost reduction initiatives excluding any charge for asset impairments incurred after March 16, 2007 from the calculation of the financial covenant ratios required under our senior credit facility. As of March 31, 2008, we have excluded \$27 million in allowable charges relating to restructuring initiatives against the \$80 million available

Edgar Filing: TENNECO INC - Form 10-Q

under the terms of the March 2007 amended and restated senior credit facility.

In addition to the announced actions, we will continue to evaluate additional opportunities and expect that we will initiate actions that will reduce our costs through implementing the most appropriate and efficient logistics, distribution and manufacturing footprint for the future. We expect to continue to undertake additional restructuring actions as deemed necessary, however, there can be no assurances we will undertake such actions. Actions that we take, if any, will require the approval of our Board of Directors, or its authorized committee. We plan to conduct any workforce reductions that result in compliance with all legal and contractual requirements including obligations to consult with workers' councils, union representatives and others.

(6) We are subject to a variety of environmental and pollution control laws and regulations in all jurisdictions in which we operate. We expense or capitalize, as appropriate, expenditures for ongoing compliance with environmental regulations that relate to current operations. We expense costs related to an existing condition caused by past operations that do not contribute to current or future revenue generation. We record liabilities when environmental assessments indicate that remedial efforts are probable and the costs can be reasonably estimated. Estimates of the liability are based upon currently available facts, existing technology, and presently enacted laws and regulations taking into consideration the likely effects of inflation and other societal and economic factors. We consider all available evidence including prior experience in remediation of contaminated sites, other companies' cleanup experiences and data released by the United States Environmental Protection Agency or other organizations. These estimated liabilities are subject to revision in future periods based on actual costs or new information. Where future cash flows are fixed or reliably determinable, we have discounted the liabilities. All other environmental liabilities are recorded at their undiscounted amounts. We evaluate recoveries separately from the liability

13

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)
(Unaudited)

and, when they are assured, recoveries are recorded and reported separately from the associated liability in our condensed consolidated financial statements.

As of March 31, 2008, we are designated as a potentially responsible party in one Superfund site. Including the Superfund site, we may have the obligation to remediate current or former facilities, and we estimate our share of environmental remediation costs at these facilities to be approximately \$11 million. For the Superfund site and the current and former facilities, we have established reserves that we believe are adequate for these costs. Although we believe our estimates of remediation costs are reasonable and are based on the latest available information, the cleanup costs are estimates and are subject to revision as more information becomes available about the extent of remediation required. At some sites, we expect that other parties will contribute to the remediation costs. In addition, at the Superfund site, the Comprehensive Environmental Response, Compensation and Liability Act provides that our liability could be joint and several, meaning that we could be required to pay in excess of our share of remediation costs. Our understanding of the financial strength of other potentially responsible parties at the Superfund site, and of other liable parties at our current and former facilities, has been considered, where appropriate, in our determination of our estimated liability. We believe

Edgar Filing: TENNECO INC - Form 10-Q

that any potential costs associated with our current status as a potentially responsible party in the Superfund site, or as a liable party at our current or former facilities, will not be material to our consolidated results of operations, financial position or cash flows.

We also from time to time are involved in legal proceedings, claims or investigations that are incidental to the conduct of our business. Some of these proceedings allege damages against us relating to environmental liabilities (including toxic tort, property damage and remediation), intellectual property matters (including patent, trademark and copyright infringement, and licensing disputes), personal injury claims (including injuries due to product failure, design or warnings issues, and other product liability related matters), taxes, employment matters, and commercial or contractual disputes, sometimes related to acquisitions or divestitures. We vigorously defend ourselves against all of these claims. In future periods, we could be subjected to cash costs or non-cash charges to earnings if any of these matters is resolved on unfavorable terms. However, although the ultimate outcome of any legal matter cannot be predicted with certainty, based on current information, including our assessment of the merits of the particular claim, we do not expect that these legal proceedings or claims will have any material adverse impact on our future consolidated financial position, results of operations or cash flows.

In addition, we are subject to a number of lawsuits initiated by a significant number of claimants alleging health problems as a result of exposure to asbestos. A small percentage of claims have been asserted by railroad workers alleging exposure to asbestos products in railroad cars manufactured by The Pullman Company, one of our subsidiaries. Nearly all of the claims are related to alleged exposure to asbestos in our automotive emission control products. Only a small percentage of these claimants allege that they were automobile mechanics and a significant number appear to involve workers in other industries or otherwise do not include sufficient information to determine whether there is any basis for a claim against us. We believe, based on scientific and other evidence, it is unlikely that mechanics were exposed to asbestos by our former muffler products and that, in any event, they would not be at increased risk of asbestos-related disease based on their work with these products. Further, many of these cases involve numerous defendants, with the number of each in some cases exceeding 200 defendants from a variety of industries. Additionally, the plaintiffs either do not specify any, or specify the jurisdictional minimum, dollar amount for damages. As major asbestos manufacturers continue to go out of business or file for bankruptcy, we may experience an increased number of these claims. We vigorously defend ourselves against these claims as part of our ordinary course of business. In future periods, we could be subject to cash costs or non-cash charges to earnings if any of these matters is resolved unfavorably to us. To date, with respect to claims that have proceeded sufficiently through the judicial process, we have regularly achieved favorable resolution. Accordingly, we presently believe that these asbestos-related claims will not have a material adverse impact on our future consolidated financial condition, results of operations or cash flows.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)
(Unaudited)

We provide warranties on some of our products. The warranty terms vary but range from one year up to limited lifetime warranties on some of our premium aftermarket products. Provisions for estimated expenses related to product

Edgar Filing: TENNECO INC - Form 10-Q

warranty are made at the time products are sold or when specific warranty issues are identified on OE products. These estimates are established using historical information about the nature, frequency, and average cost of warranty claims. We actively study trends of our warranty claims and take action to improve product quality and minimize warranty claims. We believe that the warranty reserve is appropriate; however, actual claims incurred could differ from the original estimates, requiring adjustments to the reserve. The reserve is included in both current and long-term liabilities on the balance sheet.

Below is a table that shows the activity in the warranty accrual accounts:

	THREE MONTHS ENDED MARCH 31,	
	2008	2007
	(MILLIONS)	
Beginning Balance January 1,.....	\$25	\$25
Accruals related to product warranties.....	4	3
Reductions for payments made.....	(2)	(2)
	---	---
Ending Balance March 31,.....	\$27	\$26
	===	===

The current year increase in the warranty accrual is primarily driven by higher unit pricing and product mix in the North American aftermarket.

(7) Earnings per share of common stock outstanding were computed as follows:

	THREE MONTHS ENDED MARCH 31,	
	2008	2007
	(MILLIONS EXCEPT SHARE AND PER SHARE AMOUNTS)

	=====	=====

Options to purchase 1,297,863 and 770,848 shares of common stock were outstanding at March 31, 2008 and 2007, respectively, but were not included in the computation of diluted EPS because the options were anti-dilutive for the quarters ended March 31, 2008 and 2007, respectively.

15

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)
(Unaudited)

(8) Equity Plans -- In December 1996, we adopted the 1996 Stock Ownership Plan, which permitted the granting of a variety of awards, including common stock, restricted stock, performance units, stock equivalent units, stock appreciation rights ("SARs"), and stock options to our directors, officers, employees and consultants. The 1996 plan, which terminated as to new awards on December 31, 2001, was renamed the "Stock Ownership Plan." In December 1999, we adopted the Supplemental Stock Ownership Plan, which permitted the granting of a variety of similar awards to our directors, officers, employees and consultants. We were authorized to deliver up to about 1.1 million treasury shares of common stock under the Supplemental Stock Ownership Plan, which also terminated as to new awards on December 31, 2001. In March 2002, we adopted the 2002 Long-Term Incentive Plan which permitted the granting of a variety of similar awards to our officers, directors, employees and consultants. Up to 4 million shares of our common stock were authorized for award under the 2002 Long-Term Incentive Plan. In March 2006, we adopted the 2006 Long-Term Incentive Plan which replaced the 2002 Long-Term Incentive Plan and permits the granting of a variety of similar awards to directors, officers, employees and consultants. As of March 31, 2008, up to 1,143,426 shares of our common stock remain authorized for award under the 2006 Long-Term Incentive Plan. Our nonqualified stock options have 7 to 20 year terms and vest equally over a three year service period from the date of the grant.

We have granted restricted common stock to our directors and certain key employees. These awards generally require, among other things, that the award holder remains in service to our company during the restriction period. We have also granted long-term performance units to certain key employees that are payable in cash. In 2008, the awards that are outstanding contain an annual stub-year grant payable in the first quarter of 2009, a three-year grant payable in the first quarter of 2010 and a second three year grant payable in the first quarter of 2011. Payment is based on the attainment of specified performance goals. The grant value is indexed to the stock price. Each employee granted long-term performance units will (based on the achievement of the applicable goals) receive a percentage of the total grant's value. In addition, we have granted SARs to certain key employees in our Asian operations that are payable in cash after a three year service period. The grant value is indexed to the stock price.

Accounting Methods -- Effective January 1, 2006, we adopted SFAS No. 123(R), "Share-Based Payment," using the modified prospective application method. Under this transition method, compensation cost recognized for the three

Edgar Filing: TENNECO INC - Form 10-Q

months ended March 31, 2008 and 2007, respectively, includes the applicable amounts of: (1) compensation cost of all unvested stock-based awards granted prior to January 1, 2006, based upon the grant date fair value estimated in accordance with the original provisions of SFAS No. 123 and previously presented in pro-forma footnote disclosures, and (2) compensation cost for all stock-based awards granted on or after January 1, 2006, based upon the grant date fair value estimated in accordance with the new provisions of SFAS No. 123(R).

The impact of recognizing compensation expense related to nonqualified stock options is contained in the table below.

	THREE MONTHS ENDED MARCH 31,	
	2008	2007
	(MILLIONS)	
Selling, general and administrative.....	\$ 1	\$ 1
Loss before interest expense, income taxes and minority interest.....	(1)	(1)

16

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)
(Unaudited)

For stock options awarded to retirement eligible employees we immediately accelerate the recognition of any outstanding compensation cost when employees become retiree eligible before the end of the explicit vesting period.

As of March 31, 2008, there was approximately \$4 million, net of tax, of total unrecognized compensation costs related to these stock-based awards that we expect to recognize over a weighted average period of 1.5 years.

Compensation expense for restricted stock, long-term performance units and SARs, net of tax, was approximately \$2 million for the three months ended March 31, 2008 and 2007, and was recorded in selling, general, and administrative expense on the statement of income.

SFAS No. 109, "Accounting for Income Taxes," discusses the deductibility of transactions. We are allowed a tax deduction for compensation cost which is calculated as the difference between the value of the stock at the date of grant and the price upon exercise of a stock option. Under SFAS No. 123(R), excess tax benefits, which are tax benefits we may realize upon the exercise of stock

Edgar Filing: TENNECO INC - Form 10-Q

options that are greater than the tax benefit recognized on the compensation cost recorded in our income statement, are recorded as an addition to paid-in capital. We would present cash retained as a result of excess tax benefits as financing cash flows. Any write-offs of deferred tax assets related to unrealized tax benefits associated with the recognized compensation cost would be reported as income tax expense.

Cash received from option exercises for the three months ended March 31, 2008, was less than \$1 million. Stock option exercises during the first three months of 2008 generated an excess tax benefit of less than \$1 million. Pursuant to footnote 82 of SFAS No. 123(R), this benefit was not recorded as we have federal and state net operating losses which are not currently being utilized. As a result, the excess tax benefit had no impact on our financial position or statement of cash flows.

Assumptions -- We calculated the fair values of stock option awards using the Black-Scholes option pricing model with the weighted average assumptions listed below. Determining the fair value of share-based awards requires judgment in estimating employee and market behavior. If actual results differ significantly from these estimates, stock-based compensation expense and our results of operations could be materially impacted.

	THREE MONTHS ENDED MARCH 31,	
	2008	2007
Stock Options		
Weighted average grant date fair value, per share.....	\$8.08	\$9.83
Weighted average assumptions used:		
Expected volatility.....	37.7%	38.4%
Expected lives.....	4.1	4.1
Risk-free interest rates.....	2.8%	4.7%
Dividend yields.....	0.0%	0.0%

Expected lives of options are based upon the historical and expected time to post-vesting forfeiture and exercise. We believe this method is the best estimate of the future exercise patterns currently available.

The risk-free interest rates are based upon the Constant Maturity Rates provided by the U.S. Treasury. For our valuations, we used the continuous rate with a term equal to the expected life of the options.

On January 10, 2001, we announced that our Board of Directors eliminated the quarterly dividend on our common stock. As a result, there is no dividend yield.

Edgar Filing: TENNECO INC - Form 10-Q

Stock Options -- The following table reflects the status and activity for all options to purchase common stock for the period indicated:

	THREE MONTHS ENDED MARCH 31, 2008			
	SHARES UNDER OPTION	WEIGHTED AVG. EXERCISE PRICES	WEIGHTED AVG. REMAINING LIFE IN YEARS	AGGREGATE INTRINSIC VALUE (MILLIONS)
Outstanding Stock Options				
Outstanding, January 1, 2008.....	2,820,889	\$13.10	4.6	\$46
Granted.....	580,750	23.75		
Canceled.....	--	--		
Forfeited.....	(3,740)	22.50		
Exercised.....	(43,824)	4.64		\$ 1

Outstanding, March 31, 2008.....	3,354,075	\$15.05	5.0	\$37

As previously disclosed, in certain years our administrative procedures for determining the final allocation of the options granted to middle management under our 2002 Long-Term Incentive Plan (the predecessor to our current equity incentive plan) were not finalized until after the Board approved the grants and set the exercise price. At the time the administrative procedures were completed, the market values of some of the options were greater than the grant prices. While these option-grant practices were not intended to avoid regulations or gain unfair financial advantage, they did result in monetary gains that current law (recently enacted Section 409A of the Internal Revenue Code) would subject to additional taxes and penalties.

Restricted Stock -- The following table reflects the status for all nonvested restricted shares for the period indicated:

	THREE MONTHS ENDED MARCH 31, 2008	
	SHARES	WEIGHTED AVG. GRANT DATE FAIR VALUE
Nonvested Restricted Shares		
Nonvested balance at January 1, 2008.....	469,394	\$24.91
Granted.....	227,830	23.75
Vested.....	(235,145)	24.10
Forfeited.....	--	--

Nonvested balance at March 31, 2008.....	462,079	\$24.75

The fair value of restricted stock grants is equal to the average market price of our stock at the date of grant. As of March 31, 2008, approximately \$11

Edgar Filing: TENNECO INC - Form 10-Q

million of total unrecognized compensation costs related to restricted stock awards is expected to be recognized over a weighted-average period of approximately 2.1 years.

Long-Term Performance Units and SARs -- Long-term performance units and SARs are paid in cash and recognized as a liability based upon their fair value. As of March 31, 2008, approximately \$7 million of total unrecognized compensation costs is expected to be recognized over the weighted-average period of approximately 1.7 years.

Effective January 1, 2007, we froze our defined benefit plans and replaced them with additional contributions under defined contribution plans for nearly all U.S.-based salaried and non-union hourly employees.

In September 2006, the FASB issued Statement No. 158 "Employers' Accounting for Defined Benefit and Other Postretirement Plans." Effective January 1, 2007, Tenneco elected to early-adopt the measurement date provisions of SFAS No. 158. As a result, during the first quarter of 2007, the following adjustments were made to retained earnings (accumulated deficit) and accumulated other comprehensive income (both net of tax effects):

Edgar Filing: TENNECO INC - Form 10-Q

	US	FOREIGN
	---	-----
Retained earnings (accumulated deficit).....	(3)	(2)
Accumulated other comprehensive income.....	8	6

For the three months ended March 31, 2008, we made pension contributions of approximately \$1 million for our domestic pension plans and \$4 million for our foreign pension plans. Based on current actuarial estimates, we believe we will be required to make approximately \$24 million in contributions for the remainder of 2008.

We made postretirement contributions of approximately \$1 million during the first three months of 2008. Based on current actuarial estimates, we believe we will be required to make approximately \$9 million in contributions for the remainder of 2008.

(10) In March 2008, we entered into a purchase agreement with Delphi Automotive Systems LLC to acquire certain ride control assets and inventory of Delphi's Kettering, Ohio facility. This purchase agreement has been filed with the bankruptcy court as part of Delphi's bankruptcy court proceedings. The closing of this purchase is subject to certain closing conditions. On April 30, 2008, the agreement was approved by the bankruptcy court.

As part of the purchase agreement, we will be required to pay approximately \$11 million for existing ride control components inventory and approximately \$8 million for certain machinery and equipment. Additionally, we will lease a portion of the Kettering facility from Delphi.

In connection with the purchase agreement, we have entered into an agreement with the International Union of Electrical Workers (IUE), which represents the Delphi workforce at the Kettering plant. The agreement was ratified by the IUE's rank and file in August 2007. Additionally, we have also entered into a long-term supply agreement with General Motors Corporation to continue to supply passenger car shock and strut business to General Motors from the Kettering facility.

19

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)
(Unaudited)

In September 2007, we acquired Combustion Components Associates' ELIM-NOx(TM) technology for \$16 million. The acquisition included a complete reactant dosing system design and associated intellectual property including granted patents and patent applications yet to be granted for selective catalytic reduction emission control systems that reduce emissions of oxides of nitrogen from diesel powered vehicles. The technology can be used for both urea and hydrocarbon injection. We have recorded the acquisition as part of intangible assets on our balance sheet. The final allocation of the purchase price for the assets was completed this quarter and did not result in a significant change to the assets initially recorded.

(11) In March 2008, the Financial Accounting Standards Board (FASB) issued

Edgar Filing: TENNECO INC - Form 10-Q

Statement of Financial Accounting Standards No. 161, "Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133" (SFAS No. 161). SFAS No. 161 requires enhanced disclosures about an entity's derivative and hedging activities including how and why an entity uses derivative instruments, how an entity accounts for derivatives and hedges and how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. SFAS No. 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. We are evaluating SFAS No. 161 to determine the effect on our condensed consolidated financial statement disclosures.

In February 2008, the FASB issued FASB Staff Position (FSP) 140-3, "Accounting for Transfers of Financial Assets and Repurchase Financing Transactions." FSP 140-3 provides guidance on accounting for a transfer of a financial asset and a repurchase financing which is a repurchase agreement that relates to a previously transferred financial asset between the same counterparties that is entered into contemporaneously with, or in contemplation of, the initial transfer. FSP 140-3 is effective for financial statements issued for fiscal years beginning after November 15, 2008, and interim periods within those fiscal years. We are evaluating FSP 140-3 to determine the effect on our condensed consolidated financial statements and related disclosures.

In February 2008, the FASB issued FSP 157-1, "Application of FASB Statement No. 157 to FASB Statement No. 13 and Other Accounting Pronouncements That Address Fair Value Measurements for Purposes of Lease Classification or Measurement Under Statement 13." FSP 157-1 provides a scope exception to SFAS No. 157 which does not apply under Statement 13 and other accounting pronouncements that address fair value measurements for purposes of lease classification or measurement under Statement 13. FSP 157-1 is effective upon the initial adoption of SFAS No. 157. FSP 157-1 did not have a material impact to our condensed consolidated financial statements.

In December 2007, the FASB issued SFAS No. 141 (Revised 2007), "Business Combinations" (SFAS No. 141(R)). SFAS No. 141(R) requires an acquirer to recognize the assets acquired, the liabilities assumed, contractual contingencies and any noncontrolling interest in the acquiree at the acquisition date at their fair values as of that date. SFAS No. 141(R) provides guidance on the accounting for acquisition-related costs, restructuring costs related to the acquisition and the measurement of goodwill and a bargain purchase. SFAS No. 141(R) applies prospectively to business combinations for which the acquisition date is on or after December 15, 2008. We do not expect the adoption of this statement to have a material impact to our condensed consolidated financial statements.

In December 2007, the FASB issued SFAS No. 160, "Noncontrolling Interests in Consolidated Financial Statements—an amendment of ARB No. 5." SFAS No. 160 amends ARB 51 to establish accounting and reporting standards for the noncontrolling (minority) interest in a subsidiary and for the deconsolidation of a subsidiary. It clarified that a noncontrolling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements, establishes a single method of accounting for changes in a parent's ownership interest in a subsidiary that does not result in deconsolidation and provides for expanded disclosure in the consolidated financial statements relating to the interests of the parent's owners and the interests of the noncontrolling owners of the subsidiary. SFAS No. 160 applies prospectively (except for the presentation and disclosure requirements) for fiscal years and interim periods within those fiscal years beginning on or after December 15, 2008. The presentation and disclosure requirements will be applied retrospectively for all periods

Edgar Filing: TENNECO INC - Form 10-Q

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED) (Unaudited)

presented. We are evaluating this statement to determine the effect on our condensed consolidated financial statements and related disclosures.

In December 2007, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 110 (SAB 110). SAB 110 amends and replaces Question 6 of Section D.2 Topic 14, "Share-Based Payment." Question 6 of Topic 14:D.2 (as amended) expresses the views of the staff regarding the use of a "simplified" method in developing an estimate of the expected term of "plain vanilla" share options in accordance with SFAS No. 123 (revised 2004), "Share-Based Payment" (SFAS No. 123(R)). SAB 110 is effective January 1, 2008. The adoption of SAB 110 had no impact to our condensed consolidated financial statements.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurement." This statement defines fair value, establishes a fair value hierarchy for measuring fair value under generally accepted accounting principles and expands disclosures about fair value measurements. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007. FSP 157-2 issued in February 2008 delays the effective date of SFAS No. 157 for nonfinancial assets and nonfinancial liabilities to fiscal years beginning after November 15, 2008 and interim periods within those fiscal years. We have adopted the measurement and disclosure impact of SFAS No. 157 relating to our financial assets and financial liabilities which are measured on a recurring basis (at least annually) effective January 1, 2008. See Note 2 to the condensed consolidated financial statements of Tenneco Inc. and Consolidated Subsidiaries. We do not expect the adoption of the nonfinancial assets and nonfinancial liabilities portion of SFAS No. 157 to have a material impact to our condensed consolidated financial statements.

In June 2007, the Emerging Issues Task Force (EITF) issued EITF 06-11, "Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards." EITF 06-11 provides the final consensus on the application of paragraphs 62 and 63 of SFAS No. 123(R) on the accounting for income tax benefits relating to the payment of dividends on equity-classified employee share-based payment awards that are charged to retained earnings. EITF 06-11 affirms that the realized income tax benefit from dividends or dividend equivalents that are charged to retained earnings for equity classified nonvested equity shares, nonvested equity share units, and outstanding equity share options should be recognized as an increase in additional paid-in-capital. Additionally, EITF 06-11 provides guidance on the amount of tax benefits from dividends that are reclassified from additional paid-in-capital to the income statement when an entity's estimate of forfeitures changes. EITF 06-11 is effective prospectively to the income tax benefits that result from dividends on equity-classified employee share-based payment awards that are declared in fiscal years beginning after December 15, 2007. The adoption of EITF 06-11, on January 1, 2008, did not have a material impact on our condensed consolidated financial statements.

In June 2007, the EITF issued EITF 07-3, "Accounting for Nonrefundable Advance Payments for Goods or Services Received for Use in Future Research and Development Activities." EITF 07-3 requires the deferral and capitalization of nonrefundable advance payments for goods or services that an entity will use in research and development activities pursuant to an executory contractual agreement. Expenditures which are capitalized under EITF 07-3 should be expensed as the goods are delivered or the related services are performed. EITF 07-3 is effective prospectively for fiscal years beginning after December 15, 2007 and

Edgar Filing: TENNECO INC - Form 10-Q

interim periods within those fiscal years. EITF 07-3 is applicable to new contracts entered into after the effective date of this Issue. The adoption of EITF 07-3 on January 1, 2008, did not have a material impact on our condensed consolidated financial statements.

In April 2007, the FASB issued Interpretation No. 39-1, "Amendment of FASB Interpretation No. 39" (FIN 39-1). This amendment allows a reporting entity to offset fair value amounts recognized for derivative instruments with fair value amounts recognized for the right to reclaim or realize cash collateral. Additionally, this amendment requires disclosure of the accounting policy on the reporting entity's election to offset or not offset amounts for derivative instruments. FIN 39-1 is effective for fiscal years beginning after November 15, 2007. The adoption of FIN 39-1 did not have a material impact on our condensed consolidated financial statements.

21

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED) (Unaudited)

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities." This statement permits companies to choose to measure at fair value many financial instruments and certain other items that are not currently required to be measured at fair value. SFAS No. 159 is effective for financial statements issued for fiscal years beginning on or after November 15, 2007. The adoption of SFAS 159 did not have a material effect on our condensed consolidated financial statements and related disclosures.

In September 2006, the FASB issued SFAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106, and 132(R)." Part of this Statement was effective as of December 31, 2006, and requires companies that have defined benefit pension plans and other postretirement benefit plans to recognize the funded status of those plans on the balance sheet on a prospective basis from the effective date. The funded status of these plans is determined as of the plans' measurement dates and represents the difference between the amount of the obligations owed to participants under each plan (including the effects of future salary increases for defined benefit plans) and the fair value of each plan's assets dedicated to paying those obligations. To record the funded status of those plans, unrecognized prior service costs and net actuarial losses experienced by the plans will be recorded in the Accumulated Other Comprehensive Loss section of shareholders' equity on the balance sheet. The initial adoption as of December 31, 2006 resulted in a reduction of Accumulated Other Comprehensive Loss in shareholders' equity of \$59 million.

In addition, SFAS No. 158 requires that companies using a measurement date for their defined benefit pension plans and other postretirement benefit plans other than their fiscal year end, change the measurement date effective for fiscal years ending after December 15, 2008. Effective January 1, 2007, we elected to early adopt the measurement date provision of SFAS No. 158. Adoption of this part of the statement was not material to our financial position and results of operations.

(12) We occasionally provide guarantees that could require us to make future payments in the event that the third party primary obligor does not make its required payments. We have not recorded a liability for any of these guarantees.

Edgar Filing: TENNECO INC - Form 10-Q

Additionally, we have from time to time issued guarantees for the performance of obligations by some of our subsidiaries, and some of our subsidiaries have guaranteed our debt. All of our existing and future material domestic wholly-owned subsidiaries fully and unconditionally guarantee our senior credit facility, our senior secured notes, our senior notes and our senior subordinated notes on a joint and several basis. The arrangement for the senior credit facility is also secured by first-priority liens on substantially all our domestic assets and pledges of 66 percent of the stock of certain first-tier foreign subsidiaries. The arrangement for the \$245 million senior secured notes is also secured by second-priority liens on substantially all our domestic assets, excluding some of the stock of our domestic subsidiaries. No assets or capital stock of our direct or indirect foreign subsidiaries secure these notes. You should also read Note 14 of the condensed consolidated financial statements of Tenneco Inc., where we present the Supplemental Guarantor Condensed Consolidating Financial Statements.

We have issued guarantees through letters of credit in connection with some obligations of our affiliates. As of March 31, 2008, we have guaranteed \$42 million in letters of credit to support some of our subsidiaries' insurance arrangements, foreign employee benefit programs, environmental remediation activities, and cash management requirements.

Negotiable Financial Instruments -- One of our European subsidiaries receives payment from one of its OE customers whereby the accounts receivable are satisfied through the delivery of negotiable financial instruments. We may collect these financial instruments before their maturity date by either selling them at a discount or using them to satisfy accounts receivable that have previously been sold to a European bank. Any of these financial instruments which are not sold are classified as other current assets as they do not meet our definition of cash equivalents. The amount of these financial instruments that was collected before their maturity date totaled

22

TENNECO INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)
(Unaudited)

\$5 million as of March 31, 2008, compared with \$27 million at the same date in 2007. No negotiable financial instruments were held by our European subsidiary as of March 31, 2008 or March 31, 2007.

In certain instances several of our Chinese subsidiaries receive payment from OE customers and satisfy vendor payments through the receipt and delivery of negotiable financial instruments. Financial instruments used to satisfy vendor payables and not redeemed totaled \$18 million and \$11 million at March 31, 2008 and 2007, respectively, and were classified as notes payable. Financial instruments received from OE customers and not redeemed totaled \$15 million and \$5 million at March 31, 2008 and 2007, respectively, and were classified as other current assets. One of our Chinese subsidiaries that issues its own negotiable financial instruments to pay its vendors is required to maintain a cash balance at a financial institution that guarantees those financial instruments. No financial instruments were outstanding at that Chinese subsidiary as of March 31, 2008. As of March 31, 2007 the required cash balance was approximately \$1 million and was classified as cash and cash equivalents.

The negotiable financial instruments received by one of our European

Edgar Filing: TENNECO INC - Form 10-Q

subsidiaries and some of our Chinese subsidiaries are checks drawn by our OE customers and guaranteed by their banks that are payable at a future date. The use of these instruments for payment follows local commercial practice. Because negotiable financial instruments are financial obligations of our customers and are guaranteed by our customers' banks, we believe they represent a lower financial risk than the outstanding accounts receivable that they satisfy which are not guaranteed by a bank.

(13) We are a global manufacturer with three geographic reportable segments: (1) North America, (2) Europe, South America and India ("Europe"), and (3) Asia Pacific. Each segment manufactures and distributes ride control and emission control products primarily for the automotive industry. We have not aggregated individual operating segments within these reportable segments. We evaluate segment performance based primarily on income before interest expense, income taxes, and minority interest. Products are transferred between segments and geographic areas on a basis intended to reflect as nearly as possible the "market value" of the products.

The following table summarizes certain Tenneco Inc. segment information:

(14) Supplemental guarantor condensed consolidating financial statements are presented below:

Basis of Presentation

Edgar Filing: TENNECO INC - Form 10-Q

Subject to limited exceptions, all of our existing and future material domestic 100% owned subsidiaries (which are referred to as the Guarantor Subsidiaries) fully and unconditionally guarantee our senior subordinated notes due in 2014, our senior notes due in 2015 and our senior secured notes due 2013 on a joint and several basis. We have not presented separate financial statements and other disclosures concerning each of the Guarantor Subsidiaries because management has determined that such information is not material to the holders of the notes. Therefore, the Guarantor Subsidiaries are combined in the presentation below.

These condensed consolidating financial statements are presented on the equity method. Under this method, our investments are recorded at cost and adjusted for our ownership share of a subsidiary's cumulative results of operations, capital contributions and distributions, and other equity changes. You should read the condensed consolidating financial information of the Guarantor Subsidiaries in connection with our condensed consolidated financial statements and related notes of which this note is an integral part.

Distributions

There are no significant restrictions on the ability of the Guarantor Subsidiaries to make distributions to us.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

As you read the following review of our financial condition and results of operations, you should also read our condensed consolidated financial statements and related notes beginning on page 4.

EXECUTIVE SUMMARY

Edgar Filing: TENNECO INC - Form 10-Q

We are one of the world's leading manufacturers of automotive emission control and ride control products and systems. We serve both original equipment (OE) vehicle designers and manufacturers and the repair and replacement markets, or aftermarket, globally through leading brands, including Monroe(R), Rancho(R), Clevite(R) Elastomers and Fric Rot(TM) ride control products and Walker(R), Fonos(TM), and Gillet(TM) emission control products. Worldwide we serve more than 39 different original equipment manufacturers, and our products or systems are included on eight of the top 10 passenger car models produced for sale in Europe and nine of the top 10 light truck and SUV models produced for sale in North America for 2008. Our aftermarket customers are comprised of full-line and specialty warehouse distributors, retailers, jobbers, installer chains and car dealers. We operate 80 manufacturing facilities worldwide and employ approximately 21,000 people to service our customers' demands.

Factors that are critical to our success include winning new business awards, managing our overall global manufacturing footprint to ensure proper placement and workforce levels in line with business needs, maintaining competitive wages and benefits, maximizing efficiencies in manufacturing processes and reducing overall costs. In addition, our ability to adapt to key industry trends, such as a shift in consumer preferences to other vehicles in response to higher fuel costs and other economic and social factors, increasing technologically sophisticated content, changing aftermarket distribution channels, increasing environmental standards and extended product life of automotive parts, also play a critical role in our success. Other factors that are critical to our success include adjusting to industry and economic challenges such as increases in the cost of raw materials and our ability to successfully reduce the impact of any such cost increases through material substitutions, cost reduction initiatives and other methods.

We have a substantial amount of indebtedness. As such, our ability to generate cash -- both to fund operations and service our debt -- is also a significant area of focus for our company. See "Results from Operations for the Three Months Ended March 31, 2008 and 2007 -- Cash Flows" and "Liquidity and Capital Resources" below for further discussion of cash flows.

Total revenues for the first quarter of 2008 were \$1,560 million, compared to \$1,400 million in the first quarter of 2007. Excluding the impact of currency and substrate sales, revenue was nearly flat despite the lowest light vehicle production level of any first quarter in the last 15 years in North America. A significant contributing factor to the decline was the American Axle strike, which reduced the production of significant General Motors vehicle platforms. In addition, North American commercial vehicle (truck) production, which makes up about 6 percent of our total revenue, declined 15 percent from last year's first quarter. Increased sales in South America and Asia helped partially offset the reduced North American production.

Gross margin in the first quarter of 2008 was 15.0 percent, down from 15.8 percent in 2007. Higher substrate sales, which typically carry lower margins, diluted gross margin. We also saw our revenue mix shift from higher-margin aftermarket revenues to OE revenues. Also negatively impacting gross margin was the American Axle strike and increased steel and other material costs.

We reported selling, general, administrative and engineering expenses in the first three months of 2008 of 9.0 percent of revenues, as compared to 8.7 percent of revenues for the first three months of 2007. The increase was mainly due to higher investments in engineering for next-generation ride and emission control technologies.

Earnings before interest expense, income taxes and minority interest ("EBIT") was \$39 million for the first quarter of 2008, down \$10 million from the \$49 million reported in 2007. Reduced North American OE production, lower Aftermarket sales, increased spending on engineering, higher restructuring

Edgar Filing: TENNECO INC - Form 10-Q

charges and depreciation and amortization costs all drove the decline. Partially offsetting the decline were benefits from the company's ongoing manufacturing efficiency programs and favorable currency.

31

RESULTS FROM OPERATIONS FOR THE THREE MONTHS ENDED MARCH 31, 2008 AND 2007

NET SALES AND OPERATING REVENUES

The following tables reflect our revenues for the first quarter of 2008 and 2007. We present these reconciliations of revenues in order to reflect the trend in our sales in various product lines and geographic regions separately from the effects of doing business in currencies other than the U.S. dollar. We have not reflected any currency impact in the 2007 table since this is the base period for measuring the effects of currency during 2008 on our operations. We believe investors find this information useful in understanding period-to-period comparisons in our revenues.

Additionally, we show the component of our revenue represented by substrate sales in the following table. While we generally have primary design, engineering and manufacturing responsibility for OE emission control systems, we do not manufacture substrates. Substrates are porous ceramic filters coated with a catalyst -- precious metals such as platinum, palladium and rhodium. These are supplied to us by Tier 2 suppliers and directed by our OE customers. We generally earn a small margin on these components of the system. As the need for more sophisticated emission control solutions increases to meet more stringent environmental regulations, and as we capture more diesel after treatment business, these substrate components have been increasing as a percentage of our revenue. While these substrates dilute our gross margin percentage they are a necessary component of an emission control system. We view the growth of substrates as a key indicator that our value add content in an emission control system is moving toward the higher technology hot-end gas and diesel business.

Our value-add content in an emission control system includes designing the system to meet environmental regulations through integration of the substrates into the system, maximizing use of thermal energy to heat up the catalyst quickly, efficiently managing airflow to reduce back pressure as the exhaust stream moves past the catalyst, managing the expansion and contraction of the emission control system components due to temperature extremes experienced by an emission control system, using advanced acoustic engineering tools to design the desired exhaust sound, minimizing the opportunity for the fragile components of the substrate to be damaged when we integrate it into the emission control system and reducing unwanted noise, vibration and harshness transmitted through the emission control system.

32

We present these substrate sales separately in the following table because we believe investors utilize this information to understand the impact of this portion of our revenues on our overall business and because it removes the impact of potentially volatile precious metals pricing from our revenues. While, generally, our original equipment customers assume the risk of precious metals pricing volatility, it impacts our reported revenues. Excluding "substrate" catalytic converter and diesel particulate filters sales removes this impact.

	=====	===	=====	=====	=====

Revenues from our North American operations increased \$40 million in the first quarter of 2008 compared to the same period last year. Higher sales from North American OE revenues more than offset lower aftermarket revenues. North American OE emission control revenues were up \$62 million in the first quarter of 2008; excluding favorable currency and substrate sales, revenues were up \$9 million compared to last year. This increase was primarily due to higher year-over-year volumes on several early 2007 launches, strong volumes on GM's Epsilon and Lambda platforms as well as Volkswagen's PQ35 platform and Chrysler's launch of the JC49 platform, which is the Dodge Crew crossover. The benefits from these platforms were partially offset by lower volumes on the Ford Expedition and Navigator, GM's Chevy Colorado & Canyon, and Chrysler's Dodge Dakota and Ram. North American OE ride control revenues for the first quarter of 2008 were down \$21 million from the prior year. The decline was driven by the shutdown of production for the GMT900, due to the American Axle strike, where we have content on the SUVs as well as the 1/2 ton and 3/4 ton pickups. Also, commercial-vehicle production was down 15 percent from last year's first quarter which significantly impacted our ride control performance. Our total North American OE revenues, excluding substrate sales and currency, decreased four percent in the first quarter of 2008 compared to first quarter of 2007 which compares to the North American light vehicle production rate decrease of seven percent. Aftermarket revenues for North America were \$133 million in the first quarter of 2008, a decrease of \$1 million compared to the prior year. Excluding

Edgar Filing: TENNECO INC - Form 10-Q

\$2 million in favorable currency, aftermarket revenues were down \$3 million driven by lower sales in both product lines due to soft market conditions. Net of favorable currency, aftermarket ride control revenues decreased two percent in the first quarter of 2008 while aftermarket emission control revenues decreased five percent in the first quarter of 2008.

34

Our European, South American and Indian segment's revenues increased \$92 million, or 14 percent, in the first quarter of 2008 compared to last year. The first quarter total European light vehicle industry production was even with the first quarter of 2007. Europe OE emission control revenues of \$426 million in the first quarter of 2008 were up 10 percent as compared to the first quarter of last year. Excluding \$55 million of favorable currency and a reduction in substrate sales, Europe OE emission control revenues decreased five percent over 2007. Higher emission control volumes due primarily to our growing position on the hot-end of emission control platforms were more than offset by lower customer recovery of nickel surcharge because nickel surcharge costs were down year over year. The volume increase came primarily from new platforms launched in 2007 that continue to ramp up, including: BMW's new 1 and 3-Series and Mini, the new Daimler Sprinter and Smart models, the Ford Mondeo, the Jaguar XF and the Volvo V70. Europe OE ride control revenues of \$129 million in the first quarter of 2008 were up 20 percent year-over-year. Excluding currency, revenues increased by four percent in the 2008 first quarter due to improved volumes on the Volkswagen Golf and Caddy, Audi A3 platform, the new Suzuki Splash, the Dacia Logan and the Mercedes C-Class with our electronic shock technology, offsetting lower volumes on the Audi A4 and A6 and Ford's Mazda 2. European aftermarket revenues increased \$7 million in the first quarter of 2008 compared to last year. When adjusted for currency, aftermarket revenues were down five percent. Excluding the \$6 million impact of currency, ride control aftermarket revenues were up five percent due to strong volumes while emission control aftermarket revenues were down 14 percent, excluding \$5 million in currency benefit, due to lower volumes. South American and Indian revenues were \$94 million during the first quarter of 2008, compared to \$70 million in the prior year. This increase was due to stronger OE and aftermarket sales and currency appreciation.

Revenues from our Asia Pacific segment, which includes Australia and Asia, increased \$28 million to \$141 million in the first quarter of 2008 compared to the same period last year. Excluding the impact of substrate sales and currency, revenues increased to \$92 million from \$82 million in the prior year. Asian revenues for the first quarter of 2008 were \$90 million, up 28 percent from last year. This increase was primarily due to higher OE sales in China driven by new launches and higher emission control volumes on existing platforms. Excluding higher substrate sales and \$9 million of favorable currency, Asian revenue increased \$10 million when compared with last year. First quarter revenues for Australia increased 21 percent to \$51 million. Excluding higher substrate sales and \$7 million of favorable currency, Australian revenue was even with last year.

EARNINGS BEFORE INTEREST EXPENSE, INCOME TAXES AND MINORITY INTEREST ("EBIT")

THREE MONTHS ENDED MARCH 31,		

2008	2007	CHANGE
----	----	-----

Edgar Filing: TENNECO INC - Form 10-Q

	(MILLIONS)		
North America.....	\$ 9	\$30	\$(21)
Europe, South America & India.....	25	13	12
Asia Pacific.....	5	6	(1)
	----	----	----
	\$39	\$49	\$(10)
	===	===	====

The EBIT results shown in the preceding table include the following items, discussed below under "Restructuring and Other Charges," which have an effect on the comparability of EBIT results between periods:

	THREE MONTHS ENDED MARCH 31,	
	----- 2008	2007 -----
	(MILLIONS)	
North America		
Restructuring and restructuring-related expenses.....	\$ 1	\$ 1
Europe, South America & India		
Restructuring and restructuring-related expenses.....	3	1
Asia Pacific		
Restructuring and restructuring-related expenses.....	--	--

35

EBIT for North American operations decreased to \$9 million in the first quarter of 2008, from \$30 million one year ago. Earnings on new OE emission control platforms launched in 2007 were more than offset by volume declines on other emission control platforms which resulted in a \$2 million decrease to EBIT. Increased spending of \$4 million on engineering to support future ride and emission control platform launches and higher depreciation expense of \$3 million, resulting from capital expenditures to support our 2007 emission control platform launches, negatively impacted EBIT. In addition, soft aftermarket sales and lower OE ride control volumes, due to reduced industry light and commercial vehicle production, in particular the volumes related to the American Axle strike, had a combined unfavorable impact to EBIT of \$11 million. Currency had a \$1 million favorable impact on North American EBIT. Restructuring and restructuring-related expenses of \$1 million were included in first quarter EBIT for both periods.

Our European, South American and Indian segment's EBIT was \$25 million for the first quarter of 2008 compared to \$13 million during the same period last year. The improvement was driven by significant manufacturing efficiencies across all regions which favorably impacted EBIT by \$12 million. Lower net alloy surcharges of \$1 million and reduced selling, general and administrative spending of \$3 million also benefited EBIT. These improvements were partially

Edgar Filing: TENNECO INC - Form 10-Q

offset by increased spending of \$2 million on engineering and higher steel costs of \$3 million. Included in first quarter 2008 European, South American and Indian segment's EBIT was \$3 million in restructuring and restructuring-related expenses compared to \$1 million for the first quarter of 2007.

EBIT for our Asia Pacific segment in the first quarter of 2008 was \$5 million compared to \$6 million in the first quarter of 2007. Volume increases, primarily in China, and favorable currency of \$1 million benefited EBIT. More than offsetting the increases were higher selling, general and administrative expenses due to a charge of \$1 million related to the bankruptcy of a major Australian aftermarket customer, manufacturing inefficiencies in Australia, higher steel costs of \$1 million and an increase in depreciation expense.

Currency had a \$2 million favorable impact on overall company EBIT for the three months ended March 31, 2008, as compared to the prior year.

EBIT AS A PERCENTAGE OF REVENUE

	THREE MONTHS ENDED MARCH 31,	
	2008	2007
	-----	-----
North America.....	1%	5%
Europe, South America & India.....	3%	2%
Asia Pacific.....	4%	5%
Total Tenneco.....	3%	4%

In North America, EBIT as a percentage of revenue for the first quarter of 2008 was four percentage points less than last year. Lower OE ride control volumes on light vehicle and commercial platforms, coupled with increased expenditures on engineering, steel, selling, general and administrative and depreciation, drove the decline. Partially offsetting the decline were higher OE emission control volumes and favorable currency. During the first quarter of 2008, North American results included the same amount as last year for restructuring and restructuring-related charges. In Europe, South America and India, EBIT margin for the first quarter of 2008 was one percentage point better than prior year. Manufacturing efficiencies in all regions were partially offset by higher steel costs and spending on engineering. Restructuring and restructuring-related expenses were higher than prior year. EBIT as a percentage of revenue for our Asia Pacific segment decreased one percentage point in the first quarter of 2008 versus the prior year. A charge related to the bankruptcy of a major aftermarket customer along with manufacturing inefficiencies in Australia more than offset volume increases in Asia, mainly China, and favorable currency. There were no restructuring and restructuring-related expenses in either quarter.

INTEREST EXPENSE, NET OF INTEREST CAPITALIZED

We reported interest expense of \$25 million (all in our U.S. operations) in the first quarter of 2008 compared to \$40 million (\$39 million in the U.S. and \$1 million in our foreign operations) in the prior year. The requirement to

Edgar Filing: TENNECO INC - Form 10-Q

mark to market the interest rate swaps described below decreased interest expense by \$5 million in the first quarter 2008 and decreased interest expense by \$1 million in the first quarter 2007. Included in the first quarter of 2007 results was a \$5 million charge to expense for the unamortized portion of debt issuance costs related to our previous senior credit facility due to our debt refinancing in the first quarter of 2007. Interest expense also decreased as a result of lower LIBOR rates on the variable interest rate portion of our debt.

We have three fixed-to-floating interest rate swaps that effectively convert \$150 million of our 10 1/4 percent fixed interest rate senior secured notes into floating interest rates at an annual rate of LIBOR plus 5.68 percent. Based upon the current LIBOR rate of 4.08 percent (which is in effect until July 15, 2008) these swaps are expected to decrease our interest expense by \$1 million in 2008 excluding any impact from marking the swaps to market. Since entering into these swaps, we have realized a net cumulative benefit of \$2 million through March 31, 2008, in reduced interest payments. On March 31, 2008, we had \$1,009 million in long-term debt obligations that have fixed interest rates. Of that amount, \$245 million is fixed through July 2013, \$500 million is fixed through November 2014, \$250 million is fixed through November 2015, and the remainder is fixed from 2012 through 2025. Of the \$245 million, \$150 million has been swapped to floating and we also have \$410 million in long-term debt obligations outstanding under our senior secured credit facility that are subject to variable interest rates. See Note 3 to the condensed consolidated financial statements of Tenneco Inc. and Consolidated Subsidiaries.

INCOME TAXES

We reported income tax expense of \$5 million in the first quarter of 2008 which included a \$1 million non-cash charge for changes in our estimates for tax matters subject to audit. The effective tax rate for the first quarter of 2008 was 37 percent. We reported income tax expense of \$2 million in the first quarter of 2007. The effective tax rate for the first quarter of 2007 was 22 percent.

RESTRUCTURING AND OTHER CHARGES

Over the past several years we have adopted plans to restructure portions of our operations. These plans were approved by our Board of Directors and were designed to reduce operational and administrative overhead costs throughout the business. Prior to the change in accounting required for exit or disposal activities, we recorded charges to income related to these plans for costs that did not benefit future activities in the period in which the plans were finalized and approved, while actions necessary to affect these restructuring plans occurred over future periods in accordance with established plans.

Our recent restructuring activities began in the fourth quarter of 2001, when our Board of Directors approved a restructuring plan, a project known as Project Genesis, which was designed to lower our fixed costs, relocate capacity, reduce our work force, improve efficiency and utilization, and better optimize our global footprint. We have subsequently engaged in various other restructuring projects related to Project Genesis. In 2007, we incurred \$25 million in restructuring and restructuring-related costs of which \$22 million was recorded in cost of sales, \$2 million of which related to a charge for asset impairments for the plant closure in France, and \$3 million was recorded in selling, general and administrative expense. The majority of the 2007 charges were related to the planned closing of our emission control plant in Wissembourg, France. In the first quarter of 2008, we incurred \$4 million restructuring and restructuring-related costs of which \$3 million was recorded in cost of sales and \$1 million in selling, general and administrative expense. Since Project Genesis was initiated, we have incurred costs of \$159 million through March 31, 2008. We estimate that our current annual savings rate for

Edgar Filing: TENNECO INC - Form 10-Q

completed projects is approximately \$102 million. When all actions are complete, we expect an additional \$6 million of annual savings.

Under the terms of our amended and restated senior credit agreement that took effect on March 16, 2007, we are allowed to exclude \$80 million of cash charges and expenses, before taxes, related to cost reduction initiatives excluding any charge for asset impairments incurred after March 16, 2007 from the calculation of the financial covenant ratios required under our senior credit facility. As of March 31, 2008, we have excluded \$27 million in allowable charges relating to restructuring initiatives against the \$80 million available under the terms of the March 2007 amended and restated senior credit facility.

37

In addition to the announced actions, we will continue to evaluate additional opportunities and expect that we will initiate actions that will reduce our costs through implementing the most appropriate and efficient logistics, distribution and manufacturing footprint for the future. We expect to continue to undertake additional restructuring actions as deemed necessary, however, there can be no assurances we will undertake such actions. Actions that we take, if any, will require the approval of our Board of Directors, or its authorized committee. We plan to conduct any workforce reductions that result in compliance with all legal and contractual requirements including obligations to consult with workers' councils, union representatives and others.

EARNINGS PER SHARE

We reported net income of \$6 million or \$0.13 per diluted common share for the first quarter of 2008, as compared to net income of \$5 million or \$0.11 per diluted common share for the first quarter of 2007. Included in the results for the first quarter of 2008 were negative impacts from expenses related to our restructuring activities and tax adjustments. The net impact of these items decreased earnings per diluted share by \$0.07. Included in the results for the first quarter of 2007 were negative impacts from expenses related to our restructuring activities and charges relating to refinancing activities. The net impact of these items decreased earnings per diluted share by \$0.09. Please read the Notes to the condensed consolidated financial statements for more detailed information on earnings per share.

CASH FLOWS

	THREE MONTHS ENDED MARCH 31,	
	2008	2007
	(MILLIONS)	
Cash provided (used) by:		
Operating activities.....	\$ (67)	\$ (93)
Investing activities.....	(67)	(45)
Financing activities.....	87	69

Operating Activities

Edgar Filing: TENNECO INC - Form 10-Q

For the three months ended March 31, 2008, operating activities used \$67 million in cash compared to \$93 million in cash used during the same period last year. Cash used for working capital was \$139 million for both three month periods ended March 31, 2008 and 2007. Receivables were a use of cash of \$87 million compared to a cash use of \$201 million in the prior year. Inventory represented a cash outflow of \$43 million during the three months ended March 31, 2008, an improvement of \$31 million over the prior year. The year-over-year improvement in the use of cash for both accounts receivable and inventory was primarily a result of working capital requirements for our new platform launches in North America for 2007. Accounts payable provided cash of \$16 million, a decrease from last year's cash inflow of \$150 million. This decrease also primarily resulted from the working capital need for our new platform launches in North America for 2007. Cash taxes were \$12 million for the three months ended March 31, 2008, compared to \$8 million in the prior year.

One of our European subsidiaries receives payment from one of its OE customers whereby the accounts receivable are satisfied through the delivery of negotiable financial instruments. We may collect these financial instruments before their maturity date by either selling them at a discount or using them to satisfy accounts receivable that have previously been sold to a European bank. Any of these financial instruments which are not sold are classified as other current assets as they do not meet our definition of cash equivalents. The amount of these financial instruments that was collected before their maturity date totaled \$5 million as of March 31, 2008, compared with \$27 million at the same date in 2007. No negotiable financial instruments were held by our European subsidiary as of March 31, 2008 or March 31, 2007.

In certain instances several of our Chinese subsidiaries receive payment from OE customers and satisfy vendor payments through the receipt and delivery of negotiable financial instruments. Financial instruments used to satisfy vendor payables and not redeemed totaled \$18 million and \$11 million at March 31, 2008 and 2007, respectively, and were classified as notes payable. Financial instruments received from OE customers and not redeemed totaled

38

\$15 million and \$5 million at March 31, 2008 and 2007, respectively, and were classified as other current assets. One of our Chinese subsidiaries that issues its own negotiable financial instruments to pay its vendors is required to maintain a cash balance at a financial institution that guarantees those financial instruments. No financial instruments were outstanding at that Chinese subsidiary as of March 31, 2008. As of March 31, 2007 the required cash balance was approximately \$1 million and was classified as cash and cash equivalents.

The negotiable financial instruments received by one of our European subsidiaries and some of our Chinese subsidiaries are checks drawn by our OE customers and guaranteed by their banks that are payable at a future date. The use of these instruments for payment follows local commercial practice. Because negotiable financial instruments are financial obligations of our customers and are guaranteed by our customers' banks, we believe they represent a lower financial risk than the outstanding accounts receivable that they satisfy which are not guaranteed by a bank.

Investing Activities

Cash used for investing activities was \$22 million higher in the first quarter of 2008 compared to the same period a year ago. Cash payments for plant, property and equipment were \$63 million in the first quarter of 2008 versus payments of \$39 million in the first quarter of 2007. The increase of \$24 million in cash payments for plant, property and equipment was to support new

Edgar Filing: TENNECO INC - Form 10-Q

business that has been awarded for 2010 and 2011. Cash payments for software-related intangible assets were \$5 million in the first three months of 2008 compared to \$7 million in the first three months of 2007.

Financing Activities

Cash flow from financing activities was an \$87 million inflow in the first quarter of 2008 compared to an inflow of \$69 million in the same period of 2007. The primary reason for the change is attributable to an increase in borrowings year-over-year.

OUTLOOK

We expect little change in general industry conditions for the remainder of the year. In North America, uncertainty about the economic outlook for 2008 has increased. That uncertainty in the auto sector has been compounded by labor contract disputes. We believe that at some point these strikes will be resolved, however we do not expect to see an overall improvement in market conditions in North America this year. However, we believe that our strong performance in Asia, South America and Europe will continue to help offset the weakness in North America. In addition, we will continue to focus globally on increasing productivity through Six Sigma, Lean manufacturing, restructuring activities and cost improvements, including tight control of discretionary spending and deferrals of advertising and promotional campaigns in the aftermarket.

Current second quarter industry projections are that North American OE production levels will be down year-over-year, however, we anticipate a mix improvement on the platforms we produce as current labor issues within the industry are resolved. European production levels are estimated to remain relatively stable in the second quarter, while South America and Asia markets should continue to grow. Soft market conditions are expected to continue in the global aftermarket.

For the second half of the year, industry projections continue to show North American production volumes to be down compared to last year however, in Asia, Europe and South America industry projections show production volumes to be up year-over-year.

CRITICAL ACCOUNTING POLICIES

We prepare our condensed consolidated financial statements in accordance with accounting principles generally accepted in the United States of America. Preparing our condensed consolidated financial statements in accordance with generally accepted accounting principles requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of

39

the condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. The following paragraphs include a discussion of some critical areas where estimates are required.

Revenue Recognition

We recognize revenue for sales to our original equipment and aftermarket customers when title and risk of loss passes to the customers under the terms of our arrangements with those customers, which is usually at the time of shipment from our plants or distribution centers. In connection with the sale of exhaust systems to certain original equipment manufacturers, we purchase catalytic

Edgar Filing: TENNECO INC - Form 10-Q

converters and diesel particulate filters or components thereof including precious metals ("substrates") on behalf of our customers which are used in the assembled system. These substrates are included in our inventory and "passed through" to the customer at our cost, plus a small margin, since we take title to the inventory and are responsible for both the delivery and quality of the finished product. Revenues recognized for substrate sales were \$421 million, and \$343 million for the first three months of 2008 and 2007, respectively. For our aftermarket customers, we provide for promotional incentives and returns at the time of sale. Estimates are based upon the terms of the incentives and historical experience with returns. Certain taxes assessed by governmental authorities on revenue producing transactions, such as value added taxes, are excluded from revenue and recorded on a net basis. Shipping and handling costs billed to customers are included in revenues and the related costs are included in cost of sales in our Statements of Income (Loss).

Warranty Reserves

Where we have offered product warranty, we also provide for warranty costs. Those estimates are based upon historical experience and upon specific warranty issues as they arise. While we have not experienced any material differences between these estimates and our actual costs, it is reasonably possible that future warranty issues could arise that could have a significant impact on our consolidated financial statements.

Pre-production Design and Development and Tooling Assets

We expense pre-production design and development costs as incurred unless we have a contractual guarantee for reimbursement from the original equipment customer. We had long-term receivables of \$18 million and \$20 million on the balance sheet at March 31, 2008 and December 31, 2007, respectively, for guaranteed pre-production design and development reimbursement arrangements with our customers. In addition, plant, property and equipment includes \$60 million and \$62 million at March 31, 2008 and December 31, 2007, respectively, for original equipment tools and dies that we own. Prepayments and other includes \$44 million and \$33 million at March 31, 2008 and December 31, 2007, respectively, for in-process tools and dies that we are building for our original equipment customers.

Income Taxes

We have a U.S. Federal tax net operating loss carryforward ("NOL") at December 31, 2007, of \$518 million, which will expire in varying amounts from 2020 to 2027. The federal tax effect of that NOL is recorded as a deferred tax asset on our balance sheet for \$181 million at December 31, 2007. In the quarter ended March 31, 2008, we recorded an additional \$8 million in deferred tax assets. We also have state NOL carryforwards at December 31, 2007 of \$767 million, which will expire in various years through 2027. The tax effect of the state NOL, net of a valuation allowance, is recorded as a deferred tax asset on our balance sheet for \$40 million at December 31, 2007 and \$38 million at March 31, 2008. We estimate, based on available evidence both positive and negative, that it is more likely than not that we will utilize these NOLs within the prescribed carryforward period. That estimate is based upon our expectations regarding future taxable income of our U.S. operations and the implementation of available tax planning strategies that accelerate usage of the NOL. Circumstances that could change that estimate include future U.S. earnings at lower than expected levels or a majority ownership change as defined in the rules of the U.S. tax law. If that estimate changed, we would be required to cease recognizing an income tax benefit for any new NOL and could be required to record a reserve for some or all of the asset currently recorded on our balance sheet.

Stock-Based Compensation

Effective January 1, 2006, we began accounting for our stock-based compensation plans in accordance with Statement of Financial Accounting Standards ("SFAS") No. 123(R), "Share-Based Payment," which requires a fair value method of accounting for compensation costs related to our stock-based compensation plans. Under the fair value method recognition provision of the statement, a share-based payment is measured at the grant date based upon the value of the award and is recognized as expense over the vesting period. Determining the fair value of share-based awards requires judgment in estimating employee and market behavior. If actual results differ significantly from these estimates, stock-based compensation expense and our results of operations could be materially impacted. As of March 31, 2008, there is approximately \$4 million, net of tax, of total unrecognized compensation costs related to these stock-based awards that is expected to be recognized over a weighted average period of 1.5 years as compared to \$5 million, net of tax, and a weighted average period of 1.6 years as of March 31, 2007.

Goodwill and Other Intangible Assets

We utilize an impairment-only approach to value our purchased goodwill in accordance with SFAS No. 142, "Goodwill and Other Intangible Assets." Each year in the fourth quarter, we perform an impairment analysis on the balance of goodwill. Inherent in this calculation is the use of estimates as the fair value of our designated reporting units is based upon the present value of our expected future cash flows. In addition, our calculation includes our best estimate of our weighted average cost of capital and growth rate. If the calculation results in a fair value of goodwill which is less than the book value of goodwill, an impairment charge would be recorded in the operating results of the impaired reporting unit.

Pension and Other Postretirement Benefits

We have various defined benefit pension plans that cover substantially all of our employees. We also have postretirement health care and life insurance plans that cover a majority of our domestic employees. Our pension and postretirement health care and life insurance expenses and valuations are dependent on assumptions used by our actuaries in calculating those amounts. These assumptions include discount rates, health care cost trend rates, long-term return on plan assets, retirement rates, mortality rates and other factors. Health care cost trend rate assumptions are developed based on historical cost data and an assessment of likely long-term trends. Retirement rates are based primarily on actual plan experience while mortality rates are based upon the general population experience which is not expected to differ materially from our experience.

Our approach to establishing the discount rate assumption for both our domestic and foreign plans starts with high-quality investment-grade bonds adjusted for an incremental yield based on actual historical performance. This incremental yield adjustment is the result of selecting securities whose yields are higher than the "normal" bonds that comprise the index. Based on this approach, for 2008 we left the weighted average discount rate for all of our pension plans unchanged at 5.9 percent. The discount rate for postretirement benefits was also left unchanged at 6.2 percent for 2008.

Our approach to determining expected return on plan asset assumptions evaluates both historical returns as well as estimates of future returns, and is adjusted for any expected changes in the long-term outlook for the equity and

Edgar Filing: TENNECO INC - Form 10-Q

fixed income markets. As a result, our estimate of the weighted average long-term rate of return on plan assets for all of our pension plans was left unchanged at 8.2 percent for 2008.

Except in the U.K., our pension plans generally do not require employee contributions. Our policy is to fund our pension plans in accordance with applicable U.S. and foreign government regulations and to make additional payments as funds are available to achieve full funding of the accumulated benefit obligation. At March 31, 2008, all legal funding requirements had been met. Other postretirement benefit obligations, such as retiree medical, and certain foreign pension plans are not funded.

Effective December 31, 2006, we froze future accruals under our defined benefit plans for substantially all U.S. salaried and non-union hourly employees and replaced these benefits with additional contributions under defined contribution plans. These changes reduced expense by approximately \$11 million in 2007. These changes

41

will continue to generate savings in future years but those savings will vary based on many factors, including the performance of our pension fund investments.

CHANGES IN ACCOUNTING PRONOUNCEMENTS

In March 2008, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 161, "Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133" (SFAS No. 161). SFAS No. 161 requires enhanced disclosures about an entity's derivative and hedging activities including how and why an entity uses derivative instruments, how an entity accounts for derivatives and hedges and how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. SFAS No. 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. We are evaluating SFAS No. 161 to determine the effect on our financial statement disclosures.

In February 2008, the FASB issued FASB Staff Position (FSP) 140-3, "Accounting for Transfers of Financial Assets and Repurchase Financing Transactions". FSP 140-3 provides guidance on accounting for a transfer of a financial asset and a repurchase financing which is a repurchase agreement that relates to a previously transferred financial asset between the same counterparties that is entered into contemporaneously with, or in contemplation of, the initial transfer. FSP 140-3 is effective for financial statements issued for fiscal years beginning after November 15, 2008, and interim periods within those fiscal years. We are evaluating FSP 140-3 to determine the effect on our financial statements and related disclosures.

In February 2008, the FASB issued FSP 157-1, "Application of FASB Statement No. 157 to FASB Statement No. 13 and Other Accounting Pronouncements That Address Fair Value Measurements for Purposes of Lease Classification or Measurement Under Statement 13". FSP 157-1 provides a scope exception to SFAS No. 157 which does not apply under Statement 13 and other accounting pronouncements that address fair value measurements for purposes of lease classification or measurement under Statement 13. FSP 157-1 is effective upon the initial adoption of SFAS No. 157. FSP 157-1 did not have a material impact to our condensed consolidated financial statements.

In December 2007, the FASB issued SFAS No. 141 (Revised 2007), "Business

Edgar Filing: TENNECO INC - Form 10-Q

Combinations" (SFAS No. 141(R)). SFAS No. 141(R) requires an acquirer to recognize the assets acquired, the liabilities assumed, contractual contingencies and any noncontrolling interest in the acquiree at the acquisition date at their fair values as of that date. SFAS No. 141(R) provides guidance on the accounting for acquisition-related costs, restructuring costs related to the acquisition and the measurement of goodwill and a bargain purchase. SFAS No. 141(R) applies prospectively to business combinations for which the acquisition date is on or after December 15, 2008. We do not expect the adoption of this statement to have a material impact to our condensed consolidated financial statements.

In December 2007, the FASB issued SFAS No. 160, "Noncontrolling Interests in Consolidated Financial Statements—an amendment of ARB No. 5." SFAS No. 160 amends ARB 51 to establish accounting and reporting standards for the noncontrolling (minority) interest in a subsidiary and for the deconsolidation of a subsidiary. It clarified that a noncontrolling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as equity in the consolidated financial statements, establishes a single method of accounting for changes in a parent's ownership interest in a subsidiary that does not result in deconsolidation and provides for expanded disclosure in the consolidated financial statements relating to the interests of the parent's owners and the interests of the noncontrolling owners of the subsidiary. SFAS No. 160 applies prospectively (except for the presentation and disclosure requirements) for fiscal years and interim periods within those fiscal years beginning on or after December 15, 2008. The presentation and disclosure requirements will be applied retrospectively for all periods presented. We are evaluating this statement to determine the effect on our financial statements and related disclosures.

In December 2007, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 110 (SAB 110). SAB 110 amends and replaces Question 6 of Section D.2 Topic 14, "Share-Based Payment." Question 6 of Topic 14:D.2 (as amended) expresses the views of the staff regarding the use of a "simplified" method in developing an estimate of the expected term of "plain vanilla" share options in accordance with SFAS No. 123 (revised 2004), "Share-Based Payment" (SFAS No. 123(R)). SAB 110 is effective January 1, 2008. The adoption of SAB 110 had no impact to our condensed consolidated financial statements.

42

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurement." This statement defines fair value, establishes a fair value hierarchy for measuring fair value under generally accepted accounting principles and expands disclosures about fair value measurements. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007. FSP 157-2 issued in February 2008 delays the effective date of SFAS No. 157 for nonfinancial assets and nonfinancial liabilities to fiscal years beginning after November 15, 2008 and interim periods within those fiscal years. We have adopted the measurement and disclosure impact of SFAS No. 157 relating to our financial assets and financial liabilities which are measured on a recurring basis (at least annually) effective January 1, 2008. See Note 2 to the condensed consolidated financial statements of Tenneco Inc. and Consolidated Subsidiaries. We do not expect the adoption of the nonfinancial assets and nonfinancial liabilities portion of SFAS No. 157 to have a material impact to our condensed consolidated financial statements.

In June 2007, the Emerging Issues Task Force (EITF) issued EITF 06-11, "Accounting for Income Tax Benefits of Dividends on Share-Based Payment Awards." EITF 06-11 provides the final consensus on the application of paragraphs 62 and

Edgar Filing: TENNECO INC - Form 10-Q

63 of SFAS No. 123(R) on the accounting for income tax benefits relating to the payment of dividends on equity-classified employee share-based payment awards that are charged to retained earnings. EITF 06-11 affirms that the realized income tax benefit from dividends or dividend equivalents that are charged to retained earnings for equity classified nonvested equity shares, nonvested equity share units, and outstanding equity share options should be recognized as an increase in additional paid-in-capital. Additionally, EITF 06-11 provides guidance on the amount of tax benefits from dividends that are reclassified from additional paid-in-capital to the income statement when an entity's estimate of forfeitures changes. EITF 06-11 is effective prospectively to the income tax benefits that result from dividends on equity-classified employee share-based payment awards that are declared in fiscal years beginning after December 15, 2007. The adoption of EITF 06-11, on January 1, 2008, did not have a material impact on our condensed consolidated financial statements.

In June 2007, the EITF issued EITF 07-3, "Accounting for Nonrefundable Advance Payments for Goods or Services Received for Use in Future Research and Development Activities." EITF 07-3 requires the deferral and capitalization of nonrefundable advance payments for goods or services that an entity will use in research and development activities pursuant to an executory contractual agreement. Expenditures which are capitalized under EITF 07-3 should be expensed as the goods are delivered or the related services are performed. EITF 07-3 is effective prospectively for fiscal years beginning after December 15, 2007 and interim periods within those fiscal years. EITF 07-3 is applicable to new contracts entered into after the effective date of this Issue. The adoption of EITF 07-3 on January 1, 2008, did not have a material impact on our condensed consolidated financial statements.

In April 2007, the FASB issued Interpretation No. 39-1, "Amendment of FASB Interpretation No. 39" (FIN 39-1). This amendment allows a reporting entity to offset fair value amounts recognized for derivative instruments with fair value amounts recognized for the right to reclaim or realize cash collateral. Additionally, this amendment requires disclosure of the accounting policy on the reporting entity's election to offset or not offset amounts for derivative instruments. FIN 39-1 is effective for fiscal years beginning after November 15, 2007. The adoption of FIN 39-1 did not have a material impact on our condensed consolidated financial statements.

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities." This statement permits companies to choose to measure at fair value many financial instruments and certain other items that are not currently required to be measured at fair value. SFAS No. 159 is effective for financial statements issued for fiscal years beginning on or after November 15, 2007. The adoption of SFAS 159 did not have a material effect on our condensed consolidated financial statements and related disclosures.

In September 2006, the FASB issued SFAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106, and 132(R)." Part of this Statement was effective as of December 31, 2006, and requires companies that have defined benefit pension plans and other postretirement benefit plans to recognize the funded status of those plans on the balance sheet on a prospective basis from the effective date. The funded status of these plans is determined as of the plans' measurement dates and represents the difference between the amount of the obligations owed to participants under each plan (including the effects of future salary increases for defined benefit plans) and the fair value of each plan's assets dedicated to paying those obligations. To record the funded status of those plans, unrecognized prior service costs and net actuarial losses experienced by the plans will be recorded in the Accumulated Other Comprehensive Loss section of

Edgar Filing: TENNECO INC - Form 10-Q

shareholders' equity on the balance sheet. The initial adoption as of December 31, 2006 resulted in a reduction of Accumulated Other Comprehensive Loss in shareholders' equity of \$59 million.

In addition, SFAS No. 158 requires that companies using a measurement date for their defined benefit pension plans and other postretirement benefit plans other than their fiscal year end, change the measurement date effective for fiscal years ending after December 15, 2008. Effective January 1, 2007, we elected to early adopt the measurement date provision of SFAS No. 158. Adoption of this part of the statement was not material to our financial position and results of operations.

LIQUIDITY AND CAPITAL RESOURCES

CAPITALIZATION

	MARCH 31, 2008	DECEMBER 31, 2007	% CHANGE
	-----	-----	-----
	(MILLIONS)		
Short-term debt and current maturities.....	\$ 44	\$ 46	4%

Shareholders' equity.....	465	400	16
	-----	-----	
Total capitalization.....	\$1,962	\$1,805	9
	=====	=====	

General. Short-term debt, which includes the current portion of long-term obligations and borrowings by foreign subsidiaries, was \$44 million and \$46 million as of March 31, 2008 and December 31, 2007, respectively. Borrowings under our revolving credit facilities, which are classified as long-term debt, were approximately \$260 million and \$169 million as of March 31, 2008 and December 31, 2007, respectively. The overall increase in debt resulted primarily from increased working capital levels.

The year-to-date increase in shareholders' equity primarily resulted from \$54 million of translation of foreign balances into U.S. dollars and net income of \$6 million. While our book equity balance was small at March 31, 2008, it had no effect on our business operations. We have no debt covenants that are based upon our book equity, and there are no other agreements that are adversely impacted by our relatively low book equity.

Overview. Our financing arrangements are primarily provided by a committed senior secured financing arrangement with a syndicate of banks and other financial institutions. The arrangement is secured by substantially all our domestic assets and pledges of 66 percent of the stock of certain first-tier foreign subsidiaries, as well as guarantees by our material domestic subsidiaries.

Edgar Filing: TENNECO INC - Form 10-Q

On November 20, 2007, we issued \$250 million of 8 1/8 percent Senior Notes due November 15, 2015 through a private placement offering. The offering and related transactions were designed to (1) reduce our interest expense and extend the maturity of a portion of our debt (by using the proceeds of the offering to tender for \$230 million of our outstanding \$475 million 10 1/4 percent senior secured notes due 2013), (2) facilitate the realignment of the ownership structure of some of our foreign subsidiaries and (3) otherwise amend certain of the covenants in the indenture for our 10 1/4 percent senior secured notes to be consistent with those contained in our 8 5/8 percent senior subordinated notes, including conforming the limitation on incurrence of indebtedness and the absence of a limitation on issuances or transfers of restricted subsidiary stock, and make other minor modifications.

The ownership structure realignment is designed to more effectively align our domestic and foreign assets and revenues with expenses in the appropriate local currencies. Some of the desired results of the realignment will be to allow us to more rapidly use our U.S. net operating losses and reduce our cash tax payments. At present, the ownership structure realignment involves a new European holding company which will own some of our foreign entities. We may alter the components of the realignment from time to time. If market conditions permit in 2008, we may offer debt issued by the new European holding company. The proceeds of that debt would be used to repay any outstanding intercompany debt and, in turn, to fund the redemption of any remaining 10 1/4 percent senior secured

44

notes. This realignment utilized part of our U.S. net operating tax losses. Consequently, we recorded a non-cash charge of \$66 million in the fourth quarter of 2007.

The offering of new notes and related repurchase of our senior secured notes will reduce our annual interest expense by approximately \$3 million for 2008 and increased our total debt outstanding to third-parties by approximately \$20 million. In connection with the offering and the related repurchase of our senior secured notes, we also recorded non-recurring pre-tax charges related to the tender premium and fees, the write-off of deferred debt issuance costs, and the write-off of previously recognized issuance premium totaling \$21 million in the fourth quarter of 2007.

In March 2007 we refinanced our \$831 million senior credit facility. This transaction reduced the interest rates we pay on all portions of the facility. While the total amount of the new senior credit facility is \$830 million, approximately the same as the previous facility, we changed the components of the facility to enhance our financial flexibility. We increased the amount of commitments under our revolving loan facility from \$320 million to \$550 million, reduced the amount of commitments under our tranche B-1 letter of credit/revolving loan facility from \$155 million to \$130 million and replaced the \$356 million term loan B with a \$150 million term loan A. As of March 31, 2008, the senior credit facility consisted of a five-year, \$150 million term loan A maturing in March 2012, a five-year, \$550 million revolving credit facility maturing in March 2012, and a seven-year \$130 million tranche B-1 letter of credit/revolving loan facility maturing in March 2014.

The refinancing of the prior facility allowed us to: (i) amend the consolidated net debt to EBITDA ratio, (ii) eliminate the fixed charge coverage ratio, (iii) eliminate the restriction on capital expenditures, (iv) increase the amount of acquisitions permitted to \$250 million, (v) improve the flexibility to repurchase and retire higher cost junior debt, (vi) increase our ability to enter into capital leases, (vii) increase the ability of our foreign

Edgar Filing: TENNECO INC - Form 10-Q

subsidiaries to incur debt, (viii) increase our ability to pay dividends and repurchase common stock, (ix) increase our ability to invest in joint ventures, (x) allow for the increase in the existing tranche B-1 facility and/or the term loan A or the addition of a new term loan of up to \$275 million in order to reduce our 10.25 percentage second lien notes, and (xi) make other modifications.

Following the refinancing, the term loan A facility is payable in twelve consecutive quarterly installments, commencing June 30, 2009 as follows: \$6 million due each of June 30, September 30, December 31, 2009 and March 31, 2010, \$15 million due each of June 30, September 30, December 31, 2010 and March 31, 2011, and \$17 million due each of June 30, September 30, December 31, 2011 and March 16, 2012. The revolving credit facility requires that any amounts drawn, be repaid by March 2012. Prior to that date, funds may be borrowed, repaid and reborrowed under the revolving credit facility without premium or penalty. Letters of credit may be issued under the revolving credit facility.

The tranche B-1 letter of credit/revolving loan facility requires that it be repaid by March 2014. We can borrow revolving loans and issue letters of credit under the \$130 million tranche B-1 letter of credit/revolving loan facility. The tranche B-1 letter of credit/revolving loan facility lenders have deposited \$130 million with the administrative agent, who has invested that amount in time deposits. We do not have an interest in any of the funds on deposit. When we draw revolving loans under this facility, the loans are funded from the \$130 million on deposit with the administrative agent. When we make repayments, the repayments are redeposited with the administrative agent.

The tranche B-1 letter of credit/revolving loan facility is reflected as debt on our balance sheet only if we borrow money under this facility or if we use the facility to make payments for letters of credit. We will not be liable for any losses to or misappropriation of any (i) return due to the administrative agent's failure to achieve the return described above or to pay all or any portion of such return to any lender under such facility or (ii) funds on deposit in such account by such lender (other than the obligation to repay funds released from such accounts and provided to us as revolving loans under such facility).

Senior Credit Facility -- Interest Rates and Fees. As of March 31, 2008 borrowings under the term loan A facility and the tranche B-1 letter of credit/revolving loan facility bore interest at an annual rate equal to, at our option, either (i) the London Interbank Offering Rate plus a margin of 150 basis points; or (ii) a rate consisting of the greater of the JP Morgan Chase prime rate or the Federal Funds rate plus 50 basis points, plus a margin of 50 basis points. The interest margin for borrowings under the term loan A are subject to adjustment based on the

45

consolidated net leverage ratio (consolidated indebtedness net of cash divided by consolidated EBITDA as defined in the senior credit facility agreement). The margin we pay on the term loan A and the tranche B-1 facility is reduced by 25 basis points following each fiscal quarter for which the consolidated net leverage ratio is less than 2.5 beginning in March 2007, and would increase by 25 basis points following each fiscal quarter for which the consolidated net leverage ratio exceeds 3.5. There is no cost to us for issuing letters of credit under the tranche B-1 letter of credit/revolving loan facility, however outstanding letters of credit reduce our availability to borrow revolving loans under this portion of the facility. If a letter of credit issued under this facility is subsequently paid and we do not reimburse the amount paid in full, then a ratable portion of each lender's deposit would be used to fund the letter

Edgar Filing: TENNECO INC - Form 10-Q

of credit. We pay the tranche B-1 lenders a fee which is equal to LIBOR plus 150 basis points. This fee is offset by the return on the funds deposited with the administrative agent which earn interest at a per annum rate approximately equal to LIBOR. Outstanding revolving loans reduce the funds on deposit with the administrative agent which in turn reduce the earnings of those deposits and effectively increases our interest expense at a per annum rate equal to LIBOR.

As of March 31, 2008 borrowings under the revolving credit facility bore interest at an annual rate equal to, at our option, either (i) the London Interbank Offering Rate plus a margin of 150 basis points; or (ii) a rate consisting of the greater of the JP Morgan Chase prime rate or the Federal Funds rate plus 50 basis points, plus a margin of 50 basis points. Letters of credit issued under the revolving credit facility accrue a letter of credit fee at a per annum rate of 150 basis points for the pro rata account of the lenders under such facility and a fronting fee for the ratable account of the issuers thereof at a per annum rate in an amount to be agreed upon payable quarterly in arrears. We also pay a commitment fee of 35 basis points on the unused portion of the revolving credit facility. The interest margins for borrowings and letters of credit issued under the revolving credit facility are subject to adjustment based on the consolidated net leverage ratio (consolidated indebtedness net of cash divided by consolidated EBITDA as defined in the senior credit facility agreement) measured at the end of each quarter. The margin we pay on the revolving credit facility is reduced by 25 basis points and the commitment fee we pay on the revolving credit facility is reduced by 5 basis points following each fiscal quarter for which the consolidated net leverage ratio is less than 2.5 beginning in March 2007. The margin and the commitment fee would increase by 25 basis points and 2.5 basis points, respectively, following each fiscal quarter for which the consolidated net leverage ratio exceeds 3.5.

Senior Credit Facility -- Other Terms and Conditions. As described above, we are highly leveraged. Our refinanced senior credit facility requires that we maintain financial ratios equal to or better than the following consolidated net leverage ratio (consolidated indebtedness net of cash divided by consolidated EBITDA, as defined in the senior credit facility agreement), and consolidated interest coverage ratio (consolidated EBITDA divided by consolidated interest expense, as defined under the senior credit facility agreement) at the end of each period indicated. Failure to maintain these ratios will result in a default under our senior credit facility. The financial ratios required under the amended and restated senior credit facility and, the actual ratios we achieved for the first quarter of 2008, are shown in the following tables:

	QUARTER ENDED							
	MARCH 31, 2008		JUNE 30, 2008		SEPTEMBER 30, 2008		DECEMBER 31, 2008	
	REQ.	ACT.	REQ.	REQ.	REQ.	REQ.	REQ.	
Leverage Ratio (maximum).....	4.00	2.79	4.00	4.00	4.00	4.00	4.00	4.00
Interest Coverage Ratio (minimum).....	2.10	4.06	2.10	2.10	2.10	2.10	2.10	2.10
				2009	2010	2011	2012	
				REQ.	REQ.	REQ.	REQ.	
				----	----	----	----	

Edgar Filing: TENNECO INC - Form 10-Q

Leverage Ratio (maximum).....	3.75	3.50	3.50	3.50
Interest Coverage Ratio (minimum).....	2.25	2.40	2.55	2.75

The senior credit facility agreement provides the ability to refinance our senior subordinated notes and/or our senior secured notes in an amount equal to the sum of (i) the net cash proceeds of equity issued after the closing date plus (ii) the portion of annual excess cash flow (as defined in the senior credit facility agreement) that is not required to be applied to the payment of the credit facilities and which is not used for other purposes, provided that the amount of the subordinated notes and the aggregate amount of the senior secured notes and the subordinated notes

46

that may be refinanced is capped based the pro forma consolidated leverage ratio after giving effect to such refinancing as shown in the following table:

PROFORMA CONSOLIDATED LEVERAGE RATIO	SUBORDINATED NOTES MAXIMUM AMOUNT	AGGREGATE SENIOR AND SUBORDINATE NOTE MAXIMUM AMOUNT
-----	-----	-----
Greater than or equal to 3.0x	\$50 million	\$150 million
Greater than or equal to 2.5x	\$100 million	\$300 million
Less than 2.5x	\$125 million	\$375 million

In addition, the senior secured notes may be refinanced with (i) the net cash proceeds of incremental facilities and permitted refinancing indebtedness (as defined in the senior credit facility agreement), (ii) the net cash proceeds of any new senior or subordinated unsecured indebtedness, (iii) proceeds of revolving credit loans (as defined in the senior credit facility agreement), (iv) up to E200 million of unsecured indebtedness of the company's foreign subsidiaries and (v) cash generated by the company's operations.

The refinanced senior credit facility agreement also contains restrictions on our operations that are customary for similar facilities, including limitations on: (i) incurring additional liens; (ii) sale and leaseback transactions (except for the permitted transactions as described in the amended and restated agreement); (iii) liquidations and dissolutions; (iv) incurring additional indebtedness or guarantees; (v) investments and acquisitions; (vi) dividends and share repurchases; (vii) mergers and consolidations; and (viii) refinancing of subordinated and 10.25 percent senior secured notes. Compliance with these requirements and restrictions is a condition for any incremental borrowings under the senior credit facility agreement and failure to meet these requirements enables the lenders to require repayment of any outstanding loans. As of March 31, 2008, we were in compliance with all the financial covenants and operational restrictions of the facility.

Our senior credit facility does not contain any terms that could accelerate the payment of the facility as a result of a credit rating agency downgrade.

Senior Secured, Senior and Subordinated Notes. Our outstanding debt also includes \$245 million of 10 1/4 percent senior secured notes due July 15, 2013,

Edgar Filing: TENNECO INC - Form 10-Q

\$250 million of 8 1/8 percent senior notes due November 15, 2015, and \$500 million of 8 5/8 percent senior subordinated notes due November 15, 2014. We can redeem some or all of the notes at any time after July 15, 2008 in the case of the senior secured notes, November 15, 2009 in the case of the senior subordinated notes and November 15, 2011 in the case of the senior notes. If we sell certain of our assets or experience specified kinds of changes in control, we must offer to repurchase the notes. We are permitted to redeem up to 35 percent of the senior notes with the proceeds of certain equity offerings completed before November 15, 2010.

Our senior secured, senior and subordinated notes require that, as a condition precedent to incurring certain types of indebtedness not otherwise permitted, our consolidated fixed charge coverage ratio, as calculated on a proforma basis, be greater than 2.00. We have not incurred any of the types of indebtedness not otherwise permitted by the indentures. The indentures also contain restrictions on our operations, including limitations on: (i) incurring additional indebtedness or liens; (ii) dividends; (iii) distributions and stock repurchases; (iv) investments; (v) asset sales and (vi) mergers and consolidations. Subject to limited exceptions, all of our existing and future material domestic wholly owned subsidiaries fully and unconditionally guarantee these notes on a joint and several basis. In addition, the senior secured notes and related guarantees are secured by second priority liens, subject to specified exceptions, on all of our and our subsidiary guarantors' assets that secure obligations under our senior credit facility, except that only a portion of the capital stock of our subsidiary guarantor's domestic subsidiaries is provided as collateral and no assets or capital stock of our direct or indirect foreign subsidiaries secure the notes or guarantees. There are no significant restrictions on the ability of the subsidiaries that have guaranteed these notes to make distributions to us. The senior subordinated notes rank junior in right of payment to our senior credit facility and any future senior debt incurred. As of March 31, 2008, we were in compliance with the covenants and restrictions of these indentures.

Accounts Receivable Securitization. In addition to our senior credit facility, senior secured notes, senior notes and senior subordinated notes, we also sell some of our accounts receivable on a nonrecourse basis in North America and Europe. In North America, we have an accounts receivable securitization program with two commercial banks. We sell original equipment and aftermarket receivables on a daily basis under this program. We

47

sold accounts receivable under this program of \$99 million and \$94 million as of March 31, 2008 and 2007, respectively. This program is subject to cancellation prior to its maturity date if we (i) fail to pay interest or principal payments on an amount of indebtedness exceeding \$50 million, (ii) default on the financial covenant ratios under the senior credit facility, or (iii) fail to maintain certain financial ratios in connection with the accounts receivable securitization program. In January 2008, this program was renewed for 364 days to January 26, 2009 at a facility size of \$120 million. We also sell some receivables in our European operations to regional banks in Europe. At March 31, 2008, we sold \$72 million of accounts receivable in Europe up from \$51 million at March 31, 2007. The arrangements to sell receivables in Europe are not committed and can be cancelled at any time. If we were not able to sell receivables under either the North American or European securitization programs, our borrowings under our revolving credit agreements may increase. These accounts receivable securitization programs provide us with access to cash at costs that are generally favorable to alternative sources of financing, and allow us to reduce borrowings under our revolving credit agreements.

Edgar Filing: TENNECO INC - Form 10-Q

Capital Requirements. We believe that cash flows from operations, combined with available borrowing capacity described above, assuming that we maintain compliance with the financial covenants and other requirements of our loan agreement, will be sufficient to meet our future capital requirements for the following year. Our ability to meet the financial covenants depends upon a number of operational and economic factors, many of which are beyond our control. Factors that could impact our ability to comply with the financial covenants include the rate at which consumers continue to buy new vehicles and the rate at which they continue to repair vehicles already in service, as well as our ability to successfully implement our restructuring plans and offset higher raw material prices. Lower North American vehicle production levels, weakening in the global aftermarket, or a reduction in vehicle production levels in Europe, beyond our expectations, could impact our ability to meet our financial covenant ratios. In the event that we are unable to meet these financial covenants, we would consider several options to meet our cash flow needs. These options could include renegotiations with our senior credit lenders, additional cost reduction or restructuring initiatives, sales of assets or common stock, or other alternatives to enhance our financial and operating position. Should we be required to implement any of these actions to meet our cash flow needs, we believe we can do so in a reasonable time frame.

DERIVATIVE FINANCIAL INSTRUMENTS

FOREIGN CURRENCY EXCHANGE RATE RISK

We use derivative financial instruments, principally foreign currency forward purchase and sale contracts with terms of less than one year, to hedge our exposure to changes in foreign currency exchange rates. Our primary exposure to changes in foreign currency rates results from intercompany loans made between affiliates to minimize the need for borrowings from third parties. Additionally, we enter into foreign currency forward purchase and sale contracts to mitigate our exposure to changes in exchange rates on certain intercompany and third-party trade receivables and payables. We manage counter-party credit risk by entering into derivative financial instruments with major financial institutions that can be expected to fully perform under the terms of such agreements. We do not enter into derivative financial instruments for speculative purposes.

48

In managing our foreign currency exposures, we identify and aggregate existing offsetting positions and then hedge residual exposures through third-party derivative contracts. The following table summarizes by major currency the notional amounts, weighted-average settlement rates, and fair value for foreign currency forward purchase and sale contracts as of March 31, 2008. The fair value of our foreign currency forward contracts is based on an internally developed model which incorporates observable inputs including quoted spot rates, forward exchange rates and discounted future expected cash flows utilizing market interest rates with similar quality and maturity characteristics. All contracts in the following table mature in 2008.

INTEREST RATE RISK

Our financial instruments that are sensitive to market risk for changes in interest rates are primarily our debt securities and our interest rate swaps. We use our revolving credit facilities to finance our short-term and long-term capital requirements. We pay a current market rate of interest on these borrowings. Our long-term capital requirements have been financed with long-term debt with original maturity dates ranging from five to ten years. On March 31, 2008, we had \$1,009 million in long-term debt obligations that have fixed interest rates. Of that amount, \$245 million is fixed through July 2013, \$500 million is fixed through November 2014, \$250 million is fixed through November 2015, and the remainder is fixed from 2012 through 2025. Of the \$245 million, \$150 million has been swapped to floating and we also have \$410 million in long-term debt obligations outstanding under our senior secured credit facility that are subject to variable interest rates. See Note 3 to the condensed consolidated financial statements of Tenneco Inc. and Consolidated Subsidiaries.

We estimate that the fair value of our long-term debt at March 31, 2008 was about 97 percent of its book value. A one percentage point increase or decrease in interest rates would increase or decrease the annual interest expense we recognize in the income statement and the cash we pay for interest expense by about \$3 million after tax, excluding the effect of the interest rate swaps we completed in April 2004.

The fair value of our interest rate swap agreements is \$4 million. The fair value is based on an internally developed model which incorporates observable inputs including LIBOR yield curves, the credit standing of the counterparties, nonperformance risk for similar cancelable forward option contracts, and discounted future expected cash flows utilizing market interest rates based on instruments with similar credit quality and maturities. A one percentage point increase or decrease in interest rates on the swaps we completed in April 2004 would increase or decrease the annual interest expense we recognize in the income statement and the cash we pay for interest expense by approximately \$1 million after tax, excluding the effect on interest expense of marking the swaps to market.

Edgar Filing: TENNECO INC - Form 10-Q

We are subject to a variety of environmental and pollution control laws and regulations in all jurisdictions in which we operate. We expense or capitalize, as appropriate, expenditures for ongoing compliance with environmental regulations that relate to current operations. We expense costs related to an existing condition caused by past operations that do not contribute to current or future revenue generation. We record liabilities when environmental assessments indicate that remedial efforts are probable and the costs can be reasonably estimated. Estimates of the liability are based upon currently available facts, existing technology, and presently enacted laws and regulations taking into consideration the likely effects of inflation and other societal and economic factors. We consider all available evidence including prior experience in remediation of contaminated sites, other companies' cleanup experiences and data released by the United States Environmental Protection Agency or other organizations. These estimated liabilities are subject to revision in future periods based on actual costs or new information. Where future cash flows are fixed or reliably determinable, we have discounted the liabilities. All other environmental liabilities are recorded at their undiscounted amounts. We evaluate recoveries separately from the liability and, when they are assured, recoveries are recorded and reported separately from the associated liability in our consolidated financial statements.

As of March 31, 2008, we are designated as a potentially responsible party in one Superfund site. Including the Superfund site, we may have the obligation to remediate current or former facilities, and we estimate our share of environmental remediation costs at these facilities to be approximately \$11 million. For the Superfund site and the current and former facilities, we have established reserves that we believe are adequate for these costs. Although we believe our estimates of remediation costs are reasonable and are based on the latest available information, the cleanup costs are estimates and are subject to revision as more information becomes available about the extent of remediation required. At some sites, we expect that other parties will contribute to the remediation costs. In addition, at the Superfund site, the Comprehensive Environmental Response, Compensation and Liability Act provides that our liability could be joint and several, meaning that we could be required to pay in excess of our share of remediation costs. Our understanding of the financial strength of other potentially responsible parties at the Superfund site, and of other liable parties at our current and former facilities, has been considered, where appropriate, in our determination of our estimated liability. We believe that any potential costs associated with our current status as a potentially responsible party in the Superfund site, or as a liable party at our current or former facilities, will not be material to our results of operations or consolidated financial position.

We also from time to time are involved in legal proceedings, claims or investigations that are incidental to the conduct of our business. Some of these proceedings allege damages against us relating to environmental liabilities (including toxic tort, property damage and remediation), intellectual property matters (including patent, trademark and copyright infringement, and licensing disputes), personal injury claims (including injuries due to product failure, design or warnings issues, and other product liability related matters), taxes, employment matters, and commercial or contractual disputes, sometimes related to acquisitions or divestitures. We vigorously defend ourselves against all of these claims. In future periods, we could be subjected to cash costs or non-cash charges to earnings if any of these matters is resolved on unfavorable terms. However, although the ultimate outcome of any legal matter cannot be predicted with certainty, based on current information, including our assessment of the merits of the particular claim, we do not expect that these legal proceedings or claims will have any material adverse impact on our future consolidated financial position or results of operations.

In addition, we are subject to a number of lawsuits initiated by a

Edgar Filing: TENNECO INC - Form 10-Q

significant number of claimants alleging health problems as a result of exposure to asbestos. A small percentage of claims have been asserted by railroad workers alleging exposure to asbestos products in railroad cars manufactured by The Pullman Company, one of our subsidiaries. Nearly all of the claims are related to alleged exposure to asbestos in our automotive emission control products. Only a small percentage of these claimants allege that they were automobile mechanics and a significant number appear to involve workers in other industries or otherwise do not include sufficient information to determine whether there is any basis for a claim against us. We believe, based on scientific and other evidence, it is unlikely that mechanics were exposed to asbestos by our former muffler products and that, in any event, they would not be at increased risk of asbestos-related disease based on their work with these products. Further, many of these cases involve numerous defendants, with the number of each in some cases exceeding 200 defendants from a variety of industries. Additionally, the plaintiffs either do not specify any, or specify the jurisdictional minimum, dollar

50

amount for damages. As major asbestos manufacturers continue to go out of business or file for bankruptcy, we may experience an increased number of these claims. We vigorously defend ourselves against these claims as part of our ordinary course of business. In future periods, we could be subject to cash costs or non-cash charges to earnings if any of these matters is resolved unfavorably to us. To date, with respect to claims that have proceeded sufficiently through the judicial process, we have regularly achieved favorable resolution. During the first quarter of 2008, we were dismissed from over 600 of such cases. Accordingly, we presently believe that these asbestos-related claims will not have a material adverse impact on our future financial condition or results of operations.

EMPLOYEE STOCK OWNERSHIP PLANS

We have established Employee Stock Ownership Plans for the benefit of our employees. Under the plans, subject to limitations in the Internal Revenue Code, participants may elect to defer up to 75 percent of their salary through contributions to the plan, which are invested in selected mutual funds or used to buy our common stock. We currently match in cash 50 percent of each employee's contribution up to eight percent of the employee's salary. In connection with freezing the defined benefit pension plans for nearly all U.S. based salaried and hourly employees effective December 31, 2006, and the related replacement of those defined benefit plans with defined contribution plans, we are making additional contributions to the Employee Stock Ownership Plans. We recorded expense for these matching contributions of approximately \$4 million for the three months ended March 31, 2008 as compared to \$3 million for the three months ended March 31, 2007. Matching contributions vest immediately. Defined benefit replacement contributions fully vest on the employee's third anniversary of employment.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

For information regarding our exposure to interest rate risk and foreign currency exchange risk, see the caption entitled "Derivative Financial Instruments" in "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations," which is incorporated herein by reference.

51

Edgar Filing: TENNECO INC - Form 10-Q

ITEM 4. CONTROLS AND PROCEDURES

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

An evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) and Rule 15d-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. As of December 31, 2007, we reported a material weakness in our internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) based upon our evaluation pursuant to Section 404 of the Sarbanes-Oxley Act of 2002. We have taken actions to address the identified weaknesses, but due to the nature of the material weakness, remediation will not be completed until the annual tax processes are performed during the 2008 year end close. Consequently, our March 31, 2008 evaluation concluded that our disclosure controls and procedures were not effective for the reasons more fully described below related to the unremediated material weakness. To address this control weakness, we performed additional analysis and performed other procedures in order to prepare the unaudited quarterly condensed consolidated financial statements in accordance with accounting principles generally accepted in the United States of America. Accordingly, we believe that the condensed consolidated financial statements included in this Quarterly Report on Form 10-Q fairly present, in all material respects, our financial condition, results of operations and cash flows for the periods presented.

INTERNAL CONTROLS SURROUNDING THE ACCOUNTING FOR INCOME TAXES

A material weakness is a deficiency, or combination of control deficiencies, such that there is a reasonable possibility that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis. Management identified a material weakness in our internal control over financial reporting as of December 31, 2007, related to our accounting for income taxes. We believe additional controls are needed related to the oversight and review of tax coordination, documentation and reporting. We also believe we did not maintain effective controls over the monitoring of specific balance sheet accounts relating to obligations under a tax sharing agreement with a former subsidiary, the foreign currency valuation of foreign affiliate transactions which are subject to changes in exchange rates, and the accuracy and completeness of the tax components of a foreign affiliate.

This control deficiency resulted in audit adjustments to the tax accounts for our financial statements as of December 31, 2007, as our internal controls did not operate effectively to detect errors that were or could have been, individually or in the aggregate, material.

REMEDIATION PLAN FOR MATERIAL WEAKNESS IN INTERNAL CONTROL OVER FINANCIAL REPORTING

To address the material weakness in accounting for income taxes, we will undertake the following actions during 2008:

1. We will require that all income tax entries approved for recording at the consolidated level include supporting documentation which will be provided to the local finance personnel with instructions for recording the transactions on the local ledgers.
2. We will formalize a process for documenting decisions and journal entries made based upon the review of tax packages or any other supporting information provided.

Edgar Filing: TENNECO INC - Form 10-Q

3. Based on review of each entity's quarterly balance sheet and income tax provision reconciliation, we will identify variances requiring additional balance sheet and income tax provision reconciliations. The tax department will institute a process whereby a member of the tax department will work with the location to review the tax accounting if an analysis of the balance sheet and income tax provision reconciliation identifies multiple and/or significant tax reporting variances requiring further analysis and training.

4. We will accelerate year end tax analysis and reporting activities to periods earlier in the year in order to provide additional analysis and reconciliation time.

52

We are in the process of developing additional remediation plans which will be implemented to address the material weakness in internal controls in accounting for income taxes. Although the remediation plans include accelerating the occurrence of many of the controls to earlier in the year, many of the controls and procedures will only be executed annually during the year-end closing process. Our assessment of the remediation will remain open until that time.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

Except as described above, there have been no changes in our internal control over financial reporting during the quarter ended March 31, 2008, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

53

PART II

ITEM 1A. RISK FACTORS

We are exposed to certain risks and uncertainties that could have a material adverse impact on our business, financial condition and operating results. There have been no material changes to the Risk Factors described in Part I, Item 1A of our Annual Report on Form 10-K for the year ended December 31, 2007.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(a) None.

(b) Not applicable.

(c) Purchase of equity securities by the issuer and affiliated purchasers. The following table provides information relating to our purchase of shares of our common stock in the first quarter of 2008. All of these purchases reflect shares withheld upon vesting of restricted stock, to satisfy statutory minimum tax withholding obligations.

Edgar Filing: TENNECO INC - Form 10-Q

PERIOD -----	TOTAL NUMBER OF SHARES PURCHASED -----	AVERAGE PRICE PAID -----
January 2008.....	62,668	\$22.93
February 2008.....	--	--
March 2008.....	1,515	25.02

Total.....	64,183	\$23.06

We presently have no publicly announced repurchase plan or program, but intend to continue to satisfy statutory minimum tax withholding obligations in connection with the vesting of outstanding restricted stock through the withholding of shares.
