OVERVIEW

Diluted earnings per share from continuing operations were \$0.07 in the second quarter of 2005 compared to \$0.09 in 2004.

Diluted net earnings per share were \$0.21 for the quarter ended June 30, 2005 compared to \$0.14 in 2004.

During the quarter, the Corporation entered into a definitive agreement to sell its Energy Services and International Contract Drilling divisions for approximately US\$2.28 billion with the transaction expected to close on or about September 1, 2005. The Corporation is also negotiating with a third party for the sale of its industrial and plant maintenance business carried on by CEDA. As a result, these businesses have been classified as discontinued operations with continuing operations now being comprised of Canadian contract drilling, service rig, snubbing, rentals, and related services businesses.

With respect to the continuing businesses, the Corporation announced in June 2005 that it was undertaking an examination of the available strategic alternatives, including determining the viability and method of conversion to an income trust. Although the Board of Directors has not made any decision with respect to any specific course of action at this time, it has retained the appropriate financial, accounting, legal and tax advisors to assist it in identifying and assessing issues pertaining to a conversion to an income trust. Any conversion alternatives available to Precision will be subject to review by, and approval of the Board of Directors and will also be subject to receipt of all required shareholder and regulatory approvals.

As is the norm in the second quarter, weather conditions were a significant factor affecting activity levels. An early spring break up and dry conditions in May were boding well for a very strong second quarter. These favorable conditions came to an abrupt halt in June as record rainfall in Alberta slowed the movement of oilfield equipment. Dry conditions have returned in July and activity has quickly ramped up.

Overall the market for our services is very strong with winter pricing for the most part being maintained through the spring and summer months. The healthy backlog of work should give service providers pricing leverage going into the upcoming winter season.

With the exception of snubbing, all operating divisions reported higher revenue for the quarter. This is particularly noteworthy in well servicing where service rig operating hours were 10% less than prior year.

Operating costs have escalated somewhat as a result of crew wage increases implemented in October 2004 and increases in third party materials and labor required for our equipment maintenance programs. Operating margins have, however, improved year over year with operating expenses as a percentage of revenue declining to 64.3% from 68.4% in the second quarter of 2004. This is a strong performance for the traditionally slow second quarter. Equipment repairs and maintenance expenditures, while substantial, are in line with our expectations.

At first glance, general and administrative costs appear to have increased by over \$8 million in the second quarter. While costs have increased as a result of options granted in the last half of 2004 and additional expenses incurred in relation to internal and external audit functions in this post Sarbanes Oxley world, there are also a number of severance, financial advisory and legal fees not associated with ongoing business which amounted to approximately \$4 million in the quarter.

It is also important to note that during the six to nine month period following the sales transactions mentioned earlier, general and administrative expenses will be reduced as the corporate functions will be sized to match the needs of the smaller business.

The effective tax rate on income from continuing operations has increased in 2005 as a result of the increased non-deductible options expense and a tax law change in the second quarter that was made effective January 1, 2005.

LIQUIDITY AND CAPITAL RESOURCES

The Corporation's liquidity position continues to improve with cash flow from operations and from the exercise of stock options exceeding net capital spending by \$185 million in the first six months of 2005. As a result the Corporation's cash balance has increased to \$307 million and the \$335 million revolving bank credit facility remains undrawn. During July 2005 the Corporation issued 244,950 shares on the exercise of stock options.

(1) OPERATING EARNINGS - NON-GAAP MEASURE

OPERATING EARNINGS IS NOT A RECOGNIZED MEASURE UNDER CANADIAN GENERALLY ACCEPTED ACCOUNTING PRINCIPLES (GAAP). MANAGEMENT BELIEVES THAT IN ADDITION TO NET EARNINGS, OPERATING EARNINGS IS A USEFUL SUPPLEMENTAL MEASURE AS IT PROVIDES AN INDICATION OF THE RESULTS GENERATED BY THE CORPORATION'S PRINCIPAL BUSINESS ACTIVITIES PRIOR TO CONSIDERATION OF HOW THOSE ACTIVITIES ARE FINANCED OR HOW THE RESULTS ARE TAXED IN VARIOUS JURISDICTIONS. INVESTORS SHOULD BE CAUTIONED, HOWEVER, THAT OPERATING EARNINGS SHOULD NOT BE CONSTRUED AS AN ALTERNATIVE TO NET EARNINGS DETERMINED IN ACCORDANCE WITH GAAP AS AN INDICATOR OF PRECISION'S PERFORMANCE. PRECISION'S METHOD OF CALCULATING OPERATING EARNINGS MAY DIFFER FROM OTHER COMPANIES AND, ACCORDINGLY, OPERATING EARNINGS MAY NOT BE COMPARABLE TO MEASURES USED BY OTHER COMPANIES.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

(TABULAR AMOUNTS STATED IN THOUSANDS OF DOLLARS)

1. BASIS OF PRESENTATION

These interim financial statements were prepared using accounting policies and methods of their application consistent with those used in the preparation of the Corporation's audited financial statements for the year ended December 31, 2004, except as noted below. These interim financial statements conform in all respects to the requirements of generally accepted accounting principles in Canada for annual financial statements with the exception of certain note disclosures regarding balance sheet items and transactions occurring prior to the current reporting period. As a result, these interim financial statements should be read in conjunction with the Corporation's audited financial statements for the year ended December 31, 2004 contained in the Corporation's 2004 annual report.

2. SEASONALITY OF OPERATIONS

The majority of the Corporation's operations are carried on in Canada. The ability to move heavy equipment in the Canadian oil and natural gas fields is dependent on weather conditions. As warm weather returns in the spring, the winter's frost comes out of the ground rendering many secondary roads incapable of supporting the weight of heavy equipment until they have thoroughly dried out. The duration of this "spring breakup" has a direct impact on the Corporation's activity levels. In addition, many exploration and production areas in northern Canada are accessible only in winter months when the ground is frozen hard enough to support equipment. The timing of freeze up and spring breakup affects the ability to move equipment in and out of these areas. As a result, late March through May is traditionally our slowest time.

3. CHANGES IN ACCOUNTING ESTIMATE

Effective January 1, 2005 Precision changed the useful life of its drilling rigs for purposes of determining depreciation expense to 5,000 utilization days from 4,150 utilization days (3,650 operating days), and its drill string to 1,500 from 1,100 operating days. Utilization days include both operating and rig move days. This change in accounting estimate has been applied prospectively and resulted in \$3.1 million reduction of depreciation expense for the three months ended and a \$7.9 million reduction for the six months ended June 30, 2005. Of these amounts \$1.1 million and \$4.3 million relate to continuing operations for the three and six months ended June 30, 2005, respectively.

4. DISCONTINUED OPERATIONS

Edgar Filing: PRECISION DRILLING CORP - Form 6-K

On June 6, 2005, the Corporation entered into an agreement to dispose of its Energy Services and International Contract Drilling divisions to Weatherford International Ltd. for proceeds of approximately US\$900 million and 26 million common shares of Weatherford International. The transaction is expected to close on or about September 1, 2005 and is subject to regulatory approvals and other customary closing conditions. In addition, in the second quarter of 2005, the Corporation adopted a formal plan to dispose of its industrial and plant maintenance business carried on by CEDA. These dispositions are in accordance with an extensive process undertaken by the Corporation's board of directors to explore avenues of valuation creation for the Corporation's shareholders.

On February 12, 2004, the Corporation sold substantially all of the assets of Fleet Cementers Inc. On May 7, 2004 the Corporation sold the assets of the Polar Completions division. On August 31, 2004 the Corporation sold its 65% interest in United Diamond Ltd.

Results of the operations of these businesses have been classified as results of discontinued operations. The following table provides additional information with respect to amounts included in the results of discontinued operations.

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

As of the end of second quarter ended June 30, 2005, an evaluation of the effectiveness of Precision's "disclosure controls and procedures" (as such term is defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act")) was carried out by Precision's principal executive officer and principal financial officer. Based upon that evaluation, the principal executive officer and principal financial officer have concluded that as of the end of that fiscal quarter, Precision's disclosure controls and procedures are effective to ensure that information required to be disclosed by Precision in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and forms.

During the second quarter ending June 30, 2005, there were no changes in Precision's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, Precision's internal control over financial reporting.

It should be noted that while Precision's principal executive officer and principal financial officer believe that Precision's disclosure controls and procedures provide a reasonable level of assurance that they are effective, they do not expect that Precision's disclosure controls and procedures or internal control over financial reporting will prevent all errors and fraud. A control system, no matter how well conceived or operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met.
