IMPORTANT NOTICE REGARDING DELIVERY OF SHAREHOLDER DOCUMENTS

The Securities and Exchange Commission (SEC) permits mutual funds to deliver only one copy of shareholder documents, including prospectuses, proxy statements and shareholder reports, to fund investors with multiple accounts at the same residential or post office box address. This practice is often called "householding" and it helps eliminate duplicate mailings to shareholders.

Eaton Vance, or your financial adviser, may household the mailing of your documents indefinitely unless you instruct Eaton Vance, or your financial adviser, otherwise.

If you would prefer that your Eaton Vance documents not be householded, please contact Eaton Vance at 1-800-262-1122, or contact your financial adviser.

Your instructions that householding not apply to delivery of your Eaton Vance documents will be effective within 30 days of receipt by Eaton Vance or your financial adviser.

EATON VANCE SENIOR INCOME TRUST AS OF JUNE 30, 2002

Letter to Shareholders

[Photo of James B. Hawkes]

James B. Hawkes President

Amid sharply lower interest rates, Eaton Vance Senior Income Trust again provided a significant yield advantage in a portfolio of senior floating-rate loans. Based on the Trust's June monthly dividend of \$0.045 per share and a closing share price of \$7.76, the Trust's market yield was 6.96% at June 30, 2002.

SHORT-TERM INTEREST RATES FELL TO HISTORIC LOWS DURING THE FISCAL YEAR...

In the second half of 2001, the Federal Reserve continued the rate cuts it began earlier in the year. By the end of 2001, the Fed had reduced rates by 475 basis points (4.75%), putting short-term rates at a 40-year low. LIBOR (London Interbank Offered Rate), the base rate for floating-rate loans, declined in line with short-term rates. Not surprisingly, lower LIBOR rates had a profound effect on total returns for floating-rate loans. However, while returns were somewhat lower than in previous years, the loan market remained a relative haven from the unnerving volatility of the equity and high-yield bond markets.

THE TRUST'S LOANS ARE SENIOR AND TYPICALLY SECURED, ADDING AN EXTRA MEASURE OF SECURITY \ldots

Having experienced a recession, a poor credit climate, ongoing concerns over global terrorism and repeated jolts to confidence, investors have had to endure a good deal in the past year. However, in a poor credit environment, the Trust's floating-rate loans have continued to provide an added measure of security. Loans are typically senior and secured. They are senior, which means that they rank high in the corporate capital structure and that lenders will be paid before bondholders and other subordinated lenders. In addition, many are secured, which means that the loans are fully backed by collateral, such as accounts receivable, inventory, facilities, and intangibles. In the event of a reversal of fortune, secured status represents a major advantage and, historically, has greatly improved recovery rates when compared to bonds and other junior subordinated debt.

<code>FLOATING-RATE</code> LOANS <code>REMAIN</code> A GOOD <code>MEANS</code> FOR <code>REDUCING</code> <code>RISK</code> IN AN <code>INVESTOR'S</code> <code>PORTFOLIO</code> ...

Given the recent volatility in the financial markets and increasing investor anxiety, the loan market remains an excellent vehicle for diminishing the risk of a diversified investment portfolio. While demonstrating much less volatility than other financial assets, floating-rate loans have continued to provide a significant yield advantage over other short-term income vehicles. In the pages that follow, co-portfolio managers John Redding, Scott Page and Payson Swaffield review the events of the past year and offer their insights on the period ahead.

Sincerely,

/s/ James B. Hawkes

James B. Hawkes President August 7, 2002

MANAGEMENT DISCUSSION

[photo of John P. Redding} John P. Redding

An interview with John P. Redding, Scott H. Page and Payson F. Swaffield, co-portfolio managers of Eaton Vance Senior Income Trust.

- Q: John, over the past year, many U.S. financial markets have been hurt by the weak economy, worries over global terrorism and investor concerns about corporate governnance. Has the loan market been similarly affected?
- A: MR. REDDING: Without question, this has been a very difficult year for the loan market. Credit conditions have deteriorated, and the default rate has remained toward the high end of its historical range. The weak economy resulted in a sharp decline in interest rates in 2001. Floating-rate loans are priced at a spread over LIBOR (London Interbank Offered Rate), historically fluctuating with changes in the Federal Funds rate. With short-term rates at 40-year lows, returns on loans have understandably reflected that trend.

The economy was just starting to show some anecdotal signs of recovery in the second half of 2001, when the events of September 11 dealt the economy another severe shock. With consumer confidence waning, businesses reined in their capital investment plans as well, further clouding the economic outlook.

Meanwhile, the ongoing threat of more terrorist actions has remained a major concern. And finally, the issue of corporate governance, highlighted by several prominent cases of corporate malfeasance, further dampened investor sentiment. So it has been a very difficult climate for the financial markets in general, and the loan market has been no exception.

[photo of Scott H. Page]

Scott H. Page

- Q: Scott, how would you assess the performance of the Trust in these conditions?
- A: MR. PAGE: The Trust's negative total return on a share price basis was a result of a 13.2% decline in share price and generally reflected the increasing skittishness of the financial markets. However, even at these depressed interest rate levels, the Trust had a market yield of 6.96% at June 30, 2002, still well above most other income-producing vehicles. (1) On a net asset basis, the Trust registered a positive total return of 2.92%. (2) That return significantly outperformed the 0.94% return of the Trust's benchmark, the CSFB Leveraged Loan Index. (3) The Trust benefited especially from having dramatically reduced its telecom holdings last year. Specifically, the Trust avoided the troubled areas of broadband and competitive local exchange areas, which have been plagued by high debt levels and overcapacity.

Five Largest Sector Weightings (4)

Cable Television	11.2%
Chemicals	10.6%
Manufacturing	9.0%
Health Care - Providers & Services	8.2%
Food, Beverages & Tobacco	7.7%

Trust Overview(4)

Total net assets	\$302.8 million
Number of borrowers	240
Industries represented	48
Collateral coverage ratio	1.5 to 1
Weighted days-to-interest rate reset	51 days
Average maturity	5.7 Yrs.
Average size per borrowing	\$1.9 million

(1) The Trust's market yield is calculated by dividing the most recent dividend per share by the share market price at the end of the period and annualizing the result. (2) Returns are historical and are calculated by determining the percentage change in market value or net asset value with all distributions reinvested. (3) The CSFB Leveraged Loan Index – a representative index of tradable, senior, secured, U.S. dollar-denominated leveraged loans. It is not possible to invest directly in an Index. (4) Five Largest Sector Weightings account for 46.7% of the Trust's investments, determined by dividing the total market value of the holdings by the total investments of the Trust. Five Largest Sector Weightings and Trust Overview are as of 6/30/02 and are subject to change. Trust Overview information refers only to the senior floating-rate loan portion of the Trust.

Shares of the Trust are not insured by the FDIC and are not deposits or other obligations of, or guaranteed by, any depository institution. Shares are subject to investment risks, including possible loss of principal invested. Yield will change.

[photo of Payson F. Swaffield] Payson F. Swaffield

Q: Payson where did the Trust focus its investments?

A: MR. SWAFFIELD: The Trust has emphasized companies that we believe are

well-positioned to weather a slow recovery, especially those we believe are quality companies that are leaders in their industries and have reasonable debt levels. That has meant a strong focus on basic industries, stalwarts such as specialty chemical manufacturers and manufacturers with relatively strong balance sheets. Lyondell Petrochemicals, for example, produces chemicals used in manufacturing, refined petroleum products, food processing and personal care products, and benefits from a broadly diversified customer base.

Another theme has been defensive companies, such as drug retailers and foods and beverages. Not only do these companies tend to be recession-resistant, but they are well-secured by very high quality inventories.

- Q: You mentioned that investors have been increasingly concerned over matters of corporate governance. Has the Trust been affected by any of those issues?
- A: MR. REDDING: Yes. Adelphia Communications, Inc., one of the nation's largest cable providers, has been a core holding of the Trust. (As of June 30, 2002, Adelphia through investments in subsidiaries Century Cable Holdings, Hilton Head and Olympus Cable Holdings represented 3.1% of the Trust's investments.) In March, the company disclosed that it had discovered financial irregularities by controlling family interests. The family surrendered control in May 2002, and several individuals have subsequently been charged with fraud. In June 2002, the company filed a Chapter 11 bankruptcy petition. These events caused Adelphia's outstanding securities including its loans to be valued lower. Despite this market price movement, we have good reason to believe that recovery will be at, or near, par, based on an overall debt-per-subscriber level, which is well below current industry valuation levels. The Adelphia filing impacted the overall cable sector and caused loans to other cable companies including healthy operators to be valued lower.
- Q: It's noteworthy that, despite the Adelphia difficulties, cable television providers - at 10.2% - remained among the Trust's largest holdings. Could you address that?
- A: MR. SWAFFIELD: Yes. The cable business continues to boast very compelling fundamentals. Cable operators have enjoyed revenue growth and surprising pricing flexibility, even in a weak economy, a fact that has distinguished them in the past year from industries that are more economically sensitive. While the group has traded lower in recent months in response to the Adelphia filing, companies like Insight Midwest Holdings and Charter Communications remain healthy operators.

Insight has targeted an attractive market niche in rural areas, where the subscriber growth rate remains fairly high. For its part, Charter has upgraded its network in the face of competition from other technologies, and expects to generate additional revenue from advanced services such as digital video and high-speed Internet connections.

- Q: What is your outlook for the loan market in the coming year?
- A: MR. PAGE: Although we believe the economy has embarked on a tentative recovery, in recent months there has been a disconnect between economic trends and investor confidence. That is due, in part, to the lingering anxieties over geopolitical events, as well as to the troubling cases of corporate malfeasance. While those sentiments are understandable in the short-term, economic fundamentals will dictate market trends in the long run.

MR. SWAFFIELD: The Federal Reserve made a determined bid to revive the economy throughout 2001 and, in recent testimony, Fed Chairman Greenspan has

suggested that a recovery, however slow, is under way. While the timing of an eventual uptick in interest rates is far from certain, such a trend would likely benefit floating-rate loans, which are unique among income-producing vehicles in that their returns can actually improve when interest rates rise.

MR. REDDING: It's worth noting that, in the wake of the recession and the corporate governance issues, lenders have become much more demanding of borrowers, insisting on more conservative lending terms and stricter covenants. That is a positive trend for the loan market and for investors. Moreover, ironing out the excesses of the 1990s is a very healthy development and should leave the economy - and the loan market - in better shape for the future. We believe that the Trust's diversified portfolio of floating-rate loans represents a sound investment alternative in this uncertain period, and the Portfolio should be well-positioned when rates eventually move higher.

- (1) Senior floating rate interests often require prepayments from excess cash flows or permit the borrower to repay at its election. The degree to which borrowers repay, whether as a contractual requirement or at their election, cannot be predicted with accuracy. As a result, the actual remaining maturity may be substantially less than the stated maturities shown. However, it is anticipated that the senior floating rate interests will have an expected average life of approximately two to four years.
- (2) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers.
 * Non-income producing security.
- Note: At June 30, 2002, the Trust had unfunded commitments amounting to \$7,677,697 under various revolving credit agreements.

See Notes to financial statements.

preferred share(8)	\$	25,000	\$	25,000	
Approximate market value per preferred					
share(8)	\$	25,000	\$	25,000	

(1) Net investment income per share was computed using average shares outstanding.

(2) The Trust has adopted the provisions of the revised AICPA Audit and Accounting Guide for Inverse and began using the interest method to amortize premiums on fixed-income securities. The effect for the year ended June 30, 2002 was to increase net investment income per share by less than net realized and unrealized losses per share by less than \$0.001, and increase the ratio of mincome to average net assets attributable to common shares by less than 0.01%. Per share data periods prior to July 1, 2001 have not been restated to reflect this change in presentation.

(3) For the period from the start of business, October 30, 1998, to June 30, 1999.

(4) Total return is calculated assuming a purchase at market value on the first day and a sale at on the last day of the period reported. Dividends and distributions, if any, are assumed rein reinvestment date. Total return is not computed on an annualized basis.

(5) Ratios do not reflect the effect of dividend payments to preferred shareholders. Ratios to av attributable to common shares reflect the Trust's leverage capital structure.

(6) Annualized.

(7) Calculated by subtracting the Trust's total liabilities (not including the preferred shares) total assets, and dividing this by the number of preferred shares outstanding.

(8) Plus accumulated and unpaid dividends.

See notes to financial statements.

NOTES TO FINANCIAL STATEMENTS

1 Significant Accounting Policies

Eaton Vance Senior Income Trust (the Trust) is an entity commonly known as a Massachusetts business trust and is registered under the Investment Company Act of 1940 as a non-diversified closed-end management investment company. The Trust's investment objective is to provide a high level of current income consistent with the preservation of capital, by investing primarily in senior, secured floating rate loans. The following is a summary of significant accounting policies consistently followed by the Trust in the preparation of its financial statements. The policies are in conformity with accounting principles generally accepted in the United States of America.

Certain prior year amounts have been reclassified for presentation purposes.

A Investment Valuation -- The Trust's investments are primarily in interests in senior floating rate loans (Senior Loans). Certain Senior Loans are deemed liquid because reliable market quotations are readily available for them. Liquid loans are valued on the basis of prices furnished by a pricing service. Other Senior Loans are valued at fair value by the Trust's investment adviser, Eaton Vance Management (EVM), under procedures established by the Trustees as permitted by Section 2(a)(41) of the Investment Company Act of 1940. Such procedures include the consideration of relevant factors, data and information relating to fair value, including (i) the characteristics of and fundamental analytical data relating to the Senior Loan, including the cost, size, current interest rate, period until next interest rate reset, maturity and base lending rate of the Senior Loan, the terms and conditions of the Senior Loan and any related agreements and the position of the loan in the borrower's debt structure; (ii) the nature, adequacy and value of the collateral, including the Trust's rights, remedies and interests with respect to the collateral; (iii) the creditworthiness of the Borrower, based on evaluations of its financial condition, financial statements and information about the Borrower's business, cash flows, capital structure and future prospects; (iv) information relating to the market for the Senior Loan including price quotations for and trading in the Senior Loan and interests in similar loans and the market environment and investor attitudes towards the Senior Loan and interests in similar loans; (v) the reputation and financial condition of the agent and any intermediate participant in the loan; and (vi) general economic and market conditions affecting the fair value of the Senior Loan. Other portfolio securities (other than short-term obligations, but including listed issues) may be valued on the basis of prices furnished by one or more pricing services which determine prices for normal, institutional-size trading units of such securities using market inform
