#### FORWARD-LOOKING STATEMENTS

In order to utilize the “Safe Harbor” provisions of the United States Private Securities Litigation Reform Act of 1995 (the “Reform Act”), Sappi Limited (the “Company”) is providing the following cautionary statement. Except for historical information contained herein, statements contained in this Report on Form 6-K may constitute “forward-looking statements” within the meaning of the Reform Act. The words “believe”, “anticipate”, “expect”, “intend”, “estimate”, “plan”, “assume”, “positioned”, “will”, “may”, “should”, “risk” and other similar expressions which are predictions of or indicate future events and future trends which do not relate to historical matters identify forward-looking statements. In addition, this Report on Form 6-K may include forward-looking statements relating to the Company’s potential exposure to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity price risk. Reliance should not be placed on forward-looking statements because they involve known and unknown risks, uncertainties and other factors which are in some cases beyond the control of the Company, together with its subsidiaries (the “Group”), and may cause the actual results, performance or achievements of the Group to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements (and from past results, performance or achievements). Certain factors that may cause such differences include but are not limited to: the highly cyclical nature of the pulp and paper industry; pulp and paper production, production capacity, input costs including raw material, energy and employee costs, and pricing levels in North America, Europe, Asia and southern Africa; any major disruption in production at the Group’s key facilities; changes in environmental, tax and other laws and regulations; adverse changes in the markets for the Group’s products; any delays, unexpected costs or other problems experienced with any business acquired or to be acquired; consequences of the Group’s leverage; adverse changes in the South African political situation and economy or the effect of governmental efforts to address present or future economic or social problems; and the impact of future investments, acquisitions and dispositions (including the financing of investments and acquisitions) and any delays, unexpected costs or other problems experienced in connection with dispositions. These and other risks, uncertainties and factors are discussed in the Company’s Annual Report on Form 20-F and other filings with and submissions to the Securities and Exchange Commission, including this Report on Form 6-K. Shareholders and prospective investors are cautioned not to place undue reliance on these forward-looking statements. These forward-looking statements are made as of the date of the submission of this Report on Form 6-K and are not intended to give any assurance as to future results. The Company undertakes no obligation to publicly update or revise any of these forward-looking statements, whether to reflect new information or future events or circumstances or otherwise.

comment

Our operating performance improved further in the quarter with all of our fine paper businesses improving their margins and returns. Forest Products reported a strong quarter supported by strong pulp prices and good demand in the southern African markets. Although improved, Fine Paper's margins and returns are still well short of acceptable levels. A major factor was high input costs including wood, chemical and energy costs. As a group we sell slightly more pulp than we purchase which provides an economic hedge in terms of pulp prices, but the European and southern African Fine Paper businesses purchase more than half of their pulp requirements, consequently their margins continue to be squeezed by high pulp prices and other input costs.

Coated fine paper prices in North America have started improving but margins remain under pressure from high input costs. In Europe, the price gains made earlier in the year have largely been surrendered due to very competitive markets despite high operating rates for us and the industry as a whole.

Demand for coated fine paper grew at about 1% in Europe compared with the previous year. In North America shipments by local producers declined largely as a result of capacity closures. Pulp markets remain very strong; NBSK prices for the quarter averaged US\$800 per ton, up about US\$100 compared to a year ago.

Our sales were US\$1.42 billion, an increase of 10%, reflecting strong order books in all our businesses. Operating profit increased 70% to US\$87 million. Operating profit excluding special items increased to US\$96 million (2006: US\$62 million).

Special items excluded from operating profit in the quarter include fire damage to our southern African forests of US\$8 million, profit on sale of assets US\$1 million and a loss from a change in the fair value of plantations of US\$2 million. Details of these are set out in note 4 to the financial statements.

Net finance costs were US\$27 million compared to US\$37 million a year ago and included interest capitalised of US\$6 million, foreign exchange gains of US\$4 million and a favourable change in fair value of financial instruments of US\$3 million.

Basic earnings per share for the quarter grew to 27 US cents compared to 18 US cents last year.

sappi limited – fourth quarter page 2

sappi limited – fourth quarter page 3  
year ended September 2007 compared to  
year ended September 2006

There has been a continuing trend of improvement in operating performance quarter by quarter through the year. Sales for the year increased 7% to US\$5.3 billion. Operating profit increased to US\$383 million from US\$125 million last year. Operating profit excluding special items increased to US\$313 million from US\$91 million last year. Special items amounted to US\$70 million which included US\$54 million plantation fair value gain, US\$26 million profit on sale of fixed assets and US\$15 million fire damage.

Net finance costs for the year were US\$134 million compared to US\$130 million in the prior year and included interest capitalised of US\$14 million and an unfavourable change in fair value of financial investments of US\$9 million.

The effective tax rate for the year was 19% and was reduced by rate changes offset by non-recognition of deferred tax assets.

Basic earnings per share for the year was 89 US cents compared to a loss of 2 US cents last year.  
cash flow and debt

Cash generated by operations increased to US\$182 million for the quarter from US\$158 million a year ago. Working capital was reduced by US\$140 million compared to a reduction of US\$80 million a year ago as a result of tight management of working capital in all regions.

During the quarter net finance costs paid increased to US\$52 million compared to US\$22 million a year ago as a result of the roll-over of forward exchange contracts related to long term debt.

The cash effect of investing activities was US\$120 million in the quarter compared to US\$109 million a year ago and US\$154 million in the prior quarter.

Net debt at year end was US\$2,257 million, compared to US\$2,113 million at the start of the year. After taking account of the non-cash currency impact of US\$168 million on the value of debt, net debt was reduced by US\$24 million. This is in line with our commitment to proceed with the Saiccor expansion project without materially increasing debt levels. Net debt to total capitalisation was 43.2% compared to 46.4% in September 2006.

A South African subsidiary issued bonds, maturing in four years, to the value of ZAR1 billion (US\$140 million) on 25 September 2007 to replace short term debt.

All the regions improved operating profit excluding special items and margins compared to a year ago. Sales volumes increased by 3.3% compared to a year ago and net sales increased by 8.6% to US\$1.1 billion, mainly as a result of the higher volumes, improved prices in North America and southern Africa, and the currency conversion of non-dollar sales to a weaker US Dollar. The operating profit excluding special items improved to US\$29 million compared to breaking even a year ago. The operating margin of 2.6% remains well below target.

Sales volume increased 1% compared to a year ago but 6% compared to the prior quarter as we regained some market share lost when we held a strong position on prices earlier in the year. Average prices realised were at similar levels to a year earlier and 1.5% below the previous quarter due to fiercely competitive market conditions.

Operating profit excluding special items improved to US\$17 million from a loss of US\$8 million a year ago. The cost reduction programme initiated in 2005 continues to help offset the impact of high input costs including wood, pulp, chemical and energy costs as well as employment inflation.

In Europe apparent consumption for coated fine paper grew 1% compared to a year ago. Despite reported industry operating rates of 93% for coated fine paper, prices retreated during the quarter, giving up the gains achieved earlier in the year. There have been some price improvements in specific markets.

The three new products launched in the past two quarters have been well received in the market. Sales volumes increased by 8% compared to a year ago after we regained some market share lost in the previous year. Average prices realised for paper increased compared to a year ago and compared to the previous quarter. Further increases are being implemented.

Operating profit excluding special items improved in the quarter to US\$9 million compared to US\$7 million a year ago.

We continue to implement cost reductions throughout our operations to offset high input costs.

Apparent consumption for coated fine paper declined significantly. It was impacted by reduced imports of coated fine paper. It appears that inventories of imported product have declined and that some of these imports are now recorded as coated mechanical paper, which is free of the anti-dumping and countervailing duties recently applied to certain Asian exporters. Shipments from domestic producers declined 4% reflecting a reduction in capacity following the closure of approximately 800,000 tons of higher cost coated fine paper capacity over the past two years.

*\* See note 4 to the financial statements on page 17*

The business performed strongly reflecting increasing international pulp prices and good demand for our products, particularly packaging paper in southern Africa. Demand for chemical cellulose was strong.

Operating efficiency continued to improve, however there is scope for further improvement. Energy and employment costs have continued to rise at a rate exceeding the local rate of inflation, which is approximately 6%. A general shortage of technical skills is exacerbating employment cost pressures.

Managing these costs is a priority going forward.

During the quarter we experienced extensive plantation fires resulting in a charge of US\$8 million (before tax) included in special items. The fires suffered in the third and fourth quarter were the worst fires ever experienced in South Africa. The combined pre-tax charge for the two quarters was US\$15 million before tax. Good rains have virtually ended the risk of more fires this season.

Special items also included a plantation fair value price charge of US\$2 million compared to a gain of US\$10 million a year ago. The reversal of the Usutu impairment of US\$40 million in the fourth quarter 2006 is reported as a special item.

The Saiccor expansion project is progressing well and is on track for a second calendar quarter 2008 start up. The estimated capital expenditure for the project will be approximately US\$500 million.

dividend

The board has approved a dividend, Number 84, of 32 US cents for the year ended September 2007.

A dividend of 30 US cents was paid for the previous year.

sappi limited – fourth quarter page 8

directors

Ralph Boöttger, who joined the board as Chief Executive Officer on 01 July 2007, took executive authority for the company in August following an intensive introductory tour. At that date, the group's Chairman, Eugene van As, resumed his non-executive role.

John (Jock) McKenzie joined the board as non-executive director on 01 September 2007.

outlook

Management's priority is the continuing improvement of our margins and operating efficiencies. We expect the turnaround of our North American business, which is well under way, to continue. In Europe our focus is on further improving operational efficiencies, continuous cost reductions and price recovery, to help restore margins. The southern African business continues to benefit from strong local demand and the high international pulp prices.

Supply/demand conditions for coated fine paper in North America remain favourable for improved pricing; however, there are signs of the economy cooling, which could have some impact on demand during 2008.

Despite the high operating rates in Europe prices remain low and industry margins continue to decline.

Pulp prices have continued to rise in October 2007 and NBSK prices are US\$30 per ton higher than the average for the September quarter.

Input cost pressures remain high in all our businesses. While we expect to be able to offset these costs to some extent through cost reduction efforts and improved efficiency, improving our revenue line through volume and mix improvements, improved margin management, innovation and improved pricing, is a priority. We will also continue to focus on working capital management and cash generation.

The weakness in the US Dollar at the time of writing is expected to have an unfavourable impact on our European and southern African businesses.

Our first financial quarter is usually weaker than the fourth financial quarter due to a seasonal slowdown in activity at the end of the calendar year. We do, however, expect earnings excluding special items to be stronger than the equivalent quarter last year.

We expect some increase in net debt as the Saiccor expansion nears completion over the next two quarters, but expect it to return to current levels by the end of the financial year.

Maintaining momentum of the trend of continuous improvement in the profitability of Sappi remains the top priority. A key focus is our commitment to excellence in customer service and innovation in our product offerings.

dividend announcement

The directors have declared a dividend (number 84) of 32 US cents per share for the year ended September 2007.

In compliance with the requirements of STRATE, the JSE electronic settlement system which is applicable to Sappi, the salient dates in respect of the dividend will be as follows:

Last day to trade to qualify for dividend

Thursday, 27 December 2007

Date on which shares commence trading ex-dividend

Friday, 28 December 2007

Record date

Friday, 04 January 2008

Payment date

Tuesday, 08 January 2008

Dividends payable from the Johannesburg transfer office will be paid in South African Rands except that dividends payable to nominee shareholders in respect of shares which they hold on behalf of non-residents of the Republic of South Africa will without exception be paid in United States Dollars. There will not be any currency election.

Dividends payable from the London transfer office will be paid in British Pounds Sterling or in the case of shareholders with registered addresses in the USA, in United States Dollars.

Dividends payable other than in United States Dollars will be calculated at the respective rates of exchange ruling at 01:30 Central European Time as per Reuters on Tuesday, 18 December 2007, and announced on Tuesday, 18 December 2007.

There will not be any de-materialisation nor re-materialisation of Sappi Limited share certificates from Friday 28 December 2007 to Friday 04 January 2008, both days inclusive.

forward-looking statements

Certain statements in this release that are neither reported financial results nor other historical information, are forward-looking statements, including but not limited to statements that are predictions of or indicate future earnings, savings, synergies, events, trends, plans or objectives. Undue reliance should not be placed on such statements because, by their nature, they are subject to known and unknown risks and uncertainties and can be affected by other factors, that could cause actual results and company plans and objectives to differ materially from those expressed or implied in the forward-looking statements (or from past results). Such risks, uncertainties and factors include, but are not limited to the highly cyclical nature of the pulp and paper industry (and the factors that contribute to such cyclicity, such as levels of demand, production capacity, production, input costs including raw material, energy and employee costs, and pricing), adverse changes in the markets for the group's products, consequences of substantial leverage, changing regulatory requirements, unanticipated production disruptions, economic and political conditions in international markets, the impact of investments, acquisitions and dispositions (including related financing), any delays, unexpected costs or other problems experienced with integrating acquisitions and achieving expected savings and synergies and currency fluctuations. The company undertakes no obligation to publicly update or revise any of these forward-looking statements, whether to reflect new information or future events or circumstances or otherwise.

1.

Basis of preparation

The condensed financial statements have been prepared in accordance with International Accounting Standard 34 Interim Financial Reporting. The accounting policies and methods of computation used in the preparation of the results are consistent, in all material respects, with those used in the annual financial statements for September 2006 which are compliant with the English language version of International Financial Reporting Standards (IFRS) as published by the International Accounting Standards Board.

The preliminary results for the year ended 30 September 2007 have been reviewed in terms of the International Standard on Review Engagements 2400 by the group’s auditors, Deloitte & Touche. Their unmodified review report is available for inspection at the company’s registered offices. The results for the quarters ended September 2007, June 2007, March 2007 and December 2006 have not been audited or reviewed.

Included in other operating expenses (income) for the years ended September 2007 and September 2006 are items (b), (c), (e) and (f) as disclosed in note 4.

4.

Special items

Special items cover those items which management believe are material by nature or amount to the year's/quarter's results and require separate disclosure in accordance with IAS 1 paragraph 86. Such items would generally include profit and loss on disposal of property, investments and businesses, asset impairments, restructuring charges, natural disasters and non-cash gains or losses on the price fair value adjustment of plantations.

Material balance sheet movements

Non-current interest-bearing borrowings

A South African subsidiary issued bonds to the value of ZAR1 billion (US\$140 million) on 25 September 2007. The bonds were issued at a fixed rate of 10.64% and mature on 14 October 2011.

Other non-current assets

The increase in other non-current assets relates largely to the recognition of the pension fund asset in our South African

subsidiary and the recognised actuarial gain on the pension asset to the value of ZAR599 million (US\$83 million).

10. Secondary Tax on Companies (STC)

During the annual South African 'budget speech' the Minister of Finance announced a rate reduction in South Africa's STC rate from 12.5% to 10% and the proposed replacement of STC with a tax on dividends. The rate reduction resulted in a US\$2 million charge in the March quarter's results because of the write-down of the related STC asset. There is a remaining asset of US\$10 million which may be impacted by the proposed change in legislation in this area.

supplemental information

*general definitions*

Average – averages are calculated as the sum of the opening and closing balances for the relevant period divided by two

Fellings – the amount charged against the income statement representing the standing value of the plantations harvested

NBSK – Northern Bleached Softwood Kraft pulp. One of the main varieties of market pulp, mainly produced from spruce trees in Scandinavia, Canada and north eastern USA. The NBSK is a benchmark widely used in the pulp and paper industry for comparative purposes

SG&A – selling, general and administrative expenses

Non-GAAP measures

The group believes that it is both useful and necessary to report these non-GAAP measures for the following reasons:

–

these measures are used by the group for internal performance analysis;

–

the presentation by the group's reported business segments of these measures facilitates comparability with other companies in our industry, although the group's measures may not be comparable with similarly titled profit measurements reported by other companies; and

–

it is useful in connection with discussion with the investment analyst community and debt rating agencies.

These non-GAAP measures should not be considered in isolation or construed as a substitute for GAAP measures in accordance with IFRS.

Headline earnings – as defined in circular 8/2007 issued by the South African Institute of Chartered Accountants, separates from earnings all separately identifiable re-measurements. It is not necessarily a measure of sustainable earnings. It is a listing requirement of the JSE Limited to disclose headline earnings per share

Net debt – current and non-current interest-bearing borrowings, and bank overdrafts (net of cash, cash equivalents and short-term deposits)

Net debt to total capitalisation – Net debt divided by shareholders' equity plus minority interest, non-current liabilities, current interest-bearing borrowings and overdraft

Net operating assets – total assets (excluding deferred taxation and cash) less current liabilities (excluding interest-bearing borrowings and bank overdraft)

Net assets – total assets less current liabilities

Net asset value – shareholders' equity plus net deferred tax

Net asset value per share – net asset value divided by the number of shares in issue at balance sheet date

ROE – return on average equity. Profit for the period divided by average shareholders' equity

RONOA – operating profit excluding special items divided by average net operating assets

Special items – special items cover those items which management believe are material by nature or amount to the year's/quarter's results and require separate disclosure in accordance with IAS 1 paragraph 86. Such items would generally include profit and loss on disposal of property, investments and businesses, asset impairments, restructuring charges, natural disasters and non-cash gains or losses on the price fair value adjustment of plantations.

EBITDA excluding special items – earnings before interest (net finance costs), tax, depreciation, amortisation and special items

*The above financial measures are presented to assist our shareholders and the investment community in interpreting our financial*

*results. These financial measures are regularly used and compared between companies in our industry.*

*In connection with the U.S. Securities Exchange Commission (“SEC”) rules relating to “Conditions for Use of Non-GAAP Financial Measures”, we have reconciled EBITDA excluding special items to net profit rather than operating profit. As a result our definition retains minority interest as part of EBITDA excluding special items. Operating profit excluding special items represents earnings before interest (net finance costs), taxation and special items. Net finance costs includes: gross interest paid; interest received; interest capitalised; net foreign exchange gains; and net fair value adjustments on interest rate financial instruments. See the group income statement for an explanation of the computation of net finance costs. Special items cover those items which management believe are material by nature or amount to the year’s/quarter’s results*

*and require separate disclosure in accordance with IAS 1 paragraph 86. Such items would generally include profit and loss on disposal of property, investments and businesses, asset impairments, restructuring charges, natural disasters and non-cash gains or losses on the price fair value adjustment of plantations. EBITDA excluding special items represents operating profit before depreciation, amortisation and special items. We use both Operating profit excluding special items and EBITDA excluding special items as internal measures of performance to benchmark and compare performance, both between our own operations and as against other companies. Operating profit excluding special items and EBITDA excluding special items are measures used by the group, together with measures of performance under IFRS and US GAAP, to compare the relative performance of operations in planning, budgeting and reviewing the performances of various businesses. We believe they are useful and commonly used measures of financial performance in addition to net profit, operating profit and other profitability measures under IFRS or US GAAP because they facilitate operating performance comparisons from period to period and company to company. By eliminating potential differences in results of operations between periods or companies caused by factors such as depreciation and amortisation methods, historic cost and age of assets, financing and capital structures and taxation positions or regimes, we believe both Operating profit excluding special items and EBITDA excluding special items can provide a useful additional basis for comparing the current performance of the operations being evaluated. For these reasons, we believe Operating profit excluding special items and EBITDA excluding special items and similar measures are regularly used by the investment community as a means of comparison of companies in our industry. Different companies and analysts may calculate Operating profit excluding special items and EBITDA excluding special items differently, so making comparisons among companies on this basis should be done very carefully. Operating profit excluding special items and EBITDA excluding special items are not measures of performance under IFRS or US GAAP and should not be considered in isolation or construed as a substitute for operating profit or net profit as indicators of the company's operations in accordance with IFRS or US GAAP.*

*(2)*

*Operating profit excluding special items and EBITDA excluding special items have been presented for the first time this quarter. Previously normal EBITDA was presented. The change reflects the current internal management emphasis on both Operating profit excluding special items and EBITDA excluding special items.*

*(3)*

*Refer to page 19, Supplemental Information for the definition of the term.*
