CORE LABORATORIES N.V.

NOTES TO THE UNAUDITED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements include the accounts of Core Laboratories N.V. and its subsidiaries for which we have a controlling voting interest and/or a controlling financial interest. These financial statements have been prepared in accordance with United States ("U.S.") generally accepted accounting principles ("GAAP") for interim financial information using the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, these financial statements do not include all of the information and footnote disclosures required by U.S. GAAP and should be read in conjunction with the audited financial statements and the summary of significant accounting policies and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2015 (the "2015 Annual Report").

Core Laboratories N.V. uses the equity method of accounting for investments in which it has less than a majority interest and over which it does not exercise control but does exert significant influence. We use the cost method to record certain other investments in which we own less than 20% of the outstanding equity and do not exercise control or exert significant influence. Non-controlling interests have been recorded to reflect outside ownership attributable to consolidated subsidiaries that are less than 100% owned. In the opinion of management, all adjustments considered necessary for a fair statement of the results for the interim periods presented have been included in these financial statements. Furthermore, the operating results presented for the three months ended March 31, 2016 may not necessarily be indicative of the results that may be expected for the year ending December 31, 2016.

Core Laboratories N.V.'s balance sheet information for the year ended December 31, 2015 was derived from the 2015 audited consolidated financial statements but does not include all disclosures in accordance with U.S. GAAP.

Certain reclassifications were made to prior period amounts in order to conform to the current period presentation. These reclassifications had no impact on the reported net income or cash flows for the three months ended March 31, 2015.

References to "Core Lab", the "Company", "we", "our" and similar phrases are used throughout this Quarterly Report on Form 10-Q and relate collectively to Core Laboratories N.V. and its consolidated subsidiaries.

2. INVENTORIES

Inventories consist of the following (in thousands):

	March 31, December 31,	
	2016	2015
Finished goods	\$ 27,285	\$ 25,778
Parts and materials	12,693	12,637
Work in progress	1,724	2,491
Total inventories	\$ 41,702	\$ 40,906

We include freight costs incurred for shipping inventory to customers in the Cost of product sales line of the Consolidated Statements of Operations.

3. ACQUISITIONS

In the second quarter of 2015, we acquired a business providing additional reservoir fluids technology for \$17.2 million in cash. We accounted for this acquisition by allocating the purchase price to the net assets acquired based on their estimated fair values at the date of acquisition, resulting in an increase to goodwill of \$13.7 million and an increase of \$2.0 million in intangible assets. The acquisition of this entity did not have a material impact on our Consolidated Balance Sheet or Consolidated Statements of Operations, and was recorded in the Reservoir Description business segment.

4. LONG-TERM DEBT

We have no capital lease obligations. Long-term debt is summarized in the following table (in thousands):

	March 31, 2016	December 31, 2015
Senior notes	\$150,000	\$ 150,000
Credit facility	259,000	283,000
Other indebtedness	1,406	2,244
Total debt	410,406	435,244
Less: Short-term debt included in other indebtedness	(1,406)	(2,244)
Less: Debt issuance costs	(1,888)	(2,013)
Long-term debt, net	\$407,112	\$ 430,987

We have two series of senior notes outstanding with an aggregate principal amount of \$150 million ("Senior Notes") issued in a private placement transaction. Series A consists of \$75 million in aggregate principal amount of notes that bear interest at a fixed rate of 4.01% and are due in full on September 30, 2021. Series B consists of \$75 million in aggregate principal amount of notes that bear interest at a fixed rate of 4.11% and are due in full on September 30, 2023. Interest on each series of the Senior Notes is payable semi-annually on March 30 and September 30.

We maintain a revolving credit facility ("Credit Facility") that allows for an aggregate borrowing capacity of \$400 million. The Credit Facility also provides an option to increase the commitment under the Credit Facility by an additional \$50 million to bring the total borrowings available to \$450 million if certain prescribed conditions are met by the Company. The Credit Facility bears interest at variable rates from LIBOR plus 1.25% to a maximum of LIBOR plus 2.00%. Any outstanding balance under the Credit Facility is due August 29, 2019, when the Credit Facility matures. Our available capacity at any point in time is reduced by borrowings outstanding at the time and outstanding letters of credit which totaled \$25.8 million at March 31, 2016, resulting in an available borrowing capacity under the Credit Facility of \$115.2 million. In addition to those items under the Credit Facility, we had \$11.1 million of outstanding letters of credit and performance guarantees and bonds from other sources as of March 31, 2016.

The terms of the Credit Facility and Senior Notes require us to meet certain covenants, including, but not limited to, an interest coverage ratio (consolidated EBITDA divided by interest expense) and a leverage ratio (consolidated net indebtedness divided by consolidated EBITDA), where consolidated EBITDA (as defined in each agreement) and interest expense are calculated using the most recent four fiscal quarters. The Credit Facility has the more restrictive covenants with a minimum interest coverage ratio of 3.0 to 1.0 and a maximum leverage ratio of 2.5 to 1.0. We believe that we are in compliance with all such covenants contained in our credit agreements. Certain of our material, wholly-owned subsidiaries are guarantors or co-borrowers under the Credit Facility and Senior Notes.

In 2014, we entered into two interest rate swap agreements for a total notional amount of \$50 million. See Note 12 - Derivative Instruments and Hedging Activities.

The estimated fair value of total debt at March 31, 2016 and December 31, 2015 approximated the book value of total debt. The fair value was estimated using Level 2 inputs by calculating the sum of the discounted future interest and principal payments through the date of maturity.

5. PENSION

Defined Benefit Plan

We provide a non-contributory defined benefit pension plan for substantially all of our Dutch employees ("Dutch Plan") who were hired prior to 2007. The pension benefit is based on years of service and final pay or career average pay, depending on when the employee began participating. The benefits earned by the employees are immediately vested.

6

[Return to Index](#)

The following table summarizes the components of net periodic pension cost under the Dutch Plan for the three months ended March 31, 2016 and 2015 (in thousands):

	Three Months Ended March 31,	
	2016	2015
Service cost	\$358	\$463
Interest cost	327	309
Expected return on plan assets	(275)	(256)
Amortization of transition asset	—	(22)
Amortization of prior service cost	(19)	(19)
Amortization of actuarial loss	148	183
Net periodic pension cost	\$539	\$658

During the three months ended March 31, 2016, we contributed approximately \$1.0 million to fund the estimated 2016 premiums on investment contracts held by the Dutch Plan.

6. COMMITMENTS AND CONTINGENCIES

We have been and may from time to time be named as a defendant in legal actions that arise in the ordinary course of business. These include, but are not limited to, employment-related claims and contractual disputes or claims for personal injury or property damage which occur in connection with the provision of our services and products. Management does not currently believe that any of our pending contractual, employment-related, personal injury or property damage claims and disputes will have a material effect on our future results of operations, financial position or cash flow.

7. EQUITY (DEFICIT)

During the three months ended March 31, 2016, we repurchased 6,365 of our common shares for \$0.7 million. These consisted of rights to shares that were surrendered to us pursuant to the terms of a stock-based compensation plan in consideration of the participants' tax burdens that may result from the issuance of common shares under that plan. Such common shares, unless canceled, may be reissued for a variety of purposes such as future acquisitions, non-employee director stock awards or employee stock awards. We distributed 22,156 treasury shares upon vesting of stock-based awards during the three months ended March 31, 2016.

In February 2016, we paid a quarterly dividend of \$0.55 per share of common stock. In addition, on April 14, 2016, we declared a quarterly dividend of \$0.55 per share of common stock for shareholders of record on May 4, 2016 and payable on May 24, 2016.

The following table summarizes our changes in equity for the three months ended March 31, 2016 (in thousands):

	Common Shares	Additional Paid-In Capital	Retained Earnings	Accumulated Other Comprehensive Income (Loss)	Treasury Stock	Non-Controlling Interest	Total Equity (Deficit)
December 31, 2015	\$ 1,142	\$ —	\$ 219,207	\$ (10,538)	\$(238,875)	\$ 5,365	\$(23,699)
Stock based-awards	—	2,424	—	—	3,038	—	5,462
Tax benefit of stock-based awards issued	—	(68)	—	—	—	—	(68)
Repurchase of common shares	—	—	—	—	(696)	—	(696)
Dividends paid	—	—	(23,306)	—	—	—	(23,306)
Amortization of deferred pension costs, net of tax	—	—	—	97	—	—	97
Interest rate swaps, net of tax	—	—	—	(889)	—	—	(889)
Net income	—	—	15,082	—	—	35	15,117
March 31, 2016	\$ 1,142	\$ 2,356	\$ 210,983	\$ (11,330)	\$(236,533)	\$ 5,400	\$(27,982)

Accumulated other comprehensive income (loss) consisted of the following (in thousands):

	March 31, 2016	December 31, 2015
Transition asset	\$ —	\$ —
Prior service cost	647	661
Unrecognized net actuarial loss	(10,090)	(10,201)
Fair value of derivatives, net of tax	(1,887)	(998)
Total accumulated other comprehensive income (loss)	\$(11,330)	\$(10,538)

8. EARNINGS PER SHARE

We compute basic earnings per common share by dividing net income available to common shareholders by the weighted average number of common shares outstanding during the period. Diluted earnings per common and potential common shares include additional shares in the weighted average share calculations associated with the incremental effect of dilutive restricted stock awards and contingently issuable shares, as determined using the treasury stock method. The following table summarizes the calculation of weighted average common shares outstanding used in the computation of diluted earnings per share (in thousands):

	Three Months Ended March 31, 2016 2015	
Weighted average basic common shares outstanding	42,380	43,340
Effect of dilutive securities:		
Performance shares	83	64
Restricted stock	57	62
Weighted average diluted common and potential common shares outstanding	42,520	43,466

9. OTHER (INCOME) EXPENSE, NET

The components of other (income) expense, net, were as follows (in thousands):

	Three Months Ended March 31,	
	2016	2015
Sale of assets	\$(366)	\$(135)
Results of non-consolidated subsidiaries	(188)	(44)
Foreign exchange	779	840
Rents and royalties	(101)	(136)
Other, net	(128)	(203)
Total other (income) expense, net	\$(4)	\$322

Foreign exchange (gain) loss, net by currency is summarized in the following table (in thousands):

	Three Months Ended March 31,	
	2016	2015
Australian Dollar	125	119
British Pound	228	374
Canadian Dollar	(1)	1,274
Euro	210	(1,055)
Other currencies, net	217	128
Total (gain) loss, net	\$779	\$840

10. INCOME TAX EXPENSE

The effective tax rates for the three months ended March 31, 2016 and 2015 were 22.5% and 23.0%, respectively. Income tax expense of \$4.4 million in the first quarter of 2016 decreased by \$4.9 million compared to \$9.3 million in the same period in 2015, primarily in the United States as taxable income recognized in the United States decreased by \$15.1 million in 2016 compared to 2015. No other jurisdiction in which we operate had a material change in income tax expense.

Subsequent to March 31, 2016, our U.S. subsidiaries settled an audit covering the years 2010 through 2012 with the Internal Revenue Service that will result in the release of reserves for uncertain tax positions in the amount of \$0.9 million in the second quarter of 2016.

11. SEVERANCE AND OTHER CHARGES

In 2015, in response to reduced spending by our clients on their oil and gas fields as a result of lower commodity prices for crude oil and natural gas, we reduced our cost structure, primarily through a reduction in our workforce, to better align with the decreasing activity levels into the foreseeable future. As a result of these cost reductions, in 2015, we recorded severance charges of \$8.8 million, of which \$6.4 million was recorded in the first quarter of 2015. Approximately \$2.4 million was accrued and remaining to be paid at March 31, 2016.

During the first quarter of 2016, we continued to closely monitor rig counts, crude oil and natural gas prices, and activity levels within the industry. We continued to execute our cost reduction initiative which began in the first

quarter of 2015, but no additional expenses associated with severance or asset impairments were recorded during the first quarter of 2016.

9

[Return to Index](#)

12. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

We are exposed to market risks related to fluctuations in interest rates. To mitigate these risks, we utilize derivative instruments in the form of interest rate swaps. We do not enter into derivative transactions for speculative purposes.

Interest Rate Risk

Our Credit Facility bears interest at variable rates from LIBOR plus 1.25% to a maximum of LIBOR plus 2.00%. We are subject to interest rate risk on the debt carried through our Credit Facility.

In 2014, we entered into two interest rate swap agreements for a total notional amount of \$50 million to hedge changes in the variable rate interest expense on \$50 million of our existing or replacement LIBOR-priced debt. Under the first swap agreement of \$25 million, we have fixed the LIBOR portion of the interest rate at 1.73% through August 29, 2019, and under the second swap agreement of \$25 million, we have fixed the LIBOR portion of the interest rate at 2.5% through August 29, 2024. Each swap is measured at fair value and recorded in our Consolidated Balance Sheet as a liability. They are designated and qualify as cash flow hedging instruments and are highly effective. Unrealized losses are deferred to shareholders' equity as a component of accumulated other comprehensive loss (AOCL) and are recognized in income as an increase to interest expense in the period in which the related cash flows being hedged are recognized in expense.

At March 31, 2016, we had fixed rate long-term debt aggregating \$200 million and variable rate long-term debt aggregating \$209 million, after taking into account the effect of the swaps.

The fair values of outstanding derivative instruments are as follows:

	Fair Value of Derivatives		Balance Sheet Classification
	March 31, 2016	December 31, 2015	
Derivatives designated as hedges:			
5 year interest rate swap	\$754	\$ 353	Other long-term liabilities
10 year interest rate swap	2,235	1,229	Other long-term liabilities
	\$2,989	\$ 1,582	

The fair value of all outstanding derivatives was determined using a model with inputs that are observable in the market (Level 2) or can be derived from or corroborated by observable data.

The effect of the interest rate swaps on the Consolidated Statement of Operations was as follows:

	Three Months Ended		Income Statement Classification
	March 31, 2016	March 31, 2015	
Derivatives designated as hedges:			
5 year interest rate swap	\$82	\$ 97	Increase to interest expense
10 year interest rate swap	131	146	Increase to interest expense
	\$213	\$ 243	

13. FINANCIAL INSTRUMENTS

The Company's only financial assets and liabilities which involve fair value measures relate to certain aspects of the Company's benefit plans and our derivative instruments. We use the market approach to value certain assets and liabilities at fair value using significant other observable inputs (Level 2) with the assistance of a third party specialist. We do not have any assets or liabilities measured at fair value on a recurring basis using quoted prices in an active market (Level 1) or significant unobservable inputs (Level 3). Gains and losses related to the fair value changes in the deferred compensation assets and liabilities are recorded in General and administrative expense in the Consolidated Statements of Operations. Gains and losses related to the fair value of the interest rate swaps are recorded in Other comprehensive income (loss). The following table summarizes the fair value balances (in thousands):

	Fair Value Measurement at March 31, 2016		
	Total	Level 1	Level 2 Level 3
Assets:			
Deferred compensation trust assets ⁽¹⁾	\$22,582	\$—	\$22,582
Liabilities:			
Deferred compensation plan	\$27,967	\$—	\$27,967
5 year interest rate swap	754	—	754
10 year interest rate swap	2,235	—	2,235
	\$30,956	\$—	\$30,956

	Fair Value Measurement at December 31, 2015		
	Total	Level 1	Level 2 Level 3
Assets:			
Deferred compensation trust assets ⁽¹⁾	\$23,737	\$—	\$23,737
Liabilities:			
Deferred compensation plan	\$29,155	\$—	\$29,155
5 year interest rate swap	353	—	353
10 year interest rate swap	1,229	—	1,229
	\$30,737	\$—	\$30,737

(1) Trust assets consist of the cash surrender value of life insurance policies intended to assist in the funding of the deferred compensation plan and are included in Other assets in the Balance Sheet.

14. SEGMENT REPORTING

We operate our business in three reportable segments. These complementary segments provide different services and products and utilize different technologies for improving reservoir performance and increasing oil and gas recovery from new and existing fields.

•

Reservoir Description: Encompasses the characterization of petroleum reservoir rock, fluid and gas samples. We provide analytical and field services to characterize properties of crude oil and petroleum products to the oil and gas industry.

Production Enhancement: Includes services and products relating to reservoir well completions, perforations, stimulations and production. We provide integrated services to evaluate the effectiveness of well completions and to develop solutions aimed at increasing the effectiveness of enhanced oil recovery projects.

Reservoir Management: Combines and integrates information from reservoir description and production enhancement services to increase production and improve recovery of oil and gas from our clients' reservoirs.

Results for these segments are presented below. We use the same accounting policies to prepare our segment results as are used to prepare our Consolidated Financial Statements. All interest and other non-operating income (expense) is attributable to Corporate & Other and is not allocated to specific segments. Summarized financial information concerning our segments is shown in the following table (in thousands):

	Reservoir Description	Production Enhancement	Reservoir Management	Corporate & Other ¹	Consolidated
Three Months Ended March 31, 2016					
Revenue from unaffiliated clients	\$ 101,549	\$ 44,145	\$ 7,953	\$ —	\$ 153,647
Inter-segment revenue	1,907	220	5	(2,132)	—
Segment operating income (loss)	18,220	4,141	487	92	22,940
Total assets (at end of period)	316,705	202,470	19,282	48,793	587,250
Capital expenditures	2,074	378	8	398	2,858
Depreciation and amortization	4,436	1,425	363	623	6,847
Three Months Ended March 31, 2015					
Revenue from unaffiliated clients	\$ 121,759	\$ 75,145	\$ 16,739	\$ —	\$ 213,643
Inter-segment revenue	2,776	717	149	(3,642)	—
Segment operating income (loss)	28,530	9,923	3,866	398	42,717
Total assets (at end of period)	312,129	233,414	29,505	54,960	630,008
Capital expenditures	4,437	1,803	221	408	6,869
Depreciation and amortization	3,783	1,761	431	591	6,566

(1) "Corporate & Other" represents those items that are not directly related to a particular segment and eliminations.

15. RECENT ACCOUNTING PRONOUNCEMENTS

In February 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2015-02 ("Amendments to the Consolidation Analysis") which amends the guidelines for determining whether certain legal entities should be consolidated. This update eliminates the presumption that a general partner should consolidate a limited partnership and modifies the evaluation of whether limited partnerships are variable interest entities or voting interest entities. Overall, the amendments in this Update are an improvement to current GAAP because they simplify the Codification and reduce the number of consolidation models through the elimination of the indefinite deferral of Statement 167 and because they place more emphasis on risk of loss when determining a controlling financial interest. This update is effective for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years. We adopted this standard on January 1, 2016. The adoption of this standard had no effect on our current consolidated financial statements or on the entities that we consolidate.

In November 2015, the FASB issued ASU 2015-17 ("Balance Sheet Classification of Deferred Taxes") to simplify the presentation of deferred income taxes. The amendments in this update require that deferred tax liabilities and assets be classified as non-current in a classified statement of financial position. This pronouncement is effective for public business entities for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2016, with early adoption permitted. We early adopted this standard for our fiscal year beginning on January 1, 2016 and applied the adoption prospectively. The adoption of this standard had no effect on our current Consolidated Statements of Operations and Consolidated Statement of Cash Flows but had an immaterial effect on our Consolidated Balance Sheet with the reclassification of certain deferred tax balance sheet accounts. The comparative prior period Consolidated Balance Sheet as of December 31, 2015 was not retrospectively adjusted.

In May 2014, the FASB issued ASU 2014-09 ("Revenue from Contracts with Customers"), which provides guidance on revenue recognition. The core principle of this guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. This guidance requires entities to apply a five-step

method to (1) identify the contract(s) with customers; (2) identify the performance obligation(s) in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligation(s) in the contract; and (5) recognize revenue when (or as) the entity satisfies a performance obligation. This pronouncement is effective for fiscal years, and interim periods within those years, beginning after December 15, 2017 (on July 9, 2015, the FASB deferred the implementation date for one year). We are evaluating the impact that the adoption of this standard will have on our consolidated financial statements.

In July 2015, the FASB issued ASU 2015-11 ("Simplifying the Measurement of Inventory") to require the measurement of inventory at the lower of cost and net realizable value. Net realizable value is the estimated selling prices in the ordinary course of business, less reasonably predictable costs of completion, disposal, and transportation. This pronouncement is effective for public business entities for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2016. We are evaluating the impact that the adoption of this standard will have on our consolidated financial statements.

In February 2016, the FASB issued ASU 2016-02 ("Leases"), which introduces the recognition of lease assets and lease liabilities by lessees for those leases classified as operating leases under previous guidance. The new standard establishes a right-of-use ("ROU") model that requires a lessee to record an ROU asset and a lease liability on the balance sheet for all leases with terms longer than 12 months. The new standard is effective for fiscal years beginning after December 15, 2018 and interim periods within those fiscal years with early adoption permitted. We are evaluating the impact that the adoption of this standard will have on our consolidated financial statements.

In March 2016, the FASB issued ASU 2016-09 ("Improvements to Employee Share-Based Payment Accounting") which simplifies several aspects of accounting for share-based payment transactions including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The new standard is effective for fiscal years beginning after December 15, 2016 and interim periods within those fiscal years with early adoption permitted. We are evaluating the impact that the adoption of this standard will have on our consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion summarizes the financial position of Core Laboratories N.V. and its subsidiaries as of March 31, 2016 and should be read in conjunction with (i) the unaudited consolidated interim financial statements and notes thereto included elsewhere in this Quarterly Report on Form 10-Q ("Quarterly Report") and (ii) the audited consolidated financial statements and accompanying notes to our Annual Report on Form 10-K for the fiscal year ended December 31, 2015 (the "2015 Annual Report").

General

Core Laboratories N.V. is a limited liability company incorporated and domiciled in The Netherlands. It was established in 1936 and is one of the world's leading providers of proprietary and patented reservoir description, production enhancement and reservoir management services and products to the oil and gas industry. These services and products can enable our clients to improve reservoir performance and increase oil and gas recovery from their producing fields. Core Laboratories N.V. has over 70 offices in more than 50 countries and employs approximately 4,400 people worldwide.

References to "Core Lab", the "Company", "we", "our" and similar phrases are used throughout this Quarterly Report and relate collectively to Core Laboratories N.V. and its consolidated affiliates.

We operate our business in three reportable segments. These complementary segments provide different services and products and utilize different technologies for improving reservoir performance and increasing oil and gas recovery from new and existing fields.

Reservoir Description: Encompasses the characterization of petroleum reservoir rock, fluid and gas samples. We provide analytical and field services to characterize properties of crude oil and petroleum products to the oil and gas industry.

Production Enhancement: Includes services and products relating to reservoir well completions, perforations, stimulations and production. We provide integrated services to evaluate the effectiveness of well completions and to develop solutions aimed at increasing the effectiveness of enhanced oil recovery projects.

Reservoir Management: Combines and integrates information from reservoir description and production enhancement services to increase production and improve recovery of oil and gas from our clients' reservoirs.

Cautionary Statement Regarding Forward-Looking Statements

This Quarterly Report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Certain statements contained in this Management's Discussion and Analysis of Financial Condition and Results of Operations section, including those under the headings "Outlook" and "Liquidity and Capital Resources", and in other parts of this Quarterly Report, are forward-looking. In addition, from time to time, we may publish forward-looking statements relating to such matters as anticipated financial performance, business prospects, technological developments, new products, research and development activities and similar matters. Forward-looking statements can be identified by the use of forward-looking terminology such as "may", "will", "believe", "expect", "anticipate", "estimate", "continue", or other similar words, including statements as to the intent, belief, or current expectations of our directors, officers, and management with respect to our future operations, performance, or positions or which contain other forward-looking information. These forward-looking statements are based on our current expectations and beliefs concerning future developments and their potential effect on us. While management believes that these forward-looking statements are reasonable as and when made, no assurances can be given that the future results indicated, whether expressed or implied, will be achieved. While we believe that these statements are and will be accurate, our actual results and experience may differ

materially from the anticipated results or other expectations expressed in our statements due to a variety of risks and uncertainties.

We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. For a more detailed discussion of some of the foregoing risks and uncertainties, see "Item 1A - Risk Factors" in our 2015 Annual Report and in Part II of this Quarterly Report, as well as the other reports filed by us with the Securities and Exchange Commission ("SEC").

Outlook

As part of our long-term growth strategy, we continue our long-term efforts to expand our market presence by opening or expanding facilities in strategic areas and realizing synergies within our business lines subject to client demand and market conditions. We believe our market presence provides us a unique opportunity to service clients who have global operations whether they are international oil companies, national oil companies, or independent oil companies.

During 2015, average crude oil prices decreased approximately 48% compared to 2014, which resulted in a significant decrease in activities and spending related to the exploration and production of oil and natural gas. In the fourth quarter of 2015, crude oil prices continued to weaken causing West Texas Intermediate ("WTI") to end the year at \$37.13 per barrel, the lowest end-of-year price per barrel in 12 years. The price of WTI crude oil averaged \$37.04 per barrel through the first quarter of 2016, which resulted in a further reduction of activity associated with the exploration and production of oil and spending levels from our clients in most major regions across the globe.

In North America, land-based activity continues to be the most significantly impacted by these lower commodity prices. The quarterly average rig count in North America has decreased by 57% compared to the end of the first quarter of 2015 and is down 39% from December 31, 2015. If the WTI crude oil price remains near its current level, we believe the significantly lower levels of industry activity experienced during 2015 and the first quarter of 2016 may continue through the remainder of 2016, which could continue to have a negative impact our North America operations.

Outside of North America, activities associated with the exploration and production of oil and gas have also decreased from 2015 levels, although not as significantly as the land-based activities in North America. The quarterly average international rig count for the first quarter of 2016 is down approximately 20% from the same period in 2015. These reduced international activities have impacted most regions, except the Middle East, where we continue to see sustained levels for the first quarter of 2016. As with North American land-based activity, we believe international activities will also remain at reduced levels, without a meaningful improvement in the current Brent crude oil price.

We saw U.S. crude oil production continue its sharp decline in the first quarter of 2016 which we believe is an indication that the balancing of worldwide crude-oil markets is well underway. With the very steep decline curves associated with the unconventional tight oil reservoirs in the U.S., we now believe that U.S. supply growth rolled over in April of 2015 and that year-over-year crude-oil production in 2016 will be down several hundreds-of-thousands of barrels per day. Therefore, at current industry activity levels, U.S. crude oil production could continue to fall significantly throughout 2016, while worldwide oil production continues to stagnate or decrease slightly because the prior year's international production gains may not be sustainable over the long term.

Response to Decline in Oilfield Services Activities

In 2015, in response to reduced spending by our clients on their oil and gas fields as a result of lower commodity prices for crude oil and natural gas, we reduced our cost structure, primarily through a reduction in our workforce, to better align with the decreasing activity levels into the foreseeable future. As a result of these cost reductions, in 2015, we recorded severance charges of \$8.8 million, of which \$6.4 million was recorded in the first quarter of 2015. Approximately \$2.4 million were accrued and remaining to be paid at March 31, 2016.

During the first quarter of 2016, we continued to closely monitor rig counts, crude oil and natural gas prices, and activity levels within the industry. We continued to execute our cost reduction initiative which began in the first quarter of 2015, but no additional accruals or write-offs were recorded during the first quarter of 2016.

Operating Results for the Three Months Ended March 31, 2016 Compared to the Three Months Ended December 31, 2015 and March 31, 2015

Services Revenue

Services revenue decreased to \$122.8 million for the first quarter of 2016 from \$142.0 million for the fourth quarter of 2015 and \$163.0 million for the first quarter of 2015. The average rig count for the first quarter of 2016 was 26% lower than the average rig count during the fourth quarter of 2015; however, our services revenue was down only 14% sequentially, as demand for our analytical, diagnostic, and completion services was less impacted by the significant decrease in drilling activities. Since the end of the first quarter of 2015, prices for WTI and Brent crude oil have further declined 23% and 32%, respectively. As a result, the quarterly average global rig count for the first quarter of 2016 fell by 41% compared to the same period in 2015, primarily driven by decreases in North America. However, over this same time period, our services revenue was down only 25% year over year, as demand for our analytical, diagnostic, and completion services was less impacted by the significant decrease in drilling activities. Our continued focus on worldwide crude oil related and large natural gas liquefaction projects, especially those related to the development of deepwater fields off West and East Africa and the eastern Mediterranean, kept services revenue from declining further.

Product Sales Revenue

Revenue associated with product sales decreased to \$30.9 million for the first quarter of 2016, from \$40.7 million for the fourth quarter of 2015 and from \$50.7 million for the first quarter of 2015. Our product sales revenue is primarily driven by sales in the North American market where the quarterly average rig count in the first quarter of 2016 declined 39% sequentially and declined 57% year over year; however, as a result of our differentiated well completion products in the market place, our revenue during the first quarter of 2016 decreased only 24% and 39% from our revenue in the fourth and first quarters of 2015, respectively.

Cost of Services

Cost of services expressed as a percentage of services revenue increased to 69% for the three months ended March 31, 2016, compared to 65% and 63% for the three months ended December 31 and March 31, 2015, respectively. This increase was primarily due to a reduced absorption rate of our fixed-cost structure across lower revenues in 2016.

Cost of Product Sales

Cost of product sales expressed as a percentage of product sales revenue increased to 89% for the three months ended March 31, 2016, compared to 79% and 82% for the three months ended December 31 and March 31, 2015, respectively. This increase was primarily due to a reduced absorption rate of our fixed-cost structure across lower revenue in 2016.

General and Administrative Expense

General and administrative ("G&A") expense includes corporate management and centralized administrative services that benefit our operations. G&A expense for the three months ended March 31, 2016 was \$11.1 million compared to \$12.7 million for the same period in 2015. The decrease is primarily due to lower compensation expense.

Depreciation and Amortization Expense

Depreciation and amortization expense for the three months ended March 31, 2016 was \$6.8 million compared to \$6.6 million for the same period in 2015.

Severance and Other Charges

In 2015, in response to reduced spending by our clients on their oil and gas fields as a result of lower commodity prices for crude oil and natural gas, we reduced our cost structure, primarily through a reduction in our workforce, to better align with the decreasing activity levels into the foreseeable future. As a result of these cost reductions, in 2015, we recorded severance charges of \$8.8 million, of which \$6.4 million was recorded in the first quarter of 2015. Approximately \$2.4 million was accrued and remaining to be paid at March 31, 2016.

During the first quarter of 2016, we continued to closely monitor rig counts, crude oil and natural gas prices, and activity levels within the industry. We continued to execute our cost reduction initiative which began in the first quarter of 2015, but no additional expenses associated with severance or asset impairments were recorded during the first quarter of 2016.

Other (Income) Expense, Net

The components of other (income) expense, net, were as follows (in thousands):

	Three Months Ended March 31,	
	2016	2015
Sale of assets	\$(366)	\$(135)
Results of non-consolidated subsidiaries	(188)	(44)
Foreign exchange	779	840
Rents and royalties	(101)	(136)
Other, net	(128)	(203)
Total other (income) expense, net	\$(4)	\$322

18

[Return to Index](#)

Foreign exchange (gain) loss, net by currency is summarized in the following table (in thousands):

	Three Months Ended March 31,	
	2016	2015
Australian Dollar	125	119
British Pound	228	374
Canadian Dollar	(1)	1,274
Euro	210	(1,055)
Other currencies, net	217	128
Total (gain) loss, net	\$ 779	\$ 840

Interest Expense

Interest expense for the three months ended March 31, 2016 and 2015 was \$3.4 million and \$2.4 million, respectively. Interest expense is higher in 2016 due to the increased borrowings on our Credit Facility.

Income Tax Expense

The effective tax rates for the three months ended March 31, 2016 and 2015 were 22.5% and 23.0%, respectively. Income tax expense of \$4.4 million in the first quarter of 2016 decreased by \$4.9 million compared to \$9.3 million in the same period in 2015, primarily in the United States as taxable income recognized in the United States decreased by \$15.1 million in 2016 compared to 2015. No other jurisdiction in which we operate had a material change in income tax expense.

Subsequent to March 31, 2016, our U.S. subsidiaries settled an audit covering the years 2010 thru 2012 with the Internal Revenue Service that will result in the release of reserves for uncertain tax positions in the amount of \$0.9 million in the second quarter of 2016.

Segment Analysis

Our operations are managed primarily in three complementary reportable segments - Reservoir Description, Production Enhancement and Reservoir Management. The following tables summarize our results by segment for the three months ended March 31, 2016 and 2015 and December 31, 2015 (in thousands):

	Three Months Ended March 31,		\$ Change	% Change	Three Months Ended December 31,		\$ Change	% Change
	2016	2015			2015	Q1/Q4		
Revenue:								
Reservoir Description	\$ 101,549	\$ 121,759	\$(20,210)	(17)%	\$ 114,759	\$(13,210)	(12)%	
Production Enhancement	44,145	75,145	(31,000)	(41)%	56,572	(12,427)	(22)%	
Reservoir Management	7,953	16,739	(8,786)	(52)%	11,392	(3,439)	(30)%	
Consolidated	\$ 153,647	\$ 213,643	\$(59,996)	(28)%	\$ 182,723	\$(29,076)	(16)%	
Operating income (loss):								
Reservoir Description	\$ 18,220	\$ 28,530	\$(10,310)	(36)%	\$ 21,220	\$(3,000)	(14)%	

Edgar Filing: CORE LABORATORIES N V - Form 10-Q

Production Enhancement	4,141	9,923	(5,782)	(58)	%	(639)	4,780	748	%
Reservoir Management	487	3,866	(3,379)	(87)	%	3,541	(3,054)	(86)	%
Corporate and Other ¹	92	398	(306)	NM		(480)	572	NM	
Consolidated	\$22,940	\$42,717	\$(19,777)	(46)	%	\$23,642	\$(702)	(3)	%

(1) "Corporate and Other" represents those items that are not directly related to a particular segment

"NM" means not meaningful

Reservoir Description

Revenue from the Reservoir Description segment was \$101.5 million in the first quarter of 2016, a decrease of 12% from \$114.8 million in the fourth quarter of 2015 and a decrease of 17% from \$121.8 million in the first quarter of 2015. This segment's operations continue to work on large-scale, long-term crude-oil and LNG projects with an emphasis on deepwater developments and international markets. We continue to focus on large-scale core analyses and reservoir fluids characterization studies in the Asia-Pacific areas, offshore West and East Africa, the Eastern Mediterranean region and the Middle East, including Kuwait and the United Arab Emirates.

Operating income was \$18.2 million in the first quarter of 2016, a decrease of 14% compared to \$21.2 million in the fourth quarter of 2015 and a decrease of 36% compared to \$28.5 million in the first quarter of 2015. A charge for severance and other charges was recorded in the fourth and first quarters of 2015 for \$7.9 million and \$4.3 million, respectively. Operating income decreased primarily due to our fixed-cost structure not being fully absorbed on lower revenue in 2016 when compared to 2015. Operating margins were 18% in the first quarter of 2016, unchanged from the fourth quarter of 2015, but down from 23% in the first quarter of 2015. This segment emphasizes technologically demanding services on internationally-based development and production-related crude oil projects over more cyclical exploration-related projects.

Production Enhancement

Revenue from the Production Enhancement segment was \$44.1 million in the first quarter of 2016, a decrease of 22% from \$56.6 million in the fourth quarter of 2015 compared to the average horizontal rig count that decreased 43% during that time. First quarter 2016 revenue decreased 41% from \$75.1 million in the first quarter of 2015 compared to the average horizontal rig count that decreased 60% during that same time period. This significantly lower industry activity reduced demand for our products associated with land-based completion of oil wells in U.S. unconventional developments.

Operating income in the first quarter of 2016 was \$4.1 million, an increase from a loss of \$0.6 million in the fourth quarter of 2015 and a decrease from \$9.9 million in the first quarter of 2015. The increase in sequential operating income was due to the charge of \$7.9 million for severance and other charges recorded in the fourth quarter of 2015. The decrease in year-over-year operating income was primarily due to decreased revenue in 2016 caused by the continued reduction in activities and spending of our clients, primarily in North America. Operating margins were 9% in the first quarter of 2016, down from 13% in the same period of 2015 as a result of absorbing less of our fixed costs on lower revenue.

Reservoir Management

Revenue from the Reservoir Management segment was \$8.0 million in the first quarter of 2016, a decrease of \$3.4 million from the fourth quarter of 2015 and a decrease of \$8.8 million from the first quarter of 2015. The decrease in 2016 when compared to 2015 is primarily due to the decrease of oil commodity prices and, as a result, greatly reduced or eliminated discretionary spending from our oil and gas clients. We continue to have interest in our existing multi-client reservoir studies such as the Duvernay Shale Project in Canada and the Tight Oil Reservoirs of the Midland Basin study as well as our new joint-industry projects in the Williston Basin targeting the tight oil of the entire Three Forks sections and a study in the Appalachian Basin of the emerging Devonian shales in the liquids window.

Operating income in the first quarter of 2016 decreased to \$0.5 million from \$3.5 million during the fourth quarter of 2015 and \$3.9 million during the first quarter of 2015. The decrease in the first quarter of 2016, when compared to

each period in 2015, was due primarily to decreased revenue. We are still focused on our joint industry projects, including the Utica, Duvernay, Montney, Wilrich, Mississippi Lime and Central Atlantic studies and the Marcellus, Niobrara, Wolfcamp, Eaglebine and Eagle Ford plays. Operating margins were 6% in the first quarter of 2016, down from 31% in the fourth quarter of 2015, and 23% in the first quarter of 2015. Operating margins for Reservoir Management can fluctuate due to the sale of fully completed studies, which generate significant incremental margins.

Liquidity and Capital Resources

General

We have historically financed our activities through cash on hand, cash flows from operations, bank credit facilities, equity financing and the issuance of debt. Cash flows from operating activities provides the primary source of funds to finance operating needs, capital expenditures and our dividend and share repurchase programs. If necessary, we supplement this cash flow with borrowings under bank credit facilities to finance some capital expenditures, business acquisitions, or the repurchase of the Company's common shares. As we are a Netherlands holding company, we conduct substantially all of our operations through subsidiaries. Our cash availability is largely dependent upon the ability of our subsidiaries to pay cash dividends or otherwise distribute or advance funds to us. There are no restrictions preventing any of our subsidiaries from repatriating earnings, and there are no restrictions or income taxes associated with distributing cash to the parent company through loans or advances. As of March 31, 2016, approximately \$15.0 million of our \$16.7 million of cash was held by our foreign subsidiaries.

We utilize the non-GAAP financial measure of free cash flow to evaluate our cash flows and results of operations. Free cash flow is defined as net cash provided by operating activities (which is the most directly comparable GAAP measure) less cash paid for capital expenditures. Management believes that free cash flow provides useful information to investors regarding the cash available in the period that was in excess of our needs to fund our capital expenditures and operating activities. Free cash flow is not a measure of operating performance under GAAP, and should not be considered in isolation nor construed as an alternative to operating profit, net income (loss) or cash flows from operating, investing or financing activities, each as determined in accordance with GAAP. Free cash flow does not represent residual cash available for distribution because we may have other non-discretionary expenditures that are not deducted from the measure. Moreover, since free cash flow is not a measure determined in accordance with GAAP and thus is susceptible to varying interpretations and calculations, free cash flow as presented, may not be comparable to similarly titled measures presented by other companies. The following table reconciles this non-GAAP financial measure to the most directly comparable measure calculated and presented in accordance with GAAP for the three months ended March 31, 2016 and 2015 (in thousands):

	Three Months Ended March 31,		% Change	
	2016	2015	2016/2015	
Free cash flow calculation:				
Net cash provided by operating activities	\$46,097	\$79,529	(42))%
Less: cash paid for capital expenditures	2,858	6,869	(58))%
Free cash flow	\$43,239	\$72,660	(40))%

The decrease in free cash flow for the first three months of 2016 compared to the same period in 2015 was primarily due to lower net income and less significant improvements in working capital, partially offset by lower capital expenditures.

Cash Flows

The following table summarizes cash flows for the three months ended March 31, 2016 and 2015 (in thousands):

	Three Months Ended March 31,		% Change	
	2016	2015	2016/2015	
Cash provided by/(used in):				
Operating activities	\$46,097	\$79,529	(42))%
Investing activities	(3,018)	(6,976)	(57))%

Financing activities	(48,908)	(76,766)	(36)%
Net change in cash and cash equivalents	\$(5,829)	\$(4,213)	38 %

Cash flows from operating activities for the first three months of 2016 compared to the same period in 2015 decreased primarily due to lower net income and less significant improvements to working capital.

The decrease in cash flows used in investing activities during the first three months of 2016 compared to the same period in 2015 was primarily attributable to lower capital expenditures in 2016.

21

[Return to Index](#)

Cash flows used in financing activities decreased for the first three months of 2016 compared to the same period in 2015. During the first three months of 2016, we decreased our debt by \$25 million, as compared to increasing it by \$17 million during the first three months of 2015. In the first three months of 2016, we repurchased 6,365 shares of our common stock for an aggregate purchase price of \$0.7 million compared to the repurchase of 683,290 shares for an aggregate purchase price of \$72.9 million during the same period in 2015.

Notes, Credit Facilities and Available Future Liquidity

We have two series of senior notes outstanding with an aggregate principal amount of \$150 million ("Senior Notes") issued in a private placement transaction. Series A consists of \$75 million in aggregate principal amount of notes that bear interest at a fixed rate of 4.01% and are due in full on September 30, 2021. Series B consists of \$75 million in aggregate principal amount of notes that bear interest at a fixed rate of 4.11% and are due in full on September 30, 2023. Interest on each series of the Senior Notes is payable semi-annually on March 30 and September 30.

We maintain a revolving credit facility ("Credit Facility") that allows for an aggregate borrowing capacity of \$400 million. The Credit Facility also provides an option to increase the commitment under the Credit Facility by an additional \$50 million to bring the total borrowings available to \$450 million if certain prescribed conditions are met by the Company. The Credit Facility bears interest at variable rates from LIBOR plus 1.25% to a maximum of LIBOR plus 2.00%. Any outstanding balance under the Credit Facility is due August 29, 2019, when the Credit Facility matures. Our available capacity at any point in time is reduced by borrowings outstanding at the time and outstanding letters of credit which totaled \$25.8 million at March 31, 2016, resulting in an available borrowing capacity under the Credit Facility of \$115.2 million. In addition to those items under the Credit Facility, we had \$11.1 million of outstanding letters of credit and performance guarantees and bonds from other sources as of March 31, 2016.

The terms of the Credit Facility and Senior Notes require us to meet certain covenants, including, but not limited to, an interest coverage ratio (consolidated EBITDA divided by interest expense) and a leverage ratio (consolidated net indebtedness divided by consolidated EBITDA), where consolidated EBITDA (as defined in each agreement) and interest expense are calculated using the most recent four fiscal quarters. The Credit Facility has the more restrictive covenants with a minimum interest coverage ratio of 3.0 to 1.0 and a maximum leverage ratio of 2.5 to 1.0. We believe that we are in compliance with all such covenants contained in our credit agreements. Certain of our material, wholly-owned subsidiaries are guarantors or co-borrowers under the Credit Facility and Senior Notes.

In 2014, we entered into two interest rate swap agreements for a total notional amount of \$50 million. See Note 12 - Derivative Instruments and Hedging Activities.

Our ability to maintain and grow our operating income and cash flow depends, to a large extent, on continued investing activities. We believe our future cash flows from operations, supplemented by our borrowing capacity and issuances of additional equity, should be sufficient to fund our debt requirements, capital expenditures, working capital, dividend payments and future acquisitions.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes in market risk from the information provided in Item 7A. "Quantitative and Qualitative Disclosures About Market Risk" in our 2015 Annual Report.

Item 4. Controls and Procedures

A complete discussion of our controls and procedures is included in our 2015 Annual Report.

Disclosure Controls and Procedures

Our management, under the supervision of and with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), as of the end of the period covered by this report. Our disclosure controls and procedures are designed to provide reasonable assurance that the information required to be disclosed by us in our reports filed or submitted under the Exchange Act is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure and is recorded, processed, summarized and reported within the time periods

22

[Return to Index](#)

specified in the rules and forms of the SEC. Based on such evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures were effective as of March 31, 2016 at the reasonable assurance level.

Our management does not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent all errors and all fraud. Further, the design of disclosure controls and internal control over financial reporting must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

Changes in Internal Control Over Financial Reporting

There have been no changes in our system of internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act, during the fiscal quarter ended March 31, 2016, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

CORE LABORATORIES N.V.
PART II - OTHER INFORMATION

Item 1. Legal Proceedings

See Note 6 to our Consolidated Interim Financial Statements in Part I, Item 1 of this Quarterly Report.

Item 1A. Risk Factors

Our business faces many risks. Any of the risks discussed in this Quarterly Report or our other SEC filings could have a material impact on our business, financial position or results of operations. Additional risks and uncertainties not presently known to us or that we currently believe to be immaterial may also impair our business operations. For a detailed discussion of the risk factors that should be understood by any investor contemplating investment in our securities, please refer to "Item 1A - Risk Factors" in our 2015 Annual Report.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Unregistered Sales of Equity Securities

None.

Issuer Repurchases of Equity Securities

The following table provides information about purchases of equity securities that are registered by us pursuant to Section 12 of the Exchange Act during the three months ended March 31, 2016:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of a Publicly Announced Program	Maximum Number of Shares That May Yet be Purchased Under the Program (2)(3)
January 30, 2016 (1)	210	\$ 108.74	210	2,461,268
February 29, 2016 (1)	75	96.19	75	2,461,573
March 31, 2016 (1)	6,080	109.52	6,080	2,476,694
Total	6,365	\$ 109.33	6,365	

(1) All shares repurchased during the quarter were surrendered to us by participants in a stock-based compensation plan to settle any personal tax liabilities which may result from the award.

(2) In connection with our initial public offering in September 1995, our shareholders authorized our Management Board to repurchase up to 10% of our issued share capital for a period of 18 months. This authorization was renewed at subsequent annual or special shareholder meetings. The repurchase of shares in the open market is at the discretion of management pursuant to this shareholder authorization.

(3) We distributed 22,156 treasury shares upon vesting of stock-based awards during the three months ended March 31, 2016.
