Senior secured floating rate loan interests in which the Trust invests generally pay interest at rates that are periodically redetermined by reference to a base lending rate plus a premium. These base lending rates are

- * generally (i) the lending rate offered by one or more major European banks, such as LIBOR, (ii) the prime rate offered by one or more major United States banks, (iii) the rate of a certificate of deposit or (iv) other base lending rates used by commercial lenders. The interest rate shown is the rate accruing at December 31, 2018.
- + Securities that used significant unobservable inputs to determine their value.
- ^ Security is valued using fair value methods (other than supplied by independent pricing services).
- (a) Non-income producing security.
- (b) Security is perpetual in nature and has no stated maturity date.
- (c) The interest rate is subject to change periodically. The interest rate and/or reference index and spread shown at December 31, 2018.
- (d) Security is priced as a unit.
- (e) Payment in Kind (PIK) security which may pay interest in the form of additional principal amount.
 - Debt obligation initially issued at one coupon which converts to a higher coupon at a specific date. The rate
- shown is the rate at December 31, 2018.
- (g) Security is in default.
- (h) Floating rate note. Coupon rate, reference index and spread shown at December 31, 2018.

Various inputs are used in determining the value of the Trust's investments. These inputs are summarized in the three broad levels below.

Level 1 - quoted prices in active markets for identical securities.

Level 2 - other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risks, etc.).

Level 3 - significant unobservable inputs (including the Trust's own assumptions in determining fair value of investments).

The following is a summary of the inputs used as of December 31, 2018, in valuing the Trust's investments.
