Table of Contents

**Old Second Bancorp, Inc. and Subsidiaries**

**Notes to Consolidated Financial Statements**

(Table amounts in thousands, except per share data, unaudited)

**Note 1 Summary of Significant Accounting Policies**

The accounting policies followed in the preparation of the interim financial statements are consistent with those used in the preparation of the annual financial information. The interim financial statements reflect all normal and recurring adjustments, which are necessary, in the opinion of management, for a fair statement of results for the interim period presented. Results for the period ended September 30, 2009 are not necessarily indicative of the results that may be expected for the year ending December 31, 2009. These interim financial statements should be read in conjunction with the audited financial statements and notes included in Old Second Bancorp, Inc.'s (the Company) annual report on Form 10-K for the year ended December 31, 2008. Unless otherwise indicated, amounts in the tables contained in the notes are in thousands. Certain items in prior periods have been reclassified to conform to the current presentation.

The Company's consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States and follow general practices within the banking industry. Application of these principles requires management to make estimates, assumptions, and judgments that affect the amounts reported in the financial statements and accompanying notes. These estimates, assumptions, and judgments are based on information available as of the date of the financial statements. Future changes in information may affect these estimates, assumptions, and judgments, which, in turn, may affect amounts reported in the financial statements.

All significant accounting policies are presented in Note A to the consolidated financial statements included in the Company's annual report on Form 10-K for the year ended December 31, 2008. These policies, along with the disclosures presented in the other financial statement notes and in this discussion, provide information on how significant assets and liabilities are valued in the financial statements and how those values are determined.

ASC 805 (formerly Statement No. 141R, *Business Combinations*), broadens the guidance, extending its applicability to all transactions and other events in which one entity obtains control over one or more other businesses. It broadens the fair value measurement and recognition of assets acquired, liabilities assumed, and interests transferred as a result of business combinations. ASC 805 expands on required disclosures to improve the statement users' abilities to evaluate the nature and financial effects of business combinations. The provisions of ASC 805 will only impact the Company if we are party to a business combination closing on or after January 1, 2009.

ASC 810 (formerly FAS 160, *Noncontrolling Interest in Consolidated Financial Statements*), which requires that a noncontrolling interest in a subsidiary be reported separately within equity and the amount of consolidated net income specifically attributable to the noncontrolling interest be identified in the consolidated financial statements. It also calls for consistency in the manner of reporting changes in the parent's ownership interest and requires fair value measurement of any noncontrolling equity investment retained in a deconsolidation.

## Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

ASC 815 (formerly FAS 161, *Disclosures about Derivative Instruments and Hedging Activities*) amends and expands the disclosure requirements for derivative instruments and hedging activities. ASC 815 requires qualitative disclosure about objectives and strategies for using derivative and hedging instruments, quantitative disclosures about fair value amounts of the instruments and gains and losses on such instruments, as well as disclosures about credit-risk features in derivative agreements. Information related to provisions of ASC 815 including the impact on our financial statements is outlined in Note 16.

Table of Contents

ASC 260 (formerly FASB Staff Position ( FSP ) EITF 03-6-1, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities* ), provides that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and shall be included in the computation of earnings per share pursuant to the two-class method. All previously reported earnings per share data have been retrospectively adjusted to conform with the provisions of ASC 260.

ASC 825 (formerly FSP 107-1 and Accounting Principles Board ( APB ) 28-1, *Interim Disclosures about Fair Value of Financial Instruments* ), requires a public entity to provide disclosures about fair value of financial instruments in interim financial information.

ASC 320 (formerly FSP FAS 115-2, FAS124-2 and Emerging Issues Task Force ( EITF ) 99-20-2, *Recognition and Presentation of Other-Than-Temporary-Impairment* ), (i) changes existing guidance for determining whether an impairment is other than temporary to debt securities and (ii) replaces the existing requirement that the entity's management assert it has both the intent and ability to hold an impaired security until recovery with a requirement that management assert: (a) it does not have the intent to sell the security; and (b) it is more likely than not it will not have to sell the security before recovery of its cost basis. Under ASC 320, declines in the fair value of held-to-maturity and available-for-sale securities below their cost that are deemed to be other than temporary are reflected in earnings as realized losses to the extent the impairment is related to credit losses. The amount of impairment related to other factors is recognized in other comprehensive income.

ASC 820 (formerly FSP FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly* ), affirms the objective of fair value when a market is not active, clarifies and includes additional factors for determining whether there has been a significant decrease in market activity, eliminates the presumption that all transactions are distressed unless proven otherwise, and requires an entity to disclose a change in valuation technique.

ASC 855 (formerly FAS 165, *Subsequent Events* ), establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or available to be issued. Information related to the provisions of ASC 855 is reflected in Note 19 - Subsequent Events.

In June 2009, the FASB issued Statement No. 166, *Accounting for Transfers of Financial Assets, an amendment of FASB Statement No. 140* ( FAS 166 ). FAS 166 amends the derecognition accounting and disclosure guidance relating to FAS 140. FAS 166 eliminates the exemption from consolidation for qualifying special-purpose entities ( QSPE s), it also requires a transferor to evaluate all existing QSPEs to determine whether it must be consolidated in accordance with FAS 167. FAS 166 is effective as of the beginning of the first annual reporting period that begins after November 15, 2009. Management is currently assessing the impact of FAS 166 on our financial condition, results of operations, and disclosures.

In June 2009, the FASB issued Statement No. 167, *Amendments to FASB Interpretation No. 46(R)* ( FAS 167 ). FAS 167 amends the consolidation guidance applicable to variable interest entities. The amendments to the consolidation guidance affect all entities currently within the scope of FAS 167, as well as QSPE s that are currently excluded from the scope of FAS 167. FAS 167 is effective as of the beginning of the first annual reporting period that begins after November 15, 2009. Management is currently assessing the impact of FAS 167 on our financial condition, results of operations, and disclosures.

Table of Contents

Accounting Standards Update ( ASU ) No. 2009-01 (formerly Statement No. 168) *Topic 105 - Generally Accepted Accounting Principles-FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles* (the Codification ), is the single source of authoritative nongovernmental U.S. generally accepted accounting principles ( GAAP ). The Codification does not change current GAAP, but is intended to simplify user access to all authoritative GAAP by providing all the authoritative literature related to a particular topic in one place. All existing accounting standard documents will be superseded and all other accounting literature not included in the Codification will be considered nonauthoritative. The Codification is effective for interim or annual reporting periods ending after September 15, 2009. Management has made the appropriate changes to GAAP references in our financial statements.

ASU No. 2009-05, Fair Value Measurements and Disclosures (Topic 820) *Measuring Liabilities at Fair Value* . This ASU provides amendments for fair value measurements of liabilities. It provides clarification that in circumstances in which a quoted price in an active market for the identical liability is not available, a reporting entity is required to measure fair value using one or more techniques. ASU 2009-05 also clarifies that when estimating a fair value of a liability, a reporting entity is not required to include a separate input or adjustment to other inputs relating to the existence of a restriction that prevents the transfer of the liability. ASU 2009-05 is effective for the first reporting period (including interim periods) beginning after issuance or fourth quarter 2009. Management is currently assessing the impact of ASU 2009-05 on our financial condition, results of operations, and disclosures.

**Note 2 Business Combination**

**Old Second Acquisition, Inc., was formed as part of the November 5, 2007 Agreement and Plan of Merger between the Company, Old Second Acquisition, Inc., a wholly-owned subsidiary of the Company, and HeritageBanc, Inc. ( Heritage ), located in Chicago Heights. The parties consummated the merger on February 8, 2008, at which time Old Second Acquisition, Inc. was merged with and into Heritage with Heritage as the surviving corporation as a wholly-owned subsidiary of the Company. Additionally, the parties merged Heritage Bank, a wholly-owned subsidiary of Heritage, with and into Old Second National Bank, with Old Second National Bank as the surviving bank (the Bank ). After the completion of the merger transaction, Heritage was dissolved and is no longer an existing subsidiary. The purchase price was paid through a combination of cash and approximately 1.6 million shares of the Company s common stock totaling \$86.0 million, excluding transaction costs. The final accounting for the transaction generated \$55.4 million in goodwill and \$8.9 million in intangible assets subject to amortization.**

## Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

The business combination was accounted for under the purchase method of accounting. Accordingly, the results of operations of Heritage have been included in the Company's results of

Table of Contents

operations since the date of acquisition. Under this method of accounting, the purchase price was allocated to the respective assets acquired and liabilities assumed based on their estimated fair values, net of applicable income tax effects. The excess cost over fair value of net assets acquired was recorded as goodwill. The following table summarizes the allocation of the purchase price.

**Purchase Price of Heritage (in thousands):**

Market value (market value per share of \$27.50) of the Company's common stock issued	\$	43,000
Cash paid		43,000
Transaction costs		1,557
Total purchase price	\$	87,557

**Allocation of the purchase price**

Historical net assets of Heritage as of February 8, 2008	\$	24,390
Fair market value adjustments as of February 8, 2008		
Real estate		529
Equipment		(134)
Artwork		(30)
Loans		(122)
Goodwill		55,449
Core deposit intangible and other intangible assets		8,917
Time deposits		(1,111)
FHLB advances		(331)
Total purchase price	\$	87,557

The Company decreased the goodwill attributable to the Heritage transaction by \$1.4 million in the first quarter of 2009 along with an offsetting decrease to deferred tax liabilities. In addition, the Company recorded a goodwill impairment charge of \$57.6 million in the second quarter of 2009, which primarily resulted from the goodwill that was attributable to Heritage. See Note 6 in these Notes to Consolidated Financial Statements and Item 2 of this quarterly report for additional information on the goodwill impairment charge.

The following is the unaudited pro forma consolidated results of operations of the Company as though Heritage had been acquired as of the beginning of the periods indicated.

# Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

## Table of Contents

	Three Months Ended September 2008	Nine Months Ended September 2008
Net interest income after provision	\$ 17,262	\$ 58,057
Noninterest income	7,800	26,981
Noninterest expense	19,636	65,485
Income before income taxes	5,426	19,553
Income taxes	1,544	5,794
Net income	\$ 3,882	\$ 13,759
Per common share information		
Earnings	\$ 0.28	\$ 1.00
Diluted earnings	\$ 0.28	\$ 0.99
Average common shares issued and outstanding	13,747,723	13,743,510
Average diluted common shares outstanding	13,832,869	13,858,729

Included in the pro forma results of operations for the nine months ended September 30, 2008 was one-time pretax merger costs of \$3.9 million.

## Note 3 Securities

Securities available-for-sale are summarized as follows:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
<b>September 30, 2009:</b>				
U.S. Treasury	\$ 1,498	\$ 37	\$	1,535
U.S. government agencies	19,623	410		20,033
U.S. government agency mortgage-backed	45,828	1,820	(40)	47,608
States and political subdivisions	134,591	6,288	(114)	140,765
Collateralized mortgage obligations	24,376	954	(11)	25,319
Collateralized debt obligations	17,817		(6,778)	11,039
Equity securities	99	1	(6)	94
	\$ 243,832	\$ 9,510	\$ (6,949)	\$ 246,393
<b>December 31, 2008:</b>				
U.S. Treasury	\$ 1,496	\$ 72	\$	1,568
U.S. government agencies	95,290	1,178	(113)	96,355
U.S. government agency mortgage-backed	86,062	1,396	(208)	87,250
States and political subdivisions	150,313	2,939	(1,659)	151,593
Collateralized mortgage obligations	58,684	711	(125)	59,270

Equity securities	99		(16)	83
	\$ 409,778	\$ 6,296	\$ (9,688)	\$ 406,386

Recognition of other-than-temporary impairment was not necessary in the quarter ended September 30, 2009 or the year ended December 31, 2008. The changes in fair values related to interest rate fluctuations and other market factors and were generally not related to credit quality

## Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

deterioration although the amount of deferrals and defaults in the pooled collateralized debt obligation increased from December 31, 2008. An increase in rates will generally cause a decrease in the fair value of individual securities while a decrease in rates typically results in an increase in fair value. In addition to the impact of rate changes upon pricing, uncertainty in the financial markets in the periods presented has resulted in

Table of Contents

reduced liquidity for certain investments, particularly the collateralized debt obligations ( CDO ), which also impacted market pricing for the periods presented. In the case of the CDO fair value measurement, management included a risk premium adjustment as of September 30, 2009, to reflect an estimated amount that a market participant would demand because of uncertainty in cash flows. Management made that adjustment because the level of market activity for the CDO security has continued to decrease and information on orderly transaction sales was not generally available. Accordingly, management designated this security as a level 3 security at June 30, 2009 as described in Note 15 of this quarterly report and continues with that designation as of September 30, 2009. Management does not have the intent to sell the above securities and it is more likely than not the Company will not have to sell the securities before recovery of its cost basis.

Below is additional information as it relates to the collateralized debt obligation, Trapeza 2007-13A, which is secured by a pool of trust preferred securities issued by trusts sponsored by multiple financial institutions. This collateralized debt obligation was rated AAA at the time of purchase by the Company.

	Amortized	Fair	Gross	S&P	Number	Issuance	Issuance	Issuance	
	Cost	Value	Unrealized	Credit	of	Deferrals & Defaults	Collateral	Excess Subordination	
			Loss	Rating	Banks in	Amount	%	Amount	Collateral
				(1)	Issuance				%
<b>September 30, 2009</b>									
Class A1	\$ 9,353	\$ 5,587	\$ (3,766)	BB+	63	\$ 123,500	16.5%	\$ 260,928	34.8%
Class A2A	8,464	5,452	(3,012)	BB-	63	123,500	16.5%	163,928	21.9%
	\$ 17,817	\$ 11,039	\$ (6,778)						
<b>December 31, 2008</b>									
Class A1	\$ 9,478	\$ 4,657	\$ (4,821)	AAA	63	\$ 37,500	5.0%	\$ 340,917	45.5%
Class A2A	8,356	5,610	(2,746)	AAA	63	37,500	5.0%	243,917	32.5%
	\$ 17,834	\$ 10,267	\$ (7,567)						

(1) Moody's credit rating for class A1 and A2A were A1 and Baa2, respectively, as of September 30, 2009. The Moody's credit ratings at December 31, 2008 for class A1 and A2A were both Aaa. The Fitch ratings for class A1 and A2A were AA and A, respectively, as of September 30, 2009. The Fitch ratings at December 31, 2008 for class A1 and A2A were both AAA.

In addition to other equity securities, which are recorded at estimated market value, the Bank owns the stock of the Federal Reserve Bank of Chicago ( FRB ) and the Federal Home Loan Bank of Chicago ( FHLBC ). Both of these entities require the Bank to invest in their non-marketable stock as a condition of membership. The value of the stock in each of those entities was recorded at cost in the amounts of \$3.8 million and \$9.3 million, respectively, at September 30, 2009, and at December 31, 2008. The FHLBC is a governmental sponsored entity that has been under a regulatory order for a prolonged period that generally requires approval prior to redeeming or paying dividends on their common stock. The Bank continues to utilize the various products and services of the FHLBC and management considers this stock to be a long-term investment. FHLBC members are required to own a certain amount of stock based on the level of borrowings and other factors, and may invest in additional amounts. FHLBC stock is carried at cost, classified as a restricted security, and periodically evaluated for impairment based on ultimate recovery of par value.

Table of Contents**Note 4 Loans**

Major classifications of loans were as follows:

	September 30, 2009	December 31, 2008
Commercial and industrial	\$ 215,189	\$ 244,019
Real estate - commercial	941,307	929,576
Real estate - construction	303,765	373,704
Real estate - residential	677,198	701,221
Installment	11,682	19,116
Overdraft	808	761
Lease financing receivables	4,194	4,396
	2,154,143	2,272,793
Net deferred loan fees and costs	(1,452)	(1,679)
	\$ 2,152,691	\$ 2,271,114

**Note 5 Allowance for Loan Losses**

Changes in the allowance for loan losses as of September 30 are summarized as follows:

	2009	2008
Balance at beginning of period	\$ 41,271	\$ 16,835
Addition resulting from acquisition		3,039
Provision for loan losses	66,575	9,100
Loans charged-off	(50,254)	(5,079)
Recoveries	411	280
Balance at end of period	\$ 58,003	\$ 24,175

**Note 6 Goodwill and Intangibles**

Goodwill and other intangible assets are reviewed for potential impairment on an annual basis as of September 30 and February 28, respectively, or more often if events or circumstances indicate that they may be impaired. As disclosed in the prior quarterly report, goodwill was tested for impairment at the reporting unit level as of June 30, 2009 and a total impairment loss was recorded as a result of management's determination that the carrying amount of goodwill exceeded its implied fair value. The Company's market price per share had continued to be less than its stockholders' common equity as the Company's stock continued to trade at a price below its book value. At the same time, earnings decreased as nonperforming assets, particularly loans and related charge-offs increased. Consistent with prior quarters, the Company considered these and other factors, including the items outlined in the process described below. The Company employed general industry practices in evaluating the impairment of its goodwill using a two-step process that begins with an estimation of the fair value of the reporting unit. The first step included a screen for potential impairment and the second step measured the amount of impairment. Significant management judgment was applied to the process including the development of cash flow projections, selection of appropriate discount rates, identification of relevant market comparables, the incorporation of general economic and market conditions as well as the selection of an appropriate control premium.

The first step of the June 30, 2009 analysis was to determine if there was a potential impairment. The Company used both an income and market approach as part of that analysis. The income approach was based on discounted cash flows, which were derived from internal forecasts and economic expectations for the Bank reporting unit. The key assumptions used to determine fair value under the income approach included the cash flow period, terminal values based on a terminal growth rate and the discount rate. The discount rates used in the income approach evaluated at June 30, 2009 ranged from

Table of Contents

17.5% to 22.5% to attempt to incorporate discount rates a market participant might employ in its valuation of Old Second National Bank. The market approach calculated the change of control price a market participant could have been reasonably expected to pay for the Bank by adding a change of control premium. The results of the first step of the analysis indicated that the Bank's carrying value exceeded its fair value, which indicated that an impairment existed and required that the Company perform the second step of the analysis to determine the amount of the impairment. The second step of the analysis involved a valuation of all of the assets of the Bank as if it had just been acquired and comparing the resultant goodwill with the actual carrying amount of goodwill. The results of the second step of the analysis determined that goodwill was fully impaired, which resulted in the pre-tax impairment charge of \$57.6 million. This was a total impairment and no goodwill remained as a result of that impairment charge. See the management discussion in Item 2 for additional information related to this noncash noninterest expense. The portion of the goodwill intangible asset charge that was attributable to Heritage was tax deductible and had an associated \$22.0 million deferred tax asset, and although not anticipated, there can be no guarantee that a valuation allowance against this deferred tax asset will not be necessary in future periods.

Management also performed an annual review of the core deposit and other intangible assets. Based upon these reviews, management determined there was no impairment of the core deposit and other intangible assets as of September 30, 2009. No assurance can be given that future impairment tests will not result in a charge to earnings. The core deposit and other intangible assets related to Heritage were \$8.9 million at acquisition.

The following table presents the changes in the carrying amount of goodwill and other intangibles during the first nine months ended September 30, 2009, and the year ended December 31, 2008 (in thousands):

	Six Months Ended September 30, 2009		Year Ended December 31, 2008	
	Goodwill	Core Deposit and Other Intangibles	Goodwill	Core Deposit and Other Intangibles
Balance at beginning of period	\$ 59,040	\$ 7,821	\$ 2,130	\$ 8,917
Addition resulting from acquisition			56,910	
Amortization / adjustments (1)	(1,461)	(875)		(1,096)
Impairment	(57,579)			
Balance at end of period	\$	\$ 6,946	\$ 59,040	\$ 7,821

(1) The \$1.46 million adjustment to goodwill was recorded in the first quarter of 2009.

The following table presents the estimated future amortization expense for core deposit and other intangibles as of September 30, 2009 (in thousands):

	Amount
For the rest of 2009	\$ 291
2010	1,130
2011	847
2012	780
2013	732
Thereafter	3,166
Total	\$ 6,946

Table of Contents**Note 7 Mortgage Servicing Rights**

Changes in capitalized mortgage servicing rights as of September 30, summarized as follows:

	<b>2009</b>	<b>2008</b>
Balance at beginning of period	\$ 1,973	\$ 2,569
Additions	495	99
Amortization	(658)	(562)
Balance at end of period	1,810	2,106
Changes in the valuation allowance for servicing assets were as follows:		
Balance at beginning of period	(599)	(87)
Provisions for impairment	(443)	(475)
Recovery credited to expense	811	560
Balance at end of period	(231)	(2)
Net balance	\$ 1,579	\$ 2,104

**Note 8 Deposits**

Major classifications of deposits as of September 30, 2009, and December 31, 2008, were as follows:

	<b>2009</b>	<b>2008</b>
Noninterest bearing	\$ 314,669	\$ 318,092
Savings	168,333	109,991
NOW accounts	431,726	274,888
Money market accounts	394,917	543,325
Certificates of deposit of less than \$100,000	620,571	696,240
Certificates of deposit of \$100,000 or more	405,451	444,592
	\$ 2,335,667	\$ 2,387,128

**Note 9 Borrowings**

The following table is a summary of borrowings as of September 30, 2009, and December 31, 2008:

	<b>2009</b>	<b>2008</b>
Securities sold under repurchase agreements	\$ 21,835	\$ 46,345
Federal funds purchased		28,900
FHLB advances	5,048	167,018

# Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Treasury tax and loan	4,691	2,365
Junior subordinated debentures	58,378	58,378
Subordinated debt	45,000	45,000
Notes payable and other borrowings	500	23,184
	\$ 135,452	\$ 371,190

The Company enters into sales of securities under agreements to repurchase (repurchase agreements) which generally mature within 1 to 90 days from the transaction date. These repurchase agreements are treated as financings and they were secured by securities with a carrying amount of \$27.5

Table of Contents

and \$48.5 million at September 30, 2009 and December 31, 2008, respectively. The securities sold under agreements to repurchase consisted of U.S. government agencies and mortgage-backed securities during the two-year reporting period.

The Company's borrowings at the FHLBC require the Bank to be a member and invest in the stock of the FHLBC and are generally limited to the lesser of 35% of total assets or 60% of the book value of certain mortgage loans. In addition, these borrowings were collateralized by FHLBC stock of \$9.3 million and loans totaling \$437.0 million at September 30, 2009. FHLBC stock of \$9.3 million and loans totaling \$318.4 million were pledged as of December 31, 2008.

The Bank is a Treasury Tax & Loan (TT&L) depository for the FRB and, as such, accepts TT&L deposits. The Company is allowed to hold these deposits for the FRB until they are called. The interest rate is the federal funds rate less 25 basis points. Securities with a face value greater than or equal to the amount borrowed are pledged as a condition of borrowing TT&L deposits. As of September 30, 2009 and December 31, 2008, TT&L deposits were \$4.7 million and \$2.4 million, respectively.

On January 31, 2008, the Company entered into a \$75.5 million credit facility with Bank of America, N.A. (the Lender), which was comprised of a \$30.5 million senior debt facility and \$45.0 million of subordinated debt. The senior debt facility included a \$500,000 term loan with a maturity of March 31, 2018, and a revolving loan with a maturity of March 31, 2010. The loans replaced a \$30.0 million revolving line of credit facility previously held with Marshall & Ilsley Bank. At September 30, 2009, no balance was outstanding on that revolving line. The subordinated debt matures on March 31, 2018. The interest rate on the senior debt facility resets quarterly, and is based on, at the Company's option, either the Lender's prime rate or three-month LIBOR plus 90 basis points. The interest rate on the subordinated debt resets quarterly, and is equal to three-month LIBOR plus 150 basis points. The senior debt is secured with all of the issued and outstanding shares of Old Second National Bank. The proceeds of the \$45.0 million of subordinated debt were used primarily to finance the acquisition of Heritage including transaction costs. The \$30.5 million senior debt facility is for general corporate purposes and was primarily used in the past to repurchase common stock.

The credit facility agreement contains usual and customary provisions regarding acceleration of the senior debt upon the occurrence of an event of default by the Company under the agreement, as described therein. The agreement also contains certain customary representations and warranties and financial and negative covenants. At September 30, 2009, the Company did not comply with two of the financial covenants contained within that credit agreement and additional details related to that noncompliance including the Lender notice details in response to that noncompliance are discussed in Item 2 of this quarterly report under the heading, *Deposits and Borrowings*. The agreement provides that upon an event of default as the result of the Company's failure to comply with a financial covenant, the Lender may (i) terminate all commitments to extend further credit, (ii) increase the interest rate on the Senior Debt by 200 basis points, (iii) declare the Senior Debt immediately due and payable and (iv) exercise all of its rights and remedies at law, in equity and/or pursuant to any or all collateral documents, including foreclosing on the collateral. As illustrated in the above table, the total outstanding principal amount of the Senior Debt is \$500,000. Because the Subordinated Debt is treated as Tier 2 capital for regulatory capital purposes, the Agreement does not provide the Lender with any rights of acceleration or other remedies with regard to the Subordinated Debt upon an event of default caused by the Company's breach of a financial covenant.

In its prior notice to the Company, the Lender indicated that the Lender would not extend any additional credit or make additional disbursements to or for the benefit of the Company. The Lender also indicated in that notice that it was not presently exercising any of its other rights or remedies under the Agreement and that it reserves all of its rights and remedies available to the Lender. The Company and the Lender periodically discuss potential resolution of the issues, including a change in the covenants, but there has been no definitive resolution as of the date of this Form 10-Q. The lender notified the Company on November 2, 2009 that, effective July 27, 2009, the interest rate applicable to the outstanding balance on the Senior Debt (\$500,000), and to the extent permitted by applicable law, any interest payments with respect thereto not paid within 10 days after the same becomes due, shall be equal to the Default Rate. The Company estimated that the additional interest expense

related to that notice was less than two thousand dollars for third quarter 2009.

Table of Contents

**Note 10 Junior Subordinated Debentures**

The Company completed the sale of \$27.5 million of cumulative trust preferred securities by its unconsolidated subsidiary, Old Second Capital Trust I in June 2003. An additional \$4.1 million of cumulative trust preferred securities was sold in July 2003. The costs associated with the issuance of the cumulative trust preferred securities are being amortized over 30 years. The trust-preferred securities can remain outstanding for a 30-year term but, subject to regulatory approval, can be called in whole or in part by the Company. The stated call period commenced on June 30, 2008 and can be exercised by the Company from time to time hereafter. Cash distributions on the securities are payable quarterly at an annual rate of 7.80%. The Company issued a new \$32.6 million subordinated debenture to the trust in return for the aggregate net proceeds of this trust preferred offering. The interest rate and payment frequency on the debenture are equivalent to the cash distribution basis on the trust preferred securities.

The Company issued an additional \$25.0 million of cumulative trust preferred securities through a private placement completed by an additional unconsolidated subsidiary, Old Second Capital Trust II, in April 2007. Although nominal in amount, the costs associated with that issuance are being amortized over 30 years. These trust preferred securities also mature in 30 years, but subject to the aforementioned regulatory approval, can be called in whole or in part on a quarterly basis commencing June 15, 2017. The quarterly cash distributions on the securities are fixed at 6.77% through June 15, 2017 and float at 150 basis points over three-month LIBOR thereafter. The Company issued a new \$25.8 million subordinated debenture to the trust in return for the aggregate net proceeds of this trust preferred offering. The interest rate and payment frequency on the debenture are equivalent to the cash distribution basis on the trust preferred securities. The proceeds from this trust preferred offering were used to finance the common stock tender offer in May 2007.

Both of the debentures issued by Old Second Bancorp, Inc. are recorded on the Consolidated Balance Sheets as junior subordinated debentures and the related interest expense for each issuance is included in the Consolidated Statements of Operations.

**Note 11 Long-Term Incentive Plan**

The Long-Term Incentive Plan (the Incentive Plan) authorizes the issuance of up to 1,908,332 shares of the Company's common stock, including the granting of qualified stock options (Incentive Stock Options), nonqualified stock options, restricted stock, and stock appreciation rights. Total shares issuable under the plan were 424,776 at September 30, 2009 and 664,277 at December 31, 2008. Stock based awards may be granted to selected directors and officers or employees at the discretion of the board of directors. All stock options were granted for a term of ten years. Restricted stock vests three years from the grant date. Awards under the Incentive Plan become fully vested upon a merger or change in control of the Company. Compensation expense is recognized over the vesting period of the options based on the fair value of the options at the grant date.

Total compensation cost that has been charged against income for those plans was \$228,000 in the third quarter of 2009 and \$754,000 in the first nine months of 2009. The total income tax benefit was \$80,000 in the third quarter of 2009 and \$264,000 in the first nine months of 2009. Total compensation cost that has been charged against income for those plans was \$255,000 in the third quarter of 2008 and \$760,000 in the first nine months of 2008. The total income tax benefit was \$89,000 in the third quarter of 2008 and \$266,000 in the first nine months of 2008.

## Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

There were no stock options exercised or granted during the third quarter of 2009. There were 10,500 stock options exercised during the third quarter of 2008. There were no stock options granted during the third quarter of 2008. Total unrecognized compensation cost related to nonvested stock options granted under the Incentive Plan was \$282,000 as of September 30, 2009, and is expected to be recognized over a weighted-average period of 1.00 years. Total unrecognized compensation cost related

# Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

## Table of Contents

to nonvested stock options granted under the Incentive Plan was \$618,000 as of September 30, 2008, and was expected to be recognized over a weighted-average period of 1.98 years.

A summary of stock option activity in the Incentive Plan as of each quarter is as follows:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (years)	Aggregate Intrinsic Value
Beginning outstanding at January 1, 2009	722,132	\$ 24.03		
Granted	16,500	7.49		
Exercised	(5,334)	10.13		
Canceled	(13,000)	29.12		
Expired				
Ending outstanding	720,298	\$ 23.66	4.80	\$
Exercisable at end of quarter	617,136	\$ 23.46	4.24	\$
Beginning outstanding at January 1, 2008	740,798	\$ 23.67		
Granted				
Exercised	(16,000)	10.02		
Expired				
Ending outstanding	724,798	\$ 23.98	5.63	\$ 1,192,719
Exercisable at end of quarter	582,466	\$ 22.93	4.84	\$ 1,192,719

A summary of changes in the Company's nonvested options in the Incentive Plan is as follows:

	September 30, 2009	Weighted Average Grant Date Fair Value
Nonvested at January 1, 2009	86,662	\$ 6.45
Granted	16,500	2.01
Vested		
Nonvested at September 30, 2009	103,162	\$ 5.74

A summary of stock option activity as of September 30 is as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
Intrinsic value of options exercised	\$	\$ 97,258	\$ 673	\$ 160,818

# Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Cash received from option exercises	106,064	54,033	160,259
Tax benefit realized from option exercises	38,655	268	63,917
Weighted average fair value of options granted		2.01	

# Table of Contents

Restricted stock was granted beginning in 2005 under the Incentive Plan. Restricted stock units were granted beginning in 2009 under the Incentive Plan. No shares were issued during either the third quarter of 2009 or the third quarter of 2008. These share rights are subject to forfeiture until certain restrictions have lapsed, including employment for a specific period. These share rights vest after a three-year period. Compensation expense is recognized over the vesting period of the shares based on the market value of the shares at issue date. Awards under the Incentive Plan become fully vested upon a merger or change in control of the Company.

A summary of changes in the Company's nonvested shares of restricted stock is as follows:

	September 30, 2009		September 30, 2008	
	Shares	Weighted Average Grant Date Fair Value	Shares	Weighted Average Grant Date Fair Value
Nonvested at January 1	53,311	\$ 28.49	46,065	\$ 30.09
Granted	133,724	7.49	27,254	27.75
Vested	(3,165)	27.57	(702)	31.34
Forfeited	(3,006)	29.28		
Nonvested at September 30	180,864	\$ 12.97	72,617	\$ 29.20

Total unrecognized compensation cost of restricted shares is \$1.1 million as of September 30, 2009, which is expected to be recognized over a weighted-average period of 2.70 years. Total unrecognized compensation cost of restricted shares was \$857,000 as of September 30, 2008, which was expected to be recognized over a weighted-average period of 1.92 years. There were no restricted share rights vested at September 30, 2009 or September 30, 2008.

## Note 12 Earnings Per Share

The earnings (loss) per share is included below as of September 30 (share data not in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2009	2008	2009	2008
Basic (loss) earnings per share:				
Weighted-average common shares outstanding	13,823,622	13,747,723	13,813,441	13,520,949
Weighted-average common shares less stock based awards	13,707,907	13,674,404	13,707,692	13,453,337
Weighted-average common shares stock based awards	181,165	72,999	161,027	73,112
Net (loss) income	\$ 1,472	\$ 4,121	\$ (55,970)	\$ 17,007
Dividends and accretion of discount on preferred shares	1,121		3,157	
Net (loss) income available to common shareholders	351	4,121	(59,127)	17,007
Common stock dividends	(137)	(2,189)	(1,234)	(6,395)

Other comprehensive income (loss) on available-for-sale	2,910	(4,301)	3,608	(6,298)
Changes in fair value of derivatives used for cashflow hedges arising during the period			158	
Related tax expense			(63)	
Other comprehensive income on cashflow hedges			95	
Total other comprehensive income (loss)	\$ 2,910	\$ (4,301)	\$ 3,703	\$ (6,298)

**Note 14 Retirement Plans**

The Company maintains tax-qualified contributory and non-contributory profit sharing plans covering substantially all full-time and regular part-time employees. The expense of these plans was \$1.0 million and \$1.8 million in the first nine months of 2009 and 2008, respectively, as the Company eliminated the profit sharing contribution and lowered the amount of the 401K match in 2009. Management had increased the discretionary plan expense in 2008, in part to accommodate the additional permanent employees from Heritage.

Table of Contents

**Note 15 Fair Value Option and Fair Value Measurements**

In September 2006, Fair Value Measurements was issued. This statement defines fair value, establishes a framework for measuring fair value, and expands disclosures about Fair Value Measurements. The guidance establishes a fair value hierarchy about the assumptions used to measure fair value and clarifies assumptions about risk and the effect of a restriction on the sale or use of an asset. This guidance became effective for fiscal years beginning after November 15, 2007. Fair Value Measurements does not change existing guidance as to whether or not an asset or liability is carried at fair value, but it defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Fair Value Option for Financial Assets and Financial Liabilities requirement generally permits the measurement of selected eligible financial instruments at fair value at specified election dates, subject to the conditions set for the in the standard. As disclosed in the Company's 2008 Annual Report, the impact of adoption was not material.

The Company elected to adopt the Fair Value Option for Financial Assets and Financial Liabilities as required on January 1, 2008. That standard provides companies with an option to report selected financial assets and liabilities at fair value and establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities. As of April 1, 2009, the Company elected the fair value option for the loans held-for-sale. The Company did not elect the fair value option for any other financial assets or financial liabilities.

**Fair Value Measurement**

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The fair value hierarchy established, also requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the Company has the ability to access as of the measurement date.

Level 2: Significant observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The Company uses the following methods and significant assumptions to estimate fair value:

## Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

- Investment securities available-for-sale are valued primarily by a third party pricing agent and both the market and income valuation approaches are implemented using the following types of inputs:
- U.S. treasuries are priced using the market approach and utilizing live data feeds from active market exchanges for identical securities.
- Government-sponsored agency debt securities are primarily priced using available market information through processes such as benchmark curves, market valuations of like securities, sector groupings and matrix pricing.
- Other government-sponsored agency securities, mortgage-backed securities and some of the actively traded REMICs and CMOs are primarily priced using available market information including benchmark yields, prepayment speeds, spreads and volatility of similar securities.

Table of Contents

- Other inactive government-sponsored agency securities are primarily priced using consensus pricing and dealer quotes.
- State and political subdivisions are largely grouped by characteristics, i.e., geographical data and source of revenue in trade dissemination systems. Because some securities are not traded daily and due to other grouping limitations, active market quotes are often obtained using benchmarking for like securities.
- Collateralized debt obligations are collateralized by trust preferred security issuances of other financial institutions. Uncertainty in the financial markets in the periods presented has resulted in reduced liquidity for these investment securities, which continued to affect market pricing in the period presented. To reflect an appropriate fair value measurement, management included a risk premium adjustment to provide an estimate of the amount that a market participant would demand because of uncertainty in cash flows. Management made that adjustment at June 30, 2009 because the level of market activity for the CDO security has continued to decrease and information on orderly sale transactions was not generally available.
- Marketable equity securities are priced using available market information.
- Residential mortgage loans eligible for sale in the secondary market are carried at fair market value. The fair value of loans held for sale is determined using quoted secondary market prices.
- Lending related commitments to fund certain residential mortgage loans (interest rate locks) to be sold in the secondary market and forward commitments for the future delivery of mortgage loans to third party investors as well as forward commitments for future delivery of mortgage-backed securities are considered derivatives. Fair values are estimated based on observable changes in mortgage interest rates including mortgage-backed securities prices from the date of the commitment and do not typically involve significant judgments by management.
- The fair value of mortgage servicing rights is based on a valuation model that calculates the present value of estimated net servicing income. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income to derive the resultant value. The Company is able to compare the valuation model inputs, such as the discount rate, prepayment speeds, weighted average delinquency and foreclosure/bankruptcy rates to widely available published industry data for reasonableness.
- Interest rate swap positions, both assets and liabilities, are valued by means of Bloomberg pricing models using an income approach based upon readily observable market parameters such as interest rate yield curves.
- The credit valuation reserve on customer interest rate swap positions was determined based upon management's estimate of the amount of credit risk exposure, including available collateral protection and/or by utilizing an estimate related to a probability of default as indicated in the Bank credit policy.

**Assets and Liabilities Measured at Fair Value on a Recurring Basis:**

The tables below present the balance of assets and liabilities at September 30, 2009 and December 31, 2008, respectively, measured at fair value on a recurring basis:

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Table of Contents

	September 30, 2009			
	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Investment securities available-for-sale	\$ 1,576	\$ 233,725	\$ 11,092	\$ 246,393
Loans held-for-sale		9,234		9,234

<b>Total</b>	<b>\$</b>	<b>\$ 4,870</b>	<b>\$ 26</b>	<b>\$ 4,896</b>

The changes in Level 3 assets and liabilities measured at fair value on a recurring basis are summarized as follows:

	Investment securities available-for-sale	September 30, 2009 Interest Rate Swap Credit Valuation	Risk Participation Agreement	
Beginning balance January 1, 2009	\$ 52	\$	\$	(26)
Total gains or losses (realized/unrealized)				
Included in earnings				(4)
Included in other comprehensive income	(71)			
Purchases and issuances		(981)		
Settlements				
Expirations				
Transfers in and /or out of Level 3	11,111			
<b>Ending balance September 30, 2009</b>	<b>\$ 11,092</b>	<b>\$ (981)</b>	<b>\$</b>	<b>(30)</b>

Table of Contents**Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis:**

The Company may be required, from time to time, to measure certain other financial assets at fair value on a nonrecurring basis in accordance with GAAP. These assets consist of servicing rights and impaired loans. At December 31, 2008, loans held-for-sale were valued at the lower-of-cost or fair market value basis. For assets measured at fair value on a nonrecurring basis on hand at September 30, 2009 and December 31, 2008, respectively, the following tables provide the level of valuation assumptions used to determine each valuation and the carrying value of the related assets:

	September 30, 2009			
	Level 1	Level 2	Level 3	Total
Mortgage servicing rights(1)	\$	\$	1,579	\$ 1,579
Impaired loans(2)			29,093	29,093
<b>Total</b>	\$	\$	30,672	\$ 30,672

(1) Mortgage servicing rights, which are carried at the lower-of-cost or fair value, totaled \$1.6 million, which is net of a valuation reserve amount of \$231,000. A net recovery of \$368,000 was included in earnings for the first nine months ending September 30, 2009.

(2) Represents carrying value and related write-downs of loans for which adjustments are based on the appraised value of collateral for collateral-dependent loans, had a carrying amount of \$34.1 million, with a valuation allowance of \$5.0 million, resulting in a decrease of specific allocations within the provision for loan losses of \$10.3 million for the first nine months ending September 30, 2009. The carrying value of loans fully charged off is zero.

	December 31, 2008			
	Level 1	Level 2	Level 3	Total
Mortgage servicing rights(1)	\$	\$	1,374	\$ 1,374
Impaired loans(2)			65,792	65,792
<b>Total</b>	\$	\$	67,166	\$ 67,166

(1) Mortgage servicing rights, which are carried at the lower-of-cost or fair value, totaled approximately \$1.4 million, which is net of a valuation reserve amount of approximately \$599,000. A net recovery of \$512,000 was included in earnings for the year ending December 31, 2008.

(2) Represents carrying value and related write-downs of loans for which adjustments are based on the appraised value of collateral for collateral-dependent loans, had a carrying amount of \$85.2 million, with a valuation allowance of \$15.3 million, resulting in an additional provision for loan losses of \$13.5 million for the year ending December 31, 2008. The carrying value of loans fully charged off is zero.

**Note 16 Interest Rate Swap Derivatives**

To meet the financing needs of its customers, the Bank, as a subsidiary of the Company, is a party to various financial instruments with off-balance-sheet risk in the normal course of business. These off-balance-sheet financial instruments include commitments to originate and sell loans as well as financial standby, performance standby and commercial letters of credit. The instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheet. The Bank's exposure to credit loss in the event of nonperformance by the other party to the financial instruments for loan commitments and letters of credit are represented by the dollar amount of those instruments. Management generally uses the same credit policies and collateral requirements in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Table of Contents

The Company also has interest rate derivative positions that are not designated as hedging instruments. These derivative positions relate to transactions in which the Bank enters into an interest rate swap with a client while at the same time entering into an offsetting interest rate swap with another financial institution. The Bank had \$5.2 million in investment securities pledged to support interest rate swap activity with the correspondent financial institution at September 30, 2009. There was no related pledge requirement at December 31, 2008. In connection with each transaction, the Bank agrees to pay interest to the client on a notional amount at a variable interest rate and receive interest from the client on the same notional amount at a fixed interest rate. At the same time, the Bank agrees to pay another financial institution the same fixed interest rate on the same notional amount and receive the same variable interest rate on the same notional amount. The transaction allows the client to effectively convert a variable rate loan to a fixed rate loan and is also part of the Company's interest rate risk management strategy. Because the Bank acts as an intermediary for the client, changes in the fair value of the underlying derivative contracts offset each other and do not generally impact the results of operations. Fair value measurements include an assessment of credit risk related to the client's ability to perform on their contract position, however, and valuation estimates related to that exposure are discussed in Note 15 above. At September 30, 2009, the notional amount of non-hedging interest rate swaps was \$85.5 million with a weighted average maturity of 4.3 years. At December 31, 2008, the notional amount of non-hedging interest rate swaps was \$52.6 million with a weighted average maturity of 4.5 years.

As of September 30, 2009, the Bank was party to one risk participation agreement ( RPA ) in a swap transaction with a correspondent bank for which it received a participation payment. As a participant in the RPA agreement, the Bank is not a party to the swap transaction, but it does act as a financial guarantor of 26.49% of the close out value of the swap should the counterparty to the swap transaction default or otherwise fail to perform its payment obligation, which ends June 27, 2011. The Bank estimates the market value of the RPA monthly and includes the estimated change in value in its quarterly operating results. The maximum theoretical upper bound of dollar exposure of this credit risk is approximately \$489,000 and is derived by assuming interest rates reached an effective rate of 0.0%. The actual potential credit risk of the RPA at September 30, 2009 was approximately \$357,000

The Bank also grants mortgage loan interest rate lock commitments to borrowers, subject to normal loan underwriting standards. The interest rate risk associated with these loan interest rate lock commitments is managed by entering into contracts for future deliveries of loans as well as mortgage-backed securities. Loan interest rate lock commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Commitments to originate residential mortgage loans held-for-sale and forward commitments to sell residential mortgage loans are considered derivative instruments and changes in the fair value are recorded to mortgage banking income. Fair value of mortgage loan commitments were estimated based on observable changes in mortgage interest rates and mortgage-backed security prices from the date of the commitments.

The following table presents derivatives not designated as hedging instruments as of September 30, 2009.

# Table of Contents

	Notional or Contractual Amount	Asset Derivaties		Liability Derivatives	
		Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Interest rate swap contracts net of credit valuation	\$ 85,916	Other Assets	\$ 3,371	Other Liabilities	\$ 4,352
Commitments(1)	384,302	Other Assets	51	N/A	
Forward contracts	33,728	N/A		Other Liabilities	93
Risk participation agreements	7,000	N/A		Other Liabilities	30
Total			\$ 3,422		\$ 4,475

(1) Includes unused loan commitments, interest rate lock commitments and forward rate lock and mortgage-backed securities commitments.

The Bank issues letters of credit, which are conditional commitments that guarantee the performance of a customer to a third party. The credit risk involved and collateral obtained in issuing letters of credit is essentially the same as that involved in extending loan commitments to our customers. Financial standby, performance standby and commercial letters of credit totaled \$18.8 million, \$25.5 million, and \$10.4 million at September 30, 2009, respectively. Financial standby, performance standby and commercial letters of credit totaled \$21.5 million, \$28.3 million, and \$13.1 million at December 31, 2008, respectively. Financial standby letters of credit have terms ranging from two months to four and a quarter years. Performance standby letters of credit have terms ranging from four months to four years. Commercial letters of credit have terms ranging from one month to five years.

## Note 17 Fair Values of Financial Instruments

ASC 825, Disclosures about Fair Value of Financial Instruments, requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis. The estimated fair values approximate carrying amount for all items except those described in the following table. Security fair values are generally based upon market price or dealer quotes except as described in Note 15 above. For non-marketable securities such as FHLBC and FRB stock, the carrying amounts reported in the balance sheet approximate fair value. Fair values of loans were estimated for portfolios of loans with similar financial characteristics, such as type and fixed or variable interest rate terms. Cash flows were discounted using current rates at which similar loans would be made to borrowers with similar ratings and for similar maturities. The fair value of time deposits is estimated using discounted future cash flows at current rates offered for deposits of similar remaining maturities. The fair values of borrowings were estimated based on interest rates available to the Company for debt with similar terms and remaining maturities. The fair value of off-balance sheet items is not considered material.

The carrying amount and estimated fair values of financial instruments were as follows:

Table of Contents

	September 30, 2009		December 31, 2008	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
<b>Financial assets:</b>

**Note 18 - Preferred Stock**

The Series A Preferred Stock was issued as part of the Troubled Asset Relief Program ( TARP ) Capital Purchase Program implemented by the United States Department of the Treasury ( Treasury ). The Series A Preferred Stock qualifies as Tier 1 capital and pays cumulative dividends on the liquidation preference amount on a quarterly basis at a rate of 5% per annum for the first five years, and 9% per annum thereafter. Concurrent with issuing the Series A Preferred Stock, the Company issued to the Treasury a ten year warrant to purchase 815,339 shares of the Company s Common Stock at an exercise price of \$13.43 per share.

The American Recovery and Reinvestment Act of 2009, which was enacted on February 17, 2009, permits the Company to redeem the Series A Preferred Stock at any time by repaying the Treasury, without penalty and without the requirement to raise new capital, subject to the Treasury s consultation with the Company s appropriate regulatory agency. Additionally, upon repayment, the Treasury will liquidate all outstanding warrants at their current market value.

Subsequent to the Company s receipt of the \$73.0 million in proceeds from the Treasury in the first quarter of 2009, the proceeds were allocated between the preferred stock and warrants that were issued. The warrants were classified as equity, and the allocation was based on their relative fair values in accordance with accounting guidance. The fair value was determined for both the preferred stock and the warrants as part of the allocation process in the amounts of \$68.2 million and \$4.8 million, respectively.

The fair value of the preferred stock was determined by using Fair Value Measurement concepts, using a discounted cash flow approach. Upon review of economic conditions and events that gave rise to the TARP Capital Purchase Program, a discount rate of 15% was selected to reflect management's estimate of a current market rate for the Company. Factors such as the creditworthiness of the Company, its standing as a public company, and the unique economic environment particularly as it related to financial institutions and the Treasury program were considered, as was the ability of the Company to access capital. A final factor was management's belief that the initial stated preferred stock

Table of Contents

dividend rate (5%) was below market, which also drove the decision to select the higher discount rate of 15%.

**Note 19 Subsequent Events**

We have evaluated subsequent events through the date our financial statements were issued, or November 9, 2009. We do not believe any subsequent events have occurred that would require further disclosure or adjustment to our financial statements.

## **Table of Contents**

### **Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

#### **Overview**

Old Second Bancorp, Inc. (the "Company") is a financial services company with its main headquarters located in Aurora, Illinois. The Company is the holding company of Old Second National Bank (the "Bank"), a national banking organization headquartered in Aurora, Illinois and provides commercial and retail banking services, as well as a full complement of trust and wealth management services. The Company has offices located in Cook, Kane, Kendall, DeKalb, DuPage, LaSalle and Will counties in Illinois. As a result of the February 2008 acquisition of Heritage, the franchise expanded into the southwestern section of Cook County, which includes the higher growth markets of the south Chicago suburbs. Management believed this transaction provided funding diversification with the acquisition of a strong core deposit base that also expanded our ability to offer Trust and other services as well as commercial loan and treasury management products at these locations. This acquisition provided additional market penetration by adding five retail-banking offices and allowed the Company to fill in its footprint surrounding the Chicago metropolitan area. The Company also offers insurance products through Old Second Financial, Inc.

The first quarter 2008 earnings included the contribution of the Heritage acquisition from the February 8, 2008 closing date. The Company paid consideration of \$43.0 million in cash and 1,563,636 shares of the Company's common stock valued at \$27.50 per share to consummate the Heritage acquisition. Details related to the allocation of the purchase price for this business combination are discussed in Note 2 of the financial statements included in this quarterly report. The terms of the credit facilities that were established to complete the acquisition are detailed in Note 9 of the financial statements included in this quarterly report.

The financial system in the United States, including the credit markets and markets for real estate and related assets, have been in a state of disarray since early 2008. The nationwide disorder in markets have resulted in extraordinary declines in the values of real estate and associated asset types, including the availability of ready markets, and have impacted the ability of many borrowers to continue to pay on their obligations. While some economic indicators have begun to show improvement, the inability of some borrowers to repay continues to be experienced in the Company's local market and has affected the ability of some Old Second clientele to perform on their obligations. Because of these ongoing economic conditions and the related impact upon borrower's ability to perform, the Company greatly increased the provision for loan losses in 2009, and has experienced an increase in both loans charged off and nonperforming assets that continued into the third quarter. As a result of these events, and the second quarter 2009 goodwill impairment charge discussed below, net income declined considerably as compared to prior financial periods. The Company remains committed and focused on maintaining and enhancing its procedures regarding its asset quality and general underwriting standards.

#### **Results of Operations**

Net income for the third quarter of 2009 decreased to \$1.5 million, or \$0.03 diluted earnings per share, compared with \$4.1 million, or \$0.30 diluted earnings per share, in the third quarter of 2008. In the first nine months of 2009, the Company recorded a loss of \$4.26 per diluted share, on \$56.0 million in net loss, as compared to \$1.25 per diluted share in the first nine months of 2008, on net income of \$17.0 million. The year to date loss incurred in 2009 included a second quarter pretax goodwill impairment charge of \$57.6 million that had an associated tax benefit of \$22.0 million as described below. Generally, for both the quarter and year to date periods, the decrease in earning assets combined with the increases in both the provision for loan losses and other expenses more than offset increases in noninterest income and reductions to interest expense. The Company recorded a \$66.6 million provision for loan losses in the nine months ended September 30, 2009, which included an addition of \$9.7 million in the third quarter. Net charge-offs in the same period were \$49.8 million for the nine months ended September 30,

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

2009 and \$26.2 million for the third quarter. In the same period in 2008, the provision for loan losses was \$9.1

Table of Contents

million, \$6.3 million of which was added in the third quarter. Net charge-offs in the same period were \$4.8 million for the nine months ended September 30, 2008 and \$3.7 million for the third quarter. The net income available to common stockholders was \$351,000 for the third quarter, which decreased the net loss available to common shareholders to \$59.1 million for the first nine months of 2009. This compared to net income available to common shareholders of \$4.1 million and \$17.0 million, respectively, for the same periods in 2008.

Goodwill arises from business acquisitions and represents the value attributable to unidentifiable intangible elements in the business acquired. Of the \$57.6 million second quarter 2009 noncash charge described above, \$55.4 million originated from the February 8, 2008 acquisition of HeritageBanc, Inc. and Heritage Bank. The portion of the goodwill intangible asset charge that was attributable to Heritage is tax deductible and has an associated \$22.0 million tax benefit. Although not anticipated, there can be no guarantee that a valuation allowance against the resultant deferred tax asset will not be necessary in future periods. Given the noncash nature of a goodwill impairment charge, this noninterest expense item had no adverse affect upon the Company's liquidity position. Additional details related to goodwill are provided in Note 6 of the financial statements included in this quarterly report.

***Net Interest Income***

Net interest income decreased from \$66.1 million in the first nine months of 2008 to \$64.9 million in the first nine months of 2009. Average earning assets decreased \$32.2 million, or 1.2%, from September 30, 2008 to September 30, 2009, as management continued to place emphasis upon asset quality and loan growth was limited due to the general decline in the number of qualified borrowers. Average interest bearing liabilities decreased \$86.6 million, or 3.6%, during the same period. The decrease in average interest bearing liabilities was due in large part to an initiative to retain relationships when they repriced and not to focus on attracting or retaining new deposit relationships where the depositor will utilize no other product or service. The net interest margin (tax equivalent basis), expressed as a percentage of average earning assets, decreased from 3.41% in the first nine months of 2008 to 3.39% in the first nine months of 2009. The average tax-equivalent yield on earning assets decreased from 6.02% in the first nine months of 2008 to 5.17%, or 85 basis points, in the first nine months of 2009. The cost of funds on interest bearing liabilities decreased from 3.03% to 2.13%, or 90 basis points in the same period, but the continued level of nonaccrual loans combined with the general decrease in interest rates lowered interest income to a greater degree than it reduced interest expense.

Net interest income decreased from \$23.6 million in the third quarter of 2008 to \$21.0 million in the third quarter of 2009. The decrease in average earning assets on a quarterly comparative basis was \$145.5 million, or 5.4%, from September 30, 2008 to September 30, 2009 due in part to a continued lack of demand from qualified borrowers coupled with a decrease in securities available for-sale. Average interest bearing liabilities decreased \$211.2 million, or 8.8%, during the same period. The net interest margin (tax-equivalent basis), expressed as a percentage of average earning assets, decreased from 3.61% in the third quarter of 2008 to 3.39% in the third quarter of 2009. The average tax-equivalent yield on earning assets decreased from 5.83% in the third quarter of 2008 to 5.02% in the third quarter of 2009, or 81 basis points. The cost of interest-bearing liabilities also decreased from 2.57% to 1.97%, or 60 basis points in the same period, but the continued higher level of nonaccrual loans combined with the repricing of interest bearing assets and liabilities in a lower interest rate environment decreased interest income to a greater degree than it decreased interest expense.

Management, in order to evaluate and measure performance, uses certain non-GAAP performance measures and ratios. This includes tax-equivalent net interest income (including its individual components) and net interest margin (including its individual components) to total average interest-earning assets. Management believes that these measures and ratios provide users of the financial information with a more accurate view of the performance of the interest-earning assets and interest-bearing liabilities and of the Company's operating efficiency for comparison purposes. Other financial holding companies may define or calculate these measures and ratios differently. See the tables and notes

# Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

## Table of Contents

below for supplemental data and the corresponding reconciliations to GAAP financial measures for the three and nine-month periods ended September 30, 2009 and 2008.

The following tables set forth certain information relating to the Company's average consolidated balance sheets and reflect the yield on average earning assets and cost of average liabilities for the periods indicated. Dividing the related interest by the average balance of assets or liabilities derives rates. Average balances are derived from daily balances. For purposes of discussion, net interest income and net interest income to total earning assets on the following tables have been adjusted to a non-GAAP tax equivalent (TE) basis using a marginal rate of 35% to more appropriately compare returns on tax-exempt loans and securities to other earning assets.

Net interest income to total interest earning assets (TE)	3.39%	3.61%	3.39%	3.41%

***Provision for Loan Losses***

In the first nine months of 2009, the Company recorded a \$66.6 million provision for loan losses, which included an addition of \$9.7 million in the third quarter. In the first nine months of 2008, the provision for loan losses was \$9.1 million, which included an addition of \$6.3 million in the third quarter. An additional \$3.0 million of allowance for loan losses was also assumed in the Heritage acquisition in the first quarter of 2008. Nonperforming loans increased to \$176.1 million at September 30, 2009 from \$108.6 million at December 31, 2008, and \$65.7 million at September 30, 2008. On a linked quarter basis, however, nonperforming loan totals decreased from the June 30, 2009 level of \$178.6 million. Charge-offs, net of recoveries, totaled \$49.8 million and \$4.8 million in the first nine months of 2009 and 2008, respectively. Net charge-offs totaled \$26.2 million in the third quarter of 2009 and \$3.7 million in the third quarter of 2008.

Provisions for loan losses are made to provide for probable and estimable losses inherent in the loan portfolio. Management closely monitors portfolio quality and when available information indicates that specific loans or portions of loans are uncollectible, management charges off those amounts to reduce the outstanding loan balance. While this reduces specific allocation estimates in the allowance for loan losses, it simultaneously reduces the estimated remaining risk of loss. The distribution of the Company's gross charge-off activity for the periods indicated is detailed in the first table below and the remaining nonperforming loans at September 30, 2009 are included in the table immediately following (in thousands):

Loan Charge-offs, Gross	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2009	2008	2009	2008
Real Estate-Construction	\$ 21,653	\$ 3,571	\$ 41,055	\$ 4,007

Commercial and Industrial	171		934	58
Other	942	93	2,175	213
	\$ 26,374	\$ 3,812	\$ 50,254	\$ 5,079

Table of Contents**Nonperforming Loans as of September 30, 2009**

	<b>Nonaccrual Total (1)</b>	<b>90 Days or More Past Due</b>	<b>Restructured Loans (Accruing)</b>	<b>Total Non performing Loans</b>	<b>% Non Performing Loans</b>	<b>Specific Allocation</b>
Real Estate - Construction	\$ 87,042	\$ 400	\$	\$ 87,442	49.7%	\$ 2,203
Real Estate - Residential:						
Investor	28,719		317	29,036	16.5%	141
Owner Occupied	16,460		7,128	23,588	13.4%	1,149
Revolving and Junior Liens	960			960	0.5%	120
Real Estate - Commercial, Nonfarm	30,330	218	298	30,846	17.5%	972
Real Estate - Commercial, Farm	2,243			2,243	1.3%	
Commercial and Industrial	888	284		1,172	0.7%	154
Other	771			771	0.4%	305
	\$ 167,413	\$ 902	\$ 7,743	\$ 176,058	100.0%	\$ 5,044

(1) Nonaccrual loans included \$26.3 million in restructured loans, \$11.9 million in real estate construction, \$5.4 million in commercial real estate, \$6.0 million is in real estate - residential investor and \$3.0 million is in real estate - owner occupied.

The largest component of nonperforming loans continues to be in the real estate construction sector, at \$87.4 million, or 49.7% of total nonperforming loans. This is a \$7.5 million decrease on a linked quarter basis. Management estimated that a loss allocation of \$2.2 million was adequate coverage for this category. Migration to nonperforming status occurred primarily from loans that had been previously rated as substandard. In addition to the general lack of demand for new construction in our market area, the problems in this sector were compounded by a continued decline in real estate valuations. The subcomponent details for the real estate construction segment at September 30, 2009 (in thousands) is set forth below:

<b>Real Estate - Construction</b>	<b>Nonaccrual Total</b>	<b>90 Days or More Past Due</b>	<b>Restructured Loans (Accruing)</b>	<b>Total Non performing Loans</b>	<b>% Non Performing Loans</b>	<b>Specific Allocation</b>
Homebuilder	\$ 53,690	\$	\$	\$ 53,690	61.4%	\$ 2,034
Commercial	13,010	400		13,410	15.3%	
Land	14,505			14,505	16.6%	46
Other	5,837			5,837	6.7%	123
	\$ 87,042	\$ 400	\$	\$ 87,442	100%	\$ 2,203

Commercial real estate was the Company's second largest category of nonperforming loans representing \$30.8 million, 17.5% of the nonperforming loan portfolio, a decrease of \$1.1 million on a linked-quarter basis. Within this segment, 45.8% consisted of strip mall or other retail properties where cash flows were insufficient to support the debt. Management has been in the process of administering a variety of workout strategies with the borrowers and such remedies could include a restructure option to allow more time to obtain additional tenants for a specific property or liquidation of the borrower. Management estimated that a specific loss allocation of \$510,000 was adequate coverage on that category after charging off \$1.1 million in the third quarter of 2009. The remaining nonperforming commercial real estate loans included a variety of owner occupied and non-owner occupied properties. Management estimated that a specific loss allocation of \$462,000 was sufficient for that grouping after charging off \$509,000 in the third quarter of 2009.

## Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Nonperforming residential investor loans consist of multi-family and one to four family properties that totaled \$29.0 million and accounted for 16.5% of the nonperforming loan total, an increase of \$321,000 on a linked-quarter basis. Approximately 10.6% of the Company's single-family investor loans and 6.7% of the multi-family investor loans were nonperforming as of September 30, 2009. A significant portion of these totals was attributable to a single borrower relationship totaling \$14.2 million and was comprised of approximately \$8.8 million in multi-family investment properties and \$5.4 million in one-to-four family investment properties. This relationship accounted for 49.0% of the residential investor nonperforming loan total. Management charged off \$420,000 related to that borrower during the

Table of Contents

third quarter of 2009 and estimated that no additional allocations were needed as of September 30, 2009 based upon a review of recent appraisals. The Company was the successful bidder at a Chapter 11 Bankruptcy sale of these properties, and it is anticipated that final court approval of the sale will be received in the fourth quarter of 2009. This approval would also provide clear title and would result in a transfer to other real estate owned.

A second single relationship accounted for \$5.0 million, or 17.2%, of the nonperforming loans in the residential investor category. In the aggregate, these credits are secured by forty single-family homes. These homes are substantially rented with few vacancies, but the cash flow has been insufficient to fully support the contractual repayment terms. Management has entered into a forbearance agreement with this borrower and this credit was categorized as a troubled debt restructuring within the nonaccrual portfolio at the original principal amount. Under the terms of the forbearance agreement, a cash collateral arrangement has been established whereby the Bank collects all rental receipts, and the net cash flow after expenses is retained and applied to the loan on a monthly basis. This net cash flow has been sufficient to provide for principal reductions and management estimated no loss allocation was required based upon recently obtained appraisals.

Other residential investment loans totaling \$9.5 million were comprised of several different borrower relationships. The Bank has deployed a variety of work out methods for these credits and management has estimated a specific allocation of \$141,000 should be sufficient to cover the estimated losses on this portfolio segment, after charging off \$694,000 during the third quarter of 2009.

Nonperforming residential loans to individuals totaled \$23.6 million, which was approximately 10.6% of the Company's total owner occupied residential portfolio. This was an increase of \$5.3 million on a linked-quarter basis and represents 13.4% of the nonperforming loans total as of September 30, 2009. Approximately \$7.1 million of this segment was considered to be restructured, which was an increase of \$4.3 million on a linked quarter basis. Restructured loans include credits in forbearance/foreclosure avoidance programs where the borrower's income source has been impaired and the Company has made a concession to temporarily reduce payments and/or interest rates. Most of the loans within the \$16.5 million of the residential portfolio that was in nonaccrual status at September 30, 2009 are in various stages of foreclosure. Management has estimated that a specific allocation of \$1.1 million should be sufficient to cover the estimated loss on this residential portfolio after charging-off \$472,000 during the third quarter of 2009.

Farmland loans totaling \$2.2 million comprise 1.3% of the nonperforming loans at September 30, 2009, and approximately 4.1% of this aggregate loan portfolio category was nonperforming. One of the largest loans in this category is a single family farm relationship and management has estimated that no charge-off of principal or loss allocation was required based upon a recent review of the loan including the estimated collateral value.

A linked quarter comparison of loans that were classified as performing, but past due 30 to 89 days and still accruing interest, shows that this category had a modest increase from \$27.2 million at June 30, 2009 to \$31.9 million at September 30, 2009. However, this was a decrease from \$35.6 million at December 31, 2008. Of the September 30, 2009 past due amount, \$11.2 million, or 35.1%, were for various past due commercial land development and construction credits, \$4.0 million, or 12.5%, were secured by one-to-four family real estate credits, \$3.0 million, or 9.4%, were secured by multi-family properties, \$9.1 million, or 28.6%, were secured by nonfarm nonresidential properties and \$4.1 million, or 12.8%, were commercial and industrial credits with the remaining 1.6% of 30-89 days past due credits attributable to various installment and small farm credits of \$502,000.

As of September 30, 2009, the Company's loan portfolio had 14.1% invested in real estate construction and development loans and 43.7% invested in commercial real estate and the Company has generally limited its lending activity to locally known markets. Construction lending is typically based upon cost versus appraisal values and subsequent valuations were substantially based upon updated appraisals. Additionally, the

Company does not have any material direct exposure to sub-prime loan

Table of Contents

products as it has focused its real estate lending activities on providing traditional loan products to relationship borrowers in nearby markets versus nontraditional loan products or purchased loans originated by other lenders.

The ratio of the allowance for loan losses to nonperforming loans was 33.0% as of September 30, 2009, as compared to 38.0% at December 31, 2008 and 36.8% at September 30, 2008. While this ratio decreased somewhat as compared to September 30, 2008, management believed the allowance coverage was sufficient due to the estimated loss potential, which was reduced with the third quarter 2009 charge off activity. Management determines the amount to provide in the allowance for loan losses based upon a number of factors, including loan growth, the quality and composition of the loan portfolio, and loan loss experience. The latter item is also weighted more heavily based upon recent loss experience. Management also assigned a higher loss factor for the higher risk construction and development portfolio in the first quarter of 2009 and increased that factor again in the second quarter. In the third quarter, however, management decreased that factor back to the first quarter level since \$21.7 million of the third quarter charge-off activity was in the construction and development sector. Management also estimated that the reduced size of the pool of credits subject to this factor, and the amount of the projected probable remaining exposure merited the lower factor in part because the most adverse credits had already been designated as nonperforming and thus had an associated specific allocation estimate. Management also assigned a higher risk factor for segments of the commercial real estate portfolio in the second quarter of 2009 and incrementally increased that factor in the third quarter. The above changes in estimates were made by management to be consistent with observable trends within both the loan portfolio segments and in conjunction with market conditions. These environmental factors are evaluated on an ongoing basis and are included in the assessment of the adequacy of the allowance for loan losses. When measured as a percentage of loans outstanding, the allowance for loan losses increased to 2.69% at September 30, 2009 as compared to 1.82% at December 31, 2008, and 1.07% at September 30, 2008. In management's judgment, an adequate allowance for estimated losses has been established; however, there can be no assurance that actual losses will not exceed the estimated amounts in the future.

As discussed above, nonperforming loans include loans in nonaccrual status, troubled debt restructurings, and loans past due ninety days or more and still accruing interest. The comparative

# Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

## Table of Contents

nonperforming loan totals and related disclosures for the period ended June 30, 2009 and December 31, 2008 were as follows:

	September 30, 2009	December 31, 2008
Non-accrual loans	\$ 167,413	\$ 106,511
Restructured loans	7,743	
Loans 90 days or more past due and still accruing interest	902	2,119
Nonperforming loans	176,058	108,630
Other real estate	24,492	15,212
Nonperforming assets	\$ 200,550	\$ 123,842
Interest income recorded on nonaccrual loans	\$ 1,582	\$ 4,064
Interest income which would have been accrued on nonaccrual loans	\$ 9,134	\$ 7,714

## *Other Real Estate*

Other real estate owned ( OREO ) increased \$9.3 million from \$15.2 million at December 31, 2008, to \$24.5 million at September 30, 2009. Of that total, \$8.9 million was added in the third quarter of 2009 as management successfully converted collateral securing problem loans to properties ready for disposition. The Bank added 28 properties to OREO during the third quarter, which brought the total held as OREO to 49 properties after deducting six property sales that occurred in the period. Also included in OREO was one \$9.1 million property grouping that the Bank acquired in December 2008 in satisfaction of the outstanding debt. That group of properties was transferred to OREO at its estimated fair market value with subsequent estimated valuation review performed quarterly by management. That group of properties is comprised of residential townhomes, residential townhome lots, lots zoned for condominiums, and lots zoned for retail. The value added from townhome development in that project totaled \$2.4 million in the first nine months of 2009, which was substantially offset by \$2.0 million in townhome sales, which in turn provided a significant portion of the reported OREO gains on sale. Management based the original estimated value of the project upon appraisals as well as actual sales data. In the third quarter of 2009, management reviewed and lowered the estimated valuation by \$878,000, which brought the associated year to date valuation reserve to \$3.9 million on the project lots that are zoned for condominium and retail development. The townhome portion of this project was placed under contract for sale in the third quarter of 2009, with an anticipated fourth quarter closing date. Management anticipates that the proceeds from that sale will approximate the estimated fair value of the assets. The remaining OREO consisted of multiple properties of different types all of which are carried at their estimated realizable current market value. This includes 30 single-family homes with an estimated value of \$8.0 million, six non-farm, nonresidential properties with an estimated value of \$3.0 million, a number of lots zoned for residential construction with an estimated value of \$1.5 million, and one parcel of vacant acreage suitable for either farming or development with an estimated value of \$2.9 million.

## *Noninterest Income*

Noninterest income increased \$2.4 million, or 31.1%, to \$10.2 million during the third quarter of 2009 as compared to \$7.8 million during the same period in 2008. Likewise, noninterest income increased \$3.0 million, or 11.03%, to \$29.7 million during the first nine months of 2009 as compared to \$26.8 million during the same period in 2008. Trust income increased by \$90,000, or 4.6%, in the third quarter of 2009 due to the combined increase in valuation of assets under management coupled with the settlement of a large estate. Service charge income decreased, however by \$258,000, or 10.1%, in the third quarter of 2009, and \$341,000, or 4.9%, for the year to date period. For both the third quarter and year to date comparisons, the primary source of the decrease was from consumer bounce protection fees, but this trend was partially offset by increases in commercial checking account service charges. The latter item increased in large part from the reduced commercial earnings credits that resulted from a lower interest rate environment. Despite ongoing market turbulence, third quarter 2009 mortgage banking income, including net gain on sales of mortgage loans, secondary

market fees, and servicing income, totaled \$2.2 million, an increase of \$965,000, or 78.3%, from the third quarter of 2008. The Company attributed its continuing ability to increase mortgage banking income, in part, to the prior reengineering of its mortgage operations unit, which continues to be updated in response to changes in the marketplace. This process improvement is reflected both in its operating results as well as its number one position in mortgage origination market share in both Kane and Kendall Counties. Those same factors also allowed mortgage-banking operations to increase mortgage banking income \$2.8 million, or 48.4%, from \$5.8 million in the first nine months of 2008 to \$8.5 million for the same period in 2009.

Realized gains on securities totaled \$454,000 in the third quarter of 2009 and \$1.8 million for the first nine months as compared to a \$20,000 net realized loss in the third quarter of 2008 and \$1.4 million for the first nine months of that year. Bank owned life insurance ( BOLI ) income increased for the second consecutive quarter and was \$409,000, or 629.2%, higher than the same period in 2008, as the rates of return began to stabilize on the underlying insurance investments. For the first nine months of 2009, BOLI income thus showed an increase of \$263,000, or 38.4%, from the same period in 2008. The net gains on interest rate swap activity with customers included fee income of \$156,000 and \$1.1 million for the third quarter and first nine months of 2009, respectively, but was offset by a credit risk valuation recovery and expense of \$556,000 and \$981,000, respectively, on the estimated aggregate swap position exposure at September 30, 2009. The net gain on sales of other real estate in 2009 totaled \$169,000 and \$462,000, respectively, for the third quarter and first nine months due in large part to the Bank's successful marketing efforts related to these properties. Other noninterest income decreased by \$148,000, or 11.1%, in the third quarter of 2009, and decreased by \$129,000, or 3.5% for the year to date period. Even though automatic teller machine surcharge and interchange fees increased for both periods,

Table of Contents

**decreases in fee income from brokerage activities more than outpaced that growth in the third quarter of 2009.**

***Noninterest Expense***

Noninterest expense was \$20.2 million during the third quarter of 2009, an increase of \$588,000 from \$19.7 million in the third quarter of 2008. Noninterest expense was \$122.4 million during the first nine months of 2009, an increase of \$62.5 million, or 104.3%, from \$59.9 million in the first nine months of 2008. Excluding the second quarter nonrecurring goodwill impairment charge of \$57.6 million, and the net OREO valuation adjustment of \$3.6 million from one multiuse project, noninterest expense increased by approximately \$1.3 million, or 2.1%, in the first nine months of 2009. The reductions in salaries and benefits expense were significant for both the year to date and quarterly comparative periods. This expense decreased by \$1.2 million, or 11.4%, when comparing the third quarter of 2009 to the same period in 2008. As previously announced, management made the decision to delay filling open positions and completed a reduction in force late in March 2009. That initiative, combined with the first quarter elimination of management bonuses and profit sharing contributions, substantially resulted in the \$3.8 million, or 11.4%, decrease in employee related expenses when comparing the first nine months of 2009 to the same period in 2008.

The occupancy expense in the third quarter of 2009 decreased \$51,000, or 3.5%, from the third quarter of 2008. Occupancy expense increased \$112,000, or 2.5%, in the first nine months of 2009 as compared to the same period in 2008. The increases were largely due to a second quarter 2009 charge of \$125,000 that was recorded for the combined cost of early leasehold termination charges and related acceleration of the leasehold improvement costs for the three branches that were closed in the third quarter. One additional branch is scheduled to close in the fourth quarter of 2009 and management continues to evaluate branch profitability and service overlap at all leased facilities. Excluding those costs, the largest category increase in occupancy expense for both the quarter and year to date periods was for real estate taxes. Management actively reviews county assessments as part of the overall cost control strategy particularly with the general market decline in real estate valuations. On a quarterly and year to date comparative basis, the 2009 furniture and equipment expense decreased \$40,000, or 2.3%, and increased \$71,000, or 1.4%, respectively. This quarterly decrease was primarily due to reduced expenses related to network operating costs whereas the year to date increase was largely attributable to increased depreciation costs.

On a quarterly and year to date comparative basis, the Federal Deposit Insurance Corporation ( FDIC ) costs increased \$442,000, or 116.3%, and \$3.1 million, or 309.3%, respectively. These premium expenses increased industry wide and, in the second quarter of 2009, the FDIC levied an additional special assessment of \$1.3 million. In addition to that assessment and a general increase in insurance rates, we elected to participate in the FDIC's Temporary Liquidity Guarantee Program, through which all non-interest bearing transaction accounts are fully guaranteed, as are NOW accounts earning less than 0.5% interest, and that election also caused an increase in the assessment. Third quarter 2009 advertising expense decreased by \$279,000, or 47.1%, when compared to the same period in 2008, primarily due to decreased print advertising and direct mail costs. Similarly, advertising expense in the first nine months of 2009 decreased \$613,000, or 38.3%, as compared to the first nine months of 2008.

***Income Taxes***

An income tax benefit of \$126,000 was recorded in the third quarter of 2009 as compared to \$1.3 million in expense in the same period of 2008. Likewise, an income tax benefit of \$38.4 million was recorded in the first nine months of 2009 as compared to \$6.8 million in expense in the same period of 2008. During the three and nine month periods ended September 30, 2009, our taxable income significantly decreased compared to the same periods in 2008, primarily due to the results of our operations during the three and nine -month periods ended September 30, 2009. As discussed in the Company's prior quarterly report, the portion of the goodwill intangible asset charge that was attributable

Realized gains on securities totaled \$454,000 in the third quarter of 2009 and \$1.8 million for the first nine months of 2009.

Table of Contents

to the acquisition of Heritage Bank is tax deductible and has an associated \$22.0 million tax benefit. Although not anticipated, there can be no guarantee that a valuation allowance against the resultant deferred tax asset will not be necessary in future periods. Our effective tax rate for the three and nine-month period ending September 30, 2009 was 9.36% and 40.67%, respectively, as compared to 24.66% and 28.69%, respectively, for the same periods in 2008. The income tax benefit resulted, in part, from the impairment charges for the tax-deductible goodwill.

**Financial Condition**

*Assets*

Total assets decreased \$285.5 million, or 9.6%, from December 31, 2008 to close at \$2.70 billion as of September 30, 2009. Loans decreased by \$118.4 million as demand from qualified borrowers continued to decline, but the largest asset category decrease was a \$163.3 million, or 40.2%, decrease in the long-term securities that were available-for-sale. The third largest asset reduction category was goodwill, which was deemed to be impaired at June 30, 2009, and a noncash charge was taken at that time. Management also performed an annual review of the core deposit and other intangible assets as of February 2009. Based upon that review and subsequent monitoring, management determined there was no impairment of other intangible assets as of September 30, 2009. No assurance can be given that future impairment tests will not result in a charge to earnings. The core deposit and other intangible assets related to the Heritage Bank acquisition were \$6.9 million at September 30, 2009 as compared to \$8.9 million at acquisition. The largest asset category increase was in the interest bearing deposits with financial institutions, which increased, in part, due to balances held at the Federal Reserve Bank of Chicago in the excess reserve program.

*Loans*

Total loans were \$2.15 billion as of September 30, 2009, a decrease of \$118.4 million from \$2.27 billion as of December 31, 2008. The decrease was primarily attributable to declining demand from qualified borrowers, but also included loan charge-offs, net of recoveries, of \$49.8 million in the first nine months of 2009. The largest changes by loan type included decreases in commercial and industrial, real estate construction and residential real estate loans of \$28.8 million, \$69.9 million and \$24.0 million, or 11.8%, 18.7% and 3.4%, respectively. These decreases were somewhat offset by growth of \$11.7 million, or 1.3%, in real estate commercial loans.

The loan portfolio generally reflects the profile of the communities in which the Company operates, and the local economy has been affected by the overall decline in economic conditions including real estate related activity and valuations. Because the Company is located in areas with significant open space, real estate lending (including commercial, residential, and construction) has been and continues to be a sizeable portion of the portfolio. These categories comprised 88.3% of the portfolio as of December 31, 2008 as compared to 89.3% of the portfolio as of September 30, 2009. The Company is committed to overseeing and managing its loan portfolio to avoid unnecessarily high credit concentrations in accordance with interagency guidance on risk management. Consistent with that commitment, management is updating its asset diversification plan and policy and anticipates that the percentage of real estate lending to the overall portfolio will decrease in the future as a result of that process.

*Securities*

Securities available-for-sale totaled \$246.4 million as of September 30, 2009, a decrease of \$160.0 million, or 39.4%, from \$406.4 million as of December 31, 2008. The largest category decreases were in United States government agency and United States government agency mortgage-backed securities, which decreased \$76.3 million, or 79.2%, and \$39.6 million, or 45.4%, respectively, in the first nine months of 2009. In addition to experiencing a high rate of securities being called due to the declining rates experienced in the first quarter, the Company

## Table of Contents

also sold bonds and recognized a net realized securities gain of \$1.8 million in the first nine months of 2009. At the same time, the Company also reduced its reliance upon public fund deposit accounts that had substantial investment security pledging requirements associated with those deposits.

The net unrealized losses, net of deferred tax benefit, in the portfolio increased by \$3.7 million from a net unrealized loss of \$2.1 million as of December 31, 2008 to a net unrealized gain of \$1.6 million as of September 30, 2009. The December 31, 2008 net unrealized loss total included a \$95,000 unrealized loss for a swap that matured in the first quarter of 2009. Additional information related to securities available-for-sale is found in Note 3 to this quarterly report.

## *Deposits and Borrowings*

Total deposits decreased \$51.5 million, or 2.2%, during the first nine months of 2009, to close at \$2.34 billion as of September 30, 2009. The category of deposits that declined the most in the first nine months of 2009 was certificates of deposit, which decreased \$114.8 million, or 10.1%, primarily due to a change in pricing strategy that generally required customers to have a core deposit relationship with the Bank to receive a higher rate on a certificate of deposit. Money market deposit accounts decreased by \$148.4 million, from \$543.3 million to \$394.9 million during the same period. These decreases were offset by growth in NOW deposits of \$156.8 million, or 57.1%, and savings deposits growth of \$58.3 million, or 53.0%. As noted previously, the Company also participates in the expanded FDIC insurance coverage program that became available in November 2008 and is set to expire in June 30, 2010 unless the Bank elects to opt out in December 2009. Since the Bank is relationship focused, it has generally not relied on brokered deposits and management does not anticipate increasing its level of brokered deposits in the near future. Management recently revised its overall funding plan and as a result of that process and changes to policy, brokered deposits will not exceed 4.5% of total deposits. The average cost of interest bearing deposits decreased from 2.45% in the third quarter of 2008 to 1.84%, or 61 basis points, in the third quarter of 2009. Likewise, the average cost of interest bearing liabilities decreased from 2.57% in the third quarter of 2008 to 1.97% in the third quarter of 2009, or 60 basis points.

The most significant borrowing in the first quarter of 2008 occurred in January when the Company entered into a \$75.5 million credit facility with LaSalle Bank National Association (now Bank of America). Part of that new credit facility replaced a \$30.0 million revolving line of credit facility previously held between the Company and Marshall & Ilsley Bank. The new \$75.5 million credit facility was comprised of a \$30.5 million senior debt facility, which included the \$30.0 million revolving line described above, and \$500,000 in term debt as well as \$45.0 million of subordinated debt. The proceeds of the \$45.0 million of subordinated debt were used to finance the acquisition of Heritage, including transaction costs. The Company reduced the amount outstanding on the Bank of America senior line of credit by \$17.6 million in the first half of 2009, and as of September 30, 2009, the Company continued with no principal outstanding on the revolving line, \$500,000 in principal outstanding in term debt and \$45.0 million in principal outstanding in Subordinated Debt. The Company has made all required interest payments on the outstanding principal amounts on a timely basis.

The preceding credit facility agreement contains usual and customary provisions regarding acceleration of the senior debt upon the occurrence of an event of default by the Company under the agreement. The agreement also contains certain customary representations and warranties and financial and negative covenants. A breach of any of these covenants could result in a default under the agreement. Consistent with the June 30, 2009 disclosure, the Company did not comply with two of the financial covenants in the agreement as of September 30, 2009. The first such covenant requires the Bank to maintain the ratio of its nonperforming loans to the Company's Tier 1 capital to not more than 25.0%. As of September 30, 2009, this ratio was 66.07%. The second such covenant requires the Bank to maintain, on an annualized basis, a return on average total assets of at least 0.60%. As of September 30, 2009, the Bank's return on average total assets was (1.93%). As previously reported, the Lender provided notice to the Company on July 27, 2009 that its noncompliance with the minimum ratio of nonperforming loans to Tier 1 capital, following a 30 day period after the receipt of the notice, would cause an event of default under the Agreement. The Lender also notified the Company on November 2, 2009 that, effective July 27, 2009, the interest rate applicable to the outstanding balance on the Senior Debt

## Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

(\$500,000), and to the extent permitted by applicable law, any interest payments with respect thereto not paid within 10 days after the same becomes due, shall be equal to the Default Rate. The Company estimated that the additional interest expense related to that notice was less than two thousand dollars for third quarter 2009.

## Table of Contents

Additional information related to the rights and obligations of the Company and lender are discussed in Note 9 to this quarterly report.

Because the Subordinated Debt is treated as Tier 2 capital for regulatory capital purposes, the Agreement does not provide the Lender with any rights of acceleration or other remedies with regard to the subordinated debt upon an event of default caused by the Company's breach of a financial covenant. In its June notice to the Company, the Lender indicated that after the initial 30 day period lapsed following their notice, the Lender would not extend any additional credit or make additional disbursements to or for the benefit of the Company. The Lender also indicated that it was not presently exercising any of its other rights or remedies under the agreement, and that it reserved all of its rights and remedies available to it as the Lender. No further notice has been received and the Company and the Lender are in discussions regarding the potential resolution of the issues, including a change in the covenants and/or other terms.

Other major borrowing category changes from December 31, 2008 included a decrease of \$159.6 million, or 94.3%, in other short-term borrowings, primarily Federal Home Loan Bank of Chicago ( FHLBC ) advances.

## *Capital*

As of September 30, 2009, total stockholders' equity was \$210.8 million, an increase of \$17.7 million, or 9.2%, from \$193.1 million as of December 31, 2008. As discussed in Note 18 to this quarterly report, the United States Department of the Treasury (the Treasury ) completed its investment in the Company in January 2009 and these proceeds are included as part of Tier 1 capital. The Series B fixed rate cumulative perpetual preferred stock and warrants to purchase common stock of the Company that were issued are valued at \$68.8 million and \$4.8 million, respectively, at September 30, 2009. The fair value ascribed to the warrants is carried in additional paid-in capital.

The Company and the Bank are subject to regulatory capital requirements administered by federal banking agencies. Those agencies define the basis for these calculations including the prescribed methodology for the calculation of the amount of risk-weighted assets. The risk based capital guidelines were designed to make regulatory capital requirements more sensitive to differences in risk profiles among banks. The guidelines assess balance sheet and off-balance sheet exposures, and lessen disincentives for holding liquid assets. Under the regulations, assets and off-balance sheet items are assigned to risk categories, each with appropriate weights. The resulting capital ratios represent capital as a percentage of total risk weighted assets and off-balance sheet items. Capital amounts and classifications are also subject to qualitative judgments by regulators about components, risk weightings and other factors, and regulators can lower classifications in certain areas and/or require additional capital above adequacy guidelines. Failure to meet various capital requirements can initiate regulatory action that could have a direct material adverse effect on the financial statements. The prompt corrective action regulations provide five classifications for banks, including well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized, although these terms are not used to represent overall financial condition. If adequately capitalized, regulatory approval is not required to accept brokered deposits. If undercapitalized, capital distributions are limited, as is asset growth and expansion, and plans for capital restoration are required. Management can also hold higher capital levels consistent with customized risk assessments.

Capital adequacy guidelines are described in the accompanying table. As of September 30, 2009, the Bank exceeded the general minimum regulatory requirements to be considered well capitalized. The table shows the capital ratios of the Company and the Bank, as of September 30, 2009 and December 31, 2008, and these ratios are calculated on a consistent basis with the ratios disclosed in the most recent filings with the regulatory agencies. In connection with the current economic environment and the Bank's level of nonperforming assets, which are higher than its historical averages, management is instituting a capital plan to maintain the Bank's Tier 1 capital to average assets at above 8.75% and its total capital to risk weighted assets at above 11.25%.

Table of Contents

	Actual		Minimum Required for Capital Adequacy Purposes		Minimum Required to be Well Capitalized	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
<b>September 30, 2009:</b>						
Total capital to risk weighted assets						
Consolidated	\$ 314,090	13.67%	\$ 183,813	8.00%	N/A	N/A
Old Second National Bank	274,547	11.97	183,490	8.00	\$ 229,363	10.00%
Tier 1 capital to risk weighted assets

<b>December 31, 2008:</b>						
Total capital to risk weighted assets						
Consolidated	\$ 263,260	10.76%	\$ 195,732	8.00%	N/A	N/A
Old Second National Bank	282,066	11.54	195,540	8.00	\$ 244,425	10.00%
Tier 1 capital to risk weighted assets						
Consolidated	187,548	7.66	97,936	4.00	N/A	N/A
Old Second National Bank	251,390	10.29	97,722	4.00	146,583	6.00
Tier 1 capital to average assets						
Consolidated	187,548	6.50	115,414	4.00	N/A	N/A
Old Second National Bank	251,390	8.72	115,317	4.00	144,146	5.00

The Company paid consideration of \$43.0 million in cash and issued 1,563,636 shares of Company stock valued at \$27.50 per share to consummate the acquisition of Heritage on February 8, 2008. As detailed in Note 9, the Company also established credit facilities Bank of America to finance the acquisition that included \$45.0 million in subordinated debt. That debt obligation qualifies as Tier 2 regulatory capital. In addition, trust preferred securities qualify as Tier 1 regulatory capital, and the Company continues to treat the maximum amount of this security type allowable under regulatory guidelines as Tier 1 capital.

Table of Contents

**Item 3. Quantitative and Qualitative Disclosures about Market Risk**

***Liquidity and Market Risk***

Liquidity is the Company's ability to fund operations, to meet depositor withdrawals, to provide for customer's credit needs, and to meet maturing obligations and existing commitments. The liquidity of the Company principally depends on cash flows from net operating activities, including pledging requirements, investment in and maturity of assets, changes in balances of deposits and borrowings, and its ability to borrow funds. The Company monitors and tests borrowing capacity as part of its liquidity management process. Additionally, the \$73.0 million cash proceeds from the Treasury discussed above is a new source of liquidity that became available to the Company in January 2009.

Net cash inflows from operating activities were \$40.2 million during 2009, compared with net cash inflows of \$32.4 million in 2008. Proceeds from sales of loans held-for-sale, net of funds used to originate loans held-for-sale, continued to be a source of inflow for both 2009 and 2008. Interest received, net of interest paid, combined with changes in other assets and liabilities were a source of outflow for 2009 and 2008. Management of investing and financing activities, as well as market conditions, determines the level and the stability of net interest cash flows. Management's policy is to mitigate the impact of changes in market interest rates to the extent possible, as part of the balance sheet management process.

Net cash inflows from investing activities were \$224.4 million in 2009, compared to \$42.1 million in 2008, which included cash paid for the net assets acquired from Heritage as detailed in the supplemental cash flow information. The cash paid for the 2008 acquisition, net of cash and cash equivalents retained, was \$38.9 million. In 2009, securities transactions accounted for a net inflow of \$170.5 million, and net principal received on loans accounted for net inflows of \$51.1 million. In 2008, securities transactions accounted for a net inflow of \$166.1 million, and net principal disbursed on loans accounted for net outflows of \$80.1 million.

Net cash outflows from financing activities in 2009, were \$219.6 million compared with \$82.9 million in 2008. Significant cash outflows from financing activities in 2009 included reductions of \$51.5 million in deposits and \$164.8 million in other short-term borrowings, which consists primarily of Federal Home Loan Bank advances, offset by a \$5.1 million reclassification of advances from the long-term category. Repayments of notes payable and net reductions in securities sold under repurchase agreements were \$19.8 million and \$24.5 million, respectively, in the first nine months of 2009. The largest financing inflow in the first nine months of 2009 was the \$73.0 million in total proceeds from the preferred stock and warrants issued to the Treasury in January 2009. The largest financing cash inflows in the first nine months of 2008 were \$135.8 million in short-term borrowings and \$45.0 million in subordinated debt proceeds that were used to finance the Heritage acquisition. Details related to the financing of the Heritage transaction and other borrowings are provided in Note 9 of the financial statements included in this quarterly report. The largest financing cash outflow in the first nine months of 2008 was the \$164.3 million reduction in the federal funds purchased category.

***Interest Rate Risk***

As part of its normal operations, the Company is subject to interest-rate risk on the assets it invests in (primarily loans and securities) and the liabilities it funds with (primarily customer deposits and borrowed funds), as well as its ability to manage such risk. Fluctuations in interest rates may result in changes in the fair market values of the Company's financial instruments, cash flows, and net interest income. Like most financial

institutions, the Company has an exposure to changes in both short-term and long-term interest rates.

The Company manages various market risks in its normal course of operations, including credit,

Table of Contents

liquidity risk, and interest-rate risk. Other types of market risk, such as foreign currency exchange risk and commodity price risk, do not arise in the normal course of the Company's business activities and operations. In addition, since the Company does not hold a trading portfolio, it is not exposed to significant market risk from trading activities. The changes in the Company's interest rate risk exposures at September 30, 2009 and December 31, 2008 are outlined in the table below.

Like most financial institutions, the Company's net income can be significantly influenced by a variety of external factors, including: overall economic conditions, policies and actions of regulatory authorities, the amounts of and rates at which assets and liabilities reprice, variances in prepayment of loans and securities other than those that are assumed, early withdrawal of deposits, exercise of call options on borrowings or securities, competition, a general rise or decline in interest rates, changes in the slope of the yield-curve, changes in historical relationships between indices (such as LIBOR and prime), and balance sheet growth or contraction. The Company's asset and liability committee (ALCO) seeks to manage interest rate risk under a variety of rate environments by structuring the Company's balance sheet and off-balance sheet positions, which includes interest rate swap derivatives as discussed in Note 16 of the financial statements included in this quarterly report. The risk is monitored and managed within approved policy limits.

The Company utilizes simulation analysis to quantify the impact on net interest income before income taxes under various rate scenarios. Specific cash flows, repricing characteristics, and embedded options of the assets and liabilities held by the Company are incorporated into the simulation model. Earnings at risk is calculated by comparing the net interest income before income taxes of a stable interest rate environment to the net interest income before income taxes of a different interest rate environment in order to determine the percentage change. The Company had similar risk exposure due to falling rates and would derive greater benefit from rising rates as of September 30, 2009 as compared to that of December 31, 2008. This is largely due to securities sales that reduced the quantity of longer-term assets. Some of the securities sold were callable securities and mortgage-backed securities that would otherwise have reflected lower income in declining interest rates due to being called or prepaid in those circumstances, but would have extended to maturity in conditions of increasing interest rates. In addition, the Company has emphasized originating variable rate loans that have minimum interest rates (floors) that limit the company's exposure to falling interest rates. In all interest rate scenarios, the net interest income sensitivity of the Company was well within policy limits.

The following table summarizes the affect on annual net interest income before income taxes based upon an immediate increase or decrease in interest rates of 50, 100, and 200 basis points and no change in the slope of the yield curve. The -200 basis point shock section of the table below does not contain estimates for net interest rate sensitivity due to the low interest rate environment for the periods presented:

**Analysis of Net Interest Income Sensitivity**

		Immediate Changes in Rates					
	-200	-100	-50	+50	+100	+200	
<b>September 30, 2009:</b>							
Dollar change	N/A	\$ (1,942)	\$ (1,037)	\$ 1,309	\$ 2,509	\$ 4,418	
Percent change	N/A	-2.2%	-1.2%	+1.5%	+2.9%	+5.1%	
<b>December 31, 2008:</b>							
Dollar change	N/A	\$ (1,951)	\$ (1,061)	\$ 285	\$ 401	\$ 442	
Percent change	N/A	-2.3%	-1.2%	+0.3%	+0.5%	+0.5%	

The amounts and assumptions used in the simulation model should not be viewed as indicative of expected actual results. Actual results will differ from simulated results due to timing, magnitude and frequency of interest rate changes as well as changes in market conditions and

management strategies. The above results do not take into account any management action to mitigate potential risk.

**Item 4. Controls and Procedures**

**Evaluation of Disclosure Controls and Procedures**

The Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures, as defined in Rule 13a-15(e) promulgated under the Securities and Exchange Act of 1934, as amended, as of June 30, 2008. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that as of September 30, 2009, the Company's internal controls were effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Securities and Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified.

There were no changes in the Company's internal control over financial reporting during the quarter ended September 30, 2009 that have materially affected, or are reasonably likely to affect, the Company's internal control over financial reporting.

**Forward-looking Statements**

This document (including information incorporated by reference) contains, and future oral and written statements of the Company and its management may contain, forward-looking statements, within the meaning of such term in the Private Securities Litigation Reform Act of 1995, with respect to the financial condition, results of operations, plans, objectives, future performance and business of the Company.

Forward-looking statements, which may be based upon beliefs, expectations and assumptions of the Company's management and on information currently available to management, are generally identifiable by the use of words such as believe, expect, anticipate, plan, intend, estimate, will, would, could, should or other similar expressions. Additionally, all statements in this document, including forward-looking statements, speak only as of the date they are made, and the Company undertakes no obligation to update any statement in light of new information or future events.

The Company's ability to predict results or the actual effect of future plans or strategies is inherently uncertain. The factors, which could have a material adverse effect on the operations and future prospects of the Company and its subsidiaries, are detailed in the Risk Factors section included under Item 1A. of Part I of the Company's Form 10-K. In addition to the risk factors described in that section, there are other factors that may impact any public company, including ours, which could have a material adverse effect on the operations and future prospects of the Company and its subsidiaries. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements.

**Table of Contents**

**PART II - OTHER INFORMATION**

**Item 1. Legal Proceedings**

The Company and its subsidiaries have, from time to time, collection suits in the ordinary course of business against its debtors and are defendants in legal actions arising from normal business activities. Management, after consultation with legal counsel, believes that the ultimate liabilities, if any, resulting from these actions will not have a material adverse effect on the financial position of the Bank or on the consolidated financial position of the Company.

A verdict for approximately \$2.0 million was entered in the Circuit Court of LaSalle County on January 17, 2007 in favor of Old Second Bank-Yorkville, a wholly owned subsidiary of the Company, and against an insurance company. The insurance company filed a Notice of Appeal on February 8, 2007 in the Third District Appellate Court of Illinois and oral arguments took place in January of 2008. On February 27, 2009, the Appellate Court issued a split decision reversing the trial court ruling against West American. The Illinois Supreme Court has agreed to hear an appeal of the Appellate Court's decision in the case and the oral argument is scheduled for November 18, 2009. Pending final resolution of the case, the Company has not recorded any amount of the original judgment.

**Item 1.A. Risk Factors**

There have been no material changes from the risk factors set forth in Part I, Item 1.A. Risk Factors, of the Company's Form 10-K for the year ended December 31, 2008 or from the updated risk factors set forth in Part II, Item 1.A. Risk Factors, of the Company's Form 10-Q for the quarter ended June 30, 2009. Please refer to those sections for disclosures regarding the risks and uncertainties related to the Company's business.
