EnCana now reporting in U.S. dollars and with U.S. protocols

Calgary, Alberta, (February 10, 2004) EnCana Corporation (TSX & NYSE: ECA) advises that it is now reporting its financial results in U.S. dollars and its operating results according to U.S. protocols, which means that production volumes and reserve amounts are reported on an after-royalties basis. EnCana is reporting in this manner in order to facilitate a more direct comparison to other North American upstream oil and natural gas exploration and development companies. EnCana will today issue a news release detailing its 2003 reserves, sales and production results, which are reported in U.S. dollars and with U.S. protocols.

With reserves and production reported on an after-royalties basis there is no change to the physical volumes produced and sold, or to the actual reserves as a result of adopting U.S. protocols. However, readers should note that the change results in a general lowering of reported numbers for EnCana's sales volumes and impacts the percentage changes year over year. For example, under previous Canadian protocols, if EnCana produced and sold 100 barrels of oil at the wellhead, it reported sales of 100 barrels. Under the new U.S. protocol, royalties paid to the Crown, state or mineral rights owners are deducted before sales volumes are reported. For example, under U.S. protocols, if EnCana produced and sold 100 barrels and the oil was subject to a 20 percent royalty, EnCana would report sales of 80 barrels of oil.
