WI-TRON, INC.
NOTES TO FINANCIAL STATEMENTS (UNAUDITED)
September 30, 2007

NOTE A - NATURE OF OPERATIONS AND ADJUSTMENTS

Wi-Tron, Inc. designs, manufactures and sells state of the art ultra linear single and multi channel power amplifiers, cellular base station components, and broadband wireless products to the worldwide wireless telecommunications market.

Recent Developments

On June 29, 2007, the Company entered into an Agreement and Plan of Merger (the "Agreement") with Tek Ltd., a New Jersey corporation ("Tek") and John Chase Lee, the sole shareholder of Tek and president and CEO of the Registrant ("Lee").

Pursuant to the Agreement, (a) the Company will form a wholly-owned subsidiary to merge with and into Tek, whereby Tek is the surviving corporation, and (b) the Company will issue 40,000,000 shares of its common stock to the shareholders of Tek in exchange for all of Tek's outstanding stock. Upon completion of the merger, the Company will have 90,528,293 shares of common stock outstanding, with Lee beneficially owning 54,380,632 shares or approximately 60%. The merger was scheduled to close on or about July 15, 2007, and is conditioned upon satisfactory completion of due diligence and other corporate actions. As of the date of this filing, the merger has not been consummated.

Recently Issued Accounting Pronouncements:

In February, 2007, FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities including an amendment of FAS 115, or FAS 159. This statement provides companies with an option to report selected financial assets and liabilities at fair value. This statement is effective for fiscal years beginning after November 15, 2007 with early adoption permitted. We are assessing FAS No. 159 and have not yet determined the impact that the adoption of FAS No. 159 will have on our results of operations or financial position, if any.

In September 2006, the FASB issued SFAS No. 158 Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans - an Amendment of FASB Statements No. 87, 88, 106, and 132(R). This statement requires a company to recognize the funded status of a benefit plan as an asset or a liability in its statement of financial position. In addition, a company is required to measure plan assets and benefit obligations as of the date of its fiscal year-end statement of financial position. The recognition provision of this statement, along with additional disclosure requirements, is effective for fiscal years ending after December 15, 2006, while the measurement date provision is effective for fiscal years ending after December 15, 2008. Management does not believe that adoption of this statement will have a material impact on the financial position of the Company.

In September 2006, the FASB issued Statement of Financial Accounting Standards ("SFAS") No. 157, "Fair Value Measurements" ("SFAS 157"). SFAS 157 clarifies the definition of fair value, establishes a framework for measuring fair value, and expands on required disclosures about fair value measurement. SFAS 157 will be effective for the Company on January 1, 2008 and will be applied prospectively. The Company is currently assessing whether adoption of SFAS 157 will have an impact on our financial

WI-TRON, INC.
NOTES TO FINANCIAL STATEMENTS (UNAUDITED)
September 30, 2007

statements but does not believe the adoption of SFAS 157 will have a material impact on the Company's financial position, cash flows, or results of operations.

In June, 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109, Accounting for Income Taxes (FIN48), to create a single model to address accounting for uncertainty in tax positions. FIN 48 clarifies the accounting for income taxes by prescribing a minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 also provides guidance on derecognition, measurement, classification, interest, and penalties, accounting in interim periods, disclosure and transition. The Company adopted FIN 48 as of January 1, 2007 and the adoption did not have a material impact to the Company's consolidated financial statements or effective tax rate and did not result in any unrecognized tax benefits.

Interest costs and penalties related to income taxes are classified as interest expense and general and administrative costs, respectively, in the Company's consolidated financial statements. For the nine months ended September 30, 2007 and 2006, the Company did not recognize any interest or penalty expense related to income taxes. The Company is currently subject to a three year statute of limitations by major tax jurisdictions. The Company files income tax returns in the U.S. federal jurisdiction and New Jersey.

NOTE B - UNAUDITED INTERIM FINANCIAL INFORMATION

The accompanying unaudited financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information. Accordingly, they do not include all the information and footnotes required by generally accepted accounting principles for financial statements. For further information, refer to the audited financial statements and notes thereto for the year ended December 31, 2006 included in the Company's Form 10-KSB filed with the Securities and Exchange Commission on April 6, 2006.

In the opinion of management, all adjustments, consisting only of normal recurring adjustments necessary for a fair statement of (a) results of operations for the three and nine month periods ended September 30, 2007 and 2006, (b) the financial position at September 30, 2007, (c) the statements of cash flows for the nine month period ended September 30, 2007 and 2006, and (d) the changes in stockholders' deficiency for the nine month period ended September 30, 2007 have been made. The results of operations for the three or nine months ended September 30, 2007 are not necessarily indicative of the results to be expected for the full year.

The Company's financial statements have been presented on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The liquidity of the Company has been adversely affected in recent years by significant losses from operations. As further discussed in Note F, the Company incurred losses of \$940,164 for the nine months ended September 30, 2007 and has limited cash reserves. Current liabilities exceed cash and receivables by \$1,878,337 indicating that the Company will have difficulty meeting its financial obligations for the

WI-TRON, INC.
NOTES TO FINANCIAL STATEMENTS (UNAUDITED)
September 30, 2007

balance of this fiscal year. These factors raise substantial doubt as to the Company's ability to continue as a going concern. Recently, operations have been funded by issuances of restricted common stock to an individual who is a public/investor relations consultant of the Company, as well as the Secretary and a Director. Additionally, the Company received funds from other private placements and used restricted common stock, options and warrants to pay officers and consultants in lieu of cash.

As further discussed in Note F, management intends to seek additional financing, aggressively market its products, control operating costs and broaden its product base through development and marketing new products. Accordingly, the financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amount and classification of liabilities or any other adjustments that might be necessary should the Company be unable to continue as a going concern in its present form.

Off-balance sheet arrangements

We do not have any transactions, agreements or other contractual arrangements that constitute off balance sheet arrangements.

NOTE C - STOCKHOLDERS' EQUITY

1. Warrants and Options

At September 30, 2007, the following 1,370,000 warrants, remained outstanding:

(1)	20,000 exercisable at \$1.00 through May 2010
(2)	600,000 exercisable at \$.20 through August 2009
(3)	750,000 exercisable at \$.20 through August 2009

At September 30, 2007, the Company had employee stock options outstanding to acquire 2,900,000 shares of common stock at exercise prices of \$0.15 to \$.20 per share. These option expire at various dates through January 2016.

2. Private Placements of Common Stock and Debt

In August 2005, the Company completed a private placement of common stock and notes payable aggregating 600,000 shares with \$336,000 in cash proceeds as of December 31, 2005. The offering was represented by 6 units at \$56,000 each. Each unit consists of 100,000 shares of common stock and a \$50,000 note payable with interest at 6%. A total of 600,000 shares were issued in this offering for a total of \$36,000. The notes, aggregating \$300,000, are due upon the earlier of the Company completing any financing with gross proceeds in excess of \$1,000,000; or March 1, 2006. Since the Company was unable to repay the notes on March 1, 2006. The Company requested and all of the investors agreed to a 90 day extension on the notes until June 1, 2006 and again through November 2006. The Company issued warrants to purchase an aggregate of 600,000 shares of common stock exercisable at \$.20 per share. These notes remain unpaid at September 30, 2007, and the Company may continue to seek further similar

WI-TRON, INC.
NOTES TO FINANCIAL STATEMENTS (UNAUDITED)
September 30, 2007

extensions on an ongoing basis. No actions have been taken by the note holders to collect the balance up to and since September 30, 2007 through the date of this filing.

3. Series C Convertible Preferred Stock

As of December 31, 2006, there were 131,000 shares of Series C Convertible Preferred Stock outstanding, 125,000 of which were owned by John Lee, the Chief Executive Officer and 6,000 of which were owned by Jessica Lee, the former Chief Financial Officer. Each share of the preferred stock was convertible into 100 shares of common stock (13,100,000 shares of common stock). On January 11, 2007, all of the 131,000 outstanding preferred shares were converted into 13,100,000 shares of common stock.

NOTE D - LOSS PER SHARE

The Company complies with the requirements of the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 128, "Earnings per Share" ("SFAS No. 128"). SFAS No. 128 specifies the compilation, presentation and disclosure requirements for earnings per share for entities with publicly held common stock or potential common stock. Net loss per common share - basic and diluted is determined by dividing the net loss by the weighted average number of common stock outstanding.

Net loss per common share - diluted does not include potential common shares derived from stock options and warrants (see Note C) because they are antidilutive.

NOTE E - LITIGATION

From time to time, the Company is party to what it believes are routine litigation and proceedings that may be considered as part of the ordinary course of its business. Except for the proceedings noted below, the Company is not aware of any pending litigation or proceedings that could have a material effect on the Company's results of operations or financial condition.

In April 2004, a law firm filed a judgment against the Company in the amount of approximately \$40,000 in connection with non-payment of legal fees owed to it. Inasmuch as this is a perfection of an already recorded liability, management does not believe that the judgment will have a material impact on the financial position of the Company. In March 2005, a settlement was reached whereby the Company made a down payment of \$2,500 and agreed to pay the balance in 24 equal monthly installments of \$1,595.

NOTE F - LIQUIDITY

The Company's financial statements are presented on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The Company has a recent history of significant losses and has incurred losses of \$940,164 and \$1,544,178 for the nine months ended September 30, 2007 and 2006, respectively.

WI-TRON, INC.
NOTES TO FINANCIAL STATEMENTS (UNAUDITED)
September 30, 2007

Our financial condition relies on continuing equity investment until, if ever, we are successful in commercializing our new product lines and opening up new geographic regions. During the first six months of 2007 sales revenues were not enough to offset operations, SG&A and R&D expenses. Management believes that the merger with Tek, Ltd. will provide liquidity to sustain operations and continue research and development. There is no assurance that the merger will take place or that if it occurs, that it will provide the necessary working capital to sustain operations without additional sales. Our failure to consummate that merger or to substantially improve our revenues will have serious adverse consequences and, accordingly, there is substantial doubt in our ability to remain in business over the next 12 months. There can be no assurance that any financing will be available to the Company on acceptable terms, or at all. If adequate funds are not available, the Company may be required to delay, scale back or eliminate its research, engineering and development or manufacturing programs or obtain funds through arrangements with partners or others that may require the Company to relinquish rights to certain of its technologies or potential products or other assets. Accordingly, the inability to obtain such financing could have a material adverse effect on the Company's business, financial condition and results of operations.

From time-to-time, we have issued stock, options and warrants to satisfy operating expenses, which provides us with a form of liquidity. Due, in part, to our prior lack of earnings, our current net losses, and our current debt level our success in attracting additional funding has been limited to transactions with accredited investors. In light of the availability of this type of financing, the continued use of our equity for these purposes may be necessary if we are to sustain operations, prior to reaching operating profitability. Equity financings of the type we have been required to pursue are dilutive to our stockholders and may adversely impact the market price for our shares. Furthermore, we have been unable to raise any capital in the manner since 2006 and our operations have been sustained solely by loans from Tek, Ltd.

The Company is working to increase sales of legacy systems while simultaneously developing cutting edge technological designs for near and long term sales growth. The key to long term growth in the wireless industry is anticipating and leading the evolution of power amplifier development. The Company plans to build partnerships and marketing strengths from a series of new design platforms – some of which have already have been developed – in order to expand market opportunities across technologies, frequency bands and power ranges.

NOTE G - OFFICER LOANS

1. Officer Loans and Employment Agreements

As of September 30, 2007, the Company owes \$150,000 to Devendar S. Bains, a former Chief Executive Officer for loans and unpaid salaries. These balances are non-interest bearing, unsecured, and have no fixed maturity date.

WI-TRON, INC.
NOTES TO FINANCIAL STATEMENTS (UNAUDITED)
September 30, 2007

2. Other Related Party Transactions

During the nine months ended September 30, 2007, Tek, Ltd. made purchases of parts, supplies, services and equipment rentals on behalf of the Company for a total of \$35,576 and, as per Note I.1., incurred rent to Tek, Ltd of \$54,000.

NOTE I - COMMITMENTS AND OTHER COMMENTS

1. Premises leases

On April 22, 2005, concurrent with the closing of the purchase of the building by Tek, Ltd. ("Tek") a company wholly owned by John Lee, the Company entered into a non cancelable operating lease with Tek which commences on June 1, 2005 and expires on May 31, 2008. Tek is holding a security deposit of \$5,500 in connection with this lease. The Company is obligated for minimum annual rental payments as follows:

Year ending December 31	
2007	\$ 18,000
2008	30,000
	\$ 48,000

Rent expense, including the Company's share of real estate taxes, utilities and other occupancy costs, was \$54,000 and \$51,750 for the nine months ended September 30, 2007 and 2006, respectively.

2. Phoenix Opportunity Fund II, L.P.

On January 28, 2004, the Company entered into a Subscription Agreement (the "Agreement") with Phoenix Opportunity Fund II, L.P. ("Phoenix"), to make certain investments in the Company. Due to a dispute among the Parties with respect to the terms of the loan transaction, the Company and Phoenix agreed to rescind their agreement, and the Company agreed to pay Phoenix in settlement, which included a \$40,000 secured promissory note due March 31, 2005, and bearing interest at the rate of eight percent per annum secured by substantially all the assets of the Company. The Company did not make all of the required payments due under the Phoenix rescission agreement, and the Company remains currently delinquent. The balance due on the note at September 30, 2007 was \$10,000. As yet, no action has been taken by Phoenix concerning this default.

3. Delinquent Federal and State Payroll Taxes

We are delinquent in paying Federal and State payroll taxes of which we currently owe \$205,184 including accrued interest and penalties.

PART I - FINANCIAL INFORMATION

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Certain disclosures in this Quarterly Report on Form 10-QSB include certain forward-looking statements within the meaning of the safe harbor protections of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Statements that include words such as "believe," "expect," "should," "intend," "may," "anticipate," "likely," "contingent," "could," "may," "estimate," or other future-oriented statements, are forward-looking statements. Such forward-looking statements include, but are not limited to, statements regarding our business plans, strategies and objectives, and, in particular, statements referring to our expectations regarding our ability to continue as a going concern, realize improved gross margins, and timely obtain required financing. These forward-looking statements involve risks and uncertainties that could cause actual results to differ from anticipated results. The forward-looking statements are based on our current expectations and what we believe are reasonable assumptions given our knowledge of the markets; however, our actual performance, results and achievements could differ materially from those expressed in, or implied by, these forward-looking statements. Factors, within and beyond our control, that could cause or contribute to such differences include, among others, the following: the success of our capital-raising and cost-cutting efforts, developing and marketing new technology devices, including technological advancements and innovations; consumer receptivity, preferences and availability and affordability; whether a third-party can successfully develop, manufacture and market products that incorporate our technology; political and regulatory environments and general economic and business conditions; the effects of our competition; the success of our operating, marketing and growth initiatives; development and operating costs; the amount and effectiveness of our advertising and promotional efforts; brand awareness; the existence of adverse publicity; changes in business strategies or development plans; quality and experience of our management; availability, terms and deployment of capital; labor and employee benefit costs, as well as those factors in our filings with the Securities and Exchange Commission, particularly the discussions under "Risk Factors" in our 10KSB filed on April 6, 2006. Readers are urged to carefully review and consider the various disclosures made by us in this report and those detailed from time to time in our reports and filings with the SEC.

Our fiscal year ends on December 31. References to a fiscal year refer to the calendar year in which such fiscal year ends.

The following analysis of our financial condition and results of operations for the three and nine months ended September 30, 2006 should be read in conjunction with the Financial Statements and other information presented elsewhere in this report and in the Company's 10-KSB annual report filed May 18, 2007.

Results of Operations - The Three Months Ended September 30, 2007 Compared to Three Months Ended September 30, 2006.

Revenues for the nine months ended September 30, 2007 declined by \$380 from \$16,380 to \$16,000, or 2% compared to the nine months ended September 30, 2006. The majority of the amplifier sales for the nine months ended September 30, 2007 were obtained from the Wireless Local Loop amplifier products to a European customer.

We continue to develop and refine our amplifier products for the wireless communications market. We have completed the development of our W CDMA amplifier with DSP control, with sales initially targeted at Asian markets. To this end product is being submitted to potential customers for evaluation. If we are successful, we anticipate production orders and as such we are retaining our core production personnel even though the sales of our older products are declining.

Cost of sales was \$44,945 or 281% of sales compared to 356% during the same period for 2006. Gross margin for the three months ended September 30, 2007 amounted to a loss of \$(28,945) (181%) compared to a loss of \$(41,884) (256%), for the same period ended September 30, 2006. The Company is continuing to assess cost reduction and is promoting increased product demand to improve gross margins in ensuing periods.

Selling, general and administrative expenses for the nine months ended September 30, 2007 decreased by \$- to \$- (approximately - time sales) from \$- (approximately - times sales) for the same period in 2006, principally the result of having no share based compensation in the current quarter and reductions in professional fees. In the quarter ended September 30, 2007, we continued to maintain lower staffing levels.

Research, engineering and development expenses were \$102,050 or approximately 6 times net sales for the nine months ended September 30, 2007 compared to \$79,011 or approximately 5 times net sales in 2006. The principal activity of the business related to the design and production of product for OEM manufacturers, particularly for the W-CDMA with DSP control. The research, engineering and development expenses consist principally of salary cost for engineers and the expenses of equipment purchases specifically for the design and testing of the prototype products. The Company's research and development efforts are influenced by available funds and the level of effort required by the engineering staff on customer specific projects.

Interest income was \$NIL in 2007 and 2006 because we have not been investing our cash balances in interest bearing accounts due to immediate cash flow needs.

Interest expense was \$4,501 for the three months ended September 30, 2007 compared to \$4,501 the three months ended September 30, 2006 and was principally related to private placement notes payable in the current year and other convertible notes payable in the preceding year..

As a result of the foregoing, the Company incurred net losses of \$(260,045) or \$(0.01) per share for the quarter ended September 30, 2007 compared with net losses of \$(815,675) or \$(0.02) per share for the same quarter in 2006.

Results of Operations - The Nine Months Ended September 30, 2007 Compared to Nine Months Ended September 30, 2006.

Revenues for the nine months ended September 30, 2007 declined by \$61,685 from \$133,910 to \$72,225, or 46% compared to the nine months ended September 30, 2006.

The majority of the amplifier sales for the nine months ended September 30, 2007 were obtained from the Wireless Local Loop amplifier products to a European customer.

Cost of sales was \$190,111 or approximately 3 times sales compared to \$281,169 or 210% of sales during the same period for 2006. The Company is continuing to assess cost reduction and is promoting increased product demand to improve gross margins in 2007.

Selling, general and administrative expenses decreased for the nine months ended September 30, 2007 by \$(757,328) to \$364,476 (including share based compensation of \$NIL) from \$1,121,804 in 2006. Expressed as a multiple of sales, the selling, general and administrative expenses were approximately 5.0 times sales in 2007 and approximately 8 times sales in 2006, principally the result of having no share based compensation in the current quarter and reductions in professional fees.

Research, engineering and development expenses were \$386,209 or 535% of net sales for the nine months ended September 30, 2007 compared to \$255,353 or 191% in 2006. In 2007, the principal activity of the business related to the design and production of product for OEM manufacturers, particularly for the W-CDMA amplifier. The research, engineering and development expenses consist principally of salary cost for engineers and the expenses of equipment purchases specifically for the design and testing of the prototype products. The Company's research and development efforts are influenced by available funds and the level of effort required by the engineering staff on customer specific projects.

The Company had other income in 2006 of \$3,292. Other income was \$NIL in 2007.

Interest expense was \$13,500 in 2007 compared to \$13,500 in 2006 and was principally related to private placement notes payable in the current year and other convertible notes payable in the preceding year.

As a result of the foregoing, the Company incurred net losses of \$(940,164) or \$(0.02) per share for the nine months ended September 30, 2007 compared with net losses of \$(1,544,178) or \$(0.05) per share for the same period in 2006.

Liquidity and Capital Resources

Liquidity refers to our ability to generate adequate amounts of cash to meet our needs. We have been generating the cash necessary to fund our operations through the sale of restricted common stock in private placements and paying officers and consultants with restricted common stock, options and warrants in lieu of cash. We have incurred a loss in each year since inception. We expect to incur further losses, that the losses may fluctuate, and that such fluctuations may be substantial. As of September 30, 2007 we had an accumulated deficit of \$27,779,123. Potential immediate sources of liquidity are private placements of common stock.

As of September 30, 2007, our current liabilities exceeded our cash and receivables by \$1,878,337. Our current ratio was 0.05 to 1.00, but our ratio of accounts receivable to current liabilities was only NIL to 1.00. This indicates that we will have difficulty meeting our obligations as they come due. We are carrying \$93,698 in inventory, of which \$26,175 represents component parts. Based on year to date usage, we are carrying 88 days worth of parts inventory. Because of the lead times in our manufacturing process, we will likely need to replenish many items before we use everything we now have in stock. Accordingly, we will need more cash to replenish our component parts inventory

before we are able to realize cash from all of

-14-

our existing inventories.

As of September 30, 2007, we had an overdraft of \$36,545 compared to an overdraft of \$36,140 at December 31, 2006. Overall our overdraft decreased \$(405) during 2007. Our cash used for operating activities was \$577,026. This year we repaid officer loans of \$4,050.

Because of our small number of customers and low sales volume, accounts receivable balances and allowances for doubtful accounts do not reflect a consistent relationship to sales. We determine our allowance for doubtful accounts based on a specific customer-by-customer review of collectible accounts. At September 30, 2007 and December 31, 2006 no allowance for doubtful accounts was required.

Our inventories decreased by \$889 to \$93,698 in 2007 compared to \$94,587 at December 31, 2006, a decrease of 1%.

The Company has a lease obligation for its premises and certain equipment requiring minimum monthly payments of approximately \$5,500 to \$6,000 through 2008.

In the past, the officers of the Company have deferred a portion of their salaries or provided loans to the Company to meet short-term liquidity requirements. Where possible, the Company has issued stock or granted warrants to certain vendors in lieu of cash payments, and may do so in the future. There can be no assurance that any additional financing will be available to the Company on acceptable terms, or at all. If adequate funds are not available, the Company may be required to delay, scale back or eliminate its research, engineering and development or manufacturing programs or obtain funds through arrangements with partners or others that may require the Company to relinquish rights to certain of its technologies or potential products or other assets. Accordingly, the inability to obtain such financing could have a material adverse effect on the Company's business, financial condition and results of operations.

Critical Accounting Policies

1. REVENUE RECOGNITION

Revenue is recognized upon shipment of products to customers because our shipping terms are F.O.B. shipping point. And there are generally no rights of return, customer acceptance protocols, installation or any other post-shipment obligations. All of our products are custom built to customer specifications. We provide an industry standard one-year limited warranty under which the customer may return the defective product for repair or replacement.

2. INVENTORIES

Inventories are stated at the lower of cost or market; cost is determined using the first-in, first-out method. As virtually all of our products are made to customer specifications, we do not keep finished goods in stock except for completed customer orders that have not been shipped. Our work-in-progress generally consists of customer orders that are in the process of manufacture but are not yet complete at the period end date. We review all of our components for obsolescence and excess quantities on a periodic basis and make the necessary adjustments to net realizable value as deemed necessary.

3. ALLOWANCE FOR DOUBTFUL ACCOUNTS

Because of our small customer base, we determine our allowance for doubtful accounts based on a specific customer-by-customer review of collectible accounts. Therefore, our allowance for doubtful accounts and our provision for doubtful accounts may not bear a consistent relationship to sales but we believe that this is the most accurate and conservative approach under our circumstances.

4. USE OF ESTIMATES

In preparing financial statements in conformity with accounting principles generally accepted in the United States of America, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and revenues and expenses during the reporting period. Actual results could differ from those estimates. The principal areas that we use estimates in are: allowance for doubtful accounts; work-in-process percentage of completion; accounting for stock based employee compensation; and inventory net realizable values.

5. STOCK-BASED EMPLOYEE COMPENSATION

The proforma disclosures previously permitted are no longer an alternative to financial statement recognition. Accordingly, the Company has adopted FASB Statement No. 123R and has recognized \$- of stock-based compensation for the nine months ended September 30, 2007.

6. LOSS PER SHARE

Statement of Financial Accounting Standards No.128 (SFAS No. 128), Earnings per Share, specifies the computation, presentation and disclosure requirements for earnings per share for entities with publicly held common stock or potential common stock.

Net loss per common share - basic and diluted is determined by dividing the net loss by the weighted average number of shares of common stock outstanding. Net loss per common share - diluted does not include potential common shares derived from stock options and warrants because they are antidilutive.

Recently Issued Accounting Pronouncements:

In February, 2007, FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities including an amendment of FAS 115, or FAS 159. This statement provides companies with an option to report selected financial assets and liabilities at fair value. This statement is effective for fiscal years beginning after November 15, 2007 with early adoption permitted. We are assessing FAS No. 159 and have not yet determined the impact that the adoption of FAS No. 159 will have on our results of operations or financial position, if any.

In September 2006, the FASB issued SFAS No. 158 Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans - an Amendment of FASB Statements No. 87, 88, 106, and 132(R). This statement requires a company to recognize the funded status of a benefit plan as an asset or a liability in its statement of financial position. In addition, a company is required to measure plan assets and benefit obligations as of the date of its fiscal year-end statement of financial position. The recognition provision of this statement, along with additional disclosure requirements, is effective for fiscal years ending after December 15, 2006, while the measurement date provision is effective for fiscal years ending after December 15, 2008. Management does not believe that adoption of this statement will have a material impact on the financial position of the Company.

In September 2006, the FASB issued Statement of Financial Accounting Standards ("SFAS") No. 157, "Fair Value Measurements" ("SFAS 157"). SFAS 157 clarifies the definition of fair value, establishes a framework for measuring fair value, and expands on required disclosures about fair value measurement. SFAS 157 will be effective for the Company on January 1, 2008 and will be applied prospectively. The Company is currently assessing whether adoption of SFAS 157 will have an impact on our financial statements but does not believe the adoption of SFAS 157 will have a material impact on the Company's

financial position, cash flows, or results of operations.

In June, 2006, the FASB issued Interpretation No. 48, Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109, Accounting for Income Taxes (FIN48), to create a single model to address accounting for uncertainty in tax positions. FIN 48 clarifies the accounting for income taxes by prescribing a minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 also provides guidance on derecognition, measurement, classification, interest, and penalties, accounting in interim periods, disclosure and transition. The Company adopted FIN 48 as of January 1, 2007 and the adoption did not have a material impact to the Company's consolidated financial statements or effective tax rate and did not result in any unrecognized tax benefits.

Interest costs and penalties related to income taxes are classified as interest expense and general and administrative costs, respectively, in the Company's consolidated financial statements. For the nine months ended September 30, 2007 and 2006, the Company did not recognize any interest or penalty expense related to income taxes. The Company is currently subject to a three year statute of limitations by major tax jurisdictions. The Company files income tax returns in the U.S. federal jurisdiction and New Jersey.

Item 3. CONTROLS AND PROCEDURES

As required by Rule 13a-15(b) under the Securities Exchange Act of 1934 (the "Exchange Act"), the Company's management, with the participation of the Company's Chief Executive Officer ("CEO") and the Principal Financial Officer, evaluated the effectiveness of the Company's disclosure controls and procedures as of the end of the period covered by this report in reaching a reasonable level of assurance that the information required to be disclosed by the Company in the reports that it files with the Securities and Exchange Commission ("SEC") is recorded, processed, summarized and reported within the time period specified in the SEC's rules and forms. Based upon that evaluation, the CEO and Principal Financial Officer concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this report.

As required by Exchange Act Rule 13a-15(d), the Company's management, including the Chief Executive Officer and Principal Financial Officer, conducted an evaluation of the Company's internal control over financial reporting to determine whether any changes occurred during the fiscal quarter ended March 31, 2007 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting. Based on that evaluation, other than the changes reported in the Company's Annual Report on Form 10-KSB for the year ended December 31, 2006, which remained in effect during the quarter ended September 30, 2007, there were no other changes during such quarter.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

None

ITEM 2. CHANGE IN SECURITIES

During the nine months ended September 30, 2007, the Company issued securities as follows.

On January 11, 2007, John C. Lee converted 125,000 shares of preferred stock into 12,500,000 shares of common stock.

On January 11, 2007, Jessica Lee converted 6,000 shares of preferred stock into 600,000 shares of common stock.

ITEM 3. Defaults Upon Senior Securities.

We are in default on payments of principal and interest on the notes payable in connection with private placement of notes and common stock in the aggregate principal amount of \$300,000 and accrued interest of \$38,516.

Item 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.
