Gilat's Skystar 360E VSAT platform a key component in Optus' broadband satellite communications network for interactive distance learning applications in New South Wales and the Northern Territory Australia's famous School of the Air among beneficiaries of program

Petah Tikva, Israel, July 15, 2003 Gilat Satellite Networks Ltd. (Nasdaq: GILTF) today announced that the Australian government has finalized an agreement with Optus to deliver learning services to small rural towns and isolated homesteads in New South Wales (NSW) and across the Northern Territory (NT) using Gilat's Skystar 360E broadband VSAT platform. Gilat has been selected by Optus to provide a 310-site, two-way satellite communications network to deliver broadband Internet services to these rural communities and 540 School of The Air (SOTA) sites.

Gilat's Skystar 360E VSAT network is part of a new satellite infrastructure being deployed by Optus as part of the NT and NSW Interactive Distant Learning Initiative. The initiative was developed to establish a shared, broadband interactive distance learning (IDL) communications infrastructure for small rural communities and isolated homesteads in areas of NSW and the NT. The initiative is led by Optus, the NSW Department of Education and Training, the NT Department of Employment, Education and Training and the Australian government.

The satellite-based infrastructure will deliver education services to distance education students, isolated indigenous communities and adults seeking vocational education. Services will be delivered to approximately 3,700 users, including 239 small, isolated schools. An IDL satellite hub is being installed in Sydney with backbone links to teaching studios in several other locations, in addition to the rollout of the VSAT network.

The network will provide real-time streaming video, high-resolution graphics, full duplex audio, two-way data interaction and application sharing capabilities. The courses offered via the network will cover primary, secondary and vocational material, including courses that are difficult or impossible to offer currently in remote and rural settings.

Oded Sheshinski, General Manager of Gilat's Australian office, said, "This project strengthens our cooperation with Optus, one of Australia's largest telecommunications companies. It is gratifying to take part in such an important government initiative and to know that our technology will enable so many people to take advantage of educational opportunities that were previously unavailable to them. Gilat hopes to carry this success to other locations in the region, including New Zealand.

About Optus

Optus is an Australian leader in integrated communications, serving more than five million customers each day. The company provides a broad range of communications services including mobile, national and long distance services, local telephony, international telephony, business network services, Internet and satellite services and subscription television. In 2001, SingTel became the parent company of Optus, paving the way for Optus to become a strong and strategic telecommunications player within the Asia-Pacific region.
