INTERLINK ELECTRONICS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

FOR THREE AND SIX MONTHS ENDED JUNE 30, 2003 and 2004 (UNAUDITED)

1. Basis of Presentation of Interim Financial Data

The financial information as of June 30, 2004, and for the three month and six month periods ended June 30, 2003 and 2004 included in this report, is unaudited. Such information, however, reflects all adjustments (consisting only of normal recurring adjustments), which are, in the opinion of management, necessary for a fair presentation of results for the interim periods. The interim statements should be read in conjunction with the financial statements and the related notes included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2003.

The results of operations for the interim periods presented are not necessarily indicative of the results to be expected for the full year.

2. Significant Accounting Policies Reserve for Estimated Product Returns

While not an explicit part of our terms and conditions or product sales, we do, on a discretionary basis, grant product exchanges for our distribution and reseller customers in our branded business communications market for similar products of equal value if these exchanges meet certain other criteria. We record provisions for the estimated amounts of products to be returned in such exchanges through adjustments to revenues and cost of revenues. We estimate future product returns based on recent return history, inventory status and product sell-through statistics received from our major distributors, discussions regarding product sales activity with our major reseller customers, and current industry product and technology trends.

3. Earnings Per Share

For all periods presented, per share information was computed pursuant to provisions of the Statement of Financial Accounting Standards (SFAS) No. 128, Earnings Per Share , issued by the Financial Accounting Standards Board (FASB). The computation of earnings per share basic is based upon the weighted average number of common shares outstanding during the periods presented. Earnings per share diluted also includes the effect of common shares contingently issuable from options and warrants in periods in which they have a dilutive effect.

Common stock equivalents are calculated using the treasury stock method. Under the treasury stock method, the proceeds from the assumed conversion of options and warrants are used to repurchase outstanding shares using the average market price for the period.

The following table contains information necessary to calculate earnings per share (in thousands):

Six Months

Edgar Filing: INTERLINK ELECTRONICS INC - Form 10-Q

	Three Month Ended June 30,		Ended June 30,	
	2003	2004	2003	2004
Weighted average shares outstanding basic	9,807	11,451	9,793	11,344
Effect of dilutive securities (employee stock options)	1,301	1,530	1,004	1,426
Weighted average shares diluted	11,108	12,981	10,797	12,770

4. Comprehensive Income (Loss)

The following table provides the data required to calculate comprehensive income (loss) in thousands:

	Accumulated Other Comprehensive Loss	Comprehensive Income (Loss)
Balance at December 31, 2002	\$ (837)	
Translation adjustment	13	\$ 13
Net income		421
Balance at June 30, 2003	\$ (824)	\$ 434
Balance at December 31, 2003	\$ (391)	
Translation adjustment	8	\$ 8
Net income		393
Balance at June 30, 2004	\$ (383)	\$ 401

5. Segment Information

The Company has four business segments: (i) business communications; (ii) home entertainment; (iii) e-transactions; and (iv) specialty components. The accounting policies of the segments are the same as those described in Management's Discussion and Analysis of Financial Condition and Results of Operations Application of Critical Accounting Policies and Estimates; however, the Company evaluates performance based on revenue and gross profit. The Company does not allocate any other income, expenses or assets to these segments nor does it track revenue by product. Reportable segment information for the six months ended June 30, 2003 and 2004 is as follows (in thousands):

Six Months Ended:	Business Communications	Home Entertainment	E-Transactions	Specialty Components	Total
June 30, 2003					
Revenue	\$ 9,551	\$ 970	\$ 1,554	\$ 2,403	\$ 14,478
Gross profit	3,173	449	856	1,578	6,056
June 30, 2004					
Revenue	\$ 10,017	\$ 1,223	\$ 3,110	\$ 2,242	\$ 16,592
Gross profit	2,985	536	1,581	1,400	6,502

6. Inventories

Inventories consisted of the following (in thousands):

Edgar Filing: INTERLINK ELECTRONICS INC - Form 10-Q

	December 31, 2003	June 30, 2004
Raw material	\$ 3,991	\$ 4,318
Work in process	867	2,362
Finished goods	3,780	3,438
Total inventories	\$ 8,638	\$ 10,118

7. Stock Options

Under the terms of the Company's 1996 Stock Incentive Plan, as amended (the "Plan"), officers and key employees may be granted non-qualified or incentive stock options and outside directors and independent contractors of the Company may be granted non-qualified stock options. The aggregate number of shares which may be issued under the Plan is 6,500,000. Options are granted at fair market value on the date of grant and generally vest ratably over 36 months and have a five-year term but terminate earlier if employment is terminated. As of June 30, 2004, 6,269,000 have been granted (3,848,000 are outstanding and 2,421,000 have been exercised, forfeited or expired) and there were 231,000 options available for grant.

Activity for the first six months of 2004 under the Plan is summarized as follows (in thousands, except per share information):

	Options	Wgt. avg. Exercise Price
Outstanding- beginning of period	3,416	\$ 4.66
Granted	966	9.46
Exercised	(426)	3.83
Forfeited or expired	(108)	5.35
Outstanding - end of period	3,848	5.94
Exercisable - end of period	2,347	4.64

The following table summarizes information about stock options outstanding under the Plan as of June 30, 2004 (in thousands, except contractual life and exercise price per share information):

Exercise Price Per Share	# of Options Outstanding	Months Remaining	On Contractual	Options	Options
			Life	Exercisable	Un - exercisable
\$ 2.40	568	28		512	56
2.70	45	45		19	26
2.94	475	44		475	0
3.04	50	39		30	20
3.08	21	1		21	0
3.30	10	44		5	5
3.54	4	32		3	1
4.30	14	42		7	7
4.42	320	30		272	48
5.50	24	3		24	0
5.51	80	22		80	0
5.65	17	48		4	13
6.45	465	53		103	362

Edgar Filing: INTERLINK ELECTRONICS INC - Form 10-Q

6.87	753	20	753	0
7.54	35	51	9	26
9.40	921	59	25	896
10.60	46	57	5	41
Total	3,848		2,347	1,505

The weighted average fair value at the date of grant for stock options granted during the six months ended June 30, 2003 and 2004 was \$1.65 and \$5.08 per option, respectively. The fair value of options at the date of grant was estimated using the Black-Scholes model with the following weighted average assumptions:

	Six Months Ended June 30,	
	2003	2004
Expected life (years)	4	4
Interest rate	3.0%	3.0%
Volatility	63%	69%
Dividend yield	0%	0%

The Company applies Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees , and related interpretations in accounting for its stock option plans. Accordingly, no compensation cost has been recognized for these plans. Had compensation cost for the Company's plans been determined based on the fair value at the grant dates for awards under the plans consistent with the method of SFAS No. 123, Accounting for Stock-Based Compensation , the Company would have recorded stock-based compensation expense as follows (in thousands except per share information):

	Six Months Ended June 30,	
	2003	2004
Net income as reported	\$ 421	\$ 393
Stock-based compensation expense included in reported net income, net of related tax effects		
Total stock-based compensation expense determined under fair value based method for all awards, net of related tax effects	(1,939)	(2,552)
Net loss pro forma	\$ (2,360)	\$ (2,159)
Basic earnings (loss) per share as reported	\$.04	\$.03
pro forma	(.24)	(.19)
Diluted earnings (loss) per share as reported	\$.04	\$.03
pro forma	(.22)	(.17)

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We develop, manufacture, market and sell intuitive interface devices and components for a variety of business and home applications. We generate revenues from the sale of our hardware products, such as force sensing resistor (FSR) sensors, FSR-based subassemblies and complete advanced input device products. To a lesser extent, we derive revenue from the sale of software combined with our hardware. Depending on the application, this software may be internally developed or purchased from software partners.

We record our revenue in four different market segments: business communications (wireless intuitive input device products addressing the presentation market); home entertainment (wireless intuitive input device and sensor products addressing the advanced TV viewing and home video game markets); e-transactions (input devices for the electronic signature markets); and specialty components (custom FSR-based sensors, subassemblies and complete products for a variety of vertical markets). We have addressed our specialty components market since our inception in 1985. Our other three markets have evolved out of our specialty components market. We have addressed our business communications market as a separate market since 1994, our e-transactions market since 1999 and our home entertainment market since 2000. The relative revenue and gross profit contributions of each of these segments is provided below in *Business Segment Overview Three and Six Months Ended June 30, 2003 Compared to Three and Six Months Ended June 30, 2004*.

Cost of revenues includes material, assembly, labor in the U.S. and contract labor in China, manufacturing overhead at our U.S. facility and our China logistics center, software licensing and quality assurance costs.

Analysis of Quarterly Results

Unaudited revenues, gross profit, net income (loss) and basic and diluted earnings (loss) per share are shown in the following table for each of the nine most recent quarters (in thousands except for per share data):

	March 31, 2002	June 30, 2002	Sept. 30, 2002	Dec. 31, 2002	March 31, 2003	June 30, 2003	Sept. 30, 2003	Dec. 31, 2003	March 31, 2004	June 30, 2004
Revenues	\$ 5,409	\$ 6,027	\$ 6,629	\$ 6,978	\$ 7,002	\$ 7,476	\$ 7,848	\$ 8,716	\$ 8,434	\$ 8,158
Gross profit	\$ 2,267	\$ 2,474	\$ 2,701	\$ 474	\$ 2,930	\$ 3,126	\$ 3,285	\$ 3,339	\$ 3,352	\$ 3,150
Net income (loss)	\$ (399)	\$ (333)	\$ 40	\$ (3,572)	\$ 240	\$ 181	\$ 238	\$ 407	\$ 317	\$ 76
Earnings (loss) per shares basic	\$ (.04)	\$ (.03)		\$ (.37)	\$.02	\$.02	\$.02	\$.02	\$.03	\$.01
Earnings (loss) per share diluted	\$ (.04)	\$ (.03)		\$ (.37)	\$.02	\$.02	\$.02	\$.03	\$.03	\$.01

Since the beginning of 2002, our revenues have shown a steady rate of growth due to a general improvement in the global economic climate and a broadening in the market for business presentation devices and the introduction of comparable products for consumer use. Other significant contributing factors have been sales of components for use in Microsoft's Xbox game controller and increases, particularly in 2003, in sales in our e-transactions market.

Gross profits generally trended with revenues during the periods shown except in the fourth quarter of 2002. In that quarter we recorded a \$2.3 million write-off of obsolete inventory. The write-off resulted from a material reduction in our internal forecasts for future customer demand based on downward adjustments in forecast information received from our customers as well as negative industry and worldwide economic forecasts received from outside sources. The write-off related to raw material, work-in-process and finished goods for OEM remote controls purchased or produced in anticipation of Japanese OEM business communications orders. Approximately 50% of these written-off inventories have been destroyed or sold for nominal amounts to salvage brokers and the remainder is maintained in our warehouses at a zero book value.

Earnings have shown more quarter-to-quarter fluctuations than revenues but have generally trended upward as revenues have increased, except in the fourth quarter of 2002 when we recorded a substantial inventory write-off. In 2003, earnings resumed and generally trended upward during the year. In the first half of 2004 earnings are essentially unchanged as compared to the first half of 2003 due to improved sales and gross profit offset by increased operating expenses and lower other income.

In 2002, operations were essentially cash flow break-even to marginally positive. Operations again consumed significant cash in the first three quarters of 2003 to fund the working capital requirements of our growth in the branded business communications market. Operations were slightly cash flow positive in the fourth quarter of 2003 and for the first half of 2004 recorded a negative cash flow of approximately \$600,000.

While we have generated profitable results in recent periods, history has proven that we are vulnerable to the effects of macroeconomic trends. The reader should keep in mind that past performance is not necessarily indicative of future results.

Current Opportunities and Challenges

A considerable portion of our effort is directed at emerging markets, such as our e-transactions market where our success depends on our ability to accurately forecast the nature, amount and timing of market requirements in an environment in which historical precedent is limited or non-existent. We rely on information generated by our internal staff and industry partners and on independent market studies for forecasts of market demand in our focus areas, but these studies are themselves based on limited empirical data. An inaccurate forecast of market demand in any of our core market areas would impact our short-term performance and could impact our competitive position and, therefore, our long-term performance.

Our quarterly results are often affected by volatility in orders for a particular product. For example, sales of sensors for the Microsoft Xbox constitute a significant source of revenue, but are substantially dependent on Xbox sales that we cannot control or accurately forecast. Similarly, sales to large institutions of our e-transactions products typically come in relatively large orders that can be one-time events or can occur at widely dispersed intervals.

Other factors that could cause our estimates to be wrong or could result in trends that are not apparent from our financial statements are described under "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2003.

Edgar Filing: INTERLINK ELECTRONICS INC - Form 10-Q

Management faces the constant challenge of balancing its investment in new technology, product development and marketing initiatives against the objective of steady earnings growth. A decision to make

a significant investment in a new technology, product or marketing effort may have a short-to-medium term negative impact on earnings even if the investment proves to be justified. Because we intend to pursue a growth strategy, it is probable that we will make investments in new business opportunities that will increase operating costs, decrease margins and negatively impact earnings until the investment produces significant revenue growth.

We expect to use cash in the future to support growth through the purchase of new technologies or businesses and through internal technology, product and market development efforts. We expect to generate cash from existing operations and, depending on actual cash requirements, may seek to obtain cash from commercial borrowing and/or additional sales of securities.

Business Segment Overview Three and Six Months Ended June 30, 2003 Compared To Three and Six Months Ended June 30, 2004

Three months and six months ended June 30, 2003 and 2004 revenue and gross profit by market segment are shown in the following table:

Market Segment	Three Months Ended June 30, 2003		Three Months Ended June 30, 2004		Six Months Ended June 30, 2003		Six Months Ended June 30, 2004

- Gross Profit	3,126		3,150		6,056		6,502	
- Gross Profit %	42%		39%		42%		39%	

Business Communications

In our business communications segment, we sell wireless remote controls on an OEM basis to the leading manufacturers of presentation projectors. We also sell Interlink-branded wireless remote controls and keyboards direct to computer products retailers, corporate resellers and distributors. In the first half of 2004, OEM revenues comprised approximately 75% of business communications revenues as compared to 65% in the same period of 2003.

Overall, business communications revenues for the second quarter and first half of 2004 increased 18% and 5%, respectively, as compared to the same periods of 2003. For the first six months of 2004, OEM revenues grew 22% as compared to the first half of 2003, reflecting an approximate 32% growth in units coupled with an approximate 5% decline in average selling prices. (OEM average selling prices range from \$10-\$15.) The growth in OEM units is consistent with the growth in the presentation projector market. The OEM average selling price decline is reflective of competitive price pressure affecting the industry as a whole. Revenues from branded products, which had average selling prices of approximately \$80-\$90 (before special price reductions) dropped 27% in the same period comparison. The branded unit volume decline results from our decision to de-emphasize sales to large retail outlets such as CompUSA and Frye's Electronics. Such sales constituted approximately 20% of our branded business communications revenues in the first half of 2003 as compared to approximately 8% in the first half of 2004. Due to the poor profitability (revenues less cost of sales and sales, marketing and administration costs) of this sub-channel for Interlink, we chose to de-emphasize this sub-channel by reducing the allocation of sales and marketing resources to this area. However, we will continue to support the existing customers and do not expect material product returns or bad debts associated with this change in the 2004 period.

Business communications gross profit margin for the first half of 2004 declined to 30% as compared to 33% in the first half of 2003 due to the increased percentage of lower margin OEM business in the 2004 period.

Home Entertainment

In our home entertainment segment, we sell remote controls on an OEM basis to manufacturers of advanced TV viewing devices (including projectors sold for TV viewing) and FSR sensors to Microsoft for integration into their Xbox game controller. Revenues related to the Xbox program accounted for approximately 60% of our home entertainment revenues in the first half of 2004 as compared to less than 60% in the first half of 2003. We recently entered into an agreement to supply remote input devices to a major OEM for control of advanced viewing devices. Under the agreement, we expect to provide remote controls to the contract manufacturers of plasma displays for this OEM. We expect initial shipments to commence late in the third or fourth quarter of 2004 and continue to build over subsequent quarters. Based on estimates of its requirements provided by the OEM and agreed price terms, our revenue from the sale of these remote controls would exceed \$10 million in the first eighteen months of shipments. However, as with many contracts of this nature, the OEM is not required to cause its plasma display suppliers to purchase any minimum number of remote controls or to adhere to the schedule on which its estimates are based. There is therefore no assurance that the amount or timing of actual revenues will conform to these estimates.

In the second quarter of 2004, home entertainment revenues recorded an 11% decrease over second quarter of 2003 but reflected a 26% increase for the first half of 2004 as compared to the same period of 2003 due primarily to fluctuating unit sales of sensors for the Microsoft Xbox program.

Home entertainment gross profit margin declined slightly to 44% in the first quarter and first half of 2004 from 47% and 46% in the same periods of 2003 due to a decline in the pricing of the Xbox sensors.

E-Transactions

In our e-transactions segment, we sell electronic signature capture devices and, depending on the customer requirement, signature-capture software. We offer annual software maintenance agreements and hardware upgrade programs to our existing customers; however, historically we have not recorded significant revenues from those types of sales.

In the second quarter of 2004, e-transaction revenues increased 13% over the same period of 2003 due primarily to a greater number of customers. For the first half of 2004, e-transaction revenues increased 100% from the first half of 2003 due primarily to the Wells Fargo program. However, we do not anticipate material revenues related to the Wells Fargo program for the remainder of 2004.

E-transaction gross profit margin for the second quarter and first half of 2004 declined to 52% and 51%, respectively, from 57% and 55%, respectively, in the same periods of 2003 due to lower pricing associated with higher volume customer projects.

Specialty Components

In our specialty components segment, we sell custom FSR's and FSR-based subassemblies to many customers in several vertical markets, such as medical devices, industrial input and military input products.

Specialty components revenues for the second quarter and first half of 2004 declined 11% and 7% respectively, from the same periods of 2003 due to lower sales to our Japanese customer base.

Specialty component gross profit margin declined slightly to 62% in the second quarter and first half of 2004 from 68% and 66%, respectively, in the same periods of 2003 due to a lower mix of higher margin medical device related revenues in the 2004 period.

Operating Expenses

Product development and research costs include internal engineering labor, contract engineering and outside processing costs for the design and development of our OEM and branded designs and products and the research of our technologies. For the second quarter and first half of 2004, our product development and research costs increased 23% and 10%, respectively, as compared to the second quarter and first half of 2003 due to new product and technology development in our business communication and e-transaction segments. As a percentage of revenues, product development and research costs declined to 11% in the first half of 2004 from 12% in the first half of 2003 due to sales growth leverage. However, we expect that product development and research costs will continue to exceed 10% of revenues for the foreseeable future.

Sales, general and administrative costs (SG&A) include sales, marketing, accounting and administrative labor, sales commissions, advertising, general marketing, branded business communications channel marketing and travel and entertainment costs. For the second quarter of 2004, SG&A declined 3% over the second quarter of 2003 due to the timing of expenses. For the first half of 2004, SG&A increased 3% over the first half of 2003 due to sales and marketing expenses commensurate with the sales growth. As a percentage of revenues, SG&A declined to 25% in

Edgar Filing: INTERLINK ELECTRONICS INC - Form 10-Q

the second quarter and first half of 2004 versus 28% in the second quarter and first half of 2003 due to sales growth leverage.

Total other income declined to \$3,000 in the first half of 2004 versus \$183,000 in the first half of 2003 due to the one-time gain related to a legal settlement with a supplier that occurred in the first quarter of 2003.

We have \$32 million in net operating loss carryforwards (NOLs) for U.S. federal tax purposes. Current accounting standards place significant weight on a history of recent cumulative losses in determining whether or not a valuation allowance is necessary against the deferred tax asset related to these

NOL carry forwards. Forecasts of future taxable income are not considered sufficient positive evidence to outweigh a history of losses. The net income generated in 2003 and in the first half of 2004 is not necessarily indicative of future results. Therefore, we have maintained the full valuation allowance against our deferred tax assets as of June 30, 2004. The Company's federal net operating loss carryforwards are not impacted and can continue to be utilized for up to 19 years.

Liquidity and Capital Resources

Working capital increased to \$21.5 million at June 30, 2004 from \$20.0 million at the end of 2003 due primarily to the positive operating results and the \$1.6 million realized from employee stock option exercises.

Operations consumed cash of \$580,000 in the first half of 2004 as compared to a negative cash flow of \$1.8 million in the same period of 2003. The cash flow improvement is due primarily to a reduction in our average accounts receivable balances related to the de-emphasis of our business communications branded retail channel sales focus.

We spent \$326,000 in the first half of 2004 and \$126,000 in the first half of 2003 to purchase additional manufacturing and computer equipment.

We made payments on long-term debt of \$356,000 in the first half of 2004 and \$448,000 in the first half of 2003. Net proceeds from the exercise of employee stock options were \$1.6 million in the first half of 2004 and \$211,000 in the first half of 2003.

We currently have modest commitments for capital expenditures and no material purchase obligations. Our long-term debt and operating lease obligations as of December 31, 2003, the last fiscal year-end date, are as follows (in thousands):

	Total	Less Than One Year	1-3 Years
Long-term debt obligations	\$ 1,716	\$ 706	\$ 1,010
Operating lease obligations	92	73	10
Total	\$ 1,808	\$ 779	\$ 1,029

In February 2004, we renegotiated and extended the terms of our Camarillo, California facilities. The new lease adds \$287,000 to our 2004 lease commitments and \$1,036,000 to our lease commitments in 2005, 2006 and 2007.

These amounts may increase as we pursue our growth strategy but the amount of any such growth will depend on the particular requirements of any growth commitment, the availability and attractiveness of equity capital arrangements are our general liquidity position.

Disclosure Regarding Forward-Looking Statements

Edgar Filing: INTERLINK ELECTRONICS INC - Form 10-Q

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that involve substantial risks and uncertainties and which are intended to be covered by the safe harbors created thereby. These statements can be identified by the fact that they do not relate strictly to historical information and may include the words expects, believes, anticipates, plans, may, will, intends, estimates, continue or expressions. These forward-looking statements are subject to various risks and uncertainties that could cause actual results to differ materially from those currently anticipated. These risks and uncertainties include, but are not limited to, items discussed under the headings Overview, Current Opportunities and Challenges and Business Segment Overview Three and Six Months Ended June 30, 2003 Compared to Three and Six Months Ended

June 30, 2004. Forward-looking statements speak only as of the date made. We undertake no obligation to publicly release or update forward-looking statements, whether as a result of new information, future events or otherwise.

Application of Critical Accounting Policies and Estimates

Management's discussion and analysis of our financial condition and results of operations are based upon the consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities. On an on-going basis, management evaluates estimates, including those related to the valuation of inventory and the allowance for uncollectible accounts receivable. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our consolidated financial statements:

Revenue Recognition. We recognize revenue in accordance with SEC Staff Accounting Bulletin (SAB) No. 101, Revenue Recognition in Financial Statements, as amended by SAB No. 101A, SAB No. 101B and SAB No. 104. SAB No. 101 requires that four basic criteria must be met before revenue can be recognized: (1) persuasive evidence of an arrangement exists; (2) delivery has occurred or services rendered; (3) the fee is fixed and determinable; and (4) collectibility is reasonably assured. Determination of criteria (3) and (4) require management's judgments regarding the fixed nature of the fee charged for services rendered and products delivered and the collectibility of those fees. To satisfy the criteria, we: (1) input orders based upon receipt of a customer purchase order; (2) record revenue upon shipment of goods and when risk of loss and title has transferred; (3) confirm pricing through the customer purchase order; and (4) validate creditworthiness through past payment history, credit agency reports and other financial data. Other than through warranty rights, our customers do not have explicit or implicit rights of return. Should changes in conditions cause management to determine the revenue recognition criteria are not met for certain future transactions, such as a determination that collectibility was not reasonably assured, revenue recognized for any reporting period could be adversely affected.

Reserve for Estimated Product Returns. While not an explicit part of our terms and conditions of product sales, we do, on a discretionary basis, grant product exchanges for our distribution and reseller customers in our branded business communications market for similar products of equal value if these exchanges meet certain other criteria. We estimate future product returns based on recent return history, inventory status and product sell-through statistics received from our major distributors, discussions regarding product sales activity with our major reseller customers, and current industry product and technology trends. Management judgment is required in evaluating the relative significance of the aforementioned data and in the determination of the estimated value of the returns reserve. If actual returns are greater than management's estimate then revenues in the subsequent period will be adversely affected.

Accounts Receivable and Allowance for Doubtful Accounts. Our accounts receivable are unsecured, and we are at risk to the extent such amounts become uncollectible. We continually monitor individual account receivable balances, and provide for an allowance of doubtful accounts at the time collection may become questionable based on payment performance or age of the receivable and other factors related to the customer's ability to pay.

Inventory Reserve. At each balance sheet date, we evaluate our ending inventories for excess quantities and obsolescence. This evaluation includes analyses of forecast sales levels by product and historical demand. We write off inventories that are considered obsolete. Remaining inventory balances are adjusted to approximate the lower of our cost or market value and result in a new cost basis in such inventory until sold. If future demand or market conditions are less favorable than our projections, additional inventory write-down may be required, and would be reflected in cost of sales in the period the revision is made.

Provision for Income Tax. As part of the process of preparing our financial statements, as required by Statement of Financial Accounting Standards (SFAS) No. 109, we are required to estimate our income taxes in each of the jurisdictions in which we operate. This process involves estimating our actual current tax exposure together with assessing temporary differences resulting from differing treatment of items for tax and accounting purposes. These differences result in deferred tax assets and liabilities, which are included in our balance sheet. We must then assess the likelihood that our deferred tax assets will be recovered from future taxable income and to the extent we believe that recovery is not likely, we must establish a valuation reserve. To the extent we establish a reserve or increase this reserve in a period, we must include an expense within the tax provision in the statements of operations.

Significant management judgment is required in determining our provision for income taxes, deferred tax asset and liabilities and any valuation reserve recorded against our net deferred tax assets. Management continually evaluates its deferred tax asset as to whether it is likely that the deferred tax asset will be realized.

We first achieved profitable operations in 1995. Because of net operating loss (NOL) carryforwards available both for our U.S.-based and Japan-based operations, we did not accrue income tax expense until 1999. In that year, due to the expiration or full utilization of NOL carryforwards in California and Japan, we began to record a provision for income tax expense in those jurisdictions. By the end of 2000, we also began to accrue an income tax benefit related to our federal NOL carryforwards to be used in future periods. However, in mid-2001, we began to record quarterly tax losses and suspended any further recognition of NOL carryforward tax benefits. In fourth quarter 2002 and for the 2003 year, based on historical and prospective evidence, we concluded that we did not have sufficient evidence to be able to recognize our NOL carryforward benefits as assets and thus we recognized a valuation allowance against our deferred tax asset balance. Assuring that we maintain profitable operations in 2004, we will reevaluate our deferred tax asset balance and may reduce or eliminate the valuation allowance.

As of December 31, 2003, the Company had net operating loss carryforwards for federal, state and foreign income tax purposes of \$31,676,000, \$11,282,000 and \$1,084,000, respectively, which are available to offset future taxable income in those jurisdictions through 2022.

Foreign Exchange Exposure. We have established relationships with most of the major OEMs in the business communications market. Many of these OEMs are based in Japan and approximately 22% and 28% of our revenues for the first half of 2003 and 2004, respectively, came from Japanese customers. Revenues from these customers are denominated in Japanese yen and as a result we are subject to foreign currency exchange rate fluctuations in the yen/dollar exchange rate. We use foreign currency forward contracts to hedge this exposure. We use revenue forecasts from our Japanese subsidiary to determine the amount of our forward contracts to purchase and we attempt to enter into these contracts when we believe the yen value is relatively strong against the U.S. dollar. To the extent that our revenue forecast may be inaccurate or the timing of forecasting the yen's strength is wrong, our actual hedge gains or losses may not necessarily correlate with the effect of foreign currency rate fluctuations on our revenues. We mark these contracts to market value and the gain or loss from these contracts is recorded in business communications revenue. These hedge transactions are classified as economic hedges and do not qualify for hedge accounting under Statement of Financial Accounting Standards. In addition, because our Japanese subsidiary's functional currency is the yen, the translation of the net assets of that subsidiary into the consolidated results will fluctuate with the yen/dollar exchange rate.

The following table illustrates the impact of foreign currency fluctuations on our yen-denominated revenues and the effectiveness of our foreign currency hedging activity (in thousands).

	Three Months Ended June 30,		Six Months Ended June 30,	
	2003	2004	2003	2004
Decrease in revenues resulting from foreign currency fluctuations	\$ (6)	\$ (83)	\$ (2)	\$ (63)
Hedging gains	39	50	37	60

Edgar Filing: INTERLINK ELECTRONICS INC - Form 10-Q

Net revenue impact	\$ 33	\$ (33)	\$ 35	\$ (3)

We calculate the increase (decrease) in revenues resulting from foreign currency fluctuations by calculating the U.S. dollar equivalent of our yen-denominated revenues using the yen/dollar exchange rate at the beginning of the period. The resulting product is compared to our yen-denominated revenues converted to U.S. dollars according to GAAP and the difference is shown in the table above.

Recent Accounting Pronouncements

In December 2003, the Securities and Exchange Commission issued Staff Accounting Bulletin No. 104 (SAB No. 104), Revenue Recognition, which codifies, revises and rescinds certain sections of SAB No. 101, Revenue Recognition, in order to make this interpretive guidance consistent with current authoritative accounting and auditing guidance and SEC rules and regulations. The changes noted in SAB No. 104 did not have a material effect on the Company's consolidated results of operations, consolidated financial position or consolidated cash flows.

In December 2003, the FASB issued Interpretation No. 46 (FIN 46R) (revised December 2003), Consolidation of variable Interest Entities, an interpretation of accounting Research Bulletin No. 51 (ARB 51), which addresses how a business enterprise should evaluate whether it has a controlling interest in an entity through means other than voting rights and accordingly should consolidate the entity. FIN 46R replaces FASB Interpretation No. 46 (FIN 46), which was issued in January 2003. Before concluding that it is appropriate to apply the ARB 51 voting interest consolidation model to an entity, an enterprise must first determine that the entity is not a variable interest entity. As of the effective date of FIN 46R, an enterprise must evaluate its involvement with all entities or legal structures created before February 1, 2003, to determine whether consolidation requirements of FIN 46R apply to those entities. There is no grandfathering of existing entities. Public companies must apply either FIN 46 or FIN 46R immediately to entities created after December 15, 2003 and no later than the end of the first reporting period that ends after March 15, 2004 to entities considered to be special purpose entities. The adoption of FIN 46R had no effect on the Company's consolidated financial position, results of operations, or cash flows.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Foreign Currency Exchange Rate Risk Our Japanese subsidiary, Interlink Electronics K.K., generally makes sales and collects its accounts receivable in Japanese yen. To hedge these revenues against future movements in exchange rates, we purchase foreign exchange forward contracts. Gains or losses on the forward contracts are then offset by gains or losses on the underlying revenue exposure and consequently a sudden or significant change of foreign exchange rates would not have a material impact on net income or cash flows to the extent future revenues are protected by forward currency contracts. These contracts, however, typically have a six-month duration. Thus, yen/dollar fluctuations lasting more than six months will have an impact on our revenues. For the six month periods ended June 30, 2003 and 2004, we entered into foreign currency exchange contracts in the normal course of business to manage our exposure against foreign currency fluctuations on revenues denominated in foreign currencies. The principal objective of such contracts is to minimize the risks and costs associated with financial and global operating activities. We do not utilize financial instruments for trading or other speculative purposes. The fair value of foreign currency exchange contracts is estimated by obtaining quotes from bankers. At June 30, 2004, we had foreign currency exchange contracts outstanding with a notional value of \$3.7 million. During the first half of 2004, we recognized \$60,000 of gains on foreign currency exchange contracts which is reflected in revenue in the accompanying consolidated statements of operations. Our hedging policies are designed to offset the effect of a yen devaluation on our revenues; thus, a hypothetical 10% devaluation of the yen would reduce our yen denominated revenues by 10%; but our theoretical hedging gains would offset that effect, for a period of time.

Interest Rate Exposure Based on our overall interest rate exposure at June 30, 2004, a hypothetical 10% change in interest rates applied to our outstanding debt as of June 30, 2004, would have no material impact on earnings or cash flows over a one-year period.

Item 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

As of the end of the period covered by this report, our Chief Executive Officer and Chief Financial Officer evaluated the effectiveness of our disclosure controls and procedures. Based on their evaluation, the Chief Executive Officer and the Chief Financial Officer have concluded that our disclosure controls and procedures are effective in alerting them to material information that is required to be included in the reports that we file or submit under the Securities Exchange Act of 1934.

Internal Control Over Financial Reporting

There has been no change in our internal control over financial reporting that occurred during our last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 6. Exhibits and Reports on Form 8-K

(a) Exhibits

- 3.1 Certificate of Incorporation, as amended (incorporated by reference to Exhibit 3.1 to the Registrant's Annual Report on Form 10-K for the year ended December 31, 2000).
- 3.2 Bylaws (incorporated by reference to Exhibit 3.2 to the Registrant's Annual Report on Form 10-K for the year ended December 31, 2000).
- 31.1 Certification of Chief Executive Officer of Registrant Pursuant to SEC Rule 13a-14(a)/15d-14(a), as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 31.2 Certification of Chief Financial Officer of Registrant Pursuant to SEC Rule 13a-14(a)/15d-14(a), as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
- 32.1 Certification of Chief Executive Officer of Registrant Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
- 32.2 Certification of Chief Financial Officer of Registrant Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

(b) Reports on Form 8-K

On April 22, 2004, we furnished a Current Report on Form 8-K under Item 12. Results of Operations and Financial Condition reporting that on April 22, 2004, we issued a press release regarding the Company's results of operations for the first quarter ended March 31, 2004. Our press release was attached to the report as Exhibit 99.1.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

INTERLINK ELECTRONICS, INC.
