This communication contains forward-looking statements. These statements are statements that are not historical facts, and are based on estimates of future economic circumstances, industry conditions, company performance and financial results. Statements regarding future financial results, business strategies, future synergies, future costs and future liquidity of the Companies are examples of forward-looking statements. Such statements are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.

Disclaimers

Goldman Sachs & Co. and Goldman Sachs & Cia. (together, "Goldman Sachs") have been engaged by Telesp Celular Participações S.A. ("TCP"), in accordance with Law No. 6404 of December 15, 1976 (the "Corporation Law"), as amended, to perform valuation analyses (the "Valuations") with respect to each of TCP and each of Celular CRT Participações ("CRT"), Tele Sudeste Celular Participações S.A. ("TSD"), Tele Leste Celular Participações S.A. ("TBE") and Tele Centro Oeste Celular Participações S.A. ("TCO"; together with CRT, TSD and TBE, the "Targets"; and together with TCP, the "Companies"), in connection with the merger of shares of TCO into TCP and the merger of each of the other Targets into TCP (collectively, the "Transactions").

Our Valuations have been prepared for the exclusive use of TCP's Board of Directors in connection with their analysis of the Transactions, as described further below, and should not be used for any other purposes, including, without limitation, to form the capital of TCP under the terms of the Corporation Law, including, but not limited to, its Article 8. Our Valuations have been prepared in both the Portuguese and English languages, and the Portuguese version shall prevail for all purposes.

In connection with preparing our valuation analyses, we have reviewed, among other things: (i) certain financial analyses and forecasts for each of the Companies prepared and approved by the senior management of each such Company; (ii) publicly available financial statements for the years ended December 31, 2002, 2003 and 2004 of each of the Companies, which were audited by Deloitte Touche Tohmatsu - Auditores Independentes ("Auditors"); (iii) certain other financial information with respect to each of the Companies, including the cash and bank balances, loans and other debt obligations and hedging and contingencies provisions of each Company as of September 30, 2005, as set forth in letters from the Auditors dated December 4, 2005, addressed to each such Company and forwarded to us by the latter and reflecting the best judgment of the Auditors in conformity with generally accepted accounting procedures in Brazil. We also have held discussions with members of the senior management of each of the Companies with respect to their assessment of the past and current business operations, financial condition and prospects of such Companies. The Valuations also take into consideration the distribution of interest on net equity, as well as the payment of dividends as anticipated by the Companies' Board of Directors.

In preparing our Valuations, we have assumed and relied, with the express consent of the Companies and without independent verification, on the accuracy, content, truthfulness, consistency, completeness, sufficiency and integrity of the financial, accounting, legal, tax and other information reviewed by or discussed with us, and we have not assumed, and do not hereby assume, any responsibility to independently verify any of the information or to make an independent verification or appraisal of any of the assets or liabilities (contingent or otherwise) of the Companies, nor have we examined the solvency or fair value of the Companies under any laws concerning bankruptcy, insolvency or similar matters. To this effect, we assume no responsibility or liability with respect to the accuracy, truthfulness, integrity, consistency, or sufficiency of such information, for which the respective Companies are solely and exclusively responsible. In addition, we have not assumed any obligation to conduct, and have not conducted, any physical inspection of the properties or facilities of the Companies. With your consent, we have assumed that the financial analyses and forecasts prepared by the senior management of each Company, as approved by the Management of such Company, have been reasonably prepared on a basis reflecting the best currently available estimates and judgments of such Company.

Disclaimers

(Continued)

You have asked us to prepare our Valuations in connection with the requirement under Article 30 of TCP's By-laws that TCP obtain a determination with respect to the equitable treatment of each of the exchange ratios for the proposed Transactions. Our analysis has been prepared on the basis that, if the Board of Directors of TCP proposed an exchange ratio with respect to each Transaction that falls within the range of exchange ratios implied by the ranges of value indications derived from our Valuations with respect to TCP and the relevant Target involved in such Transaction, applied on a consistent basis, then that exchange ratio would constitute equitable treatment. Our Valuations have been prepared solely based on the discounted cash flow methodology assuming a stable macroeconomic scenario for Brazil. The valuation analyses and the results therefrom do not purport to reflect the prices at which any of the Companies or its securities could be sold, nor do they take into account any element of value that may arise from the accomplishment or expectation of the proposed Transactions. You should further note that we are not an accounting firm and we did not provide accounting or audit services in connection with this Valuation Report. In addition, because these valuation analyses are based upon forecasts of future financial results, they are not necessarily indicative of actual future results, which may be significantly more or less favorable than those suggested by such analyses. Given, further, that these analyses are intrinsically subject to uncertainties and various events or factors outside the control of the Companies and Goldman Sachs, neither Goldman Sachs, nor any of its affiliates and representatives, assume any responsibility or liability if future results differ substantially from the projections presented in the Valuations and make no representation or warranty with respect to such projections.

Our Valuations are necessarily based on economic, monetary, market and other conditions as in effect on, and the information made available to us as of, the date hereof. As a result, the valuation analyses are valid exclusively as of the date hereof as future events and developments may affect their conclusions. We do not assume any obligation to update, review, revise or revoke the Valuations as a result of any subsequent event or development. With respect to the Valuations, TCP and its Board of Directors have not authorized us to solicit, nor have we solicited any indication of interest from third parties to acquire, in whole or in part, any Company's shares. As a result, the results determined in the Valuations do not necessarily correspond to, and should not be construed as representative of, the prices at which any Company could be sold in a third-party acquisition transaction, at which any Company's respective shares trade on the date hereof or will trade at any future time, or at which the shares of TCP will trade after the Transactions.

The preparation of economic and financial analyses such as those conducted in the preparation of the Valuations is a complex process that involves subjective judgment and is not susceptible to partial analysis or summary description. In arriving at its conclusions, Goldman Sachs did not attribute any particular weight to any particular factor considered by it; rather, Goldman Sachs made qualitative judgments as to the importance and relevance of all the factors considered therein. Accordingly, Goldman Sachs believes that the Valuations should be considered as a whole and that selecting portions of its analyses or the factors considered therein could result in an incomplete and incorrect understanding of the conclusions of the Valuations. The results presented herein refer solely to the Transactions and do not extend to any other present or future matters or transactions regarding the Companies, the economic group to which they belong or to the sector in which they operate.

The Valuations are exclusively addressed to TCP's Board of Directors and do not address the underlying business decision by TCP to engage in the Transactions and do not constitute a recommendation to any of the Companies and/or the holders of the respective Companies' shares (including, but not limited to, as to whether any such holder should vote in favor of the Transactions or exercise any appraisal rights or other rights with respect thereto). In addition, the Valuations (i) treat the Companies as stand-alone operations and therefore, the analyses and results of the Valuations do not include any operational, tax or other benefits or losses, or synergies, incremental value and/or costs for the Companies, if any, which may arise from the consummation of the Transactions and (ii) do not address the treatment of the different classes of shares of the Companies, and any adjustments intended to offset, or that may reflect, any specific rights associated with any specific class of shares of the Companies. We are therefore not expressing, and the Valuations do not contain, any views relating to the distribution of economic value among the various classes of shares of any of the Companies.

Disclaimers

(Continued)

Goldman, Sachs & Co. and its affiliates, as part of their investment banking business, are continually engaged in performing financial analyses with respect to businesses and their securities in connection with mergers and acquisitions, negotiated underwritings, competitive biddings, secondary distributions of listed and unlisted securities, private placements and other transactions as well as for estate, corporate and other purposes. We have been engaged by TCP and, irrespective of whether the Transactions are consummated, we will receive a fee for the services provided by us. Moreover, TCP has agreed to reimburse our expenses and indemnify us for certain liabilities that may arise as a result of our engagement. In addition, we have provided certain investment banking services to the Company from time to time, including having acted as the Company's financial advisors in connection with its rights offerings of 2002 and 2004 and in the voluntary tender offer for the acquisition of TCO shares in 2004. We also have provided and currently are providing certain investment banking services to Telefónica, S.A., one of the indirect controlling shareholders in TCP, including, in its cash offer to acquire the entire issued and to be issued share capital of O2 plc. We also may provide investment banking services to each of the Companies and their affiliates in the future. In connection with the above-described services we have received, and may receive, compensation.

Goldman, Sachs & Co. is a full service securities firm engaged, either directly or through its affiliates, in securities trading, investment management, financial planning and benefits counseling, risk management, hedging, financing and brokerage activities for both companies and individuals. In the ordinary course of these activities, Goldman, Sachs & Co. and its affiliates may provide such services to each of the Companies and their respective affiliates, may actively trade the debt and equity securities (or related derivative securities) of the each of the Companies and their respective affiliates for their own account and for the accounts of their customers and may at any time hold long and short positions of such securities.

In preparing the Valuations, in accordance with applicable laws and regulations, we did not take into account (i) the tax consequences of the Transactions for the holders of the Companies' shares, and (ii) the impact of any fees and expenses that may result from the consummation of the Transactions, including, but not limited to, those related to any depositary services that may be charged to the holders of the Companies' ADSs. In addition, pursuant to applicable laws and regulations, we have excluded the tax-related effects associated with the future use by TCP of the non-amortized premium arising from the purchase by TCP of shares of the Targets. The financial calculations contained in the Valuations may not always result in a precise sum due to rounding.

Based upon and subject to the foregoing and based upon other matters as we considered relevant, if the exchange ratio approved by TCP's Board of Directors with respect to each Transaction is within the implied exchange ratios derived from the Valuations with respect to TCP and the relevant Target involved in such Transaction, it is our view that such exchange ratio as of the date hereof would constitute equitable treatment as understood in the manner described above.

Valuation Analyses Methodology

Valuation analyses were performed as of September 30, 2005 based on a projection period from 2005 to 2014. All projections used for purposes of the valuations of each of the Companies were prepared by the senior management of that company

Unlevered free cash flows (before financing costs) were projected by the Companies in Reais and subsequently converted to US Dollars at the average projected exchange rate for each year

Illustrative enterprise values of each of the Companies were determined by the sum of:

Net present value indications calculated as of September 30, 2005 with respect to the unlevered free cash flows for the projection period, and

Net present value indications calculated as of September 30, 2005 with respect to the illustrative terminal value, determined using the perpetuity growth methodology applied to a normalized unlevered free cash flow (capex equal to depreciation and excluding temporary tax benefits)

The valuation analyses prepared for Telesp Celular Participações S.A. (TCP) included the following components: (i) projected free cash flows for its wholly owned subsidiaries, Telesp Celular S.A. and Global Telecom S.A.; (ii) adjustments to reflect the net present value of TCP's expenses, and (iii) value indication of TCP's equity interest in TCO, calculated using the Discounted Cash Flow methodology

The illustrative present values of the unlevered free cash flows were calculated using a weighted average cost of capital (WACC) between 11.25% and 12.75%. The perpetuity growth rate for the unlevered free cash flow was between 3% and 5%

Table of Contents

Valuation Analyses Methodology

The equity value indications calculated for each of the Companies were determined by subtracting from the illustrative enterprise value previously calculated the total value of (i) the net debt and contingencies, as set forth in the audited balance sheets as of September 30, 2005, and (ii) the interest on capital and dividends already declared, both converted to US dollars at such date

The indicative equity values indications per share for each of the Companies were determined by dividing the equity value indications by the total number of shares outstanding

Values were adjusted to reflect treasury shares (reduces the number of shares used to determine the equity value indications per share)

The valuation analyses result in aggregate equity value indications for each of the Companies and do not allocate value between any classes of shares. No adjustments were made as to potential benefits that may arise from the transaction, such as synergies or tax gains

The illustrative ranges of exchange ratios calculated for the Companies were determined by the consistent comparison of the illustrative equity value indications per share calculated for each of them

I - OBJECT

PLANCONSULT Planejamento e Consultoria Ltda. was retained by **TELE CENTRO OESTE PARTICIPAÇÕES. S.A.** (TCO) to render the Valuation Report on the Actual Net Equity at Market Value of the Company, on the basis date of September 30, 2005. This paper refers to the corporate restructuring process, whose object is the process of exchange of shares and merger of associated companies, according to the provisions applicable to the calculation of the exchange ratios of shares, under the provisions of article 264 of Law No. 6,404 of December 15, 1976, as amended by Law No. 9,457 of May 5, 1997.

Table of Contents

II - PRESENTATION OF THE COMPANY

1) THE COMPANY

TCO is a Holding Company owner of 100% of the following operators: Telegoiás Celular S.A., Telemat Celular S.A., Telems Celular S.A., Teleron Celular S.A., Teleacre Celular S.A. (hereinafter referred to, jointly, as Area 7), Norte Brasil Telecom S.A., (NBT) (former Area 8) and a company who provided solutions to data market services via IP (Internet Protocol), TCO IP. In addition to be a Holding Company, the Company and its controlled companies are operators authorized for the rendering of Personal Mobile Services (SMP) in the Federal District. Its controlled companies operate in the states of Goiás and Tocantins, Mato Grosso, Mato Grosso do Sul, Rondônia, Acre and, through NBT, in Roraima, Amapá, Pará, Amazonas and Maranhão.

The Company was incorporated pursuant to the laws of the Federative Republic of Brazil under the name of Tele Centro Oeste Celular Participações S.A., known as TCO . It is a joint stock company (*sociedade por ações*) under the Brazilian Corporation law. Its head office is located at SCS, Quadra 2, Bloco C, 226, 7^o andar, 70319-900 Brasília, DF.

Table of Contents

III - INFORMATION BASIS

The accounting information, showed in the interim balance sheet of the Company reviewed by independent auditors on the basis date of September 30, 2005, has been used as starting point.

The report is based on interviews with the Company s management and on managerial data, additional information, written or oral, furnished by the Company, aging schedule of receivables and suppliers, loan transactions controls, and debt hedging, among others.

This report does not constitute an audit report on accounting statements used or on any other information included herein and, therefore, it shall not be interpreted as such.

Table of Contents

IV - SUBSEQUENT EVENTS

This valuation does not reflect events occurred after issuance of this report and any relevant fact occurring between the valuation basis date and the date on which this document was issued that has not been informed to PLANCONSULT.

Until issuance of this report, PLANCONSULT is not aware of any event that may substantially change the result of this valuation.

Table of Contents

V - SCOPE

The methodology has been applied to calculate the market value of the Actual Net Equity (ANE) of the Company, and mainly considered the assets and liabilities registered in the accounting information reviewed by the Company's independent auditors, under the rules of IBRACON applicable to the statements on the basis date of September 30, 2005, and further, the interim balance sheets furnished by the Company's subsidiaries.

This methodology is applicable to determine the market value of assets and liabilities of a certain company. Its application considers as starting point the accounting values of assets and liabilities and makes adjustments to several of these items in order to reflect their respective probable realization values.

For that purpose, the following procedures have been carried out:

Reading and analysis of interim balance sheets furnished by the Company and its controlled companies;

Analysis of assets and liabilities accounts registered in the Company's and its controlled companies' balance sheets, aiming at identifying items that might be adjusted, as well as the calculation of their probable market value;

Adjustments of accounting statements to their market value based on the result of our analysis;

Adjustments of property, plant and equipment by their respective market value, based on the analysis carried out by the technical staff of PLANCONSULT with experience in evaluating fixed assets of telecommunications companies;

Calculation of investments values of the Company and its subsidiaries by the equity method of accounting, based on the net equity at market of these subsidiaries;

Calculation of tax effects (income tax and social contribution) on the surplus and deficit resulting from such valuation;

Calculation of the market value of the Company's net equity (Exhibit I).

The details of the foregoing procedures and calculations are set forth in Chapter VIII of this report.

The methodology and scope of this report aimed at evaluating a company in operation, therefore, except for tax costs and credits, any cost related to expenses ordinarily incurred in the realization of assets or payment of liabilities, as well as those related to bankruptcy or liquidation procedures of companies, such as terminations, costs in connection with judicial disputes, retainment of third parties (legal counsels, advisors,

etc.) have not been considered in our calculations.

Table of Contents

When existing, the total amount of goodwill and negative goodwill registered in the investment account held in controlled companies, the amount prepaid for acquisition of shares concerning the special goodwill reserve and their respective tax credits have been disregarded in the result of this valuation.

The ANE methodology exclusively considers the market value of tangible assets and adjusted liabilities at market, excluding, therefore, market values of intangible assets, which are registered in most of the companies in operation, and disregarding the prospective future profitability of the company.

Consequently, the object of our analysis was not the identification and valuation of the Company's intangible assets, which were not accounted for in the accounting statements, or the identification and quantification of liabilities unregistered and undisclosed by the Company's Management.

The Fixed Assets were valued as follows:

1. Development of the analysis

- 1.1 PLANCONSULT demanded to the Company the existing individual records and/or information of asset or engineer control of all its equity assets, for the basis date of September 30, 2005, containing, among other, the following information:

Number of the asset or of its control

Account

Place

Purchase date

Description of the asset

Original purchase values, monetary adjustment and depreciation

Other information

Edgar Filing: TELE CENTRO OESTE CELULAR PARTICIPACOES - Form 6-K

The information already available at the accounting and technical files of the Company were used at most in order to preserve the memory of the Company.

The register of offer prices of equipment was also requested, containing the most recently used prices and the prices effectively paid by the Company, as well as the amounts for installation and manpower of contractors.

- 1.2 PLANCONSULT carried out, due to the short amount of time available, by a reduced sampling, a physical inspection of the assets under analysis, jointly with the Company.

On the places where the inspections were carried out, employees of the Company accompanied the staffs of PLANCONSULT. These people were familiar to the assets under inspection and could clarify the doubts regarding the physical inventory of the assets.

Table of Contents

- 1.3 Based on the accounting file sent by the Company, for the basis date of September 30, 2005, PLANCONSULT processed a summary of the amounts per account.

Based on such summary, the accounts with relevant amounts were set forth, due to the representation of the accounting values over the total adjusted value of the company and due to the operational status of the account.

2. Items valued at market value

Market Value is considered the value that the asset would obtain in a purchase and sale transaction, within a reasonable term, not being the purchaser and the seller constrained to transact, and considering that the parties know their assets in detail.

PLANCONSULT bases their valuation of the Fixed Assets on the ABNT RULES. These rules impose the currently rules in force applicable to valuation, setting forth guidelines that are basic to the good valuation and basically orientate, according to two methods:

Comparative method

The value of the asset is obtained from the comparison of market data regarding other assets of similar characteristics.

Cost method

The value of the asset results from a summary or detailed budget or from the composition of the cost of other assets that are equal (manufacturing cost) or equivalent (replacement cost) to the object of the valuation.

The valuation of fixed assets, as a rule, is carried out through the method of replacement or exchange cost. In the case under analysis, the replacement or exchange cost may be summarized as the sum total of the purchase price of the fixed assets with all the implications of taxes, transport costs until the work place, with the costs of materials for installation, respective manpower, including in regard to special or regular finish, engineer, supervision, etc.

Information relating to recent purchase of fixed assets (goods and services), resulted from quotations and negotiations with suppliers in the Brazilian market, were obtained from the Company.

Researches on the useful lives of each kind of fixed assets, mainly set forth on account of their use and technological obsolescence, were also carried out, in order to find out the effective depreciation rate to be applied to each asset.

The depreciation factor is the one that adjust the market value of the asset. By applying the due depreciation to the price (or cost), the market price is found out.

The valuation presented in this work normally fit in the Precise Valuations of the RULES of ABNT (Associação Brasileira de Normas Técnicas), except for the accounts and items that present a lower value (please refer to Chapter II Methodology) and that fit in the Expeditious Valuations .

Table of Contents

The fixed assets with relevant economic values, belonging to the accounts below related to Assets and Installations in Service (BIS), were valuated by the traditional methods (at market value):

a) Switch Equipment

BIS Analog central office switching systems

BIS Analog central office switching systems GATEWAY

BIS Analog home location register (HLR)

BIS Other switch equipment Analog

BIS Digital central office switching systems

BIS Digital central office switching systems GATEWAY

Table of Contents

VI - PROCEDURES

The main procedures adopted in our analysis were the following:

1) Uniformity in the companies under consideration

The analysis carried out for all Companies complied with the same precepts and methodology.

We do not describe the meaning of each Asset and Liability Accounts (Capital Accounts) provided that the Company (and its respective Controlled Companies) has to comply with the Accounts Plan (including the content thereof) determined by the regulatory body of the telecommunications sector - ANATEL.

Certain Assets and Liabilities accounts may have their original accounting value set to zero, pursuant to the balance sheets delivered by the Company (and of its respective Controlled Companies).

The Market Value arises out of the calculation of the Present Value of each Capital Account, taking into consideration their respective aging and a discount rate equal to the capital cost of the company (based on the study carried out by Banco Goldmann Sachs, retained by the Company to render a valuation based on the Economic Value Method), duly adjusted in order to consider inflation differences between the Brazilian and North-American currencies.

2) Treatment of the Goodwill

Based on the opinion of Machado, Meyer, Sendacz e Opice Advogados, as to the interpretation of the Corporation Law (art. 264, *caput* and paragraph 2 of Law No. 6,404/76) in connection with the treatment of the goodwill, negative goodwill and any reserve for losses in the merger of shares, we have disregarded these items in the calculation of the net equity of the Company at market value.

3) Discount rate

In relation to the flow discount rate at Present Value of each capital account, we have adopted in this analysis the capital cost equal to 15.9407% p.a., in accordance with EXHIBIT II, considering that all amounts existing in the financial statements furnished by the Company are expressed in Brazilian currency (R\$ - Reais).

Table of Contents

4) Term

Accounts Payable were considered as an average term of 15 days.

As from such term, we considered the final maturity informed, that is, 30 days from 1 one to 30 days, 60 days from 31 to 60 days, 90 days from 61 to 90. From 90 days on, it was adopted the bad debt provision.

5) Current Assets

a) Available Funds

Considered as Market Value They are already at Actual Present Value.

b) Receivables, net

In the calculation of the Market Value, it has been considered the following:

The aging of each Account and Sub-account furnished by the Company;

Reduction Factors resulting from amounts which will not be effectively received calculated by means of statistic data provided by the Company.

The Discount rate explained in item 3 above, to calculate the Present Value of Accounts and Sub-accounts.

c) Inventories

In the calculation of the Market Value, it has been considered the following:

The aging of each Account and Sub-account furnished by the Company (the average turnover indexes of handsets inventory was used to determine the aging).

Zero value for obsolete inventory, calculated by means of statistic data furnished by the Company.

Edgar Filing: TELE CENTRO OESTE CELULAR PARTICIPACOES - Form 6-K

The Discount rate explained in item 3 above, to calculate the Present Value of Accounts and Sub-accounts.

d) Advance to Suppliers

The accounting values already represent the Market Value They are already at Actual Present Value.

e) JSCP (Interest on Own Capital) and Dividends

The accounting values already represent the Market Value They are already at Actual Present Value.

f) Deferred taxes and tax credits

f.1) Tax credits

In the calculation of the Market Value, it has been considered the following:

The aging of each Account and Sub-account furnished by the Company;

The Discount rate explained in item 3 above, to calculate the Present Value of Accounts and Sub-accounts.

Table of Contents

f.2) ICMS (value-added tax) over Services to be Appropriated

In the calculation of the Market Value, it has been considered the following:

The aging of each Account and Sub-account furnished by the Company;

The Discount rate explained in item 3 above, to calculate the Present Value of Accounts and Sub-accounts.

f.3) Social Contribution and Deferred Income Tax

In the calculation of the Market Value, it has been considered the following:

The aging of each Account and Sub-account furnished by the Company;

The Discount rate explained in item 3 above, to calculate the Present Value of Accounts and Sub-accounts.

g) Loans and financing

In the calculation of the Market Value, it has been considered the following:

The aging of each Account and Sub-account furnished by the Company;

Reduction Factors resulting from amounts which will not be effectively received calculated by means of statistic data furnished by the Company.

The Discount rate explained in item 3 above, to calculate the Present Value of Accounts and Sub-accounts.

h) Derivative transactions

In the calculation of the Market Value, the accrual furnished by the Company, which is already at Actual Present Value, has been considered.

- i) Prepaid expenses

The accounting values already represent the Market Value They are already at Actual Present Value.

- j) Other assets

The accounting values already represent the Market Value They are already at Actual Present Value.

6) Long Term Receivables

- a) Deferred taxes and tax credits

a.1) Tax credits

In the calculation of the Market Value, it has been considered the following:

The aging of each Account and Sub-account furnished by the Company;

The Discount rate explained in item 3 above, to calculate the Present Value of Accounts and Sub-accounts.

a.2) Social Contribution and Deferred Income Tax

In the calculation of the Market Value, it has been considered the following:

The aging of each Account and Sub-account furnished by the Company;

Table of Contents

The Discount rate explained in item 3 above, to calculate the Present Value of Accounts and Sub-accounts.

- b) Loans and financing

In the calculation of the Market Value, it has been considered the following:

The aging of each Account and Sub-account furnished by the Company;

Reduction Factors resulting from amounts which will not be effectively received calculated by means of statistic data furnished by the Company.

The Discount rate explained in item 3 above, to calculate the Present Value of Accounts and Sub-accounts.

- c) Derivative transactions

In the calculation of the Market Value, it has been considered the following:

The aging of each Account and Sub-account furnished by the Company;

The Discount rate explained in item 3 above, to calculate the Present Value of Accounts and Sub-accounts.

- d) Prepaid expenses

The accounting values already represent the Market Value They are already at Actual Present Value.

- e) Other assets

The accounting values already represent the Market Value They are already at Actual Present Value.

7) Permanent Asset

- a) Investments

Edgar Filing: TELE CENTRO OESTE CELULAR PARTICIPACOES - Form 6-K

Equity Accounting: In the cases of equity interests held in controlled companies, the accounting balances, presented in the balance sheet of the companies that are controlled by the Company, were adjusted at market value by using the same criteria adopted by the Company. The value posted as equity interest of the Company in these associated companies was then adjusted, based on the shareholders' equities of their controlled companies at market value. As previously mentioned, for the purposes of the exchange ratio, the total net amount of goodwill and negative goodwill possibly registered in the investment account held by the companies, was not considered.

Other sub accounts

The accounting values already represent the Market Value They are already at Actual Present Value.

Table of Contents

b) Fixed Assets

In the calculation of the Market Value, it has been considered the following:

Properties and Facilities in Operation BIS

PLANCONSULT, by means of its staff specialized in the valuation of fixed assets of telecommunications companies, carried out a valuation of these assets, at market value, under the Valuation Rules in force and the already presented Chapter V above.

Properties and Facilities in Progress BIA

The accounting values already represent the Market Value They are already at Actual Present Value.

c) Deferred Assets

Goodwill

As previously mentioned, for the purposes of the exchange ratio, the total net amount of goodwill and negative goodwill possibly registered in the investment account held by the companies, was not considered.

Point of Presence Rights (*Fundo de Comércio*)

The accounting values already represent the Market Value They are already at Actual Present Value.

Other

The accounting values already represent the Market Value They are already at Actual Present Value.

8) Current Liability

a) Personnel, social charges and benefits

The accounting values already represent the Market Value They are already at Actual Present Value.

- b) Trade accounts payable

In the calculation of the Market Value, it has been considered the following:

The aging of each Account and Sub-account furnished by the Company;

The Discount rate explained in item 3 above, to calculate the Present Value of Accounts and Sub-accounts.

- c) Taxes, rates and contributions

In the calculation of the Market Value, it has been considered the following:

The aging of each Account and Sub-account furnished by the Company;

The Discount rate explained in item 3 above, to calculate the Present Value of Accounts and Sub-accounts.

- d) Loans and financing

In the calculation of the Market Value, the accrual furnished by the Company, which is already at Actual Present Value (MTM), has been considered.

Table of Contents

- e) Derivative transactions

In the calculation of the Market Value, the accrual furnished by the Company, which is already at Actual Present Value (MTM), has been considered.

- f) Interest on own capital and dividends

The accounting values already represent the Market Value They are already at Actual Present Value.

- g) Provision for contingencies

The accounting values already represent the Market Value They are already at Actual Present Value.

- h) Other liabilities

The accounting values already represent the Market Value They are already at Actual Present Value.

9) Long Term Liabilities

- a) Taxes, rates and contributions

In the calculation of the Market Value, it has been considered the following:

The aging of each Account and Sub-account furnished by the Company;

The Discount rate explained in item 3 above, to calculate the Present Value of Accounts and Sub-accounts.

- b) Loans and financing

In the calculation of the Market Value, the accrual furnished by the Company, which is already at Actual Present Value (MTM), has been considered.

c) Derivative transactions

In the calculation of the Market Value, the accrual furnished by the Company, which is already at Actual Present Value (MTM), has been considered.

d) Provision for contingencies

The accounting values already represent the Market Value They are already at Actual Present Value.

e) Advance for Future Capital Increase - AFAC

The accounting values already represent the Market Value They are already at Actual Present Value.

f) Other liabilities

The accounting values already represent the Market Value They are already at Actual Present Value.

Table of Contents

10) Minority interest

In case of minority interest in the capital stock, the reduction equal to such minority interest (in R\$) is required before the calculation of the equity accounting to be considered in the respective Controlling Company.

11) Treasury Shares

Treasury shares owned by the Company shall not be considered provided that they are related to the Net Equity account.

12) Capital Recourses

The accounting values already represent the Market Value They are already at Actual Present Value.

13) Tax effect on the carried out adjustments Capital gain or loss

a) Whereas part of the adjustments made to the shareholders equity of the Company would result on a capital gain or loss, deductible for tax purposes, the tax credit (or debt) of income tax and social contribution must be considered as an adjustment factor in the shareholders equity of the Company, since, as of the maturity date of the assessed assets and liabilities, the gain (or loss) assessed as a result of the adjusts shall cause a tax credit (or debt).

b) As a result, the tax effect (tax credit or debt) resulting from the adjustments mentioned above was calculated considering:

The average tax rate of income tax and social contribution of the Company, furnished by it.

An amortization term of 10 years.

The Discount rate presented on item 3 above for the calculation of the Present Value.

c) The amount of such tax effect was dully added to (or subtracted from) the Actual Net Equity at Market Value.

Table of Contents

VII - CONCLUSION

Based on the object, scope, methodology and data furnished by the Company (and its controlled companies), the market value to the Actual Net Equity as of September 30, 2005 is R\$ 2,390,078,454.51

Table of Contents

VIII - PLANCONSULT

PLANCONSULT is a leading company in the valuation market of large telecommunications companies.

PLANCONSULT has been assisting for over twenty-five years largest groups and companies within the country engaged in several industries.

In order to make a difference in the market and to always keep itself as a company with the highest quality in the segment, PLANCONSULT continuously invests in state of the art technology, communication and qualified personnel.

It has a high tech computer and telecommunication network, enabling the quickest and safest performance. PLANCONSULT also works with a mobile network, including own hardware, software and telecommunication, which, if required, constitutes a complete working structure inside client's offices, speeding up the work pace, optimizing costs and results, in addition to enable a close follow-up by the client on work development.

PLANCONSULT has been carrying out throughout last years hundreds of valuations to several of the largest and most important companies of the country, in addition to present them to governmental institutions such as Banco Nacional de Desenvolvimento Econômico S.A. Participações - BNDESPAR, Ministry of Finance, Internal Revenue Services, Comissão de Valores Mobiliários - CVM (Brazilian Securities Commission), etc.

PLANCONSULT has been acting as advisor and consultant in privatization transactions, under Decree No. 91,991, of November 28, 1985 (company's valuation and stockholding control), including the appraisal of several companies that have already been privatized (Banestado, Banespa, Usiminas, PQU, Açominas, Celpav, Sibra, Banco Meridional, CESP, ELETROPAULO, and the 53 subsidiaries of TELEBRÁS System).

It has been further provided services of technical and financial due diligence, particularly to meet the needs of financial organism as for example IDB (Inter-American Development Bank).

Table of Contents

PLANCONSULT, in addition to its qualification and know-how, facilities, personnel, and own computer systems (hardware and software) that have already been developed and proved, has the necessary and indispensable experience in the segment of **TELECOMMUNICATIONS COMPANIES**, stressing the valuation works for publicly-held companies, namely:

IX - DISCLAIMER

- 1) This Valuation Report on the Actual Net Equity at Market Value was prepared by PLANCONSULT Planejamento e Consultoria Ltda. (PLANCONSULT), aiming at the process of exchange of shares and mergers of associated companies, according to the provisions applicable to the calculation of the exchange ratios of shares set forth in the article 264 of Law No. 6,404 of December 15, 1976, as amended by Law No. 9,457, of May 5, 1997.
- 2) This Valuation Report on Actual Net Equity has been prepared by PLANCONSULT based on the information furnished by the Company's management, as well as other publicly available information, including the financial statements of the Company audited and reviewed by DELOITTE TOUCHE TOHMATSU. PLANCONSULT has taken all care and acted with high diligence standards in order to demand that the information provided by the Company be true and consistent with those audited or reviewed. However, there is no assurance that such information is true and complete.
- 3) PLANCONSULT did not conduct any legal, accounting or any other due diligence or carried out any independent investigation on the information made available in order to prepare this Valuation Report. Therefore, this report did not consider the impacts of any audit or investigation. PLANCONSULT assumes no responsibility for the truthfulness, accuracy or extension of the information obtained.
- 4) PLANCONSULT has not analyzed the legal validity and effectiveness of the processed information taking into account that such analysis is beyond its professional scope. The validity and enforceability of liens or encumbrances on the Company's assets have not as well been analyzed. However, the amounts relating to such liens or encumbrances have been considered in our report.
- 5) Therefore, PLANCONSULT does not assume any responsibility on the legal, engineering or financial matter beyond those implicit in the exercise of its specific functions at issue, which are specifically set forth in the applicable legislation, codes and regulations.
- 6) The Company's managers did not in any way directed, made difficult or took any action which might hinder the access, use or knowledge of any information relevant for the quality of the work, and stated that all documents and/or other information existing to enable the accomplishment of the work and quality of the respective conclusions were made available to PLANCONSULT.
- 7) PLANCONSULT represents that the number of shares of the company at issue, which PLANCONSULT itself, its controlling persons and other persons bound to them are holders, or which are under their discretionary management, is zero.
- 8) PLANCONSULT states the non existence of any conflict or communion of interest, effective or potential, with the controlling person of the company, or minority shareholders of the company, or in relation to any other involved company, its

Table of Contents

respective partners, or in connection with the operation itself of exchange of shares and mergers of associated companies.

- 9) There is no assurance that any of the premises, estimates, projections, partial or total results or conclusions used or showed in this Valuation Report will be effectively accomplished or determined, in whole or in part. The final results may be different from the projections, and those differences may be relevant and further be impacted by market conditions, among others. Therefore, there is no guarantee on the part of PLANCONSULT as to the accomplishment or not of the projections herein, specifically which occurrence depends on future and uncertain events.
- 10) The fixed assets of the company have been appraised by PLANCONSULT.
- 11) The Valuation Report did not consider any future benefit that a potential success of the operation of exchange of shares and mergers of companies may eventually bring to themselves.
- 12) The information included herein reflects the financial and accounting conditions of the company on 09/30/2005. Any amendment to these conditions may change the result showed herein.
- 13) This Valuation Report must be used exclusively within the scope of the operation of exchange of shares and mergers of companies, duly informed to the market by applicable means.
- 14) Analysis reports on other companies and sectors prepared by PLANCONSULT and/or its affiliates may address market premises in a way different from this Valuation Report.
- 15) This Valuation Report may not be reproduced or published, in whole or in part, without the prior consent of PLANCONSULT.
- 16) The basis date of this Valuation Report is 09/30/2005.

INDEPENDENT AUDITORS REPORT

To the Shareholders and Management of

Tele Centro Oeste Celular Participações S.A.

Brasília - DF

1. We have audited the accompanying balance sheet of Tele Centro Oeste Celular Participações S.A. as of September 30, 2005 and the related statement of income and change in shareholders' equity for the nine-month period then ended, prepared under the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements.
2. Our work was conducted in accordance with the Brazilian auditing standards and comprised: (a) planning of the work, taking into consideration the significance of the balances, the volume of transactions and the accounting and internal control systems of the Company; (b) checking, on a test basis, the evidence and records that support the amounts and accounting information disclosed; and (c) evaluating the relevant accounting practices and estimates adopted by management, as well as the presentation of the financial statements taken as a whole.
3. Considering the special purpose of these financial statements (see Note 2), the Company is not presenting the statement of changes in financial position for the nine-month period ended at September 30, 2005, that is required for a complete presentation of the financial statements in Brazil.
4. In our opinion, except for the omission discussed in paragraph 3, that results in an incomplete presentation of the financial statements, the financial statements referred to in paragraph 1 present fairly, in all material respects, the financial position of Tele Centro Oeste Celular Participações S.A. as of September 30, 2005, the results of its operations and the changes in shareholders' equity for the nine-month period then ended in accordance with accounting practices adopted in Brazil.
5. The accompanying financial statements have been translated into English for the convenience of readers outside Brazil.

TELE CENTRO OESTE CELULAR PARTICIPAÇÕES S.A.

NOTES TO THE FINANCIAL STATEMENTS

FOR THE NINE-MONTH PERIOD SEPTEMBER 30, 2005

(In thousands of Brazilian reais - R\$, unless otherwise indicated)

1. OPERATIONS

Tele Centro Oeste Celular Participações S.A. (TCO or Company) is a publicly-traded company which, as of September 30, 2005, is controlled by Telesp Celular Participações S.A. (TCP) (90.59% of the voting capital and 52.47% of total capital).

TCO is the controlling company of the operators Telegoiás Celular S.A. (Telegoiás), Telemat Celular S.A. (Telemat), Telems Celular S.A. (Telems), Teleron Celular S.A. (Teleron), Teleacre Celular S.A. (Teleacre) and Norte Brasil Telecom S.A. (NBT), which provide mobile telephone services, through the licenses granted, including activities necessary or useful to provide these services in the Mid-West and North of Brazil.

The license granted to TCO is effective until July 24, 2006 and those of its subsidiaries have the following terms:

<u>Subsidiary</u>	<u>Operating area</u>	<u>Term of license</u>
Telegoiás	Goiás and Tocantins	10.29.08
Telemat	Mato Grosso	03.30.09
Telems	Mato Grosso do Sul	09.28.09
Teleron	Rondônia	07.21.09
Teleacre	Acre	07.15.09
NBT	Amazonas, Roraima, Amapá, Pará and Maranhão	11.29.13

The above licenses are renewable, once only, for a 15-year term, by paying annual charges equivalent to approximately 1% of the annual revenues of the operators.

The Company's business and that of its subsidiaries, including the services it may provide, is regulated by the National Telecommunications Agency (Agência Nacional de Telecomunicações - ANATEL), the telecommunications regulatory agency, in accordance with Law No. 9,472, of July 16, 1997, and respective regulations, decrees, rulings and complementary plans.

Edgar Filing: TELE CENTRO OESTE CELULAR PARTICIPACOES - Form 6-K

On March 28, 2005, TCO's Board approved the corporate restructuring of Teleacre, Telegoiás, Teleron and Telems, through a merger with the parent company, and of Telemat, through a merger with the subsidiary TCO IP S.A. (TCO IP). The proposed restructurings were filed with ANATEL on June 7 and June 27, 2005, respectively.

The objective of this operation is to obtain financial and operational benefits, among others, through reductions in administrative costs, the cost of publications, and rationalization of the accounting procedures.

Table of Contents

Tele Centro Oeste Celular Participações S.A.

2. PRESENTATION OF THE FINANCIAL STATEMENTS

The financial statements have been prepared in accordance with generally accepted accounting practices in Brazil and Brazilian Corporate Legislation, which include the norms applicable to public telecommunications services concessionaires and the norms and accounting procedures established by the Brazilian Securities Commission (Comissão de Valores Mobiliários - CVM).

The Company year ends on December 31 of each year. These interim financial statements were prepared to serve as a basis for corporate restructuring purposes, involving the Company, TCP Participações S.A., Tele Leste Celular Participações S.A., Tele Sudeste Celular Participações S.A. and Celular CRT Participações S.A., all of which are publicly-held companies under common share control. The objective of the restructuring is to transfer the share control and the minority participations to TCP, through an exchange of shares. This proposal will require the approval of the shareholders of the various companies involved and, if approved, will be based on the relation of the exchange to the economic value to be established in a report issued by independent experts.

Consequently, the balance sheet, the income statement and the statement of changes in shareholders' equity only include the operations effected in the first nine months of 2005, which are presented without comparison to any prior period. Additionally, in view of the specific purpose of these interim financial statements, the Company is not presenting the statement of changes in financial position.

3. SUMMARY OF THE PRINCIPAL ACCOUNTING PRACTICES

a) Cash and cash equivalents

Are considered to be all available balances in cash and banks and all highly liquid temporary cash investments, stated as cost plus interest accrued to the balance sheet date, with original maturity dates of three months or less.

b) Investments

Represents goodwill recorded on acquisitions of consolidated subsidiaries and permanent investments in unconsolidated affiliates and subsidiaries that are accounted for under the equity method. The accounting practices of direct and indirect subsidiaries are consistent with those applied by the Company.

c) Income and social contribution taxes

Are calculated and recorded based on the tax rates in effect on the balance sheet date, on an accrual basis.

Table of Contents

Tele Centro Oeste Celular Participações S.A.

- d) Reserve for contingencies

The reserve is recorded based on the opinion of external legal and the Company's management, how to the probable result of the dependent subject, and are update until to date the balance sheet for the probable amount of the loss, observed the nature of each contingency.

The changes in the reserve for contingencies in the nine-month period ended September 30, 2005 is as follows:

Balance at the beginning of the year	124,812
New provisions, net of reversals	2,021
Monetary variations	5,385
Payments	(15)
	<hr/>
Balance as of September 30	132,203
	<hr/>

15.1. Telebrás

Correspond to the original loans from Telecomunicações Brasileiras S.A. - Telebrás, which, according to Appendix 2 of the Spin-off Report dated February 28, 1998, approved by the Shareholders' General Meeting of May 1998, should be attributed to the corresponding holding company of Telegoiás Celular S.A. and Telebrasília Celular S.A.

As it considered that there had been a mistake in the allocation of these loans at the time of the spin-off, the Company suspended the payments and began to restate the debt in accordance with the variation of the IGP-M rate plus 6% interest per annum.

In June 1999, the Company filed a suit requesting a statement that the assets corresponding to these liabilities, plus accessories of these assets, are its property, also claiming compensation for the amounts paid.

On August 1, 2001, a decision was handed down ruling the requests made by the Company in the declaratory action to be without grounds; however, on October 8, 2001 the Company filed an appeal, which was also ruled groundless, upholding the first level court decision. The Company filed a further appeal that is awaiting judgment by the Supreme Court (STJ).

15.2. Tax litigation

15.2.1. Probable loss

No significant new tax claims classified as probable losses were incurred in the nine-month period ended September 30, 2005. The changes in the provisions for tax contingencies largely correspond to the monetary restatement on the provisions during the period.

15.2.2. Possible loss

Edgar Filing: TELE CENTRO OESTE CELULAR PARTICIPACOES - Form 6-K

No significant new tax claims classified as possible losses were incurred in the nine-month period ended September 30, 2005. No significant alterations occurred in the claims indicated in this report since the last financial year.

16. SHAREHOLDERS EQUITY

a) Capital

On March 31, 2005, Company's capital was increased by R\$164,878, without the issue of new shares, by capitalizing that part of the revenue reserves that exceeded the capital as of December 31, 2004.

In the General and Extraordinary Shareholders' Meetings held on March 31, 2005, a reverse split of 386,664,974,968 nominative book-entry shares, without par value, was approved; of these, 129,458,666,783 are common shares and 257,206,308,185 are preferred shares, representing capital, in the proportion of 3,000 (three thousand) shares to 1 (one) share of the same type. Capital now comprises 128,888,325 nominative book - entry shares, without par value, of which 43,152,889 are common shares and 85,735,436 are preferred shares.

At the same meeting, the shareholders present unanimously approved ratification of the cancellation of the 1,927,812 common nominative book-entry shares, without par value, held in treasury, without reduction of the capital, pursuant to paragraph 1 of article 30 of Law No. 6,404/76.

On July 29, 2005, the Company advised the shareholders of a capital increase of R\$63,893, corresponding to the tax benefit of the merged goodwill, effectively realized during the 2004 fiscal year. The capital was increased from R\$957,844 to R\$1,021,737, with the issue of 3,107,645 new common shares, while assuring the right to preference laid down in article 171 of Law No. 6,404/76. The resources arising from the exercise of the right to preference were credited to Telesp Celular Participações S.A.

The capital as of September 30, 2005 comprises shares without par value, as follows:

	Thousands
	of shares
	09.30.05
Common shares	44,333
Preferred shares	85,735
Total	130,068

b) Interest on capital and dividends

Edgar Filing: TELE CENTRO OESTE CELULAR PARTICIPACOES - Form 6-K

The preferred shares do not have voting rights, except in the cases stipulated in the bylaws. They are, however, assured priority in the reimbursement of capital, without premium, the right to participate in the dividend to be distributed, corresponding to a minimum of 25% of net income for the financial year, calculated in accordance with article 202 of corporate law, and priority in receiving minimum noncumulative dividends equivalent to the largest of the following values:

- b.1) 6% per annum on the amount resulting from dividing the subscribed capital by the total number of Company's shares.

Table of Contents

Tele Centro Oeste Celular Participações S.A.

b.2) 3% per annum on the amount resulting from division of the shareholders' equity by the total number of Company's shares, and also the right to participate in distributed income under equal conditions to the common shares, after the latter has been assured a dividend equal to the minimum priority dividend established for the preferred shares.

c) Special goodwill reserve

This reserve represents the formation of a special goodwill reserve as a result of the Company's corporate restructuring, which will be capitalized in favor of the controlling shareholder at the time of effective realization of the tax benefit.

d) Revenue reserve

d.1) Statutory reserve

The statutory reserve is calculated based on 5% of net annual income until the reserve reaches 20% of paid-up capital or 30% of capital plus capital reserves; from then on, appropriations to this reserve are no longer compulsory. The purpose of this reserve is to ensure the integrity of capital and it may only be used to offset losses or to increase capital.

d.2) Special reserve for expansion

The special reserve for expansion and modernization is based on the capital expenditure budget prepared by management, which shows the need for funds for investment projects for the coming financial year.

17. INSURANCE

The Company has a policy of monitoring the risks inherent to their operations. Accordingly, as of September 30, 2005, the Companies had insurance policies in effect to cover third-party liability and auto. The Management of the Company considers that the amounts are sufficient to cover possible losses. The principal responsibility covered by insurance and corresponding amounts is shown below:

<u>Type</u>	<u>Amounts insured</u>
General third-party liability - RCG	R\$7,560
Auto (fleet of executive vehicles)	Five Table (100%), R\$250 for DC and R\$50 for DM
