SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the quarterly period ended March 31, 2006

Or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the transition period from _____ to _____

Commission File Number: 1-7183

TEJON RANCH CO.

(Exact name of Registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

77-0196136
(IRS Employer Identification No.)

P.O. Box 1000, Lebec, California 93243

(Address of principal executive offices)

Registrant's telephone number, including area code: (661) 248-3000

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Edgar Filing: TEJON RANCH CO - Form 10-Q

The number of the Company's outstanding shares of Common Stock on May 9, 2006 was 16,562,193 shares.

TEJON RANCH CO. AND SUBSIDIARIES

NOTES TO UNAUDITED CONSOLIDATED CONDENSED FINANCIAL STATEMENTS

March 31, 2006

NOTE A BASIS OF PRESENTATION

The summarized information of Tejon Ranch Co. and Subsidiaries, or the Company, furnished pursuant to the instructions to Part I of Form 10-Q is unaudited and reflects all adjustments which are, in the opinion of the Company's management, necessary for a fair statement of the results for the interim period. All such adjustments are of a normal recurring nature.

The Company has identified three reportable segments: real estate-commercial/industrial, real estate-resort/residential, and farming. Information for the Company's reported segments is presented in its consolidated condensed statements of operations. The Company's reporting segments follow the same accounting policies used for the Company's consolidated financial statements. Management evaluates a segment's performance based upon a number of factors including pretax results.

The results of the period reported herein are not indicative of the results to be expected for the full year due to the seasonal nature of the Company's agricultural activities. Historically, the largest percentages of revenues are recognized during the third and fourth quarters.

For further information and a summary of significant accounting policies, refer to the Consolidated Financial Statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2005.

NOTE B NET INCOME (LOSS) PER SHARE

Basic net income or loss per share is based upon the weighted average number of shares of common stock outstanding during the period. Diluted net income per share is based upon the weighted average number of shares of common stock outstanding and the weighted average number of shares outstanding assuming the issuance of common stock upon exercise of stock options and vesting of stock grants per Financial Accounting Standards Board (FASB) Statement No. 128 Earnings per share .

	Three months ended March 31	
	2006	2005
Weighted average number of shares outstanding:		
Common stock	16,543,663	16,429,505
Common stock equivalents	977,550	442,470
 Diluted shares outstanding	 17,521,213	 16,871,975

For the three months ended March 31, 2006 and March 31, 2005, diluted net loss per share is based on the weighted average number of shares of common stock outstanding because of the antidilutive impact of common stock equivalents.

Table of Contents**NOTE C MARKETABLE SECURITIES**

FASB Statement No. 115, Accounting for Certain Investments in Debt and Equity Securities, requires that an enterprise classify all debt securities as either held-to-maturity, trading, or available-for-sale. The Company has elected to classify its securities as available-for-sale and therefore is required to adjust securities to fair value at each reporting date.

The following is a summary of available-for-sale securities at March 31, 2006 and December 31, 2005:

(In thousands)	March 31, 2006		December 31, 2005	
	Cost	Estimated Fair Value	Cost	Estimated Fair Value
Marketable Securities:				
US Treasury and agency notes				
with unrecognized losses for less than 12 months	\$ 345	\$ 338	\$ 17,407	\$ 17,091
with unrecognized losses for 12 months or more	41,950	40,715	24,573	23,917
with unrecognized gains	128	159	138	205
Total US Treasury and agency notes	\$ 42,423	\$ 41,212	\$ 42,118	\$ 41,213
Corporate notes				
with unrecognized losses for less than 12 months	\$	\$	\$ 7,507	\$ 7,338
with unrecognized losses for 12 months or more	21,347	20,613	13,806	13,373
with unrecognized gains				
Total Corporate notes	21,347	20,613	21,313	20,711
	\$ 63,770	\$ 61,825	\$ 63,431	\$ 61,924

As of March 31, 2006, the adjustment to accumulated other comprehensive loss in consolidated stockholders' equity reflects a decline in the market value of available-for-sale securities of \$250,000, which is net of a tax benefit of \$188,000. As of March 31, 2006, the Company's gross unrealized holding gains equal \$31,000 and gross unrealized holding losses equal \$1,976,000. On March 31, 2006, the average maturity of U.S. Treasury and agency securities was 3.08 years and corporate notes was 2.75 years. Currently, the Company has no securities with a remaining term to maturity of greater than six years.

Estimated market value equals quoted market price, if available. If a quoted market price is not available, market value is estimated using quoted market prices for similar securities. The Company's investments in corporate notes are with companies with a credit rating of A or better.

NOTE D COMMITMENTS AND CONTINGENCIES

The Tejon Ranch Public Facilities Financing Authority, a joint powers authority formed by Kern County and the Tejon-Castac Water District, formed a Community Facilities District, or CFD, that has placed liens on 1,728 acres of the Company's land. These liens are to secure payment of special taxes related to \$23,900,000 million of bond debt sold by the CFD. The Company is obligated, as a landowner in the district, to pay its share of the special taxes assessed each year. The 1,728 acres of land includes the Tejon Industrial Complex development. Proceeds from the sale of CFD bonds went to reimbursing the Company for public infrastructure related to the Tejon Industrial Complex development. There have been no

Table of Contents

reimbursements thus far during 2006. During 2005, the Company paid approximately \$385,000 in special taxes related to the CFD. As development occurs at Tejon Industrial Complex, new owners of land and new lease tenants, through triple net leases, will bear an increasing portion of the assessed special tax. As this occurs, the Company's obligation will be reduced. It is expected that the Company will have special tax payments in 2006 of approximately \$637,000, but this could change in the future based on the amount of bonds outstanding within the CFD and the amount of taxes paid by others. As and if development and values increase around the Tejon Industrial Complex, the Company may be able to have approximately 1,400 acres released from the CFD lien.

At March 31, 2006, the Company was guaranteeing 50% of a loan to Tejon Dermody Industrial LLC. This guarantee consists of a \$6,000,000 guarantee related to debt within the Tejon Dermody Industrial LLC, an unconsolidated joint venture formed to construct and market a 651,000 square foot building at the Tejon Industrial Complex. Total debt in the venture is approximately \$12,021,000 and was used in the construction of the building. In the joint venture agreement, each partner agreed to guarantee one half of the outstanding debt through the term of the loan. The maturity date for this loan has been extended to July 31, 2006 while the Company finalizes the refinancing of this loan. The refinancing should be completed prior to the new maturity date. The proposed new loan provides for a reduction in guarantees and an improved interest rate. The Company believes it is unlikely that it will ever be required to make payments under this guarantee. Therefore, no liabilities have been recorded related to this guarantee at March 31, 2006 or December 31, 2005.

The Company leases land to National Cement Company of California Inc, or National, for the purpose of manufacturing Portland cement from limestone deposits on the leased acreage. National's former subtenant, Systech Environmental Corporation, is awaiting action by the California Department of Toxic Substances Control in order to achieve regulatory closure for its former facility that burned hazardous waste as a supplemental fuel in the cement plant located on land leased from the Company.

The California Regional Water Quality Control Board, or RWQCB, for the Lahontan Region has issued several orders with respect to four environmental conditions on the property:

- (1) *Groundwater plume of chlorinated hydrocarbon compounds.* This order directs the Company's former tenant Lafarge Corporation, or Lafarge, the current tenant National, and the Company to, among other things, investigate the source and extent of the groundwater contamination and initiate cleanup. The Company is advised that Lafarge and National have completed their investigation and are operating a groundwater pump-and-treat system to clean up the groundwater. In 1991 and 2000, Lafarge and National removed certain soils from the property that were the principal source of the contamination.
- (2) *Cement kiln dust.* National and Lafarge have consolidated, closed and capped cement kiln dust piles located on land leased from the Company. An order of the RWQCB directs National, Lafarge and the Company to maintain and monitor the effectiveness of the cap. Maintenance of the cap and groundwater monitoring remain as on-going activities. Groundwater contamination levels down gradient of the cap exceeded limits set by the RWQCB following record-breaking rains in late winter 2005. The Company is advised that National and Lafarge are conducting studies and developing a plan to minimize the chances of this occurring again.
- (3) *Former industrial waste landfills.* This order requires Lafarge, National and the Company to complete the cleanup of groundwater associated with the former industrial waste landfills. The Company is advised that Lafarge is addressing the low-level contamination by natural attenuation and

Table of Contents

that monitoring remains an ongoing activity. Lafarge previously removed waste historically disposed of in the landfills and transported that waste off-site for disposal.

- (4) *Diesel fuel.* An order of the RWQCB directs Lafarge, National and the Company to investigate and clean up contamination from a diesel fuel tank and pipeline. The Company is advised that Lafarge and National have completed their investigation and groundwater cleanup and that groundwater monitoring remains an on-going activity. Some oil contamination located beneath plant buildings and equipment remains on the property.

To date, the Company is not aware of any failure by Lafarge or National to comply with the orders or informal requests of the RWQCB. The Company has not been directed by the RWQCB to perform any remedial activities. Under the lease between National and the Company, National is obligated to indemnify the Company for costs and liabilities arising directly or indirectly out of its use of the leased premises. Lafarge has liability for all obligations under the indemnity provisions arising before the November 1987 assignment of the lease from Lafarge to National. The Company believes that all of the matters described above are included within the scope of the National or Lafarge indemnity obligations.

The Company believes that Lafarge and National have sufficient resources to perform any possible or reasonably likely obligations relating to these matters. If they do not and the Company is required to perform the likely remedial work at its own cost, it is unlikely that the amount of any such expenditure by the Company would be material.

On November 29, 2004, a complaint was filed asking for the Antelope Valley ground water basin to be adjudicated. This means that the rights of all parties overlying the basin, including the Company's land, should be permanently fixed based on various principles of water law and on negotiations among the principal parties or groups of water users. It is too early to ascertain what effect, if any, this case may have on the Centennial project or the Company's remaining lands in the Antelope Valley. Because the water supply plan for the Centennial project includes several sources of water in addition to ground water underlying the Company's lands, and because the creation of an efficient market for local water rights is frequently an outcome of adjudication proceedings, we anticipate that sufficient water to supply the Centennial project's needs will continue to be available for its use.

For further discussion, refer to the Company's Form 10-K, Part I, Item 3, - Legal Proceedings. There have been no significant changes since the filing of the 2005 Form 10-K.

NOTE E INVESTMENT IN UNCONSOLIDATED JOINT VENTURES

The Company maintains investments in unconsolidated joint ventures. The Company accounts for its investments in these unconsolidated joint ventures using the equity method of accounting. The Company's investment in its unconsolidated joint ventures at March 31, 2006 is \$3,200,000 and included in other assets on the consolidated condensed balance sheet. The Company's equity in the net earnings of the unconsolidated joint ventures is \$121,000 for the three months ended March 31, 2006. The joint ventures have not been consolidated as of March 31, 2006 because they are not variable interest entities and the Company does not control the investments. The Company's current unconsolidated joint ventures are as follows:

Petro Travel Plaza LLC is a joint venture with Petro Stopping Centers, L.P. for the development and management of the Petro Travel Plaza. This is a 60% owned venture which owns and operates a travel plaza/commercial highway operation in the Tejon Industrial Complex. It houses multiple

Table of Contents

commercial eating establishments as well as diesel and gasoline operations. The Company does not control the investment due to its having only 50% voting rights, and because our partner performs the day-to-day operations at the facility. At March 31, 2006, the Company had an equity investment balance of \$1,316,000 in this joint venture.

Centennial Founders, LLC is an unconsolidated joint venture in which the Company has a 50% ownership interest. This is a venture with three homebuilders and community developers (Pardee Homes, Lewis Investment Company, and Standard Pacific Corp.). The venture was organized to pursue the entitlement and development of land that the Company owns in Los Angeles County. At March 31, 2006, the Company's equity investment balance in this joint venture was \$496,000.

Tejon Dermody Industrial LLC is a joint venture between the Company and DP Properties for the development and ownership of a 651,000 square foot industrial building in the Tejon Industrial Complex. The Company owns a 50% interest in this venture. At March 31, 2006, the Company's equity investment balance in this joint venture was \$262,000.

Five West Parcel LLC is a joint venture between the Company and Rockefeller Group Development Corporation for the development of a parcel in Tejon Industrial Complex West, and is related to a larger agreement for the designation of 500 acres in Tejon Industrial Complex West and East as a Foreign Trade Zone, or FTZ, and the development of the property within the FTZ for warehouse distribution and light manufacturing. The Company owns a 50% interest in this venture. At March 31, 2006, the Company's equity investment balance in this joint venture was \$1,126,000.

Unaudited condensed financial information of the Company's unconsolidated joint ventures as of and for the three months ended March 31, 2006 and 2005 is as follows:

Condensed Combined Statement of Operations Information

(In thousands)	2006	2005
Net sales	\$ 19,556	\$ 14,212
Net income (loss)	173	(835)
Partners' share of net income (loss)	52	(377)
Equity in earnings (losses) of unconsolidated joint ventures	\$ 121	\$ (458)

Condensed Combined Balance Sheet Information

(In thousands)	2006	2005
Current assets	\$ 12,718	\$ 8,499
Property and equipment, net	50,535	45,746
Other assets	376	112
Long-term debt	(23,594)	(24,286)
Other liabilities	(7,419)	(6,500)
Net assets	\$ 32,616	\$ 23,571

The Company's investment balance in its unconsolidated joint ventures differs from its capital accounts in the respective joint ventures. The differential represents the difference between the cost basis of assets contributed by the Company and the agreed-upon contribution value of the assets contributed.

Table of Contents

NOTE F INTEREST RATE RISK MANAGEMENT

At March 31, 2006, the Company had no outstanding interest rate swap agreements. However, a joint venture of the Company (Petro Travel Plaza LLC) has an interest rate swap agreement with respect to \$6,700,000 of its long-term debt to manage interest rate risk by converting floating interest rate debt to fixed-rate debt. This swap agreement matures in November 2009 and is a contract to exchange variable-rate for fixed-rate interest payments periodically over the life of the agreement. The interest rate swap fixed rate is 4.33%. The joint venture accounts for the swap agreement as a cash flow hedge in accordance with FASB Statement No. 133, Accounting for Derivative Investments and Hedging Activities.

The Company records its pro rata change in the fair market value of the interest rate swap in accumulated other comprehensive income. As of March 31, 2006, the Company's portion of the fair value of the interest rate swap was \$99,000. The estimated fair value of the swap was determined by market price quotes as of March 31, 2006, received from the joint venture's bank.

NOTE G STOCK COMPENSATION - OPTIONS

The Company's 1998 Stock Incentive Plan, or the 1998 Plan, provides for the making of awards to employees, consultants, and advisors of the Company with respect to 1,600,000 shares of common stock. Since the adoption of the 1998 Plan through March 31, 2006, the Company has granted options to purchase 1,129,292 shares at a price equal to the fair market value at date of grant, 416,588 of which have been exercised or forfeited, leaving 712,704 granted options outstanding at March 31, 2006. Options granted under the 1998 Plan vest over a five-year period and have ten-year contractual terms.

The Non-Employee Director Stock Incentive Plan, or NDSI Plan, is intended to enable the Company to attract, retain, and motivate non-employee directors by providing for or increasing the proprietary interest of such persons in the Company. The NDSI Plan provides for the grant of awards to non-employee directors with respect to an aggregate of 200,000 shares of the Company's common stock. Since adoption of the NDSI Plan through March 31, 2006, the Company has granted options under the plan to purchase 83,518 shares at a price equal to the fair market value at date of grant, of which 1,817 options have been exercised, leaving 81,701 granted options outstanding at March 31, 2006.

Prior to January 1, 2006, the Company accounted for these plans under the recognition and measurement provisions of APB Opinion 25, or Opinion 25, Accounting for Stock Issued to Employees, and related interpretations, as permitted by FASB Statement No. 123, Accounting for Stock-Based Compensation. No stock-based employee compensation cost related to stock options was recognized in the unaudited consolidated condensed statement of operations for the three months ended March 31, 2005 as all options granted under the plan had an exercise price equal to the fair market value of the underlying common stock on the date of grant. Effective January 1, 2006, the Company adopted the fair value recognition provisions of FASB Statement No. 123(R), Share-Based Payment, using the modified-prospective method. Under that transition method, compensation cost recognized in the first quarter of 2006 includes: (a) compensation cost for all share-based payments for stock options granted prior to but not yet vested as of January 1, 2006, based on the grant date fair value estimated in accordance with the original provisions of Statement No. 123, and (b) compensation cost for all share-based payments granted subsequent to January 1, 2006, based on the grant-date fair value estimated in accordance with the provisions of Statement No. 123(R). There were no options granted during the first quarter of 2006 or 2005. Results for prior periods have not been restated.

Table of Contents

As a result of adopting Statement No. 123(R), on January 1, 2006, the Company's income before income taxes and net income for the three months ended March 31, 2006 are \$202,000 and \$119,000 lower, respectively, than if it had continued to account for share-based compensation under Opinion 25. Basic and diluted earnings (loss) per share for the three months ended March 31, 2006 would have been \$0.00 if the company had not adopted Statement No. 123(R), compared to reported basic and diluted net loss per share of \$0.01.

Prior to the adoption of Statement No. 123(R), the Company presented all tax benefits of deductions resulting from the exercise of stock options as operating cash flows in the Statement of Cash Flows. Statement 123(R) requires cash flows resulting from the tax benefits resulting from tax deductions in excess of the compensation cost recognized for those options (excess tax benefits) to be classified as financing cash flows. The \$308,000 excess tax benefit classified as a financing cash inflow would have been classified as an operating cash inflow if the company had not adopted Statement No. 123(R).

The value of the options is estimated using the Black-Scholes option-pricing formula and the expense is amortized over the options' vesting periods. The following weighted-average assumptions were used in estimating the fair value of the options: risk-free interest rate of 5.00%, dividend rate of 0.0%, volatility factor of the expected market price of our common stock of 0.34; and a weighted-average expected life of the options of five years from the option grant date. No options were granted in 2005 or the first quarter of 2006.

Exercise prices for options outstanding as of March 31, 2006 ranged from \$16.75 to \$27.90. The weighted-average remaining contractual life of those options is approximately five years. None of the options granted under the 1998 Plan contain conversion features.

The following table illustrates the effect on net income and earnings per share if the Company had applied the fair value provisions of Statement No. 123 to options granted under the Company's stock option plan in all periods presented:

	Three Months Ended March 31, 2005
Net loss, as reported	\$ (984,000)
Add: Stock-based employee compensation included in reported net income, net of related tax effects	
Deduct: Total stock-based employee compensation expense under fair value based method for all awards, net of related tax effects	(217,000)
Pro Forma Net Loss	\$ (1,201,000)
Earnings per share	
Basic - as reported	\$ (0.06)
Basic - pro forma	\$ (0.07)
Diluted - as reported	\$ (0.06)
Diluted - pro forma	\$ (0.07)

Table of Contents

The following is a summary of the Company's stock option activity and related information for the three month period ended March 31, 2006, and the year ended December 31, 2005:

	Options	2006 Weighted-Average Exercise Prices Per Share	Options	2005 Weighted-Average Exercise Prices Per Share
Outstanding beginning of period	836,241	\$ 23.70	970,843	\$ 23.70
Granted				
Exercised	(41,836)	\$ 25.22	(114,602)	21.88
Forfeited/Cancelled			(20,000)	25.85
Outstanding end of period	794,405	\$ 23.62	836,241	\$ 23.90
Options exercisable end of period	668,905	23.32	682,641	\$ 23.56

The following is a summary of the vesting activity relating to granted options for the three month period ended March 31, 2006:

	Options	Weighted-Average Grant Date Fair Value
Non-vested at the beginning of the period	153,600	\$ 9.04
Granted		
Vested during the period	(28,100)	\$ 8.09
Forfeited during the period		
Non-vested at the end of the period	125,500	\$ 9.26

As of March 31, 2006, there was \$916,000 of total unrecognized compensation costs related to stock options. These costs are expected to be recognized over a weighted-average period of 1.4 years. The total fair value of shares vested during the three months ended March 31, 2006 was \$227,000 and the total intrinsic value of options exercised during the three months ended March 31, 2006 and 2005 were \$713,000 and \$1,613,000, respectively. As of March 31, 2006, there were 668,905 options vested and exercisable with a weighted-average exercise price of \$23.32, aggregate intrinsic value of \$17,088,000, and weighted-average remaining contractual life of 4 years.

The total compensation cost related to stock option arrangements recognized in income for the three months ended March 31, 2006 was \$202,000 and the total related recognized tax benefit was \$83,000. No share-based payment compensation costs were capitalized during this period. There were no such compensation costs recognized during the first three months of 2005.

Table of Contents**NOTE H STOCK COMPENSATION - RESTRICTED STOCK AND PERFORMANCE SHARE GRANTS**

In May 2004, the shareholders of the Company approved a stock incentive plan for designated employees, the 2004 Stock Incentive Plan, and a stock compensation plan for the Board of Directors. The 2004 Stock Incentive Plan provides for the making of awards to employees based upon time-based criteria and through the achievement of performance-related objectives. Performance-related objectives are stratified into threshold, target, and maximum goals. Under the 2004 Stock Incentive Plan, the Company has granted to current employees in the plan potential stock awards from zero shares if below the threshold performance, to 295,067 shares for threshold performance and up to a maximum of 635,828 shares for maximum performance. These shares are being expensed over the expected vesting period based on each performance criterion. The Company makes estimates of the number of shares that will actually be granted based upon estimated ranges of success in meeting defined performance measures. Each year the Company will update these estimates and reflect the change to the estimate in the income statement. Total expense related to this plan for the three months ending March 31, 2006 was \$873,000. There was \$581,000 of costs related to the 2004 Stock Incentive Plan for the first quarter of 2005.

Under the stock compensation plan for the Board of Directors, each director will receive a portion of his annual compensation in restricted stock (unless that director controls over 15% of Company stock) and a portion in cash. Each director has the option of electing to receive the cash portion of his annual retainer in restricted stock. Under this plan, 19,264 shares of stock have been granted. Total expenses relating to director stock compensation at March 31, 2006 was \$79,000. There was \$69,000 of costs related to this plan for the first quarter of 2005.

NOTE I RETIREMENT PLAN

The Company has a defined benefit plan that covers many of its employees. The benefits are based on years of service and the employee's five-year final average salary. Contributions are intended to provide for benefits attributable to service both to date and expected to be provided in the future. The Company funds the plan in accordance with the Employee Retirement Income Security Act of 1974 (ERISA). The Company expects to contribute approximately \$580,000 to the plan during 2006.

Plan assets consist of equity, debt and short-term money market investment funds. The weighted-average discount rate and rate of increase in future compensation levels used in determining the periodic pension cost is 5.0% and 3.0% in 2006 and 2005, respectively. The expected long-term rate of return on plan assets is 7.5% in 2006 and 2005.

The total pension and retirement expense was as follows for the three months ended March 31, 2006 and 2005:

(In thousands)	2006	2005
Cost components:		
Service cost-benefits earned during the period	\$ (89)	\$ (62)
Interest cost on projected benefit obligation	(50)	(52)
Expected return on plan assets	54	27
Total net periodic pension cost	\$ (85)	\$ (87)

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Throughout Management's Discussion and Analysis of Financial Condition and Results of Operations, and Quantitative and Qualitative Disclosures About Market Risk below and Notes to Unaudited Consolidated Condensed Financial Statements on the preceding pages of this report, management has made forward-looking statements regarding future developments, future revenue and income of our crops, future special taxes associated with our industrial complex, the adequacy of future cash flows to fund our operations, potential losses to the Company as a result of pending environmental proceedings, our risks with respect to a guarantee of indebtedness on a jointly owned industrial building, and market value risks associated with investment and risk management activities and with respect to inventory, accounts receivable, marketable securities, and outstanding indebtedness. These forward-looking statements involve known and unknown risks, uncertainties and other important factors that could cause the actual results, performance or achievements of the Company, or industry results, to differ materially from any future results, performance, or achievement predicted or implied by such forward-looking statements. These risks, uncertainties and important factors include, but are not limited to, weather, market and economic forces, availability of financing for land development activities, and success in obtaining various governmental approvals and entitlements for land development activities. No assurance can be given that the actual future results will not differ materially from the forward-looking statements.

Overview

We are a diversified real estate development and agribusiness company committed to responsibly using our land and resources to meet the housing, employment, and lifestyle needs of Californians and create value for our shareholders. Current operations consist of land planning and entitlement, land development, commercial sales and leasing, leasing of land for mineral royalties, grazing leases, income portfolio management, and farming. Our prime asset is approximately 270,000 acres of contiguous, largely undeveloped land that, at its most southerly border, is 60 miles north of Los Angeles and, at its most northerly border, is 15 miles east of Bakersfield.

Over the past few years, we have been implementing a strategy that has led to our transformation from an agricultural operations based company to a real estate development company. In order to implement our strategy, we entered into joint venture agreements for the development of portions of our land, began conceptual land planning and land entitlement projects, and undertook a program of divesting non-strategic assets. Our business model is designed to create value through the entitlement and development of land for commercial/industrial and resort/residential uses while at the same time protecting significant portions of our land for conservation purposes.

We currently operate in three business segments: commercial/industrial real estate development and services; resort/residential real estate development; and farming.

Commercial/industrial real estate development generates revenues from lease activities, land sales, build-to-suit building sales and leases, oil and mineral royalties and grazing leases. Resort/residential land development does not currently produce revenues but is actively involved in the land entitlement process. Farming produces revenues from the sale of grapes, almonds, pistachios, and walnuts.

For the first three months of 2006, we have a net loss of \$102,000, compared to a loss of \$984,000 for the first three months of 2005. The improvement when compared to the prior year is due to an increase in

Table of Contents

revenues of \$2,159,000 being partially offset by expense increases of \$1,243,000 across our farming, corporate, and resort/residential segments.

Critical Accounting Policies

The preparation of our interim financial statements in accordance with generally accepted accounting principals (GAAP) requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We consider an accounting estimate to be critical if (1) the accounting estimate requires us to make assumptions about matters that were highly uncertain at the time the accounting estimate was made, and (2) changes in the estimates that are likely to occur from period to period, or use of different estimates that we reasonably could have used in the current period, would have a material impact on our financial condition or results of operations. On an on-going basis, we evaluate our estimates, including those related to revenue recognition, impairment of long-lived assets, capitalization of costs, profit recognition related to land sales, stock compensation, and our defined benefit retirement plan. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Our critical accounting policies have not changed since the filing of our Annual Report on Form 10 K for the year ended December 31, 2005. Please refer to this filing for a description of our critical accounting policies.

New Accounting Pronouncements

FASB Statement No. 155, Accounting for Certain Hybrid Financial Instruments an amendment of FASB Statements No. 133 and 140, was issued in February 2006. This statement amends FASB Statement No. 133, Accounting for Derivative Instruments and Hedging Activities, and Statement No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities and addresses the financial treatment and evaluation of certain derivatives. FASB Statement No. 155 is effective for fiscal periods beginning after September 15, 2006. We have reviewed FASB Statement No. 155 and concluded that this pronouncement will not have a material impact on results of operations or our financial condition.

FASB Statement No. 156, Accounting for Servicing of Financial Assets an amendment of FASB Statement No. 140, was issued in March 2006. This statement amends FASB Statement No. 140, Accounting for Transactions and Servicing of Financial Assets and addresses recognition, measurement and presentation requirements when entering into contractual obligations to service financial assets. FASB Statement No. 156 is effective for fiscal periods after September 15, 2006. We have reviewed FASB Statement No. 156 and concluded that this pronouncement will not have a material impact on results of operations or our financial condition.

Results of Operations

Total revenue from segment operations for the first quarter of 2006 was \$5,719,000 compared to \$3,560,000 for the first quarter of 2005. Other income, including interest income, was \$639,000 for the first quarter of 2006 compared to \$590,000 for the same period of 2005. The growth in revenue during the first quarter of 2006 is due to increased commercial/industrial real estate revenue, increased farming revenue, and higher

Table of Contents

interest income. Commercial/industrial real estate revenue grew \$773,000 due to a \$626,000 increase in oil and mineral royalty income, an \$87,000 improvement in returns from the Calpine lease, and generally higher commercial lease revenue. Farming revenues increased \$1,386,000, primarily due to the sale of 2005 crop almonds that were inventoried at year-end and to the collection of additional grape revenue related to the 2005 grape crop. The sale of 2005 crop almonds in the first three months of 2006 accounted for \$1,976,000 of farming revenue compared to \$732,000 of farming revenue in the first quarter of 2005 from the sale of 2004 crop almonds. Interest income improved due to an increase in the yields on outstanding investments.

The net loss for the first quarter of 2006 was \$102,000 or \$0.01 per share, diluted, compared to a net loss of \$984,000 or \$0.06 per share, diluted, for the same period of 2005. The improvement in operations during 2006 is due to the growth in revenues described above being partially offset by increased expenses. Commercial/industrial real estate expenses increased \$237,000 during the first quarter of 2006 due primarily to increased corporate allocations and stock compensation costs resulting from the expensing of stock options and changes in estimates for stock grants. Resort/residential real estate costs increased \$150,000 due largely to higher stock compensation costs and increased spending on our public outreach campaign. Farming expenses grew \$474,000 during the first quarter of 2006 due to higher cultural costs related to the cost of sales of 2005 crop almonds and higher staffing costs, which include stock compensation costs. Corporate general and administrative costs increased \$382,000 during 2006 due to higher staffing costs and stock compensation costs, which were partially offset by increased corporate allocations to operating segments. Stock compensation costs related to the 2004 stock incentive plan are higher in 2006 as compared to the same period of 2005, due to revised estimates relating to the cost of stock grants and the expensing of stock options which began January 1, 2006. Total stock compensation costs for the first quarter of 2006 totaled \$952,000, compared to \$650,000 of cost during the same period of 2005.

During December 2005, the tenant of the power plant lease, Calpine Corp., or Calpine, filed for Chapter 11 bankruptcy protection. We believe that during the bankruptcy restructuring the plant will remain operational and we will continue to receive our base lease payments and variable lease payments during 2006. This assumption is based upon the structure of our lease with Calpine, discussions with Calpine, and the fact that the plant is currently profitable. As of the date of this report, we have not heard from the bankruptcy court regarding whether our lease has been affirmed, but we expect it to be. If for some reason Calpine or another operator does not continue to operate the plant, the loss of lease payments would significantly impact our commercial/industrial segment revenues.

Future activities within the commercial/industrial segment will be focused on the marketing and development of commercial/industrial product. On March 24, 2006 the Company received a favorable ruling in Kern County Superior Court that cleared the way for expansion of the Tejon Industrial Complex-East by dismissing the legal challenges to the project. While this ruling could be appealed until late June, the grounds for such an appeal are limited and construction could commence pending the outcome. During the first three months of 2006, we experienced an increase in activity from companies looking to buy or lease land at Tejon Industrial Complex. This is a continuation of the improvement we saw during the second half of 2005.

During the remainder of 2006, we anticipate the our real estate segments will continue to experience increases in costs, net of amounts capitalized, primarily related to professional service fees, marketing costs, commissions, planning costs, and staffing costs as we continue to increase real estate activities and pursue development opportunities.

Table of Contents

The actual timing and completion of entitlement and development-related activities is difficult to predict due to the uncertainties of the approval process and market factors. These types of real estate development activities and costs could continue over several years as we develop our land holdings. We will also continue to evaluate land resources to determine the highest and best uses for our land holdings. Future sales of land are dependent on market circumstances and specific opportunities. Our goal in the future is to increase land value and create future revenue growth through planning and development of residential communities and commercial/industrial properties.

All of our crops are particularly sensitive to the size of each year's world crop. Large crops in California and abroad can rapidly depress prices. Although it is early in the year to accurately predict production for this year's crops, early estimates for almonds and pistachios indicate that crop production for 2006 could be less than in 2005. Production estimates for almonds for 2006 may be lower due to adverse weather factors. Pistachio estimates are lower following two successive years of high production due largely to the alternate bearing cycle of pistachios. We are seeing a decline in current almond prices from the highs experienced during 2005, while prices for our grapes continue to improve. Although current demand seems stable, improved production in other parts of the world, or increases in the value of the dollar could negatively impact demand and prices. We continue to believe that, on a statewide basis, the long-term production trend will continue to increase for the crops that we grow. This long-term trend in production could lead to a future decline in the prices received for the crops that we grow.

Prices received for many of our products are dependent upon prevailing market conditions and commodity prices. Therefore, we are unable to accurately predict revenue and we cannot pass on to our customers any cost increases caused by general inflation, except to the extent such inflation is reflected in market conditions and commodity prices. The operations of the Company are seasonal and future results of operations cannot be predicted based on quarterly results. Future real estate sales and leasing activity are dependent on market circumstances and specific opportunities and therefore are difficult to predict from period to period.

For further discussion of the risks and uncertainties that could potentially adversely affect us, please refer to the Company's Annual Report on Form 10-K for the year ended December 31, 2005. Part I, Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations.

We continue to be involved in various environmental proceedings related to leased acreage. For a further discussion, refer to Note D Commitments and Contingencies in the Notes to Unaudited Consolidated Condensed Financial Statements.

Income Taxes

Income tax benefits totaled \$71,000 in the first quarter of 2006. This is compared to \$733,000 of benefits for the first quarter of 2005. These represent effective income tax rates of approximately 41% in 2006 and 43% in 2005. Other than the slight change in the effective tax rate the large change when compared to 2005 is due to the significantly higher before tax loss during the first quarter of 2005 compared to 2006.

Table of Contents**Cash Flow and Liquidity**

Our cash, cash equivalents and marketable securities totaled approximately \$62,164,000 at March 31, 2006, an increase of \$126,000 from the corresponding amount at the end of 2005. Cash, cash equivalents and marketable securities increased during the first quarter of 2006 due to the non-cash nature of many of our current period operating expenses and the exercise of stock options. These favorable cash variances were partially offset by an increase in land development costs.

The following table shows our cash flow activities for the three months ended March 31:

(In thousands)	2006	2005
Operating activities	\$ 1,799	\$ 355
Investing activities	\$ (5,430)	\$ (7,628)
Financing activities	\$ 3,856	\$ 1,548

During the first three months of 2006, our operations provided \$1,799,000 of cash reflecting a cash distribution of earnings from one of our joint ventures, and improved business results, especially when non-cash stock compensation costs are added back to operations. During 2005, the net cash provided by operations resulted from the same non-cash costs being added back to operations.

During the first quarter of 2006, we used \$5,430,000 for investing, primarily reflecting capital investments of \$5,028,000 in our real estate projects. Cash used in investing activities during the first quarter of 2005 was \$7,628,000, primarily consisting of \$1,727,000 of capital investment spending and \$6,438,000 of investments in marketable securities.

It is anticipated that throughout the remainder of 2006 we will continue to invest funds in our real estate development projects. We estimate that our capital investment requirements over this period of time could total approximately \$8,000,000 to \$10,000,000.

During the first three months of 2006, financing activities provided \$3,856,000 in cash, primarily due to borrowing against our line of credit and to proceeds from the exercise of stock options. Cash provided by financing activities for the first three months of 2005 totaled \$1,548,000, due to net proceeds from the exercise of stock options.

It is difficult to accurately predict cash flows due to the nature of our businesses and to fluctuating economic conditions. Our earnings and cash flows will be affected from period to period by the commodity nature of our farming operations and by the timing of sales and leases of property within our development projects. The timing of sales and leases within our development projects is difficult to predict due to the time necessary to complete the development process and negotiate sales or lease contracts. Often, this variability in the land development process can lead to particular years or periods having more or less earnings than comparable periods. Based on our experience, we believe we will have adequate cash flows and cash balances over the next twelve months to fund internal operations.

Capital Structure and Financial Condition

Management considers our financial structure and condition to be solid. At March 31, 2006, total capitalization was \$141,484,000, consisting of \$462,000 of debt and \$ 141,022,000 of equity, resulting in a debt-to-total-capitalization ratio of less than one percent.

Table of Contents

We have a long-term revolving line of credit of \$30,000,000 that, as of March 31, 2006, had an outstanding balance of \$2,500,000. At the Company's option, the interest rate on this line of credit can be fixed at 1.50% over a selected LIBOR rate or float at .75% less than the bank's prime lending rate. During the term of this credit facility, we can borrow at any time and partially or wholly repay any outstanding borrowings and then re-borrow, as necessary. Any outstanding principal balance is due and payable in full in July, 2008. This note is unsecured. The long-term debt, less current portion of \$25,000, is \$437,000 at March 31, 2006. This note is for a loan that provides long-term financing for a building being leased to Starbucks. This note has a maturity date of May 1, 2018.

Contractual Cash Obligations

The following table summarizes our contractual cash obligations and commercial commitments over the next five years:

(In thousands)	Total	Payments Due by Period			
		One Year or Less	Years 2-3	Years 4-5	After 5 Years
CONTRACTUAL OBLIGATIONS:					
Long-term debt	\$ 462	\$ 25	\$ 56	\$ 62	\$ 319
Interest on fixed rate debt	\$ 218	\$ 30	\$ 56	\$ 48	\$ 84
Line of credit commitment fees	\$ 75	\$ 30	\$ 45	\$	\$
Cash contract commitments	\$ 3,411	\$ 3,411	\$	\$	\$
 Total contractual obligations	 \$ 4,166	 \$ 3,496	 \$ 157	 \$ 110	 \$ 403

The categories above include purchase obligations and other long-term liabilities reflected on our balance sheet under GAAP. A purchase obligation is defined in Item 303(a)(5)(ii)(D) of Regulation S-K as an agreement to purchase goods or services that is enforceable and legally binding on [us] and that specifies all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction. Based on this definition, the table above includes only those contracts that include fixed or minimum obligations. It does not include normal purchases, which are made in the ordinary course of business.

Our contractual cash commitments consist of contracts in various stages of completion related to infrastructure development within our industrial developments, entitlement and planning costs related to our industrial and residential development projects, and a company public relations campaign. These commitments do not include any on-going operational costs such as utilities and maintenance contracts for equipment. Many of these commitments are for future services and until the service is rendered we have no obligation to pay. Therefore, many of the above commitments are not included in accounts payable on the balance sheet because we have no current payment obligation. At the present time, we do not have any capital lease obligations or purchase obligations outstanding. Our operating lease obligations are primarily for office equipment, a small land lease, and six vehicle leases. These operating lease obligations average approximately \$9,000 per month.

As discussed in Note I to the Unaudited Consolidated Condensed Financial Statements, we have long-term liabilities for employee retirement plans. The payments related to the supplemental retirement plan are not

Table of Contents

included above since they are dependent upon when the employee retires or leaves the Company. In addition, minimum pension funding requirements are not included above, as such amounts are not available for all periods presented. We estimate that we will contribute approximately \$580,000 to the pension plan in 2006. During 2005, we made approximately \$488,000 in pension plan contributions.

Off-Balance Sheet Arrangements

The following table shows contingent obligations we have with respect to unconsolidated entities in which we have an interest, and certain bonds issued by a local Community Facilities District:

(In thousands)	Amount of Commitment Expiration Per Period				
	Total	One Year or Less	Years 2-3	Years 4-5	After 5 Years
OTHER COMMERCIAL COMMITMENTS:					
Standby letter of credit	\$ 4,584	\$	\$ 4,584	\$	\$
Guarantee	\$ 6,000	\$ 6,000	\$	\$	\$
Total other commercial commitments	\$ 10,584	\$ 6,000	\$ 4,584	\$	\$

The standby letter of credit is related to the issuance of Community Facilities District bonds by the Tejon Ranch Public Facilities Financing Authority, a joint-powers authority created by Kern County and the Tejon-Castac Water District. The standby letter of credit is in place to provide additional credit enhancement and covers approximately two years worth of interest on the outstanding bonds. The annual cost for this letter of credit is approximately \$50,000. This letter of credit will not be drawn upon unless we, as the largest landowner in the district, fail to make our property tax payments. This letter of credit was originally for a two-year period and will be renewed, if necessary, in 2007.

The guarantee consists of a \$6,000,000 guarantee related to debt within Tejon Dermody Industrial LLC, an unconsolidated joint venture formed to construct and market a 650,000-square foot building at the Tejon Industrial Complex. Total debt in the venture is approximately \$12,021,000 and was used in the construction of the building. In the joint venture agreement, each partner agreed to guarantee one half of the outstanding debt through the term of the loan. The maturity date for this loan has been extended to July 31, 2006 while we finalize the refinancing of the loan. The refinancing should be completed prior to the new maturity date and includes a reduction in guarantees and an improved interest rate. We believe it is unlikely that we will ever be required to make payments under this guarantee.

Our current and future capital resource requirements will be provided primarily from current cash and marketable securities, cash flow from ongoing operations, proceeds from the sale of developed parcels, potential sale of assets, additional use of debt, proceeds from the reimbursement of public infrastructure costs through the Community Facilities District bond debt, and the issuance of common stock. As noted above, we have \$62,164,000 in cash and securities and \$27,500,000 available on credit lines to meet any short-term liquidity needs. We continue to expect that substantial investments will need to be made in future years in our land assets to secure entitlements and develop the land. In order to meet these long-term capital requirements, we will need to secure additional debt financing and continue to renew our existing credit facilities. In addition to debt financing, we will use other capital alternatives such as joint ventures with financial partners, sales of assets, and the issuance of common stock. There is no assurance that we can obtain financing from any of these sources or that we can obtain financing at favorable terms.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk represents the risk of loss that may impact the financial position, results of operations, or cash flows of the Company due to adverse changes in financial or commodity market prices or rates. We are exposed to market risk in the areas of interest rates and commodity prices.

Financial Market Risks

Our exposure to financial market risks includes changes to interest rates and credit risks related to marketable securities, interest rates related to our outstanding indebtedness and trade receivables.

The primary objective of our investment activities is to preserve principal while at the same time maximizing yields and prudently managing risk. To achieve this objective and limit interest rate exposure, we limit our investments to securities with a maturity of less than six years and an investment grade of A or better from Moody's or Standard and Poors. See Note C Marketable Securities, of Notes to Unaudited Consolidated Condensed Financial Statements.

We are exposed to interest rate risk on our line of credit, which currently has a balance of \$2,500,000, and the long-term debt currently outstanding. The line-of-credit interest rate can be tied to the lending bank's prime rate and would change when that rate changes, or the debt can be tied to a LIBOR rate on a fixed basis and change only at maturity of the fixed-rate feature. The long-term debt of \$462,000 has a fixed interest rate, and the fair value of this long-term debt will change based on interest rate movements in the market. The floating rate feature in our line of credit can expose us to variability in interest payments due to changes in the interest rates. We believe it is prudent at times to limit the variability of floating-rate interest payments and in the past entered into interest rate swaps to manage those fluctuations.

At March 31, 2006, we had no outstanding interest rate swap agreements. However, Petro Travel Plaza LLC, an unconsolidated joint venture, has an interest rate swap agreement with respect to \$6,700,000 of its long-term debt to manage interest rate risk by converting floating interest rate debt to fixed-rate debt. This swap agreement matures in November 2009. The interest rate swap fixed rate is 4.33%. The joint venture accounts for the swap agreement as a cash flow hedge in accordance with FASB Statement No. 133, Accounting for Derivative Investments and Hedging Activities.

We record our pro rata change in the fair market value of the interest rate swap in accumulated other comprehensive income. As of March 31, 2006, the Company's portion of the fair market value of the interest rate swap was a gain of \$99,000. Estimated fair value of the swap was determined by market price quotes as of March 31, 2006, received from the joint venture's bank.

Market risk related to our inventories ultimately depends on the value of almonds, grapes, pistachios, and walnuts at the time of payment or sale. Credit risk related to our receivables depends upon the financial condition of our customers. Based on historical experience with our current customers and periodic credit evaluations of our customers' financial conditions, we believe our credit risk is minimal. Market risk is discussed below in the section pertaining to commodity price exposure.

The following tables provide information about our financial instruments that are sensitive to changes in interest rates. The tables present our debt obligations, principal cash flows and related weighted-average interest rates by expected maturity dates.

Table of Contents

In comparison to the prior year, our risk with regard to fluctuations in interest rates has increased related to the use of debt due to the increase in the use of lines of credit that fluctuate with the bank's prime lending rate. With regard to our marketable securities, we continue to have a significant risk to fluctuations in interest rates, especially increasing rates, due to our high outstanding balances.

Commodity Price Exposure

As of March 31, 2006, we have exposure to adverse price fluctuations associated with certain inventories and accounts receivable. Inventories consist of farming and processing costs related to 2006 and 2005 crop production. The farming costs inventoried are recorded at actual costs incurred. Historically, these costs have been recovered each year when that year's crop harvest has been sold.

With respect to accounts receivable, the amount at risk relates primarily to farm crops. These receivables are recorded as estimates of the prices that ultimately will be received for the crops. The final price is generally not known until the third or fourth quarter of the following year. Of the accounts receivable outstanding at March 31, 2006, \$4,554,000 is at risk to changing prices. Of the amount at risk to changing prices, \$2,709,000 is attributable to almonds and \$1,845,000 is attributable to pistachios. The comparable amount of accounts receivable at risk to price changes at December 31, 2005 was \$5,667,000. Of the December 31, 2005 amount at risk to changing prices, \$2,360,000 is related to almonds, \$3,244,000 is related to pistachios, and \$63,000 is related to walnuts.

The price estimated for recording accounts receivable for almonds recorded at March 31, 2006 was \$2.22 per pound, as compared to \$3.18 per pound at December 31, 2005. For each \$.01 change in the price of almonds, our receivable for almonds increases or decreases by \$10,700. Although the final price of almonds (and therefore the extent of the risk) is not presently known, over the last three years prices have ranged from \$1.85 to \$3.80. With respect to pistachios, the price estimated for recording the receivable was \$2.28 per pound at March 31, 2006. For each \$.01 change in the price of pistachios, our receivable for pistachios increases or decreases by \$8,100. The range of final prices over the last three years for pistachios has ranged from \$1.05 to \$2.30. The price estimated for walnuts was \$0.50 per pound. The final price for walnuts has averaged from \$0.32 to \$0.60 over the last three years.

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer, Chief Financial Officer and Controller, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rules 13a-15 and 15d-15 of the Securities Exchange Act of 1934, as amended, or the Exchange Act. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective in ensuring that all information required in the reports we file or submit under the Exchange Act was accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure and was recorded, processed, summarized and reported within the time period required by the rules and regulations of the Securities and Exchange Commission.

Table of Contents

(b) Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of Rule 13a-15 or Rule 15d-15 under the Exchange Act that occurred during our last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

Not applicable.

Item 1A. Risk Factors

There have been no material changes to the risk factors disclosed in Item 1A or elsewhere in our most recent Annual Report on Form 10-K.

Item 2. Changes in Securities and Use of Proceeds

Not applicable.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Submission of Matters to a Vote of Security Holders

None

Item 5. Other Information
