Note 1. Valuation and Investment Practices

Securities Valuation: Securities for which market quotations are readily available (including securities listed on national securities exchanges and those traded over-the-counter) are based on quoted prices from the applicable exchange. To the extent valuation adjustments are not applied to these securities, they are categorized as Level 1. If such securities were not traded on the valuation date, but market quotations are readily available, they are valued at the most recently quoted bid price provided by an independent pricing service or by principal market makers. Securities traded on NASDAQ are valued at the NASDAQ Official Closing Price (NOCP). Where market quotations are not readily available or where the pricing agent or market maker does not provide a valuation or methodology, or provides a valuation or methodology that, in the judgment of the adviser or sub-adviser, does not represent fair value (Fair Value Securities), securities are valued at fair value by a Pricing Committee appointed by the Board of Directors, in consultation with the adviser or sub-adviser. The Fund uses various valuation techniques that utilize both observable and unobservable inputs including multi-dimensional relational pricing model, option adjusted spread pricing, book value, last available trade, discounted future cash flow models, cost, and comparable company approach. To the extent these inputs are observable and timely, the values of these securities are categorized as Level 2; otherwise, the values are categorized as Level 3. In such circumstances, the adviser or sub-adviser makes an initial written recommendation to the Pricing Committee regarding valuation methodology for each Fair Value Security. Thereafter, the adviser or sub-adviser conducts periodic reviews of each Fair Value Security to consider whether the respective methodology and its application is appropriate and recommends methodology changes when appropriate. The Pricing Committee reviews and makes a determination regarding each initial methodology recommendation and any subsequent methodology changes. All methodology recommendations and any changes are reviewed by the entire Board of Directors on a quarterly basis.

The Fund's investments in unregistered pooled investment vehicles (hedge funds) are valued at the most recent value periodically determined by the respective hedge fund managers according to such manager's policies and procedures (adjusted for estimated expenses and fees accrued to the Fund since the last valuation date); provided, however, that the Pricing Committee may consider whether it is appropriate, in light of relevant circumstances, to adjust such valuation in accordance with the Fund's valuation procedures. If a hedge fund does not report a value to the Fund on a timely basis, the fair value of such hedge fund shall be based on the most recent value reported by the hedge fund, as well as any other relevant information available at the time the Fund values its portfolio. As a practical matter, hedge fund valuations generally can be obtained from hedge fund managers on a weekly basis, as of close of business Thursday, but the frequency and timing of receiving valuations for hedge fund investments is subject to change at any time, without notice to investors, at the discretion of the hedge fund manager or the Fund.

The Portfolio of Investments includes investments valued at \$168,537,402 (65.24% of total net assets), whose fair values have been estimated by management in the absence of readily determinable fair values. Due to the inherent uncertainty of the valuation of these investments, these values may differ from the values that would have been used had a ready market for these investments existed and the differences could be material.

Short-term securities which mature in more than 60 days are valued at current market quotations. Short-term securities which mature in 60 days or less are valued at amortized cost, which approximates fair value.

Corporate Bonds, other than short-term securities, are valued at the price provided by an independent pricing service. The prices provided by the independent service are based on the mean of bid and ask prices for each corporate bond security. In determining the value of a particular investment, pricing services may use certain information with respect to transactions in such investments, quotations from dealers, pricing matrixes, market

transactions in comparable investments, various relationships observed in the market between investments and calculated yield measures based on valuation technology commonly employed in the market for such investments. To the extent that these inputs are observable and timely, the values of corporate bonds are categorized as Level 2; otherwise, the values are categorized as Level 3.

For valuation purposes, the last quoted prices of non-U.S. equity securities may be adjusted under the circumstances described below. If the Fund determines that developments between the close of a foreign market and the close of the NYSE will, in its judgment, materially affect the value of some or all of its portfolio securities, the Fund will adjust the previous closing prices to reflect what it believes to be the fair value of the securities as of the close of the NYSE. In deciding whether it is necessary to adjust closing prices to reflect fair value, the Fund reviews a variety of factors, including developments in foreign markets, the performance of U.S. securities markets, and the performance of instruments trading in U.S. markets that represent foreign securities and baskets of foreign securities. The Fund may also fair value securities in other situations, such as when a particular foreign market is closed but the U.S. market is open. The Fund uses outside pricing services to provide it with closing prices and information to evaluate and/or adjust those prices. The Fund cannot predict how often it will use closing prices and how often it will determine it necessary to adjust those prices to reflect fair value. If the Fund uses adjusted prices, the Fund will periodically compare closing prices, the next days opening prices in the same markets and those adjusted prices as a means of evaluating its security valuation process.

Various inputs are used to determine the value of the Fund's investments. Observable inputs are inputs that reflect the assumptions market participants would use based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions based on the best information available in the circumstances.

These inputs are summarized in the three broad levels listed below.

- Level 1 Unadjusted quoted prices in active markets for identical investments
- Level 2 Significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 Significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The following is a summary of the inputs used as of June 30, 2011 in valuing the Fund's investments carried at value:

Recent Accounting Pronouncements In April 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-03 Transfers and Servicing (Topic 860):

Reconsideration of Effective Control for Repurchase Agreements. The ASU 2011-03 is intended to improve financial reporting of repurchase agreements and other agreements that both entitle and obligate a transferor to repurchase or redeem the financial assets before their maturity. The ASU is effective for the first interim or annual period beginning on or after December 15, 2011. Management is currently evaluating the impact this ASU may have on the Fund's financial statements.

In May 2011, the FASB issued ASU No. 2011-04 Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs. ASU 2011-04 includes common requirements for measurement of and disclosure about fair value between U.S. GAAP and IFRS. ASU 2011-04 will require reporting entities to disclose quantitative information about the unobservable inputs used in the fair value measurements categorized within Level 3 of the fair value hierarchy. In addition, ASU 2011-04 will require reporting entities to make disclosures about amounts and reasons for all transfers in and out of Level 1 and Level 2 fair value measurements. The new and revised disclosures are effective for interim and annual reporting periods beginning after December 15, 2011. Management is currently evaluating the impact this ASU may have on the Fund's financial statements.

Securities Transactions and Investment Income: Securities transactions are recorded as of the trade date. Realized gains and losses from securities sold are recorded on the identified cost basis. Dividend income is recorded as of the ex-dividend date, or for certain foreign securities, when the information becomes available to the Fund. Interest income including amortization of premium and accretion of discount on debt securities, as required, is recorded on the accrual basis, using the interest method.

Foreign Currency Translations: The Fund may invest a portion of its assets in foreign securities. In the event that the Fund executes a foreign security transaction, the Fund will generally enter into a forward foreign currency contract to settle the foreign security transaction. Foreign securities may carry more risk than U.S. securities, such as political, market and currency risks.

The books and records of the Fund are maintained in U.S. dollars. Foreign currencies, investments and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars at the exchange rate prevailing at the end of the period, and purchases and sales of investment securities, income and expenses transacted in foreign currencies are translated at the exchange rate on the dates of such transactions. Foreign currency gains and losses result from fluctuations in exchange rates between trade date and settlement date on securities transactions, foreign currency transactions and the difference between amounts of foreign interest and dividends recorded on the books of the Fund and the amounts actually received. The Fund records net realized gain or loss on investment securities and foreign currency transactions separately.

Investment in non-U.S. issuers may involve unique risks compared to investing in securities of U.S. issuers. These risks may include, but are not limited to: (i) less information about non-U.S. issuers or markets may be available due to less rigorous disclosure, accounting standards or regulatory practices; (ii) many non-U.S. markets are smaller, less liquid and more volatile thus, in a changing market, the adviser may not be able to sell the Fund's portfolio securities at times, in amounts and at prices they consider reasonable; (iii) currency exchange rates or controls may adversely affect the value of the Fund's investments; (iv) the economies of non-U.S. countries may grow at slower rates than expected or may experience downturns or recessions; and, (v) withholdings and other non-U.S. taxes may decrease the Fund's return.

Concentration Risk: The Fund has highly concentrated positions in certain hedge funds and may take concentrated positions in other securities. Concentrating investments in a fewer number of securities (including investments in hedge funds) may involve a degree of risk that is greater than a fund which has less concentrated investments spread out over a greater number of securities. For example, the value of the Fund's net assets will fluctuate significantly based on the fluctuation in the value of the

hedge funds in which it invests. In addition, investments in hedge funds can be highly volatile and may subject investors to heightened risk and higher operating expenses than another closed-end fund with a different investment focus.

Note 2. Unrealized Appreciation/(Depreciation)

On June 30, 2011, based on cost of \$289,681,520 for federal income tax purposes, aggregate gross unrealized appreciation for all securities in which there is an excess of value over tax cost was \$25,840,985 and aggregate gross unrealized depreciation for all securities in which there is an excess of tax cost over value was \$57,869,105, resulting in net unrealized depreciation of \$32,028,120.

Note 3. Transactions With Affiliated Companies

Transactions during the period with companies in which the Fund owned at least 5% of the voting securities were as follows:

Note 4. Credit Default Swaps

The Fund may enter into credit default swap contracts for hedging purposes, to gain market exposure or to add leverage to its portfolio. When used for hedging purposes, the Fund would be the buyer of a credit default swap contract. In that case, the Fund would be entitled to receive the par (or other agreed-upon) value of a referenced debt obligation, index or other investment from the counterparty to the contract in the event of a default by a third party, such as a U.S. or foreign issuer, on the referenced debt obligation. In return, the Fund would pay to the counterparty a periodic stream of payments over the term of the contract provided that no event of default has occurred. If no default occurs, the Fund would have spent the stream of payments and received no benefit from the contract. When the Fund is the seller of a credit default swap contract, it receives the stream of payments but is obligated to pay upon default of the referenced debt obligation. As the seller, the Fund would effectively add leverage to its portfolio because, in addition to its total assets, the Fund would be subject to investment exposure on the notional amount of the swap.

In addition to the risks applicable to derivatives generally, credit default swaps involve special risks because they may be difficult to value, may be susceptible to liquidity and credit risk, and generally pay a return to the party that has paid the premium only in the event of an actual default by the issuer of the underlying obligation, as opposed to a credit downgrade or other indication of financial difficulty. Credit default swaps are marked to market periodically using quotations from pricing services. A realized gain or loss is recorded upon payment or receipt of a periodic payment or termination of the swap agreement.

Counterparty Risk: Changes in the credit quality of the companies that serve as the Fund's counterparties with respect to derivatives, swaps or other transactions supported by another party's credit will affect the value of those instruments. By using derivatives, swaps or other transactions, the Fund assumes the risk that its counterparties could experience such changes in credit quality.

The Fund had no outstanding credit default swap contracts as of June 30, 2011.

Note 5. Restricted Securities

As of June 30, 2011, investments in securities included issues that are considered restricted. Restricted securities are often purchased in private placement transactions, are not registered under the Securities Act of 1933, may have contractual restrictions on resale, and may be valued under methods approved by the Board of Directors as reflecting fair value.

Restricted securities as of June 30, 2011 are as follows:

Note 6. Investments in Limited Partnerships

As of June 30, 2011, the Fund held investments in limited partnerships. The Fund's investments in the limited partnerships are reported on the Portfolio of Investments under the section titled Limited Partnerships.

Since the investments in limited partnerships are not publicly traded, the Fund's ability to make withdrawals from its investments in the limited partnerships is subject to certain restrictions which vary for each respective limited partnership. These restrictions include notice requirements for withdrawals and additional restrictions or charges for withdrawals within a certain time period following initial investment. In addition, there could be circumstances in which such restrictions can include the suspension or delay in withdrawals from the respective limited partnership, or limited withdrawals allowable only during specified times during the year. In certain circumstances a limited partner may not make withdrawals that occur less than one year following the date of admission to the partnership. As of June 30, 2011, withdrawal restrictions applied to certain of the Fund's investments in limited partnerships as the Fund was admitted as a partner less than one year ago in certain investments.

The following table summarizes the Fund's investments in limited partnerships as of June 30, 2011.
