2 SEMI-ANNUAL REPORTS APRIL 30, 2007

A Letter to Shareholders

#### Dear Shareholder

In its first four months, 2007 could already be termed an eventful year for investors. For most financial markets, 2007 opened just as 2006 ended — on a positive trajectory. Then, at the end of February and into March, global equity markets registered their first significant decline since last summer. The market jitters were triggered by a significant setback in the Chinese market and were exacerbated by worries of a weakening economy, escalating geopolitical concerns and rising delinquencies in the subprime mortgage market. Still, underlying stock market fundamentals appeared quite sound, supported by a generally favorable global economic backdrop, tame inflation, slowing but still positive earnings growth, relatively low interest rates and attractive valuations. These conditions prevailed later, and the Dow Jones Industrial Average crossed the 13,000 mark for the first time in its history in late April.

Not unlike the equity market, the bond market also experienced volatility as observers attempted to interpret mixed economic signals. A bond market rally (falling yields and rising prices) late last year reversed itself early in 2007 amid some transitory signs of economic strength. Overall, yields have fluctuated month to month but ended April little changed from the beginning of the year. However, compared to one year ago, yields on 30-year Treasury bonds fell 36 basis points (.36%) and 10-year yields fell 44 basis points, while prices correspondingly rose.

For its part, the Federal Reserve Board (the Fed) has left the target short-term interest rate on hold at 5.25% since first pausing in its interest rate-hiking campaign on August 8, 2006. The central bankers continue to express concern about potential inflationary pressures, but also acknowledge signs of economic weakness. Given this relatively "balanced" assessment, most observers believe the Fed will keep interest rates on hold for now.

Against this backdrop, most major market indexes posted positive returns for the annual and semi-annual reporting periods ended April 30, 2007:

6-month
+ 8.60%
+ 6.86
+15.46
+ 2.64
+ 1.59
+ 6.96

If the first four months are any guide, 2007 could be a year of enhanced market volatility. As you navigate the uncertainties, we encourage you to review your investment goals with your financial professional and to make portfolio changes, as needed. For more insight, we invite you to view "What's Ahead in 2007: An Investment Perspective" and "Are You Prepared for Volatility?" at www.blackrock.com/funds. We thank you for entrusting BlackRock with your investment assets, and we look forward to continuing to serve you in the months and years ahead.

Sincerely,

/s/ Robert C. Doll, Jr.

A Discussion With Your Funds' Portfolio Managers

The Funds posted total returns that surpassed their respective Lipper category averages for the period, as we maintained our focus on generating yield and protecting net asset value.

Describe the recent market environment relative to municipal bonds.

Long-term bond yields traded in a fairly broad and volatile range over the past six months, only to end the period little changed. Overall, financial conditions have remained relatively balanced, with moderate economic activity and well-contained inflationary pressures. Recent commentary from the Federal Reserve Board (the Fed) has supported this trading range. The Fed is expected to maintain its "balanced" economic assessment at least into mid-year.

During the six-month reporting period, 30-year U.S. Treasury bond yields rose nine basis points (.09%) to 4.81%, while 10-year Treasury note yields rose two basis points to 4.63%. Similarly, movements were fairly muted in the tax-exempt market. As measured by Municipal Market Data, yields on AAA-rated municipal bonds maturing in 30 years declined three basis points to 4.10%, and yields on AAA-rated municipal bonds maturing in 10 years rose 12 basis points to 3.76%.

Investor demand for municipal product continued to strengthen throughout the six-month period. The Investment Company Institute reports that long-term municipal bond funds received over \$8.7 billion in net new cash flows during the first three months of 2007, a 42% increase compared to the first three months of 2006. Weekly fund flows, as reported by AMG Data, also have risen. Weekly inflows during the three-month period ended April 30, 2007, averaged over \$489 million, up from a weekly average of \$400 million in fourth quarter 2006. The improving demand among retail investors reflects, in large part, increased acceptance of lower nominal yields and bond coupon structure. Throughout much of last year, retail-oriented municipal bond broker/dealers noted significant individual investor resistance to purchasing tax-exempt issues with yields below 4.50% and/or issues bearing nominal coupons below 5%. As tax-exempt bond yields have stabilized in recent months, it appears retail investors have become increasingly comfortable purchasing tax-exempt bonds with those characteristics, which has served to support the market's performance.

In terms of supply, issuance of long-term municipal bonds has increased over the past six months. More than \$225 billion in new bonds was issued during the April reporting period, an increase of over 30% compared to the same six months one year ago. Over the past three months, municipalities issued more than \$106 billion in new long-term tax-exempt bonds, an increase of more than 32% compared to the same period a year ago. So far this year, greater than \$135 billion in long-term municipal bonds have been underwritten, putting 2007 annual issuance some 4% ahead of 2005's record pace. Issuers have continued to take advantage of historically low interest rates to refinance outstanding issues. In the first four months of 2007, we have seen 10 underwritings exceeding \$1 billion in size. These "mega-deals" have continued to be relatively easily absorbed by market

participants, especially non-traditional and foreign buyers who find the liquidity afforded by these deals to be particularly attractive.

Looking ahead, we believe investor demand will be critical in maintaining the tax-exempt market's strong technical position. The increase in new bond supply seen this year is unlikely to abate significantly, leading to record or near-record annual issuance. Relatively stable yield ratios compared to taxable bonds, coupled with a comparatively steep municipal yield curve, should help to sustain traditional and non-traditional investor interest in tax-exempt bonds and support the market's performance into mid-2007.

4 SEMI-ANNUAL REPORTS

APRIL 30, 2007

BlackRock MuniYield Fund, Inc.

How did the Fund perform during the period?

For the six-month period ended April 30, 2007, the Common Stock of BlackRock MuniYield Fund, Inc. had net annualized yields of 5.53% and 5.24%, based on a period-end per share net asset value of \$14.89 and a per share market price of \$15.71, respectively, and \$.408 per share income dividends. Over the same period, the total investment return on the Fund's Common Stock was +2.19%, based on a change in per share net asset value from \$14.98 to \$14.89, and assuming reinvestment of all distributions.

The Fund's total return, based on net asset value, exceeded the +1.66% average return of the Lipper General Municipal Debt Funds (Leveraged) category for the six-month period. (Funds in this Lipper category invest primarily in municipal debt issues rated in the top four credit-rating categories. These funds can be leveraged via use of debt, preferred equity and/or reverse repurchase agreements.)

As in prior reporting periods, Fund performance continued to be driven by our above-average dividend yield, which is largely the result of the portfolio's exposure to lower-rated, higher-yielding credits. Another significant driver of positive performance was the refunding activity that has been evident in the market for some time. A number of the Fund's holdings were refunded during the period and enjoyed subsequent increases in value. An additional benefit of the refunding activity was a boost in the overall credit profile of the portfolio as some of our lower-rated or non-rated bonds were refunded (when a bond is refunded, the risk of default essentially drops to zero and, therefore, raises the credit quality to the equivalent of a AAA-rated issue).

For the most part, the Fund's interest rate exposure remained neutral during the six-month period and did not have a significant effect on performance. We did, however, employ some tactical hedging strategies in order to position the Fund a bit more defensively (that is, less interest rate exposure) late in the period. This move was in anticipation of the temporary weakness typically seen in the municipal market around the April tax deadline, when investors are focused more on allocating funds for tax payments than on buying bonds. While the "tax effect" was fairly muted this year, our hedging strategies did prove beneficial to performance for the period. On the negative side, a widening in credit spreads in the health care industry was a detractor, although the Fund's neutral exposure to that sector limited its influence on overall performance.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Stock (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of distributions, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the

secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Stock may vary significantly from total investment returns based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?

In our last report to shareholders, we noted that portfolio activity had been focused on taking advantage of further flattening in the municipal yield curve by shifting assets to the 10-year to 15-year area of the curve. During the most recent six months, we made only modest efforts to pursue this strategy as we came to believe that the yield curve will potentially maintain its flatness for an extended period of time. While we still see the greatest value in the 10-year to 15-year part of the curve, we also foresee continued strength on the long end due, in part, to high demand from traditional investors who are drawn to the positively sloped municipal curve versus other asset classes. Additionally, issuers have lately become more inclined to raise capital through structured derivative products rather than traditional bonds. Should investor demand for structured products remain strong, the supply of long-term fixed rate bonds may be reduced, which would lend further strength to the long end of the curve.

Other activity during the six-month period included an effort to increase exposure to the high-grade housing and health care sectors as part of our larger goal of upgrading the overall credit profile of the portfolio. As heavy issuance occurred in both sectors, bond prices declined and we found attractive values on high-grade issues (AA or AAA). Given the persistently narrow credit spreads of these sectors and the added incentive of reduced prices on high-grade credits, we were able to increase the quality of the portfolio with less yield loss than is typically associated with a credit upgrade.

SEMI-ANNUAL REPORTS

APRIL 30, 2007

5

#### A Discussion With Your Funds' Portfolio Managers (continued)

For the six-month period ended April 30, 2007, the Fund's Auction Market Preferred Stock had average yields of: 3.50% for Series A, 3.65% for Series B, 3.45% for Series C, 3.40% for Series D, 3.55% for Series E, 3.53% for Series F and 3.52% for Series G. The Fed opted to keep the target short-term interest rate on hold at 5.25% throughout the period. As such, the Fund's borrowing costs were stable, but relatively high during the period as we experienced a typical spike related to the April tax-filing deadline. The municipal yield curve, although flat by historical standards, remained positively sloped and continued to generate an income benefit to the Common Stock shareholder from the leveraging of Preferred Stock. As always, should the spread between short-term and long-term interest rates narrow, the benefits of leverage will decline and, as a result, reduce the yield on the Fund's Common Stock. (For a more complete explanation of the benefits and risks of leveraging, see page 11 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

At period-end, the Fund was neutrally positioned in terms of interest rate risk, as it appears that the Fed will refrain from changing its target short-term interest rate for some time. When we see more definite signs that the economy is indeed continuing to slow to the point where the Fed is likely to lower rates, we will look to adjust the portfolio to take advantage of the falling-rate environment. We also intend to continue working on reducing the portfolio's credit exposure while maintaining the competitive income to shareholders that the Fund has consistently achieved for several years. At period-end, our borrowing costs were still elevated due to the seasonal spike associated with

tax season, but we expect rates to settle back rather quickly and allow us more flexibility to pursue our credit strategies.

BlackRock MuniYield Insured Fund, Inc.

How did the Fund perform during the period?

For the six-month period ended April 30, 2007, the Common Stock of BlackRock MuniYield Insured Fund, Inc. had net annualized yields of 4.45% and 4.73%, based on a period-end per share net asset value of \$15.22 and a per share market price of \$14.33, respectively, and \$.336 per share income dividends. Over the same period, the total investment return on the Fund's Common Stock was +1.85%, based on a change in per share net asset value from \$15.30 to \$15.22, and assuming reinvestment of all distributions.

The Fund's total return, based on net asset value, exceeded the +1.46% average return of the Lipper Insured Municipal Debt Funds (Leveraged) category for the six-month period. (Funds in this Lipper category invest primarily in municipal debt issues insured as to timely payment. These funds can be leveraged via use of debt, preferred equity and/or reverse repurchase agreements.) The Fund's outperformance can be attributed to our long duration relative to our peers, a posture we assumed for the majority of the period. Rates moved within a very narrow range during the period, but our slightly long bias proved favorable at times when the market rallied (that is, rates fell and prices increased). This was particularly true toward the end of 2006.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Stock (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of distributions, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Stock can vary significantly from total investment returns based on changes in the Fund's net asset value.

6 SEMI-ANNUAL REPORTS

APRIL 30, 2007

What changes were made to the portfolio during the period?

While we generally favored a long duration, we shifted to a slightly short bias in January and February in anticipation of a market decline. We refocused our efforts on increasing duration in March and April based on our belief that turmoil in the subprime mortgage market would bring yields down. Throughout the six months, we aimed to achieve additional yield for the portfolio by investing in longer-dated bonds, specifically in the 25-year to 30-year maturity range, while also seeking to protect the Fund's underlying value.

In our last report to shareholders, we noted a marked narrowing of credit spreads between municipal bonds issued by high-tax states and those issued by low-tax states. In seeking to capitalize on this trend, we looked to purchase high-quality bonds issued by the high-tax states, as opposed to bonds issued by low-tax states. Because of the relatively high income taxes imposed by these states, their securities typically meet with strong retail demand, which in turn creates a solid technical market, leading to better liquidity. We maintained that bias during this period, especially with regard to California issues, in which we maintained a position of approximately 23% of net assets.

Similarly, we maintained the Fund's exposure to the Pacific Northwest, where we continue to observe solid credit fundamentals. Bonds issued by the State of

Washington made up approximately 10% of the portfolio.

Importantly, the Fund continued to be fully invested throughout the period, consistent with our goal of maintaining an attractive level of income.

For the six-month period ended April 30, 2007, the Fund's Auction Market Preferred Stock had average yields of 3.50% for Series A, 3.60% for Series B, 3.64% for Series C, 3.49% for Series D, 3.51% for Series E, 3.63% for Series F, 3.56% for Series G, 3.55% for Series H and 3.55% for Series I. The Fed kept its target interest rate unchanged during the six-month period at 5.25%. As such, the Fund's borrowing costs remained relatively stable. Importantly, the municipal yield curve maintained its positive slope, particularly compared to the Treasury curve, and continued to generate an income benefit to the Common Stock shareholder from the leveraging of Preferred Stock. As always, should the spread between short-term and long-term interest rates narrow, the benefits of leveraging will decline and, as a result, reduce the yield available to the Common Stock shareholder. (For a more complete explanation of the benefits and risks of leveraging, see page 11 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

We ended the period with a fully invested portfolio and a neutral to slightly long duration relative to our peers. Municipal yields and credit spreads are near their all-time lows and the slope of the yield curve is historically very flat. However, a favorable supply/demand environment should continue to be supportive of present valuations in the municipal market.

Against this backdrop, we intend to continue our efforts to enhance yield for shareholders while also protecting the Fund's underlying value. To that end, we continue to look for maturities in the 25-year to 30-year area and to favor a neutral to slightly long portfolio duration, which offers the benefit of incremental yield. We believe above-average yields can provide for competitive Fund returns over time.

SEMI-ANNUAL REPORTS

APRIL 30, 2007

7

A Discussion With Your Funds' Portfolio Managers (continued)

BlackRock MuniYield Quality Fund, Inc.

How did the Fund perform during the period?

For the six-month period ended April 30, 2007, the Common Stock of BlackRock MuniYield Quality Fund, Inc. had net annualized yields of 4.53% and 4.79%, based on a period-end per share net asset value of \$15.21 and a per share market price of \$14.39, respectively, and \$.342 per share income dividends. Over the same period, the total investment return on the Fund's Common Stock was +1.69%, based on a change in per share net asset value from \$15.32 to \$15.21, and assuming reinvestment of all distributions.

The Fund's total return, based on net asset value, outpaced the  $\pm 1.46\%$  average return of the Lipper Insured Municipal Debt Funds (Leveraged) category for the six-month period. (Funds in this Lipper category invest primarily in municipal debt issues insured as to timely payment. These funds can be leveraged via use of debt, preferred equity and/or reverse repurchase agreements.)

The Fund's positive performance is primarily attributed to two factors. First, in prior periods, we had focused on investing further out along the municipal yield curve, a strategy that continued to benefit performance as longer-dated bonds outperformed issues with shorter maturities during this period (that is,

the yield curve flattened). Second, several bond holdings were advance refunded during the period, which also proved advantageous. When bonds are refunded ahead of their maturity date, they generally rise sharply in value. Finally, it is worth noting that the Fund's relatively neutral status in terms of duration (a measure of interest rate sensitivity) provided an incremental advantage versus our peers that had taken a more severe bias in terms of the direction of interest rates. Overall, interest rates were volatile but little changed over the course of the period.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Stock (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of dividends, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Stock can vary significantly from total investment returns based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?

We maintained the Fund's fully invested stance and relatively neutral posture on interest rate risk. In terms of specific portfolio activity during the period, we sold some recently advance refunded positions, as their book yields were not significantly above current market yields, and moved into higher-yielding current issues. In doing so, we focused on bonds that could be advance refunded in the future, primarily premium-coupon, high-quality bonds in the 15-year to 20-year maturity range, which would allow us to replicate the same types of trades again (that is, sell bonds with lower yields in exchange for bonds with higher yields as the curve steepens).

The Fund has the ability to invest in bonds that are not insured, and we made use of that uninsured basket in an effort to enhance yield in the portfolio. Of course, "uninsured" does not necessarily mean substantially lower quality. In many cases, uninsured bonds are AAA-rated due to other types of enhancements. As such, our use of the uninsured basket did not translate into a meaningful drop in the Fund's credit quality.

8 SEMI-ANNUAL REPORTS

APRIL 30, 2007

We had ample opportunity to add single-family housing bonds and health care-related issues to the portfolio given heavy issuance in the two sectors during the period. In both cases, yields were more attractive than they had been in the past couple of years. The single-family housing bonds are generally rated AA or AAA, even without insurance. In the health care sector, we primarily found opportunities in A-rated and AA-rated hospital issues. So, again, we were able to take advantage without a huge sacrifice in terms of credit quality.

For the six-month period ended April 30, 2007, the Fund's Auction Market Preferred Stock had average yields of 3.67% for Series A, 3.55% for Series B, 3.53% for Series C, 3.61% for Series D and 3.55% for Series E. The Fed kept its target interest rate unchanged during the six-month period at 5.25%. As such, the Fund's borrowing costs remained relatively stable. Importantly, the municipal yield curve maintained its positive slope, particularly compared to the Treasury curve, and continued to generate an income benefit to the Common Stock shareholder from the leveraging of Preferred Stock. As always, should the spread between short-term and long-term interest rates narrow, the benefits of leveraging will decline and, as a result, reduce the yield available to the Common Stock shareholder. (For a more complete explanation of the benefits and risks of leveraging, see page 11 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

The Fund ended the period in a neutral position with respect to interest rate risk. We believe this is the appropriate posture with the Fed on hold and given the historical flatness of the yield curve. We will look for a steepening of the yield curve to provide attractive investment opportunities for the portfolio. In particular, we believe the 15-year to 20-year area of the curve could offer strong relative performance in the future.

The Fund was fully invested at period-end, reflecting our efforts to enhance tax-free income for our shareholders. Overall, we maintain our focus on providing shareholders with a competitive yield and preservation of net asset value within the context of a high-quality portfolio.

BlackRock MuniYield Quality Fund II, Inc.

How did the Fund perform during the period?

For the six-month period ended April 30, 2007, the Common Stock of BlackRock MuniYield Quality Fund II, Inc. had net annualized yields of 4.46% and 4.77%, based on a period-end per share net asset value of \$13.55 and a per share market price of \$12.67, respectively, and \$.300 per share income dividends. Over the same period, the total investment return on the Fund's Common Stock was +1.76%, based on a change in per share net asset value from \$13.64 to \$13.55, and assuming reinvestment of all distributions.

The Fund's total return, based on net asset value, outpaced the +1.46% average return of the Lipper Insured Municipal Debt Funds (Leveraged) category for the six-month period. (Funds in this Lipper category invest primarily in municipal debt issues insured as to timely payment. These funds can be leveraged via use of debt, preferred equity and/or reverse repurchase agreements.)

The Fund's positive performance is primarily attributed to two factors. First, in prior periods, we had focused on investing further out along the municipal yield curve, a strategy that continued to benefit performance as longer-dated bonds outperformed issues with shorter maturities during this period (that is, the yield curve flattened). Second, several bond holdings were advance refunded during the period, which also proved advantageous. When bonds are refunded ahead of their maturity date, they generally rise sharply in value. Finally, it is worth noting that the Fund's relatively neutral status in terms of duration (a measure of interest rate sensitivity) provided an incremental advantage versus our peers that had taken a more severe bias in terms of the direction of interest rates. Overall, interest rates were volatile but little changed over the course of the period.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Stock (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of distributions, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Stock can vary significantly from total investment returns based on changes in the Fund's net asset value.

10 SEMI-ANNUAL REPORTS

APRIL 30, 2007

The Benefits and Risks of Leveraging

The Funds utilize leveraging to seek to enhance the yield and net asset value of their Common Stock. However, these objectives cannot be achieved in all interest rate environments. To leverage, each Fund issues Preferred Stock, which pays dividends at prevailing short-term interest rates, and invests the proceeds in long-term municipal bonds. The interest earned on these investments, net of dividends to Preferred Stock, is paid to Common Stock shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share net asset value of each Fund's Common Stock. However, in order to benefit Common Stock shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. At the same time, a period of generally declining interest rates will benefit Common Stock shareholders. If either of these conditions change, then the risks of leveraging will begin to outweigh the benefits.

To illustrate these concepts, assume a fund's Common Stock capitalization of \$100 million and the issuance of Preferred Stock for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are approximately 3% and long-term interest rates are approximately 6%, the yield curve has a strongly positive slope. The fund pays dividends on the \$50 million of Preferred Stock based on the lower short-term interest rates. At the same time, the fund's total portfolio of \$150 million earns the income based on long-term interest rates.

In this case, the dividends paid to Preferred Stock shareholders are significantly lower than the income earned on the fund's long-term investments, and therefore the Common Stock shareholders are the beneficiaries of the incremental yield. However, if short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental yield pickup on the Common Stock will be reduced or eliminated completely. At the same time, the market value of the fund's Common Stock (that is, its price as listed on the New York Stock Exchange) may, as a result, decline. Furthermore, if long-term interest rates rise, the Common Stock's net asset value will reflect the full decline in the price of the portfolio's investments, since the value of the fund's Preferred Stock does not fluctuate. In addition to the decline in net asset value, the market value of the fund's Common Stock may also decline.

As of April 30, 2007, BlackRock MuniYield Fund, Inc., BlackRock MuniYield Insured Fund, Inc., BlackRock MuniYield Quality Fund, Inc. and BlackRock MuniYield Quality Fund II, Inc. had leverage amounts, due to Auction Market Preferred Stock, of 33.85%, 35.75%, 35.07% and 34.55% of total net assets, respectively, before the deduction of Preferred Stock.

As a part of their investment strategy, the Funds may invest in certain securities whose potential income return is inversely related to changes in a floating interest rate ("inverse floaters"). In general, income on inverse floaters will decrease when short-term interest rates increase and increase when short-term interest rates decrease. Investments in inverse floaters may be

characterized as derivative securities and may subject the Funds to the risks of reduced or eliminated interest payments and losses of invested principal. In addition, inverse floaters have the effect of providing investment leverage and, as a result, the market value of such securities will generally be more volatile than that of fixed rate, tax-exempt securities. To the extent the Funds invest in inverse floaters, the market value of each Fund's portfolio and the net asset value of each Fund's shares may also be more volatile than if the Funds did not invest in these securities.

#### Swap Agreements

The Funds may invest in swap agreements, which are over-the-counter contracts in which one party agrees to make periodic payments based on the change in market value of a specified bond, basket of bonds, or index in return for periodic payments based on a fixed or variable interest rate or the change in market value of a different bond, basket of bonds or index. Swap agreements may be used to obtain exposure to a bond or market without owning or taking physical custody of securities. Swap agreements involve the risk that the party with whom each Fund has entered into a swap will default on its obligation to pay the Fund and the risk that the Fund will not be able to meet its obligations to pay the other party to the agreement.

Gross unrealized appreciation	\$ 57,719 (1,399)
Net unrealized appreciation	\$ 56,320

- (a) AMBAC Insured.
- (b) Assured Guaranty Insured.
- (c) CIFG Insured.
- (d) FGIC Insured.
- (e) FHA Insured.
- (f) FNMA Collateralized.
- (g) FSA Insured.
- (h) GNMA Collateralized.
- (i) MBIA Insured.
- (j) Prerefunded.
- (k) Radian Insured.
- (1) Investments in companies considered to be an affiliate of the Fund, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

Affiliate	Net Activity	Dividend Income
Merrill Lynch Institutional Tax-Exempt Fund	(6,110)	\$120

- (m) Represents a zero coupon bond; the interest rate shown reflects the effective yield at the time of purchase.
- (n) Security may have a maturity of more than one year at time of issuance, but has variable rate and demand features that qualify it as a short-term security. The rate disclosed is that currently in effect. This rate changes periodically based upon prevailing market rates.
- (o) Securities represent underlying bonds transferred to a separate securitization trust established in a tender option bond transaction in which the Fund may have acquired the residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1(c) to Financial Statements for details of Municipal Bonds Held in Trust.
- (p) XL Capital Insured.
- (q) Represents the current yield as of April 30, 2007.

See Notes to Financial Statements.

Schedule of Investments (concluded)

BlackRock MuniYield Quality Fund, Inc. (in Thousands)

\* The cost and unrealized appreciation (depreciation) of investments as of April 30, 2007, as computed for federal income tax purposes, were as follows:

	===	
Net unrealized appreciation	\$	33,959
Gross unrealized depreciation		(196)
Gross unrealized appreciation	\$	34,155
	===	
Aggregate Cost	\$ (	676 <b>,</b> 026

- (a) AMBAC Insured.
- (b) XL Capital Insured.
- (c) Escrowed to maturity.
- (d) FGIC Insured.
- (e) Assured Guaranty Insured.
- (f) FSA Insured.
- (g) MBIA Insured.
- (h) Prerefunded.
- (i) The rate disclosed is that currently in effect. This rate changes periodically and inversely based upon prevailing market rates.
- (j) Radian Insured.
- (k) CIFG Insured.
- (1) Investments in companies considered to be an affiliate of the Fund, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

	Net	Dividend	
Affiliate	Activity	Income	
Merrill Lynch Institutional Tax-Exempt Fund	(3,701)	\$87	

(m) Securities represent underlying bonds transferred to a separate securitization trust established in a tender option bond transaction in which the Fund may have acquired the residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1(c)

to Financial Statements for details of Municipal Bonds Held in Trust.

- (n) Represents a step or zero coupon bond; the interest rate shown reflects the effective yield at the time of purchase.
- (o) FNMA/GNMA Collateralized.
- (p) FHLMC Collateralized.
- (q) Represents the current yield as of April 30, 2007.
- (r) These securities are short-term floating rate certificates issued by tender option bond trusts and are secured by the underlying municipal bond securities.
- o Forward interest rate swaps outstanding as of April 30, 2007 were as follows:

See Notes to Financial Statements.

44 SEMI-ANNUAL REPORTS APRIL 30, 2007

Notes to Financial Statements (Unaudited)

1. Significant Accounting Policies:

BlackRock MuniYield Fund, Inc., BlackRock MuniYield Insured Fund, Inc., BlackRock MuniYield Quality Fund, Inc. and BlackRock MuniYield Quality Fund II, Inc. (the "Funds" or individually as the "Fund"), are registered under the Investment Company Act of 1940, as amended, as non-diversified, closed-end management investment companies. The Funds' financial statements are prepared in conformity with U.S. generally accepted accounting principles, which may require the use of management accruals and estimates. Actual results may differ from these estimates. These unaudited financial statements reflect all adjustments, which are, in the opinion of management, necessary to present a fair statement of the results for the interim period. All such adjustments are of a normal, recurring nature. The Funds determine and make available for publication the net asset value of their Common Stock on a daily basis. The Funds' Common Stock shares are listed on the New York Stock Exchange under the symbol MYD for BlackRock MuniYield Fund, Inc., MYI for BlackRock MuniYield Insured Fund, Inc., MQY for BlackRock MuniYield Quality Fund, Inc. and MQT for BlackRock MuniYield Quality Fund II, Inc. The following is a summary of significant accounting policies followed by the Funds.

- (a) Valuation of investments -- Municipal bonds are traded primarily in the over-the-counter ("OTC") markets and are valued at the last available bid price in the OTC market or on the basis of values as obtained by a pricing service. Pricing services use valuation matrixes that incorporate both dealer-supplied valuations and valuation models. The procedures of the pricing service and its valuations are reviewed by the officers of each of the Funds under the general direction of the respective Board of Directors. Such valuations and procedures are reviewed periodically by the Boards of Directors of the Funds. Financial futures contracts and options thereon, which are traded on exchanges, are valued at their closing prices as of the close of such exchanges. Options written or purchased are valued at the last sale price in the case of exchange-traded options. Options traded in the OTC market are valued at the last asked price (options written) or the last bid price (options purchased). Swap agreements are valued by quoted fair values received daily by the Funds' pricing service. Short-term investments with a remaining maturity of 60 days or less are valued at amortized cost, which approximates market value, under which method the investment is valued at cost and any premium or discount is amortized on a straight line basis to maturity. Effective April 2, 2007, short-term securities purchased with a maturity of greater than 60 days may be valued at amortized cost. Investments in open-end investment companies are valued at their net asset value each business day. Securities and other assets for which market quotations are not readily available are valued at fair value as determined in good faith by or under the direction of each Fund's Board of Directors.
- (b) Derivative financial instruments Each Fund may engage in various portfolio investment strategies both to increase the return of the Fund and to hedge, or protect, its exposure to interest rate movements and movements in the securities markets. Losses may arise due to changes in the value of the contract due to an unfavorable change in the price of the underlying security or if the counterparty does not perform under the contract. The counterparty for certain instruments may pledge cash or securities as collateral.
- o Financial futures contracts -- Each Fund may purchase or sell financial futures contracts and options on such financial futures contracts. Financial futures contracts are contracts for delayed delivery of securities at a specific future date and at a specific price or yield. Upon entering into a contract, the Fund deposits and maintains as collateral such initial margin as required by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or

loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

Options -- Each Fund may purchase and write call and put options. When the Fund writes an option, an amount equal to the premium received by the Fund is reflected as an asset and an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. When a security is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of the security acquired or deducted from (or added to) the proceeds of the security sold. When an option expires (or the Fund enters into a closing transaction), the Fund realizes a gain or loss on the option to the extent of the premiums received or paid (or gain or loss to the extent the cost of the closing transaction exceeds the premium paid or received).

Written and purchased options are non-income producing investments.

SEMI-ANNUAL REPORTS

APRIL 30, 2007

45

Notes to Financial Statements (continued)

- Forward interest rate swaps -- Each Fund may enter into forward interest rate swaps. In a forward interest rate swap, the Fund and the counterparty agree to make periodic net payments on a specified notional contract amount, commencing on a specified future effective date, unless terminated earlier. When the agreement is closed, the Fund records a realized gain or loss in an amount equal to the value of the agreement.
- Swaps -- Each Fund may enter into swap agreements, which are OTC contracts in which the Fund and a counterparty agree to make periodic net payments on a specified notional amount. The net payments can be made for a set period of time or may be triggered by a predetermined credit event. The net periodic payments may be based on a fixed or variable interest rate; the change in market value of a specified security, basket of securities, or index; or the return generated by a security. These periodic payments received or made by the Fund are recorded in the accompanying Statement of Operations as realized gains or losses, respectively. Gains or losses are also realized upon termination of the swap agreements. Swaps are marked-to-market daily and changes in value are recorded as unrealized appreciation (depreciation). Risks include changes in the returns of the underlying instruments, failure of the counterparties to perform under the contracts' terms and the possible lack of liquidity with respect to the swap agreements.
- (c) Municipal bonds held in trust -- Certain Funds invest in leveraged residual certificates ("TOB Residuals") issued by tender option bond trusts ("TOBs"). A TOB is established by a third party sponsor forming a special purpose entity, into which a Fund, or an agent on behalf of the Fund, transfers municipal securities. A TOB typically issues two classes of beneficial interests: short-term floating rate certificates, which are sold to third party investors, and residual certificates, which are generally issued to the Fund which made the transfer or to affiliates of the Fund. Each Fund's transfers of the municipal securities to a TOB do not qualify for sale treatment under Statement of Financial Accounting Standards No. 140 "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities," therefore the municipal securities deposited into a TOB are presented in the Funds' schedules of investments and the proceeds from the transactions are reported as liability for trust certificates. Similarly, proceeds from residual certificates issued to affiliates, if any, from the transaction are included in the liability for trust

certificates. Interest income from the underlying security is recorded by the Funds on an accrual basis. Interest expense incurred on the secured borrowing and other expenses related to remarketing, administration and trustee services to a TOB are reported as expenses of a Fund. The floating rate certificates have interest rates that generally reset weekly and their holders have the option to tender certificates to the TOB for redemption at par at each reset date. The residual interests held by the Funds include the right of the Funds (1) to cause the holders of a proportional share of floating rate certificates to tender their certificates at par, and (2) to transfer a corresponding share of the municipal securities from the TOB to the Funds. At April 30, 2007, the aggregate value of the underlying municipal securities transferred to TOBs and the liability for trust certificates were:

	Liability	Range of	Underlying Municipal Bonds
	for Trust Certificates	Interest Rates	Transferred to TOBs
BlackRock MuniYield			
Fund, Inc BlackRock MuniYield Insured	\$ 36,112,500	3.95% - 3.98%	\$ 77,803,233
Fund, Inc BlackRock MuniYield Quality	\$182,665,000	3.92% - 4.02%	\$390,354,034
Fund, Inc BlackRock MuniYield Quality	\$ 79,897,914	3.95% - 4.02%	\$169,499,155
Fund II, Inc	\$ 50,510,000	3.91% - 4.02%	\$106,455,776

Financial transactions executed through TOBs generally will underperform the market for fixed rate municipal bonds in a rising interest rate environment, but tend to outperform the market for fixed rate bonds when interest rates decline or remain relatively stable. Should short-term interest rates rise, a Fund's investments in TOB Residuals likely will adversely affect a Fund's investment income — net and distributions to shareholders. Fluctuations in the market value of municipal securities deposited into the TOB may adversely affect the Funds' net asset values per share.

While the Funds' investment policies and restrictions expressly permit investments in inverse floating rate securities such as TOB Residuals, they generally do not allow the Funds to borrow money for purposes of making investments. The Funds' management believes that the Funds' restrictions on borrowings do not apply to the secured borrowings deemed to have occurred for accounting purposes.

(d) Income taxes -- It is each Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substan-

46 SEMI-ANNUAL REPORTS APRIL 30, 2007

Notes to Financial Statements (continued)

tially all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

(e) Security transactions and investment income -- Security transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on security transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend dates.

Interest income is recognized on the accrual basis. The Funds amortize all premiums and discounts on debt securities.

- (f) Dividends and distributions -- Dividends from net investment income are declared and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates.
- (g) Offering costs -- Direct expenses relating to the public offering of each Fund's Preferred Stock were charged to capital at the time of issuance of the shares. Any adjustments to estimates of offering costs were recorded back to capital.
- (h) Recent accounting pronouncements -- In July 2006, the Financial Accounting Standards Board ("FASB") issued Interpretation No. 48 ("FIN 48"), "Accounting for Uncertainty in Income Taxes -- an interpretation of FASB Statement No. 109." FIN 48 prescribes the minimum recognition threshold a tax position must meet in connection with accounting for uncertainties in income tax positions taken or expected to be taken by an entity, including mutual funds, before being measured and recognized in the financial statements. Adoption of FIN 48 is required for the last net asset value calculation in the first required financial statement reporting period for fiscal years beginning after December 15, 2006. The impact on each of the Fund's financial statements, if any, is currently being assessed.

In September 2006, "Statement of Financial Accounting Standards No. 157, Fair Value Measurements" ("FAS 157"), was issued and is effective for fiscal years beginning after November 15, 2007. FAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. At this time, management is evaluating the implications of FAS 157 and its impact on each of the Fund's financial statements, if any, has not been determined.

In addition, in February 2007, FASB issued "Statement of Financial Accounting Standards No. 159, The Fair Value Option for Financial Assets and Financial Liabilities" ("FAS 159"), which is effective for fiscal years beginning after November 15, 2007. Early adoption is permitted as of the beginning of a fiscal year that begins on or before November 15, 2007, provided the entity also elects to apply the provisions of FAS 157. FAS 159 permits entities to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. FAS 159 also establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. At this time, management is evaluating the implications of FAS 159 and its impact on each of the Fund's financial statements, if any, has not been determined.

2. Investment Advisory Agreement and Transactions with Affiliates:

The Investment Advisory Agreement between each Fund and BlackRock Advisors, LLC (the "Manager"), an indirect, wholly owned subsidiary of BlackRock, Inc. became effective on September 29, 2006. Prior to September 29, 2006, Fund Asset Management, L.P. ("FAM") was the Funds' manager. The general partner of FAM is Princeton Services, Inc. ("PSI"), an indirect, wholly owned subsidiary of Merrill Lynch & Co., Inc. ("Merrill Lynch"), which is the limited partner. Merrill Lynch and The PNC Financial Services Group, Inc. are principal owners of BlackRock, Inc.

The Manager is responsible for the management of each of the Fund's portfolios and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of each Fund. For such services, each Fund pays a monthly fee at an annual rate of .50% of the Fund's average daily net assets, including proceeds from the issuance of Preferred Stock. The Manager has agreed to reimburse its management fee by the amount of management fees each Fund pays to the Manager indirectly through its investment in the Black Rock Institutional Tax-Exempt Fund. The reimbursements were as follows:

For the Six
Months Ended
April 30, 2007
Reimbursement
by Manager

BlackRock MuniYield Fund, Inc. \$7,025
BlackRock MuniYield Insured Fund, Inc. \$3,459
BlackRock MuniYield Quality Fund, Inc. \$4,980
BlackRock MuniYield Quality Fund II, Inc. \$4,063

SEMI-ANNUAL REPORTS

APRIL 30, 2007

47

Notes to Financial Statements (continued)

In addition, the Manager has entered into separate sub-advisory agreements with BlackRock Investment Management, LLC, an affiliate of the Manager, with respect to each Fund, under which the Manager pays the Sub-Adviser for services it provides a fee that is a percentage of the management fee paid by each Fund to the Manager.

The Funds reimbursed the Manager for certain accounting services. The reimbursements were as follows:

Reimbursement to the Manager

BlackRock MuniYield Fund, Inc. \$ 9,813

BlackRock MuniYield Insured Fund, Inc. \$15,011

BlackRock MuniYield Quality Fund, Inc. \$ 6,885

BlackRock MuniYield Quality Fund II, Inc. \$ 4,462

Certain officers and/or directors of the Funds are officers and/or directors of BlackRock, Inc. or its affiliates.

#### 3. Investments:

Purchases and sales of investments, excluding short-term securities, for the six months ended April 30, 2007 were as follows:

	Total	Total		
	Purchases	Sales		
BlackRock MuniYield				
Fund, Inc	\$117,225,723	\$108,061,910		
BlackRock MuniYield				

Insured	Fund, Inc	\$809,963,306	\$762,862,940
BlackRock	MuniYield		
Quality	Fund, Inc	\$ 65,079,294	\$ 58,154,053
BlackRock	MuniYield		
Quality	Fund II, Inc	\$ 50,304,370	\$ 45,006,849

### 4. Stock Transactions:

Each Fund is authorized to issue 200,000,000 shares of stock, including Preferred Stock, par value \$.10 per share, all of which were initially classified as Common Stock. The Board of Directors is authorized, however, to reclassify any unissued shares of stock without approval of the holders of Common Stock.

#### Common Stock

BlackRock MuniYield Fund, Inc.

Shares issued and outstanding during the six months ended April 30, 2007 and during the year ended October 31, 2006, increased by 132,043 and 346,987, respectively, as a result of dividend reinvestment.

BlackRock MuniYield Insured Fund, Inc., BlackRock MuniYield Quality Fund, Inc. and BlackRock MuniYield Quality Fund II, Inc.

Shares issued and outstanding during the six months ended April 30, 2007 and the year ended October 31, 2006 remained constant.

#### Preferred Stock

Auction Market Preferred Stock are redeemable shares of Preferred Stock of the Funds, with a liquidation preference of \$25,000 per share, plus accrued and unpaid dividends that entitle their holders to receive cash dividends at an annual rate that may vary for the successive dividend periods. The yields in effect at April 30, 2007 were as follows:

	BlackRock MuniYield Fund, Inc.	BlackRock MuniYield Insured Fund, Inc.	BlackRock MuniYield Quality Fund, Inc.	BlackRock MuniYield Quality Fund II, Inc.
Series A	3.42%	3.65%	3.70%	3.75%
Series B	3.75%	3.70%	3.85%	3.85%
Series C	3.62%	3.62%	3.849%	3.92%
Series D	3.54%	3.56%	3.88%	3.80%
Series E	3.88%	3.86%	3.92%	
Series F	3.80%	3.80%		
Series G	3.55%	3.82%		
Series H		3.90%		
Series I		3.88%		

Shares issued and outstanding for each of the Funds during the six months ended April 30, 2007 and during the year ended October 31, 2006 remained constant.

48 SEMI-ANNUAL REPORTS APRIL 30, 2007

Notes to Financial Statements (concluded)

Each Fund pays commissions to certain broker-dealers at the end of each auction at an annual rate ranging from .25% to .375%, calculated on the proceeds of each auction. For the six months ended April 30, 2007, Merrill Lynch, Pierce, Fenner & Smith Incorporated earned commissions as follows:

Commissions

BlackRock MuniYield Fund, Inc. \$161,904

BlackRock MuniYield Insured Fund, Inc. \$223,849

BlackRock MuniYield Quality Fund, Inc. \$119,850

BlackRock MuniYield Quality Fund II, Inc. \$91,505

#### 5. Capital Loss Carryforward:

BlackRock MuniYield Fund, Inc.

At October 31, 2006, the Fund had a net capital loss carryforward of \$34,653,455, of which \$2,657,924 expires in 2007, \$25,806,020 expires in 2008, \$6,000,235 expires in 2009 and \$189,276 expires in 2010. These amounts will be available to offset like amounts of any future taxable gains.

BlackRock MuniYield Insured Fund, Inc.

At October 31, 2006, the Fund had a net capital loss carryforward of \$1,489,118, all of which expires in 2014. These amounts will be available to offset like amounts of any future taxable gains.

BlackRock MuniYield Quality Fund, Inc.

At October 31, 2006, the Fund had a net capital loss carryforward of \$1,773, all of which expires in 2012. These amounts will be available to offset like amounts of any future taxable gains.

BlackRock MuniYield Quality Fund II, Inc.

At October 31, 2006, the Fund had a net capital loss carryforward of \$32,892,456, of which \$181,057 expires in 2007, \$26,079,903 expires in 2008, \$1,096,837 expires in 2010 and \$5,534,659 expires in 2012. These amounts will be available to offset like amounts of any future taxable gains.

#### 6. Subsequent Event:

On June 1, 2007, each Fund paid a tax-exempt income dividend to holders of Common Stock of record on May 15, 2007. The amount of the tax-exempt income dividend per share was as follows:

	Per Share Amount
BlackRock MuniYield Fund, Inc	\$.068000
BlackRock MuniYield Insured Fund, Inc	\$.056000
BlackRock MuniYield Quality Fund, Inc	\$.057000
BlackRock MuniYield Quality Fund II, Inc	\$.050000

Availability of Quarterly Schedule of Investments

The Funds file their complete schedules of portfolio holdings with the

Securities and Exchange Commission ("SEC") for the first and third quarters of each fiscal year on Form N-Q. The Funds' Forms N-Q are available on the SEC's Web site at http://www.sec.gov. The Funds' Forms N-Q may also be reviewed and copied at the SEC's Public Reference Room in Washington, DC. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

BlackRock Privacy Principles

BlackRock is committed to maintaining the privacy of its current and former fund investors and individual clients (collectively, "Clients") and to safeguarding their non-public personal information. The following information is provided to

help you understand what personal information BlackRock collects, how we protect that information and why in certain cases we share such information with select parties.

If you are located in a jurisdiction where specific laws, rules or regulations require BlackRock to provide you with additional or different privacy-related rights beyond what is set forth below, then BlackRock will comply with those specific laws, rules or regulations.

BlackRock obtains or verifies personal non-public information from and about you from different sources, including the following: (i) information we receive from you or, if applicable, your financial intermediary, on applications, forms or other documents; (ii) information about your transactions with us, our affiliates, or others; (iii) information we receive from a consumer reporting agency; and (iv) from visits to our Web sites.

BlackRock does not sell or disclose to non-affiliated third parties any non-public personal information about its Clients, except as permitted by law or as is necessary to respond to regulatory requests or to service Client accounts. These non-affiliated third parties are required to protect the confidentiality and security of this information and to use it only for its intended purpose.

We may share information with our affiliates to service your account or to provide you with information about other BlackRock products or services that may be of interest to you. In addition, BlackRock restricts access to non-public personal information about its Clients to those BlackRock employees with a legitimate business need for the information. BlackRock maintains physical, electronic and procedural safeguards that are designed to protect the non-public personal information of its Clients, including procedures relating to the proper storage and disposal of such information.

#### Dividend Policy

The Funds' dividend policy is to distribute all or a portion of their net investment income to their shareholders on a monthly basis. In order to provide shareholders with a more stable level of dividend distributions, the Funds may at times pay out less than the entire amount of net investment income earned in any particular month and may at times in any month pay out such accumulated but undistributed income in addition to net investment income earned in that month. As a result, the dividends paid by the Funds for any particular month may be more or less than the amount of net investment income earned by the Funds during such month. The Funds' current accumulated but undistributed net investment income, if any, is disclosed in the Statement of Net Assets, which comprises part of the Financial Information included in this report.

#### Electronic Delivery

Electronic copies of most financial reports and prospectuses are available on the Funds' Web site. Shareholders can sign up for e-mail notifications of quarterly statements, annual and semi-annual reports and prospectuses by enrolling in the Funds' electronic delivery program.

Shareholders Who Hold Accounts with Investment Advisers, Banks or Brokerages:

SEMI-ANNUAL REPORTS

APRIL 30, 2007

51

These reports, including the financial information herein, are transmitted to

shareholders of BlackRock MuniYield Fund, Inc., BlackRock MuniYield Insured Fund, Inc., BlackRock MuniYield Quality Fund, Inc. and BlackRock MuniYield Quality Fund II, Inc. for their information. This is not a prospectus. Past performance results shown in these reports should not be considered a representation of future performance. The Funds have leveraged their Common Stock and intend to remain leveraged by issuing Preferred Stock to provide the Common Stock shareholders with potentially higher rates of return. Leverage creates risks for Common Stock shareholders, including the likelihood of greater volatility of net asset value and market price of shares of the Common Stock, and the risk that fluctuations in the short-term dividend rates of the Preferred Stock may affect the yield to Common Stock shareholders. Statements and other information herein are as dated and are subject to change.

A description of the policies and procedures that the Funds use to determine how to vote proxies relating to portfolio securities is available (1) without charge, upon request, by calling toll-free 1-800-441-7762; (2) at www.blackrock.com; and (3) on the Securities and Exchange Commission's Web site at http://www.sec.gov. Information about how the Funds voted proxies relating to securities held in the Funds' portfolios during the most recent 12-month period ended June 30 is available (1) at www.blackrock.com and (2) on the Securities and Exchange Commission's Web site at http://www.sec.gov.
