PALL CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(In thousands, except per share data)
(Unaudited)

NOTE 1 - BASIS OF PRESENTATION

The condensed consolidated financial information of Pall Corporation and its subsidiaries (hereinafter collectively called the "Company") included herein is unaudited. Such information reflects all adjustments of a normal recurring nature, which are, in the opinion of Company management, necessary to present fairly the Company's consolidated financial position, results of operations and cash flows as of the dates and for the periods presented herein. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes set forth in the Company's Annual Report on Form 10-K for the fiscal year ended July 31, 2010 ("2010 Form 10-K").

NOTE 2 - ADOPTION OF NEW ACCOUNTING PRONOUNCEMENTS

In October 2009, the Financial Accounting Standards Board issued updated guidance amending existing revenue recognition accounting pronouncements that have multiple element arrangements. This guidance requires companies to allocate revenue in arrangements involving multiple deliverables based on the estimated selling price of each deliverable, even though such deliverables are not sold separately either by the company or other vendors. This guidance eliminates the requirement that all undelivered elements must have objective and reliable evidence of fair value before a company can recognize the portion of the overall arrangement fee that is attributable to items that already have been delivered. As a result, some companies may recognize revenue on transactions that involve multiple deliverables earlier than under previously existing authoritative guidance. This new authoritative guidance is effective with the Company's first quarter of fiscal year 2011. The adoption of this authoritative guidance did not have a material impact on the Company's condensed consolidated financial statements.

NOTE 3 - BALANCE SHEET DETAILS

The following tables provide details of selected balance sheet items:

	Oct. 31, 2010	July 31, 2010
Accounts receivable:		
Billed	\$ 503,675	\$ 493,563
Unbilled	72,746	83,740
Total	576,421	577,303
Less: Allowances for doubtful accounts	(10,983)	(10,804)
	\$ 565,438	\$ 566,499

Unbilled receivables principally relate to long-term contracts recorded under the percentage-of-completion method of accounting.

	Oct. 31, 2010	July 31, 2010
Inventories:		
Raw materials and components	\$ 140,174	\$ 125,270
Work-in-process	61,006	49,290
Finished goods	253,230	240,486
	\$ 454,410	\$ 415,046

	Oct. 31, 2010	July 31, 2010
Property, plant and equipment:		
Property, plant and equipment	\$ 1,606,998	\$ 1,551,538
Less: Accumulated depreciation and amortization	(881,499)	(845,103)
	\$ 725,499	\$ 706,435

NOTE 4 - GOODWILL AND INTANGIBLE ASSETS

The following table presents goodwill, allocated by reportable segment.

	Oct. 31, 2010	July 31, 2010
Life Sciences	\$ 130,453	\$ 126,854
Industrial	158,067	156,968
	\$ 288,520	\$ 283,822

Intangible assets, net, consist of the following:

	Oct. 31, 2010		
	Gross	Accumulated Amortization	Net
Patents and unpatented technology	\$ 101,646	\$ 59,531	\$ 42,115
Customer-related intangibles	26,321	4,296	22,025
Trademarks	6,625	4,323	2,302
Other	3,562	2,178	1,384
	\$ 138,154	\$ 70,328	\$ 67,826

	July 31, 2010		
	Gross	Accumulated Amortization	Net
Patents and unpatented technology	\$ 99,825	\$ 57,210	\$ 42,615
Customer-related intangibles	26,100	3,511	22,589
Trademarks	6,438	4,196	2,242
Other	3,488	2,107	1,381
	\$ 135,851	\$ 67,024	\$ 68,827

Amortization expense for intangible assets for the three months ended October 31, 2010 and October 31, 2009 was \$3,196 and \$2,621, respectively. Amortization expense is estimated to be approximately \$9,745 for the remainder of fiscal year 2011, \$12,751 in fiscal year 2012, \$8,900 in fiscal year 2013, \$7,438 in fiscal year 2014, \$5,966 in fiscal year 2015 and \$4,805 in fiscal year 2016.

(Unaudited)

NOTE 5 - TREASURY STOCK

On November 15, 2006, the board of directors authorized an expenditure of \$250,000 to repurchase shares of the Company's common stock. On October 16, 2008, the board authorized an additional expenditure of \$350,000 to repurchase shares. The Company's shares may be purchased over time, as market and business conditions warrant. There is no time restriction on these authorizations. During the three months ended October 31, 2010, the Company purchased 576 shares in open-market transactions at an aggregate cost of \$25,000 with an average price per share of \$43.41. As of October 31, 2010, \$327,944 remains to be expended under the current board repurchase authorizations. Repurchased shares are held in treasury for use in connection with the Company's stock plans and for general corporate purposes.

During the three months ended October 31, 2010, 538 shares were issued under the Company's stock-based compensation plans. At October 31, 2010, the Company held 12,528 treasury shares.

NOTE 6 - CONTINGENCIES AND COMMITMENTS

With respect to the matters described in Note 14, Contingencies and Commitments, to the Company's consolidated financial statements included in the 2010 Form 10-K, under the heading Federal Securities Class Actions, Shareholder Derivative Lawsuits and Other Proceedings, no liabilities or related receivables for insurance recoveries have been reflected in the condensed consolidated financial statements as of October 31, 2010 as these amounts are not currently estimable.

The Company and its subsidiaries are subject to certain other legal actions that arise in the normal course of business. Other than those legal proceedings and claims discussed below and in the 2010 Form 10-K, the Company did not have any current other legal proceedings and claims that would individually or in the aggregate have a reasonably possible materially adverse affect on its financial condition or operating results. However, the results of legal proceedings cannot be predicted with certainty. If the Company failed to prevail in several of these legal matters in the same reporting period, the operating results of a particular reporting period could be materially adversely affected.

Shareholder Derivative Lawsuits:

On October 5, 2007, two plaintiffs filed identical derivative lawsuits in New York Supreme Court, Nassau County, relating to the Company's understatement of certain of its U.S. income tax payments and of its provision for income taxes in certain prior periods as described in Note 2, Audit Committee Inquiry and Restatement to the consolidated financial statements included in the 2007 Form 10-K. These actions purported to bring claims on behalf of the Company based on allegations that certain current and former directors and officers of the Company breached their fiduciary duties by failing to evaluate and otherwise inform themselves about the Company's internal controls and financial reporting systems and procedures. In addition, plaintiffs alleged that certain officers of the Company were unjustly enriched as a result of the Company's inaccurate financial results over fiscal years 1999-2006 and the first three quarters of fiscal year 2007. The complaints sought unspecified compensatory damages on behalf of the Company, disgorgement of defendants' salaries, bonuses, stock grants and stock options, equitable relief and costs and expenses. The Company, acting in its capacity as nominal defendant, moved to dismiss the complaints for failure to make a demand upon the Company's board of directors, which motions were granted on April 30 and May 2, 2008. On September 19, 2008, the same two plaintiffs filed a derivative lawsuit in New York Supreme Court, Nassau County, which was served on the Company on September 26, 2008 (the "September Derivative"). This action purports to bring claims on behalf of the Company based on allegations that certain current and former directors and officers of the Company breached their fiduciary duties and were unjustly enriched in connection with the tax matter. In addition, the plaintiffs allege that the board's refusal of their demand to commence an action against the defendants was not made in good faith. The plaintiffs and the Company agreed to stay this proceeding pending resolution of the Company's motion to dismiss in the federal securities class action lawsuit related to the tax matter after which resolution the plaintiffs and the Company agreed to confer about a schedule for the defendants' time to answer or otherwise respond to the complaint. On September 21, 2009, the U.S. District Court for the Eastern District of New York denied the Company's motion to dismiss the consolidated amended complaint in the federal securities class action lawsuit. On October 9, 2009, the Company moved for certification for interlocutory appeal in the federal securities class action lawsuit, and the Court denied the motion by Memorandum and Order entered November 25, 2009. The September Derivative is no longer stayed.

Edgar Filing: PALL CORP - Form 10-Q

PALL CORPORATION AND SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)
 (In thousands, except per share data)
 (Unaudited)

On November 13, 2008, another shareholder filed a derivative lawsuit in New York Supreme Court, Nassau County, against certain current and former directors and officers of the Company, and against the Company, as nominal defendant, which was served on the Company on December 4, 2008. This action purports to bring similar claims as the September Derivative.

Environmental Matters:

The Company's condensed consolidated balance sheet at October 31, 2010 includes liabilities for environmental matters of approximately \$11,769, which relate primarily to the previously reported environmental proceedings involving a Company subsidiary, Gelman Sciences Inc., pertaining to groundwater contamination. In the opinion of management, the Company is in substantial compliance with applicable environmental laws and its current accruals for environmental remediation are adequate. However, as regulatory standards under environmental laws are becoming increasingly stringent, there can be no assurance that future developments, additional information and experience gained will not cause the Company to incur material environmental liabilities or costs beyond those accrued in its condensed consolidated financial statements. The Company is currently in late stage negotiations with the Michigan Department of Natural Resources and Environment regarding its Comprehensive Proposal to Modify Cleanup Program that was submitted to the State of Michigan on May 4, 2009. It is reasonably possible that the results of these negotiations may result in a material increase to the Company's environmental reserves beyond those accrued in its condensed consolidated balance sheet at October 31, 2010, however, the impact is not currently estimable.

NOTE 7 - RESTRUCTURING AND OTHER CHARGES, NET

The following tables summarize the restructuring and other charges ("ROTC") recorded for the three months ended October 31, 2010 and October 31, 2009:

	Three Months Ended Oct. 31, 2010		
	Restructuring	Other	Total
	(1)	(2)

PALL CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(In thousands, except per share data)

(Unaudited)

(2) Other Charges:

Professional fees and other costs:

In the three months ended October 31, 2010 and October 31, 2009, the Company recorded legal and other professional fees related to the Federal Securities Class Actions, Shareholder Derivative Lawsuits and Other Proceedings (see Note 6, Contingencies and Commitments) which pertain to matters that had been under audit committee inquiry as discussed in Note 2, Audit Committee Inquiry and Restatement, to the consolidated financial statements included in the Company's Annual Report on Form 10-K for the fiscal year ended July 31, 2007 ("2007 Form 10-K").

Environmental matters:

In the three months ended October 31, 2009, the Company increased its previously established environmental reserve related to matters in Pinellas Park, Florida.

The following table summarizes the activity related to restructuring liabilities that were recorded in the three months ended October 31, 2010 and in fiscal years 2010 and 2009.

PALL CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(In thousands, except per share data)

(Unaudited)

NOTE 8 – INCOME TAXES

The Company's effective tax rate for the three months ended October 31, 2010 and October 31, 2009 was 26.8% and 10.5%, respectively. For the three months ended October 31, 2010, the effective tax rate varied from the U.S. federal statutory rate primarily due to the benefits of foreign operations. For the three months ended October 31, 2009, the effective tax rate varied from the U.S. federal statutory rate primarily due to the benefits of foreign operations and the resolution of a foreign tax audit.

At October 31, 2010 and July 31, 2010, the Company had gross unrecognized income tax benefits of \$236,785 and \$227,256, respectively. During the three months ended October 31, 2010, the amount of gross unrecognized income tax benefits increased by \$9,529, primarily due to tax positions taken during the current period. As of October 31, 2010, the amount of net unrecognized income tax benefits that, if recognized, would impact the effective tax rate was \$170,788.

At October 31, 2010 and July 31, 2010, the Company had accrued \$64,792 and \$62,546, respectively, for potential payment of interest and penalties. As previously disclosed in Note 2, Audit Committee Inquiry and Restatement, to the consolidated financial statements included in the 2007 Form 10-K, the actual amounts due and payable upon final settlement of the matters that are under review by taxing authorities in the U.S. and other taxing jurisdictions may differ materially from the Company's estimate. In particular, the Company may be subject to potential additional penalties that may be asserted by the U.S. and foreign taxing authorities of up to \$125,868. In determining the probability of those potential additional penalties being assessed, the Company concluded that it was not "more likely than not" that those potential additional penalties will be assessed. As a result, the Company did not recognize the potential additional penalties of up to \$125,868 in the condensed consolidated financial statements as of October 31, 2010.

Due to the potential resolution of tax examinations and the expiration of various statutes of limitations, the Company believes that it is reasonably possible that the gross amount of unrecognized income tax benefits may decrease within the next twelve months by a range of zero to \$82,622.

NOTE 9 - COMPONENTS OF NET PERIODIC PENSION COST

The Company provides substantially all domestic and foreign employees with retirement benefits. Net periodic pension benefit cost for the Company's defined benefit pension plans includes the following components:

	Three Months Ended					
	U.S. Plans		Foreign Plans		Total	
	Oct. 31, 2010	Oct. 31, 2009	Oct. 31, 2010	Oct. 31, 2009	Oct. 31, 2010	Oct. 31, 2009
Service cost	\$ 2,015	\$ 1,983	\$ 1,287	\$ 1,231	\$ 3,302	\$ 3,214
Interest cost	3,032	3,048	4,516	4,587	7,548	7,635
Expected return on plan assets	(2,203)	(2,023)	(3,512)	(3,443)	(5,715)	(5,466)

NOTE 10 - STOCK-BASED PAYMENT

The Company currently has four stock-based employee and director compensation award types (Restricted Stock Unit, Stock Option Plans, Management Stock Purchase Plan ("MSPP"), and Employee Stock Purchase Plan ("ESPP")), which are more fully described in Note 15, Common Stock, to the consolidated financial statements included in the 2010 Form 10-K.

The detailed components of stock-based compensation expense recorded in the condensed consolidated statements of earnings for the three months ended October 31, 2010 and October 31, 2009 are reflected in the table below.

	Three Months Ended	
	Oct. 31, 2010	Oct. 31, 2009
Restricted stock units	\$ 2,394	\$ 2,554
Stock options	1,010	819
ESPP	988	1,419
MSPP	1,024	936
Total	\$ 5,416	\$ 5,728

NOTE 11 - EARNINGS PER SHARE

The condensed consolidated statements of earnings present basic and diluted earnings per share. Basic earnings per share is determined by dividing income available to common shareholders by the weighted average number of common shares outstanding for the period. Diluted earnings per share considers the potential effect of dilution on basic earnings per share assuming potentially dilutive shares that meet certain criteria, such as those issuable upon exercise of stock options, were outstanding. The treasury stock method reduces the dilutive effect of potentially dilutive securities as it assumes that cash proceeds (from the issuance of potentially dilutive securities) are used to buy back shares at the average share price during the period. Employee stock options and restricted stock units aggregating 922 and 1,508 shares were not included in the computation of diluted shares for the three months ended October 31, 2010 and October 31, 2009, respectively, because their effect would have been antidilutive. The following is reconciliation between basic shares outstanding and diluted shares outstanding:

	Three Months Ended	
	Oct. 31, 2010	Oct. 31, 2009
Basic shares outstanding	116,292	117,686
Effect of stock plans	1,529	1,161
Diluted shares outstanding	117,821	118,847

NOTE 12 - FAIR VALUE MEASUREMENTS

The Company records certain of its financial assets and liabilities at fair value, which is the price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date.

The current authoritative guidance discusses valuation techniques, such as the market approach (comparable market prices), the income approach (present value of future income or cash flow), and the cost approach (cost to replace the service capacity of an asset or replacement cost). Authoritative guidance utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The following is a brief description of those three levels:

- Level 1: Use of observable inputs such as quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Use of inputs other than quoted prices included in Level 1, which are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data.
- Level 3: Use of inputs that are unobservable.

The following table presents, for each of these hierarchy levels, the Company's financial assets and liabilities that are measured at fair value on a recurring basis as of October 31, 2010:

	As of Oct. 31, 2010	Fair Value Measurements		
		Level 1	Level 2	Level 3
Financial assets carried at fair value				
Money market funds	\$ 5,277	\$ 5,277	\$ –	\$ –

(Unaudited)

The following table presents, for each of these hierarchy levels, the Company's financial assets and liabilities that are measured at fair value on a recurring basis as of July 31, 2010:

	As of Jul. 31, 2010	Fair Value Measurements		
		Level 1	Level 2	Level 3
Financial assets carried at fair value				
Money market funds	\$ 5,034	\$ 5,034	\$ –	\$ –
Available-for-sale securities:				
Equity securities	5,224	5,224	–	–
Debt securities:				
Corporate	27,676	–	27,676	–
U.S. Treasury	19,209	–	19,209	–
Other U.S. government	20,163	–	20,163	–
Municipal government	1,001	–	1,001	–
CMO/mortgage-backed	256	–	256	–
Derivative financial instruments:				
Foreign exchange forward contracts	2,166	–	2,166	–
Financial liabilities carried at fair value				
Derivative financial instruments:				
Foreign exchange forward contracts	555	–	555	–

The Company's money market funds and equity securities are valued using quoted market prices and, as such, are classified within Level 1 of the fair value hierarchy.

The fair value of the Company's investments in debt securities are valued utilizing third party pricing services. The pricing services use inputs to determine fair value which are derived from observable market sources including reportable trades, benchmark curves, credit spreads, broker/dealer quotes, bids, offers, and other industry and economic events. These investments are included in Level 2 of the fair value hierarchy.

The fair values of the Company's foreign currency forward contracts are valued using pricing models, with all significant inputs derived from or corroborated by observable market data such as yield curves, currency spot and forward rates and currency volatilities. These investments are included in Level 2 of the fair value hierarchy.

NOTE 13 – INVESTMENT SECURITIES

The following is a summary of the Company's available-for-sale investment securities by category which are classified within other non-current assets in the Company's condensed consolidated balance sheets. Contractual maturity dates of debt securities held by the trust at October 31, 2010 range from 2011 to 2044.

NOTE 14 - DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

The Company manages certain financial exposures through a risk management program that includes the use of foreign exchange derivative and nonderivative financial instruments. Derivatives are executed with counterparties with a minimum credit rating of "A" by Standard & Poors and Moody's Investor Services, in accordance with the Company's policies. The Company does not utilize derivative instruments for trading or speculative purposes.

Foreign Exchange Related:

a. Derivatives Not Designated as Hedging Instruments

The risk management objective of holding foreign exchange derivatives is to mitigate volatility to earnings and cash flows due to changes in foreign exchange rates. The Company and its subsidiaries conduct transactions in currencies other than their functional currencies. These transactions include non-functional intercompany and external sales as well as intercompany and external purchases. The Company uses foreign exchange forward contracts, matching the notional amounts and durations of the receivables and payables resulting from the aforementioned underlying foreign currency transactions, to mitigate the exposure to earnings and cash flows caused by the changes in fair value of these receivables and payables from fluctuating foreign exchange rates. The notional amount of foreign currency forward contracts entered into during the three months ended October 31, 2010 was \$461,635. The notional amount of foreign currency forward contracts outstanding as of October 31, 2010 was \$301,142.

b. Net Investment Hedges

The risk management objective of designating the Company's foreign currency loan as a hedge of a portion of its net investment in a wholly owned Japanese subsidiary is to mitigate the change in the fair value of the Company's net investment due to changes in foreign exchange rates. The Company uses a JPY loan outstanding to hedge its equity of the same amount in the Japanese wholly owned subsidiary. The hedge of net investment consists of a JPY 9 billion loan.

Interest Rate Related:

As of October 31, 2010, there are no existing interest rate related derivatives.

The fair values of the Company's derivative financial instruments included in the condensed consolidated balance sheets are presented as follows:

October 31, 2010	Asset Derivatives		Liability Derivatives

NOTE 16 - SEGMENT INFORMATION

The Company's reportable segments, which are also its operating segments, consist of the Company's Life Sciences and Industrial businesses.

As previously disclosed in the 2010 Form 10-K, the Company reorganized its operating segments during the fourth quarter of fiscal year 2010. Based on this reorganization, segment information for the first quarter of fiscal year 2010 has been restated to reflect these changes. All discussions and amounts reported in this report are based on the reorganized segment structure.

The following table presents sales and operating profit by segment reconciled to earnings before income taxes, for the three months ended October 31, 2010 and October 31, 2009.

	Three Months Ended	
	Oct. 31, 2010	Oct. 31, 2009

NOTE 17 - SUBSEQUENT EVENT

The Company has evaluated subsequent events for possible disclosure through the date the financial statements were issued. On November 30, 2010, the Company established a commercial paper program under which the Company may issue up to \$600,000 of unsecured commercial paper notes. The Company's board of directors has authorized debt financings through the issuance of commercial paper plus borrowings under the Company's revolving credit facility of up to a maximum aggregate amount outstanding at any time of \$600,000. In December 2010, the Company issued \$205,000 of notes under the commercial paper program. No amounts under the commercial paper program were outstanding as of October 31, 2010. The proceeds of the commercial paper issuances will be used for general corporate purposes, including paying down existing balances under the Company's revolving credit facility.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

Forward-Looking Statements and Risk Factors

The following discussion should be read together with the accompanying condensed consolidated financial statements and notes thereto and other financial information in this Form 10-Q and in the Pall Corporation and its subsidiaries (hereinafter collectively called the "Company") Annual Report on Form 10-K for the fiscal year ended July 31, 2010 ("2010 Form 10-K"). The discussion under the subheading "Review of Operating Segments" below is in local currency (i.e., had exchange rates not changed year over year) unless otherwise indicated. Company management considers local currency change to be an important measure because by excluding the impact of volatility of exchange rates, underlying volume change is clearer. Dollar amounts discussed below are in thousands, unless otherwise indicated, except per share dollar amounts. In addition, per share dollar amounts are discussed on a diluted basis. The Company utilizes certain estimates and assumptions that affect the reported financial information as well as to quantify the impact of various significant factors that contribute to the changes in the Company's periodic results included in the discussion below.

The matters discussed in this Quarterly Report contain "forward-looking statements" as defined in the Private Securities Litigation Reform Act of 1995. Forward-looking statements are those that address activities, events or developments that the Company or management intends, expects, projects, believes or anticipates will or may occur in the future. All statements regarding future performance, earnings projections, earnings guidance, management's expectations about its future cash needs and effective tax rate, and other future events or developments are forward-looking statements. Forward-looking statements are those that use terms such as "may," "will," "expect," "believe," "intend," "should," "could," "anticipate," "estimate," "forecast," "project," "plan," "predict," "potential," and similar expressions. Forward-looking statements contained in this and other written and oral reports are based on management's assumptions and assessments in light of past experience and trends, current conditions, expected future developments and other relevant factors.

The Company's forward-looking statements are subject to risks and uncertainties and are not guarantees of future performance, and actual results, developments and business decisions may differ materially from those envisaged by the Company's forward-looking statements. Such risks and uncertainties include, but are not limited to, those discussed in Part I-Item 1A.-Risk Factors in the 2010 Form 10-K, and other reports the Company files with the Securities and Exchange Commission, including the effect of litigation and regulatory inquiries associated with the restatement of our prior period financial statements; the impact of legislative, regulatory and political developments globally and the impact of the uncertain global economic environment and the timing and strength of a recovery in the markets and regions we serve, and the extent to which adverse economic conditions may affect our sales volume and results; demand for our products and business relationships with key customers and suppliers, which may be impacted by their cash flow and payment practices, as well as delays or cancellations in shipments; our ability to obtain regulatory approval or market acceptance of new technologies; our ability to successfully complete our business improvement initiatives, which include integrating and upgrading our information systems and the effect of a serious disruption in our information systems; fluctuations in our effective tax rate; volatility in foreign currency exchange rates, interest rates and energy costs and other macro economic challenges currently affecting us; changes in product mix, market mix and product pricing, particularly relating to the expansion of the systems business; increase in costs of manufacturing and operating costs; our ability to achieve the savings anticipated from cost reduction and gross margin improvement initiatives; the effect of the restrictive covenants in our debt facilities; our ability to enforce patents and protect proprietary products and manufacturing techniques; our ability to successfully complete or integrate any acquisitions; and the impact of pricing and other actions by competitors. Factors or events that could cause our actual results to differ may emerge from time to time, and it is not possible for the Company to predict all of them. The Company makes these statements as of the date of this disclosure and undertakes no obligation to update them, whether as a result of new information, future developments or otherwise.

Results of Operations

Review of Consolidated Results

Sales in the first quarter of fiscal year 2011 increased 10.7% to \$605,477 from \$546,939 in the first quarter of fiscal year 2010. Exchange rates used to translate foreign subsidiary results into U.S. Dollars decreased reported sales by \$7,859, primarily due to the strengthening of the U.S. Dollar against the Euro, Korean Won and British Pound, partly offset by the weakening of the U.S. Dollar against the Japanese Yen (“JPY”) and Australian Dollar. In local currency, sales increased 12.1%. Increased pricing contributed \$3,204 to overall sales in the quarter, attributable to an improvement in both the Life Sciences and Industrial segments.

Life Sciences segment sales increased 10.4% (in local currency) reflecting growth in all three markets, with sales in the BioPharmaceuticals and Food & Beverage markets particularly strong. Industrial segment sales increased 14.1% (in local currency) reflecting strong growth in the Aeropower and Microelectronics markets, partly offset by a decline in the Energy & Water market. Overall systems sales were flat as growth in the Life Sciences segment was offset by a decline in the Industrial segment. Systems sales represented 9.0% of total sales in the first quarter of fiscal year 2011 compared to 10.1% in the first quarter of fiscal year 2010. For a detailed discussion of sales, refer to the section “Review of Operating Segments” below.

Gross margin in the first quarter of fiscal year 2011 increased to 51.0% from 49.4% in the first quarter of fiscal year 2010. Key drivers of the improvement in gross margin were:

- favorable absorption of manufacturing overhead, due to increased volume and the estimated benefit of cost savings initiatives, including improved efficiency in manufacturing operations, that outpaced inflation which includes the effect of exchange rates on foreign currency denominated sourced goods primarily by the Euro-zone, contributing an estimated 120-140 basis points in margin, and
- an increase in pricing as well as the benefit of certain sales channel changes from distribution to direct, contributing an estimated 20-40 basis points in margin.

The increase in gross margin reflects improvements in both the Life Sciences and Industrial segments. For a detailed discussion of the factors impacting gross margin by segment, refer to the section “Review of Operating Segments” below.

Selling, general and administrative (“SG&A”) expenses in the first quarter of fiscal year 2011 increased by \$5,640, or 3.2% (an increase of \$8,224, or 4.7%, in local currency). SG&A (in local currency) in Life Sciences and Industrial increased, while Corporate SG&A was flat. The overall increase in SG&A (in local currency) reflects the impact of strategic and structural investments and company-wide inflationary increases in payroll and employee benefit costs. The strategic and structural investments made include:

- geographic expansion in Latin America, Middle East and Asia, primarily impacting Industrial,
- investments in information technology, impacting both Life Sciences and Industrial,
- costs related to the establishment of the European headquarters in Switzerland, primarily impacting Life Sciences, and the Asian headquarters in Singapore, primarily impacting Industrial,
- costs incurred for changes in sales channels from distribution to direct, primarily impacting Life Sciences, and
- incremental costs related to a biotechnology company that was acquired in the second quarter of fiscal year 2010.

It is estimated that these strategic and structural investments accounted for approximately 60% of the local currency increase in SG&A. As a percentage of sales, SG&A expenses were 30.1% compared to 32.3% in the first quarter of fiscal year 2010 reflecting the leverage of an increasing sales base. For a detailed discussion of SG&A by segment, refer to the section “Review of Operating Segments” below.

Research and development (“R&D”) expenses were \$20,169 in the first quarter of fiscal year 2011 compared to \$17,249 in the first quarter of fiscal year 2010, an increase of \$2,920, or 16.9% (\$3,213, or 18.6% in local currency). The increase in R&D was primarily driven by increased spending in the Life Sciences segment. As a percentage of sales, R&D expenses were 3.3% compared to 3.2% in the first quarter of fiscal year 2010. For a detailed discussion of R&D by segment, refer to the section “Review of Operating Segments” below.

Edgar Filing: PALL CORP - Form 10-Q

In the first quarter of fiscal year 2011, the Company recorded restructuring and other charges (“ROTC”) of \$1,409. ROTC in the quarter was primarily comprised of professional fees and other costs related to the Company’s cost reduction initiatives. In the first quarter of fiscal year 2010, the Company recorded ROTC of \$4,057. ROTC in the quarter was primarily comprised of severance, professional fees and other costs related to the Company’s cost reduction initiatives.

The details of ROTC for the three months ended October 31, 2010 and October 31, 2009 as well as the activity related to restructuring liabilities that were recorded in the three months ended October 31, 2010 and in fiscal years 2010 and 2009 can be found in Note 7, Restructuring and Other Charges, Net, to the accompanying condensed consolidated financial statements.

Earnings before interest and income taxes (“EBIT”) were \$104,797 in the first quarter of fiscal year 2011 compared to \$72,234 in the first quarter of fiscal year 2010. The impact of foreign currency translation on EBIT was immaterial. As a percentage of sales, EBIT were 17.3% compared to 13.2% in the first quarter of fiscal year 2010.

Net interest expense in the first quarter of fiscal year 2011 was \$7,294 compared to net interest income of \$2,606 in the first quarter of fiscal year 2010. Net interest income in the first quarter of fiscal year 2010 reflects the reversal of \$8,984 of accrued interest primarily related to the resolution of a foreign tax audit. Excluding this item, net interest expense increased \$916 compared to the first quarter of fiscal year 2010, primarily driven by an increase in interest rates as well as debt levels.

In the first quarter of fiscal year 2011, the Company’s effective tax rate was 26.8% as compared to 10.5% in the first quarter of fiscal year 2010. The effective tax rate in the first quarter of fiscal year 2010 reflects the favorable resolution of a foreign tax audit. Excluding this item, the effective tax rate in the first quarter of fiscal year 2010 would have been 31.3%. The decrease in the effective tax rate to 26.8% in the first quarter of fiscal year 2011 is primarily driven by tax benefits associated with the establishment of the Company’s European headquarters. For the three months ended October 31, 2010, the effective tax rate varied from the U.S. federal statutory rate primarily due to the benefits of foreign operations. The Company expects its effective tax rate to be approximately 27% for fiscal year 2011, exclusive of the impact of discrete items in future periods. The actual effective tax rate for the full fiscal year 2011 may differ materially based on several factors, including the geographical mix of earnings in tax jurisdictions, enacted tax laws, the resolution of tax audits, the timing and amount of foreign dividends, state and local taxes, the ratio of permanent items to pretax book income, and the implementation of various global tax strategies, as well as other factors.

Net earnings in the first quarter of fiscal year 2011 were \$71,409, or 61 cents per share, compared with net earnings of \$66,983, or 56 cents per share in the first quarter of fiscal year 2010. In summary, the increase in net earnings and earnings per share reflect the increase in EBIT partly offset by increases in net interest expense and the effective tax rate. Company management estimates that foreign currency translation did not have a material impact on earnings per share in the first quarter of fiscal year 2011.

Edgar Filing: PALL CORP - Form 10-Q

Review of Operating Segments

The following table presents sales and operating profit by segment, reconciled to earnings before income taxes, for the three months ended October 31, 2010 and October 31, 2009.

	Oct. 31, 2010	%	Oct. 31, 2009	%	%
		Margin		Margin	Change
SALES:					
Life Sciences	\$ 311,580		\$ 288,127		8.1
Industrial	293,897		258,812		13.6

Edgar Filing: PALL CORP - Form 10-Q

Life Sciences segment sales increased 10.4% in the first quarter of fiscal year 2011 compared to the first quarter of fiscal year 2010. The increase in sales reflects growth in consumables and systems sales of 10.2% and 13.4%, respectively. Increased pricing (driven by the BioPharmaceuticals and Food & Beverage markets) contributed \$2,314, or 0.8%, to overall sales growth in the quarter and, as such, the volume increase was 9.6%. Life Sciences sales represented approximately 51% of total sales in the first quarter of fiscal year 2011 compared to 53% in the first quarter of fiscal year 2010.

Sales in the BioPharmaceuticals market, which is comprised of two submarket groupings (Pharmaceuticals and Laboratory) increased 14.6%. The sales results by the submarkets that comprise BioPharmaceuticals are discussed below:

- Sales in the Pharmaceuticals submarket, which represented approximately 44% of total Life Sciences sales, increased 14.6% in the first quarter of fiscal year 2011 compared to the first quarter of fiscal year 2010, with all geographies contributing. Consumables sales increased 13.5%, while systems sales grew 30.3%. The sales results in all geographies reflect overall growth in the pharmaceuticals marketplace. The biotech and plasma sectors were strong, while the vaccines sector was essentially flat. The Western Hemisphere also benefited from a change in route to market (from distributor to direct). In addition to growth in emerging markets of India and Korea and strong sales in Japan, Asia also benefited from strong growth in China as drug producers are increasingly adopting Federal Drug Administration manufacturing standards to facilitate exporting their products to the U.S. and Europe.
- Sales in the Laboratory submarket, which represented less than 10% of Life Sciences sales, grew 14.0% with all geographies contributing. The growth in this submarket was driven by increased end-user demand, fueled by underlying growth in the pharmaceutical marketplace, and customer restocking of inventory.

Sales in the Medical market, which is comprised of blood filtration product sales and other infection and patient protection products sold to hospitals, original equipment manufacturers (“OEM”) and cell therapy developers, increased 4.9% in the first quarter of fiscal year 2011 compared to the first quarter of fiscal year 2010. OEM sales, which represented less than 10% of total Life Sciences sales, increased 18.8% driven by strong growth in Europe. The growth in Europe reflects customer restocking of inventory, timing of shipments, and the impact of new business wins. Sales of blood filtration products, which represented approximately 17% of total Life Sciences sales, increased 1.1%. The growth in blood filtration sales was driven by the U.S., reflecting new product conversions at certain customers and increased sales to independent blood centers related to increased market share, and Asia, reflecting growth in China and Korea. These increases were partly offset by reduced blood collections in the U.K.. Sales to Hospitals, which represented less than 10% of total Life Sciences sales, increased 1.5% driven by an increase in point of use water filter sales in the Western Hemisphere and Europe.

Sales in the Food & Beverage market increased 8.9% reflecting double-digit growth in the Western Hemisphere and Asia, accompanied by mid single digit growth in Europe, the Company’s largest Food & Beverage region. The growth in the quarter was primarily driven by increased sales to the wine, spirits, bottled water and soft drink sectors due in part to improving market conditions, growth in emerging markets, new market applications and increased market share. Sales to the beer marketplace were flat as growth in Asia and Latin America were offset by continued weakness in Europe.

Life Sciences gross margin in the first quarter of fiscal year 2011 increased 40 basis points to 54.5% from 54.1% in the first quarter of fiscal year 2010. Key drivers of the improvement in gross margin were:

- an increase in pricing, as well as the benefit of certain sales channel changes from distribution to direct, contributing an estimated 20-30 basis points in margin, and
- favorable absorption of manufacturing overhead, due to increased volume and the estimated benefit of cost savings initiatives, including improved efficiency in manufacturing operations, that outpaced inflation which includes the effect of exchange rates on foreign currency denominated sourced goods primarily in the Euro-zone, contributing an estimated 10-20 basis points in margin.

SG&A expenses in the first quarter of fiscal year 2011 increased by \$2,821, or 3.5% (an increase of \$4,724, or 5.9% in local currency), compared to the first quarter of fiscal year 2010. The increase in SG&A in local currency principally reflects the impact of strategic and structural investments and inflationary increases in payroll and employee benefit costs. It is estimated that these strategic and structural investments accounted for approximately 60% of the local currency increase in SG&A. SG&A as a percentage of sales decreased to 26.8% from 28.0% in the first quarter of fiscal year 2010, reflecting the leverage of the increase in sales.

Edgar Filing: PALL CORP - Form 10-Q

R&D expenses were \$13,257 compared to \$10,614 in the first quarter of fiscal year 2010, an increase of \$2,643, or 24.9% (\$2,934, or 27.6% in local currency). The increase in R&D expenses reflects increased headcount as well as expenses to support projects in the Medical and BioPharmaceuticals markets. As a percentage of sales, R&D expenses were 4.3% compared to 3.7% in the first quarter of fiscal year 2010.

Operating profit dollars in the first quarter of fiscal year 2011 were \$73,188, an increase of \$8,634, or 13.4% (\$9,694, or 15.0% in local currency) compared to the first quarter of fiscal year 2010. Operating margin improved to 23.5% from 22.4% in the first quarter of fiscal year 2010.

Industrial:

Presented below are summary Statements of Operating Profit for the Industrial segment for the three months ended October 31, 2010 and October 31, 2009:

	Oct. 31, 2010	% of Sales	Oct. 31, 2009	% of Sales
Sales	\$ 293,897		\$ 258,812	
Cost of sales	155,143	52.8	144,435	55.8
Gross margin	138,754	47.2	114,377	44.2
SG&A	86,503	29.4	83,558	32.3
R&D	6,912	2.4	6,635	2.6
Operating profit	\$ 45,339	15.4	\$ 24,184	9.3

The tables below present sales by market and geography within the Industrial segment for the three months ended October 31, 2010 and October 31, 2009, including the effect of exchange rates for comparative purposes.

	Oct. 31, 2010	Oct. 31, 2009	% Change	Exchange Rate Impact	% Change in Local Currency
By Market					
Aerpower	\$ 116,549	\$ 95,019	22.7	\$ (1,630)	24.4
Energy & Water	102,393	107,244	(4.5)	(1,520)	(3.1)
Microelectronics	74,955	56,549	32.5	1,799	29.4
Total Industrial	\$ 293,897	\$ 258,812	13.6	\$ (1,351)	14.1
By Geography					
Western Hemisphere	\$ 100,468	\$ 72,098	39.3	\$ 188	39.1
Europe	81,681	82,974	(1.6)	(5,747)	5.4
Asia	111,748	103,740	7.7	4,208	3.7
Total Industrial	\$ 293,897	\$ 258,812	13.6	\$ (1,351)	14.1

Industrial segment sales increased 14.1% in the first quarter of fiscal year 2011, reflecting strong growth in the Aerpower and Microelectronics markets, partly offset by a decline in the Energy & Water market. Consumables sales grew 17.8% with all markets contributing, while systems sales decreased 5.5% related to a decline in the Energy & Water market. Increased pricing contributed \$890, or 0.3%, to overall sales growth in the quarter and, as such, the volume increase was 13.8%. Industrial sales represented approximately 49% of total sales in the first quarter of fiscal year 2011 compared to 47% in the first quarter of fiscal year 2010.

The Aerpower market is comprised of sales of air, water, lubrication, fuel and machinery and hydraulic protection products to OEM manufacturers and end-user customers in Military and Commercial Aerospace as well as in the Machinery & Equipment submarkets, which

Edgar Filing: PALL CORP - Form 10-Q

consist of a grouping of producers of mobile equipment and trucks, pulp and paper, mining, automotive and metals. The sales results by the submarkets that comprise Aeropower are discussed below:

- Sales to the Military Aerospace submarket, which represented less than 10% of total Industrial sales, increased 6.3% reflecting increased shipments of spares to the U.S. government in the Western Hemisphere.

Edgar Filing: PALL CORP - Form 10-Q

- Sales to the Commercial Aerospace submarket, which represented less than 10% of total Industrial sales, increased 27.3%, with all geographies contributing to the growth. The growth in Commercial Aerospace sales was primarily driven by restocking of inventory for airline support as well as by the impact of modest increases in aircraft build rates.
- Sales in the Machinery & Equipment submarkets, which represented approximately 22% of total Industrial sales, increased 32.3%, with all geographies contributing to the growth. The increase in Machinery & Equipment sales was driven by growth in the mining and primary metals sectors as well as an increase in OEM in-plant activities related to increased demand for manufacturing capacity. Furthermore, the Western Hemisphere benefited from an increase in sales to mobile OEM customers (construction and mining) as they increased their build rates to meet demand.

Sales in the Energy & Water market, which is comprised of three submarkets; Fuels & Chemicals, Municipal Water, and Power Generation, declined 3.1%. The sales results by submarket are discussed below:

- Sales in the Fuels & Chemicals submarket, which represented approximately 19% of total Industrial sales, were down 12.7% reflecting a decline in Asia, partly offset by increases in the Western Hemisphere and Europe. Consumables sales increased 10.7%, while systems sales declined 63.5%. The decline in Asia primarily reflects large systems sales in the first quarter of fiscal year 2010 in the oil and gas sector for treatment of coal seam methane produced water, which did not repeat in the quarter. Furthermore, the decline in Asia reflects weakness in the electronics-grade chemical marketplace. The growth in the Western Hemisphere and Europe reflects an increase in aftermarket and capital goods sales driven by strength in the chemical, polymer and oil and gas sectors.
- Municipal Water submarket sales, which represented less than 10% of total Industrial sales, increased 11.3%. Sales in the Western Hemisphere (the Company's largest Municipal Water region) increased 25.1%, as municipalities upgraded to membrane filtration to comply with regulations of the Environmental Protection Agency. A decrease in sales in Europe of 2.1% and Asia (the smallest Municipal Water region) of 13.6% partly offset the above. The sales result in Europe reflects a decrease in Leachate sales due to a reduction in publicly funded projects related to the fiscal challenges of local governments.
- Sales in the Power Generation submarket, which represented less than 10% of total Industrial sales, increased 11.1% reflecting growth in Asia, fueled by demand in the wind-turbine market and in the Western Hemisphere, primarily driven by increased sales to energy customers for boiler feed water treatment systems. A decrease in sales in Europe, related to continued weakness in the turbo machinery sector in light of reduced demand for power, partly offset the above.

Microelectronics sales increased 29.4% reflecting double-digit growth in all geographies. Overall, the sales growth in the quarter reflects continued strength in the semiconductor marketplace as well as an increase in OEM activity in all geographies. Growth in the display market in Asia contributed to the sales increase in the quarter as well.

Industrial gross margin in the first quarter of fiscal year 2011 increased 300 basis points to 47.2% from 44.2% in the first quarter of fiscal year 2010. Key drivers of the improvement in gross margin were:

- favorable absorption of manufacturing overhead and the estimated benefit of cost savings initiatives, including improved efficiency in manufacturing operations, that outpaced inflation, contributing an estimated 260-280 basis points in margin, and
- a change in mix and improved pricing estimated to have increased gross margin percentage by 20-40 basis points.

SG&A expenses in the first quarter of fiscal year 2011 increased by \$2,945, or 3.5% (an increase of \$3,656, or 4.4% in local currency), compared to the first quarter of fiscal year 2010. The increase in SG&A in local currency principally reflects the impact of strategic and structural investments and inflationary increases (principally payroll and employee benefit costs). It is estimated that these strategic and structural investments accounted for approximately 60% of the local currency increase in SG&A. SG&A expenses as a percentage of sales decreased to 29.4% from 32.3% in the first quarter of fiscal year 2010, reflecting the leverage of the increase in sales.

R&D expenses were \$6,912 in the first quarter of fiscal year 2011 compared to \$6,635 in the first quarter of fiscal year 2010, an increase of \$277, or 4.2% (\$279, or 4.2% in local currency). As a percentage of sales, R&D expenses were 2.4%, compared to 2.6% in the first quarter of fiscal year 2010.

Edgar Filing: PALL CORP - Form 10-Q

Operating profit dollars in the first quarter of fiscal year 2011 were \$45,339, an increase of \$21,155, or 87.5% (\$20,669, or 85.5% in local currency) compared to the first quarter of fiscal year 2010. Operating margin increased to 15.4% from 9.3% in the first quarter of fiscal year 2010.

Corporate:

Corporate expenses in the first quarter of fiscal year 2011 were \$12,321 compared to \$12,447 in the first quarter of fiscal year 2010, a decrease of \$126 or 1.0% (\$155, or 1.2% in local currency). The decrease in Corporate expenses primarily reflects an increase in foreign currency transaction gains partly offset by an increase in payroll and related costs.

Liquidity and Capital Resources

Non-cash working capital, which is defined as working capital excluding cash and cash equivalents, notes receivable, notes payable and the current portion of long-term debt, was approximately \$693,700 at October 31, 2010 as compared with \$608,000 at July 31, 2010. Excluding the effect of foreign exchange (discussed below), non-cash working capital increased approximately \$60,400 compared to July 31, 2010.

The Company's balance sheet is affected by spot exchange rates used to translate local currency amounts into U.S. Dollars. In comparing spot exchange rates at October 31, 2010 to those at July 31, 2010, the Euro, the British Pound and JPY have strengthened against the U.S. Dollar. The effect of foreign currency translation increased non-cash working capital by \$25,330, including net inventory, net accounts receivable and other current assets by \$14,849, \$20,087 and \$5,531, respectively, as compared to July 31, 2010. Additionally, foreign currency translation increased accounts payable and other current liabilities by \$14,306 and increased current income taxes payable by \$831.

Net cash provided by operating activities in the first quarter of fiscal year 2011 was \$58,686 as compared to \$73,040 in the first quarter of fiscal year 2010, a decrease of \$14,354, or about 20%. The decrease in net cash provided by operating activities reflects an increase in certain payments made in the first quarter of fiscal year 2011, primarily related to income taxes and variable based compensation tied to fiscal year 2010 earnings performance which was considerably stronger than fiscal year 2009. This was partially offset by an improvement in working capital management as discussed below. The Company's full cash conversion cycle, defined as days in inventory outstanding ("DIO") plus days sales outstanding ("DSO") less days payable outstanding ("DPO"), decreased to 142 days in the quarter ended October 31, 2010 from 161 days in the quarter ended October 31, 2009. This improvement reflects a decrease in DIO and DSO, as well as an increase in DPO.

Free cash flow, which is defined as net cash provided by operating activities less capital expenditures, was \$33,328 in the first quarter of fiscal year 2011, as compared with \$35,959 in the first quarter of fiscal year 2010. The decrease in free cash flow reflects the decline in net cash provided by operating activities as discussed above, partly offset by a decrease in capital expenditures. The Company utilizes free cash flow as one way to measure its current and future financial performance. Company management believes this measure is important because it is a key element of its planning. The following table reconciles net cash provided by operating activities to free cash flow.

	Oct. 31, 2010	Oct. 31, 2009
Net cash provided by operating activities	\$ 58,686	\$ 73,040
Less capital expenditures	25,358	37,081
Free cash flow	\$ 33,328	\$ 35,959

Overall, net debt (debt net of cash and cash equivalents) as a percentage of total capitalization (net debt plus equity) was 18.7% at October 31, 2010 as compared to 19.4% at July 31, 2010. Net debt increased by approximately \$11,600 compared with July 31, 2010, comprised of a decrease in cash and cash equivalents of \$39,700 partly offset by a decrease in gross debt of \$16,700. The impact of foreign exchange rates decreased net debt by about \$11,400, including the revaluation of the JPY 9 billion loan (\$111,843 at October 31, 2010).

The Company's 5-year revolving credit facility contains financial covenants which require the Company to maintain a minimum consolidated net interest coverage ratio of 3.5:1, based upon trailing four quarters results, and a maximum consolidated leverage ratio of 3.5:1, based upon trailing four quarters results. In addition, the facility includes other covenants that under certain circumstances can restrict the Company's ability to incur additional indebtedness, make investments and other restricted payments, enter into sale and leaseback transactions, create liens and sell assets. As of October 31, 2010, the Company was in compliance with all related financial and other restrictive covenants, including limitations on indebtedness.

The Company manages certain financial exposures through a risk management program that includes the use of foreign exchange and interest rate derivative financial instruments. Derivatives are executed with counterparties with a minimum credit rating of "A" by Standard and Poor's and Moody's Investor Services, in accordance with the Company's policies. The Company does not utilize derivative instruments for trading or speculative purposes.

The Company conducts transactions in currencies other than their functional currency. These transactions include non-functional intercompany and external sales as well as intercompany and external purchases. The Company uses foreign exchange forward contracts, matching the notional amounts and durations of the receivables and payables resulting from the aforementioned underlying foreign currency transactions, to mitigate the exposure to earnings and cash flows caused by changing foreign exchange rates. The risk management objective of holding foreign exchange derivatives is to mitigate volatility to earnings and cash flows due to changes in foreign exchange rates. The notional amount of foreign currency forward contracts entered into during the three months ended October 31, 2010 was \$461,635. The notional amount of foreign currency forward contracts outstanding as of October 31, 2010 was \$301,142. The Company's foreign currency balance sheet exposures resulted in the recognition of a gain within SG&A of approximately \$2,617 in the first quarter of fiscal year 2011 before the impact of the measures described above. Including the impact of the Company's foreign exchange derivative instruments, the net recognition within SG&A was a gain of approximately \$282 in the first quarter of fiscal year 2011.

On November 30, 2010, the Company established a commercial paper program under which the Company may issue up to \$600,000 of unsecured commercial paper notes. The Company's board of directors has authorized debt financings through the issuance of commercial paper plus borrowings under the Company's revolving credit facility of up to a maximum aggregate amount outstanding at any time of \$600,000. In December 2010, the Company issued \$205,000 of notes under the commercial paper program. No amounts under the commercial paper program were outstanding as of October 31, 2010. These borrowings have interest rates between 0.45% and 0.47% and have original maturities of between 30-50 days. The proceeds of the commercial paper issuances will be used for general corporate purposes, including paying down existing balances under the Company's revolving credit facility.

The Company utilizes cash flow generated from operations and its revolving credit facility to meet its short-term liquidity needs. Company management considers its cash balances, lines of credit and access to the commercial paper and other credit markets, along with the cash typically generated from operations, to be sufficient to meet its anticipated liquidity needs.

In the first quarter of fiscal year 2011, capital expenditures were \$25,358. Depreciation and amortization expense in the first quarter of fiscal year 2011 were \$20,800 and \$3,236, respectively. Depreciation and amortization expense in the first quarter of fiscal year 2010 were \$20,530 and \$2,698, respectively.

On November 15, 2006, the board of directors authorized an expenditure of \$250,000 to repurchase shares of the Company's common stock. On October 16, 2008, the board authorized an additional expenditure of \$350,000 to repurchase shares. At July 31, 2010, there was \$352,944 remaining under the current stock repurchase programs. The Company repurchased stock of \$25,000 in the first quarter of fiscal year 2011 leaving \$327,944 remaining at October 31, 2010 under the current stock repurchase programs. Net proceeds from stock plans were \$13,989 in the first quarter of fiscal year 2011.

In the first quarter of fiscal year 2011, the Company paid dividends of \$36,976 compared to \$33,913 in the first quarter of fiscal year 2010, an increase of approximately 9.0%. The Company increased its quarterly dividend by 10.3% from 14.5 cents to 16 cents per share, effective with the dividend declared on January 21, 2010.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

There is no material change in the market risk information disclosed in Item 7A of the 2010 Form 10-K.

ITEM 4. CONTROLS AND PROCEDURES.

There are a number of significant business improvement initiatives designed to improve processes and enhance customer and supplier relationships and opportunities. These include information systems upgrades and integrations that are in various phases of planning or implementation and contemplate enhancements of ongoing activities to support the growth of the Company's financial shared service capabilities and standardization of its financial systems. When taken together, these changes, which will occur over a multi year period, are expected to have a favorable impact on the Company's internal control over financial reporting. The Company is employing a project management and phased implementation approach that will provide continued monitoring and assessment in order to maintain the effectiveness of internal control over financial reporting during and subsequent to implementation of these initiatives.

In connection with the aforementioned business improvement initiatives, during fiscal year 2010, certain significant operations migrated and are expected to continue to migrate in future fiscal quarters to the Company's global enterprise resource planning ("ERP") software system. The purpose of the ERP system is to facilitate the flow of information between all business functions inside the boundaries of the Company and manage the connections to outside stakeholders. Built on a centralized database and utilizing a common computing platform, the ERP system consolidates business operations into a more uniform, enterprise wide system environment. The Company's ERP implementation is accompanied by process changes and improvements, including those that impact internal control over financial reporting. No operations were migrated to the ERP system during the first quarter of fiscal year 2011.

During fiscal year 2010 and continuing in the first quarter of fiscal year 2011, the Company centralized the management of its European Life Sciences operations resulting in significant changes to aspects of the internal control environment. In connection with these continuing process changes, the Company has instituted material changes in its internal control over financial reporting.

As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's chief executive officer and chief financial officer, of the effectiveness of the Company's disclosure controls and procedures pursuant to Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended. Based on this evaluation, the chief executive officer and chief financial officer concluded that the Company's disclosure controls and procedures are effective.

Any system of controls, however well designed and operated, can provide only reasonable, and not absolute, assurance that the objectives of the system are met. In addition, the design of any control system is based in part upon certain assumptions about the likelihood of future events. Because of these and other inherent limitations of control systems, there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

(In thousands)

As previously disclosed in the 2010 Form 10-K, the Company is subject to various regulatory proceedings and litigation, including with respect to various environmental matters. Reference is also made to Note 6, Contingencies and Commitments, to the accompanying condensed consolidated financial statements.

Shareholder Derivative Lawsuits:

On October 5, 2007, two plaintiffs filed identical derivative lawsuits in New York Supreme Court, Nassau County, relating to the Company's understatement of certain of its U.S. income tax payments and of its provision for income taxes in certain prior periods as described in Note 2, Audit Committee Inquiry and Restatement to the consolidated financial statements included in the 2007 Form 10-K. These actions purported to bring claims on behalf of the Company based on allegations that certain current and former directors and officers of the Company breached their fiduciary duties by failing to evaluate and otherwise inform themselves about the Company's internal controls and financial reporting systems and procedures. In addition, plaintiffs alleged that certain officers of the Company were unjustly enriched as a result of the Company's inaccurate financial results over fiscal years 1999-2006 and the first three quarters of fiscal year 2007. The complaints sought unspecified compensatory damages on behalf of the Company, disgorgement of defendants' salaries, bonuses, stock grants and stock options, equitable relief and costs and expenses. The Company, acting in its capacity as nominal defendant, moved to dismiss the complaints for failure to make a demand upon the Company's board of directors, which motions were granted on April 30 and May 2, 2008. On September 19, 2008, the same two plaintiffs filed a derivative lawsuit in New York Supreme Court, Nassau County, which was served on the Company on September 26, 2008 (the "September Derivative"). This action purports to bring claims on behalf of the Company based on allegations that certain current and former directors and officers of the Company breached their fiduciary duties and were unjustly enriched in connection with the tax matter. In addition, the plaintiffs allege that the board's refusal of their demand to commence an action against the defendants was not made in good faith. The plaintiffs and the Company agreed to stay this proceeding pending resolution of the Company's motion to dismiss in the federal securities class action lawsuit related to the tax matter after which resolution the plaintiffs and the Company agreed to confer about a schedule for the defendants' time to answer or otherwise respond to the complaint. On September 21, 2009, the U.S. District Court for the Eastern District of New York denied the Company's motion to dismiss the consolidated amended complaint in the federal securities class action lawsuit. On October 9, 2009, the Company moved for certification for interlocutory appeal in the federal securities class action lawsuit, and the Court denied the motion by Memorandum and Order entered November 25, 2009. The September Derivative is no longer stayed.

On November 13, 2008, another shareholder filed a derivative lawsuit in New York Supreme Court, Nassau County, against certain current and former directors and officers of the Company, and against the Company, as nominal defendant, which was served on the Company on December 4, 2008. This action purports to bring similar claims as the September Derivative.

Environmental Matters:

The Company's condensed consolidated balance sheet at October 31, 2010 includes liabilities for environmental matters of approximately \$11,769, which relate primarily to the previously reported environmental proceedings involving a Company subsidiary, Gelman Sciences Inc., pertaining to groundwater contamination. In the opinion of management, the Company is in substantial compliance with applicable environmental laws and its current accruals for environmental remediation are adequate. However, as regulatory standards under environmental laws are becoming increasingly stringent, there can be no assurance that future developments, additional information and experience gained will not cause the Company to incur material environmental liabilities or costs beyond those accrued in its condensed consolidated financial statements. The Company is currently in late stage negotiations with the Michigan Department of Natural Resources and Environment regarding its Comprehensive Proposal to Modify Cleanup Program that was submitted to the State of Michigan on May 4, 2009. It is reasonably possible that the results of these negotiations may result in a material increase to the Company's environmental reserves beyond those accrued in its condensed consolidated balance sheet at October 31, 2010, however, the impact is not currently estimable.

ITEM 1A. RISK FACTORS.

There is no material change in the risk factors reported in Item 1A of the 2010 Form 10-K. This report contains certain forward-looking statements that reflect management's expectations regarding future events and operating performance and speak only as of the date hereof. These statements are subject to risks and uncertainties, which could cause actual results to differ materially. For a description of these risks see "Management's Discussion and Analysis of Financial Condition and Results of Operations – Forward-Looking Statements and Risk Factors."

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

- (a) During the period covered by this report, the Company did not sell any of its equity securities that were not registered under the Securities Act of 1933, as amended.
- (b) Not applicable.
- (c) The following table provides information with respect to purchases made by or on behalf of the Company or any "affiliated purchaser" of shares of the Company's common stock.

(In thousands, except per share data)

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (1)
August 1, 2010 to August 31, 2010	–	\$ –	–	\$ 352,944
September 1, 2010 to September 30, 2010	–	\$ –	–	\$ 352,944
October 1, 2010 to October 31, 2010	576	\$ 43.41	576	\$ 327,944
Total	576	\$ 43.41	576	

- (1) On November 15, 2006, the board authorized an expenditure of \$250,000 to repurchase shares of the Company's common stock. On October 16, 2008, the board authorized an additional expenditure of \$350,000 to repurchase shares. The Company's shares may be purchased over time, as market and business conditions warrant. There is no time restriction on these authorizations. During the three months ended October 31, 2010, the Company purchased 576 shares in open-market transactions at an aggregate cost of \$25,000, with an average price per share of \$43.41. As of October 31, 2010, \$327,944 remains to be expended under the current board repurchase authorizations. Repurchased shares are held in treasury for use in connection with the Company's stock plans and for general corporate purposes.
