04.01 - EXPLANATORY NOTES

1. Business Overview

Gol Linhas Aéreas Inteligentes S.A. (Company or GLAI) is a low-cost, low-fare airline, with an aircraft fleet of 34 Boeing 737, one of the industry's newest and most modern fleets, with low maintenance, fuel and training costs, and high usage and efficiency ratios.

In the quarter ended June 30, 2005, the Company began operating 4 new aircraft and one new base in the city of São José do Rio Preto, State of São Paulo.

In January 2005, the Company obtained an authorization from the Committee of Studies Related to International Air Navigation (CERNAI) to operate regular flights from Brazil to Santa Cruz de La Sierra, Bolivia. Company's Management expects to begin operating those flights in the second half of 2005. In May 2005, the Company also obtained an authorization from CERNAI to operate regular flights from Brazil to Montevideo, Uruguay, and Asunción, Paraguay. Company's Management expects to begin operating those flights in the fourth quarter of 2005.

Except for the continuity of its expansion and growth plan, there were no changes in the Company's operations for the quarter ended June 30, 2005.

On April 27, 2005, the Company concluded a global public offering of 14,700,000 preferred shares at the price of R\$ 35.12, out of which 5,520,811 preferred shares were offered by the Company and 9,179,189 preferred shares were offered, by BSSF Air Holding LLC, company affiliated to the shareholder AIG Capital Partners, in the Brazilian and foreign markets as ADS.

The public offering registration in the Brazilian market was granted by the Brazilian Securities and Exchange Commission and one registration relating to these securities was filed and declared effective by the US Securities and Exchange Commission. The funds raised by the Company by means of a primary offering of new shares, in the amount of R\$ 193.890, will be used for its expansion plan, mainly for payment of the deposit for aircraft purchase provided under its agreement with Boeing.

On May 2, 2005, the Board of Directors resolved on a R\$ R\$77,440 capital increase as a result of the public subscription of 2,205,000 preferred shares, in view of the option exercise for subscription and distribution of new shares, according to the agreements entered into with financial institutions for placement of the new shares issued.

At June 30, 2005, the Company's stock ownership structure is as follows:

	Common	Preferred	Total
Aeropar Participações S.A.	100.00%	36.70%	72.18%
Comporte Participações S.A.	-	3.90%	1.72%

04.01 - EXPLANATORY NOTES

The Company's Quarterly Information was prepared in accordance with the generally accepted accounting principles in Brazil and the provisions contained in the Brazilian Corporation Law, in the Chart of Accounts prepared by the Civil Aviation Department - DAC and the supplementary rules of the Brazilian Securities and Exchange Commission CVM, consistently applied to the financial statements for the year ended December 31, 2004.

Significant accounting practices and consolidation criteria adopted by the Company are described in the financial statements for the year ended December 31, 2004 and remain unchanged.

Additionally in 2005, aiming towards continuous improvement of the information presented to the market, the Company began adopting the following new principles:

a) Employee profit sharing

The provision for employee profit sharing is set up monthly, based on Management's estimates, in view of the goals established for the current year, and recorded as personnel expenses while considered as provision, classified as employee profit sharing when the accomplishment of the year's goals is confirmed.

b) Managed account

The Company and its subsidiaries are quota holders of managed accounts, whose investment in securities and liabilities resulting from the fund portfolio activities started to be presented on a consolidated basis for the first quarter of 2005.

Securities from the managed account portfolios are acquired with the aim of being frequently and actively traded and, as provided for by specific rules of the Central Bank of Brazil are classified as securities for negotiation and booked based on the market value, having the realized and unrealized gains and losses recognized in the results.

c) Accounting of operations with derivatives

Aiming at recording, stating and disclosing transactions with derivative financial instruments performed by the Company and its subsidiaries, based on formal policies of risk management, the Company started to adopt, beginning January 2005, accounting practices for derivative instruments in line with the USGAAP, whose concepts which are used and described below result from SFAS133 and the regulations from the Brazilian Central Bank.

The derivative financial instruments used by the Company, with the specific purpose of covering market risks, are measured based on its fair values, and the non-effective portion of income realized from transactions with derivative financial instruments is directly recognized in the income for the period, while the effective risk coverage is recognized in order to adjust the revenues and expenses related to

the items subject to the contracted coverage. The accounting criteria for the effective measurement of the instruments was defined based on the Company's risk management policy and is in line with the USGAAP SFAS 133 concepts, which consider effective the instruments that offset between 80% and 120% of the volatility of the item for which the hedge was contracted.

The market value of derivative financial instruments is calculated based on usual market practices, using the closing values for the period, considering relevant underlying quotes, except for option contracts, whose values are determined through the Black and Scholes pricing methodology, whereby the variables and the information related to the volatility coefficient are obtained through well-known insiders.

d) Reconciliation between information and the disclosures under USGAAP

Preferred shares of Gol Linhas Aéreas Inteligentes S.A. are traded as American Depositary Shares ADS on the NYSE in the United States of America and are subject to the rules of the US Securities and Exchange Commission SEC. Each ADS represents 2 preferred shares traded under the ticker GOL. The Company prepares the consolidated financial statements according to generally accepted accounting principles in the United States of America USGAAP. Aiming at fulfilling the need for information in the markets in which it operates, the Company's practice is to simultaneously disclose its corporate financial statements and the USGAAP.

The accounting practices adopted in Brazil differ from accounting principles generally accepted in the United States USGAAP applicable to the air transport segment, especially the allocation of maintenance expenses to income. At June 30, 2005, the net income for the period, in accordance with accounting practices adopted in Brazil (BR GAAP), was R\$ 41,686 lower (R\$ 108,819 at June 30, 2004) due to this difference and the respective tax effects in comparison with net income under USGAAP. At this same date, shareholder's equity presented in the Company's financial statements as per Brazilian Corporation Law was R\$175,991 lower due to, mainly, the accumulated difference in the allocation of maintenance expenses and respective tax effects, also as the result of the accrual in USGAAP financial statements of net proceeds received through issuing shares and accounting for share purchase options granted to executives and employees. There are also differences in the classification of assets, liabilities and income items, and the most significant difference is the classification of readily available financial investments. The Company discloses significant information on transactions in a consistent way in the financial statements as per Brazilian Corporation Law and in accordance with USGAAP.

The Company entered into an Agreement for the Adoption of Level 2 Differentiated Corporate Governance Practices with the São Paulo Stock Exchange BOVESPA, starting to be listed on the Bovespa's Novo Mercado index, created to set apart a selected group of companies that undertake to adopt

(a) Considering the managed accounts as instruments, their results are included in the Company's financial income.

The Company and its subsidiary Gol Transportes Aéreos S.A. hold 100% of the quotas from managed accounts, organized as a joint ownership for an undetermined period, with tax neutrality, resulting in benefits for the quota holders. The investments in these managed accounts have daily liquidity. These managed account portfolios are managed by external managers who follow the investment policies set forth by the Company.

The financial assets that comprise the managed account portfolios are registered, accordingly, with the Special Settlement and Custody System - SELIC, or the Mercantile and Futures Exchange - BM&F.

The managed accounts participate in operations involving derivative financial instruments recorded in equity or compensation accounts, which aim at maximizing the income and managing the Company's exposure to market risks and exchange rates. The information related to risk management policies and the outstanding positions are further described in Note 17.

On May 17, 2004, the Company entered into an agreement with Boeing Company to close a purchase order of 17 737-800 Next Generation aircraft, jointly with purchase options of 26 additional 737-800 Next Generation aircraft.

Considering contract amendments, at June 30, 2005 the Company had placed firm orders for the acquisition of 30 aircraft Boeing 737-800. The firm orders for the aircraft purchase, in the approximate amount of US\$ 1,980 million based on the aircraft list price (corresponding to approximately R\$4,654 million based on the exchange rate of June 30, 2005), have deliveries expected for 2006 (six aircraft), 2007 (thirteen aircraft), 2008 (seven aircraft) and 2009 (four aircraft).

The Company has been making the initial payments related to the acquisition of these aircraft, using its own funds arising from the primary public offering of its shares and loans contracted through short-term credit lines and supplier s financing. Future payments referring to firm orders and options for the purchase of 63 aircraft, set forth based on the aircraft price list, determined in US dollars and converted into reais based on the exchange rate of June 30, 2005, have the following breakdown per year:

	Future commitments for the acquisition of aircraft	
2005	195,697	83,261
2006	1,108,905	471,794
2007	4,696,421	1,998,137

2009	1,218,248	518,316
Total	9,576,029	4,074,213

The obligations with the purchase of aircraft will be financed up to 85% through long-term financing guaranteed by the US Ex-Im Bank.

The Company maintains an agreement, which expires in 2014, for use of the Open Skies sales system, which may be terminated by the hirer with a prior notice of 180 days. The future payments under that agreement depend on the

number of passengers carried and the minimum monthly price is R\$346, corresponding to U\$147 converted based on the exchange rate of June 30, 2005. From January 1 to June 30, 2005 payments to Open Skies totaled R\$ 8,242 (R\$ 4,153 at March 31, 2005).

After becoming exercisable, the holder of each option may exercise it for a period of 24 months.

On January 19, 2005, the Compensation Committee, within the scope of its functions and in conformity with the Company's Stock Option Plan, approved the grant of 87,418 options for the purchase of the Company's preferred shares at the price of R\$ 33.06 per share.

If the Company had accounted for the total effect of the options granted as expense, the operating result for the period ended June 30, 2005 would be lower by approximately R\$3,353 (R\$2,129 at March 31, 2005), considering the intrinsic value of options granted.

Employee profit sharing is also provided for in the Bylaws of the Company's subsidiary Gol. The employee profit sharing plan is subject to economic and financial results measured based on the Company's performance indicators, which assume the accomplishment of the performance goals of the Company and the units, as well as individual performance goals. At June 30, 2005 the provision set up based on the Management's estimates and expectations is R\$ 9,000.

17. Derivative Financial Instruments

The Company is exposed to several market risks arising from its operations. Such risks involve mainly the effects of changes in price and fuel availability, exchange rate risk, as the revenues thereof are generated in reais and the Company has significant obligations in US dollars, credit risks and interest rate risks. The Company uses derivative financial instruments to manage those risks. The Company maintains a formal risk management policy under the management of its executive officers and the Board of Directors.

The management of these risks is performed through control policies, establishing limits, as well as other monitoring techniques, mainly mathematical models adopted for the continuous monitoring of exposures. All derivative instruments used shall present a certain level of liquidity in order to permit position adjustments.

04.01 - EXPLANATORY NOTES

The managed account of which the Company is a quota holder is used as an instrument for contracting risk coverage in accordance with the Company's risk management policies.

a) Fuel price risk and availability

In order to manage risks resulting from the price changes in aircraft fuel, GOL uses derivative financial instruments to measure oil price changes represented by *futures and commodities options contracts*. The oil prices are extremely linked to aircraft fuel, which makes oil derivatives efficient in the compensation of aircraft fuel price fluctuations, providing a short-term hedge against a sharp increase in the average fuel price.

The Company makes use of oil swap and options. The Company records its derivative instruments related to fuel hedge as cash flow hedges, according to SFAS 133. The fair value of the Company's fuel derivative instruments at June 30, 2005 corresponded to an unrealized net gain of approximately R\$2,223.

In the quarter ended June 30, 2005, the Company recognized in the financial result a gain of R\$1,097 with derivatives measured as non-effective.

At June 30, 2005, the Company held derivative agreements for the purchase of up to 270,000 barrels of oil, in the nominal value of US\$15.3 million, for a two month period, and the results from the transactions with such derivatives were not recognized as adjustments to the items which refer to the financial statements.

The fuel purchase is substantially made from a single supplier, which accounts for the supply of 95% of the annual fuel consumption.

b) Exchange risk

At June 30, 2005, significant assets and liabilities in foreign currency are related to aircraft leasing operations. The installments relating to renegotiated lease agreements are recorded under current and long-term liabilities.

The total exchange exposure related to unsettled amounts resulting from leasing operations is managed jointly with hedge strategies. The Company records its derivative financial instruments related to foreign currency futures market as cash flow hedges. All changes in the fair value of derivative instruments measured as effective are recorded in

Other total accumulated revenues up to the date when the corresponding foreign currency exposure is realized. Changes in the fair value of the Company's derivative financial instruments at June 30, 2005 corresponded to a net current asset of R\$8,574 (equivalent to US\$3,648 thousand), classified in other current liabilities in the Balance Sheet.

In the quarter ended June 30, 2005, the Company recognized operating expenses, amounting to R\$20,060, with derivative instruments measured as effective.

c) Interest rate risk

The Company's results are affected by changes in interest rates due to the impact of such changes on expenses with interest on variable income instruments, variable-rate lease agreements and remuneration on cash balance and financial investments.

At June 30, 2005, there were no open hedge agreements and the transactions carried out in 2005 were not recognized as adjustments to hedged items in the financial statements.

At June 30, 2005 the Company holds derivative instrument agreements related to futures at the nominal value of R\$124,584.

18. Insurance Coverage

Management holds an insurance coverage at amounts that it deems necessary to cover possible losses, due to the nature of its assets and the inherent risks associated to its activity, observing the limits established in lease agreements. At June 30, 2005, the insurance coverage, by nature, considering GOL's aircraft fleet and in relation to the maximum indemnifiable amounts, is the following:

Aeronautic Type

Warranty Hull	1,703,499	724,770
Civil Liability per occurrence/aircraft	1,410,204	600,000
Warranty Hull/War	1,703,499	724,770
Inventories	94,016	40,000

By means of the Law 10,605 of December 18, 2002, the Brazilian government undertook to supplement any civil liability expenses against third parties caused by acts of war or terrorist attacks, occurred in Brazil or abroad, for which GOL may be demanded, for the amounts that exceed the insurance policy limit effective on September 10, 2001, limited to the equivalent in reais to one billion US dollars.

19. EBITDA and EBITDAR

The Company uses EBITDA (earnings before interest, taxes, depreciation and amortization) and EBITDAR (earnings before interest, taxes, depreciation and amortization plus operating costs with aircraft leases and supplementary aircraft leases) as indices for measuring its economic performance.

EBITDA and EBITDAR are not measurements accepted by accounting rules. The Company uses EBITDA and EBITDAR because they are standard financial

20. Subsequent Events

In July 2005, the Company received 02 new 737-300 aircraft. With the addition of these aircraft, the Company increased its fleet to 36 aircraft.

On July 5, 2005 the Company confirmed the execution of the exclusive Letter of Intent Agreement with the Mexican group *Inversiones y Técnicas Aeroportuárias SA de CV* (ITA), for creation of an airline company to operate in the Mexican territory. In the second half of 2005, the Company is expected to conclude the shareholders' agreement and begin requesting the required licenses to organize, manage and operate an airline company, according to the Mexican

aviation law and other applicable regulations.

**08.01 - COMMENTS ON THE CONSOLIDATED PERFORMANCE IN THE
QUARTER**

08.01.1 - Analysis of the Consolidated Performance of GOL Linhas Aéreas Inteligentes (US GAAP)

MANAGEMENT'S COMMENTS ON 2Q05 RESULTS

GOL's performance in the second quarter of 2005 demonstrated the Company's ability to grow capacity significantly while maintaining profitability, even during periods of extremely high fuel prices. GOL remains committed to its virtuous cycle of maintaining low costs, allowing us to offer the lowest fares and achieve the highest load factors in the Brazilian market, thereby driving industry-leading profitability, commented Constantino de Oliveira Junior, GOL's CEO. Mr. Oliveira added, "Through the addition of aircraft and flight frequencies during the quarter, GOL significantly increased its domestic market share to 29% and achieved a position as the second-largest domestic airline in Brazil."

GOL's results in the second quarter of 2005 were in line with the guidance that the Company had articulated to the market. GOL continued to show the highest load factors in the Brazilian market and the highest aircraft utilization in the world, while maintaining market cost leadership. During the quarter, GOL's load factor increased 3.7 percentage points to 73%, aircraft utilization remained at 14 block hours per day, while operating costs decreased, excluding fuel.

Jet fuel per available seat kilometers (ASK) increased 33% year-over-year and accounted for a 9%, or \$1.3 cents (R\$) per ASK, increase in GOL's operating cost per seat kilometer (CASK) to 15.5 cents (R\$). GOL's non-fuel CASK, at 9.2 cents (R\$), showed significant improvement. Non-fuel CASK decreased 3% in the year-over-year comparison, despite a 49% 2Q05 increase in employees in preparation for our planned 65% capacity expansion in 2H05, a 5.8% inflation adjustment on salaries effected in 4Q04, provisions for employee profit sharing, a 46% increase in fleet size, and a 26% increase in average landing fees.

Cost reductions were driven by increased productivity, reductions in sales expenses and a 19% Brazilian Real appreciation. The 33% increase in fuel CASK contributed to the 8% reduction in operating profits. Fuel-neutral operating income increased 38% in the year-over-year comparison. Using 2Q04 fuel costs, pro-forma operating income was R\$128mm in 2Q05, representing a 23% operating margin. The Company has hedged approximately 55% of its short-term fuel price exposure for 3Q05. Our absolute market cost leadership, represented by a stage-length adjusted CASK more than 30% lower than our closest competitor, is key to our virtuous cycle, and allows us to provide the lowest fares and the best customer value proposition in the market, commented Richard Lark, GOL's CFO.

In terms of future perspectives, besides maintaining high levels of productivity and profitability, short-term growth will be driven by the addition of new aircraft, new destinations and new frequencies in existing routes. The addition of

eight Boeing 737 aircraft to the fleet in the second half of 2005 will increase seat capacity by 65% year-over-year.

QUARTER**

GOL remains committed to its strategy of profitable expansion through a low cost structure and high quality customer service. We are very proud that more than 30 million customers have chosen to fly GOL, and we continue to make every effort to offer them the best in air travel: new planes, frequent flights in the main markets, an ever-expanding route system and lower prices; all of which is delivered by our dedicated team of employees who are key to our success," stated Mr. Oliveira. By remaining focused on our business model, while continuing to grow, be innovative and provide the lowest fares, we will further create value for our customers, employees and shareholders.

REVENUES

Net operating revenues, 93% of which are revenues from passenger transportation, increased 40.3% to R\$524.5mm, primarily due to higher revenue passenger kilometers (RPK), offset by lower yields. RPK growth was driven by a 38% increase in departures, as well as an increase in load factor from 68.9% to 72.6% . RPKs grew 57.3% to 2,239 million, and revenue passengers grew 45.9% to 3.1 million.

Average fares decreased 3.6% from R\$181 to R\$175, principally due to our March fare re-alignment. Yields declined 11.0% to 23.40 cents (R\$) per passenger kilometer, due to our focus on reducing fares, as well as increased price competition during the quarter due to the end of the TAM-Varig code share (which had been in effect since 2003).

Complementing net operating revenues, cargo transportation activities primarily contributed to the expansion of other operating revenues, which increased from R\$11.7mm to R\$37.7mm.

The 49.4% year-over-year capacity expansion, represented by ASK, facilitated the addition of 52 new flight frequencies (including 26 night flights) and one new destination in 2Q05. The addition of an average of four operating aircraft during the quarter (from 22 to 32 aircraft in the year-over-year comparison) drove the ASK increase.

Operating revenue per available seat kilometer (RASK) decreased 2.4% from R\$18.67 cents in 2Q04 to R\$18.22 cents in 2Q05.

The growth in RPKs resulted in a higher domestic market share for GOL, reaching 29% in the end of 2Q05, compared to 22% in the end of 2Q04. Through its first regular international flights to Buenos Aires, Argentina, GOL achieved an international market share of 2% in the same period. Approximately 5% of GOL's total RPKs were related to Brazil-Buenos Aires passenger traffic.

OPERATING EXPENSES

Operating expenses per ASK decreased by 2.7%, excluding fuel, in the quarter. Total CASK increased 9.0%, to 15.5 cents (R\$), primarily as a result of increases in aircraft fuel expenses per ASK, partially offset by a higher productivity and by a greater dilution of our fixed costs over a higher number of ASKs. Total operating expenses increased

63%, reaching R\$477.2mm, due to extremely high fuel prices and the expansion of our operations (fleet and headcount expansion, a higher volume of landing fees and marketing activities). Over the quarter, fuel price increases led to an increase of R\$95.5mm in operating expenses. Breakeven load factor increased from 54% to 62%.

Results from GOL's operating expense (jet fuel and USD-related) hedging programs are accounted for in accordance with SFAS 133 (*Statement of Financial Accounting Standard No 133*), Accounting of Derivatives and Hedging Activities.

Salaries, wages and benefits expenses per available seat kilometer (ASK) increased 25.3% to 1.83 cents (R\$) due to a 5.8% inflation adjustment on salaries in 4Q04, a R\$4.5mm provision for our employee profit sharing program (2004 profit sharing was expensed in 4Q), and to a 49.1% increase in the number of full-time equivalent employees, from 2,685 to 4,002, related to capacity expansion.

Aircraft fuel expenses per ASK increased 32.8% over 2Q04 to 6.24 cents (R\$), due to higher fuel prices per liter. The average fuel cost per liter increase of 20% compared to 2Q04 was primarily due to the 39% increase in the international price for crude oil (WTI), partially offset by the 19% Brazilian Real appreciation. GOL's hedging program, in conjunction with its fuel efficient fleet and intelligent yield management, has helped to mitigate against increases in jet fuel prices. The Company has hedged approximately 55% of its fuel requirements for 3Q05.

Aircraft rent per ASK decreased 15.5% to 2.02 cents (R\$) in 2Q05 primarily due to a high aircraft utilization rate (14 block hours per day), and a 19% appreciation of the Brazilian Real during the period. GOL's high aircraft utilization rates are attributable to our standardized fleet, which reduces complexity and turnaround times, and allows an increase in the number of daily flights per aircraft and a 24-hour per day utilization for over 25% of the fleet.

Aircraft insurance expenses per ASK decreased 17.2% due to a reduction in average premium rates, the 19% appreciation of the Brazilian Real against the US dollar, and a higher aircraft utilization rate.

Sales and marketing expenses per ASK decreased 1.9% to 2.55 cents (R\$) primarily due to reductions in sales commissions. GOL booked a majority of its ticket sales through a combination of its website (78% during 2Q05) and its call center (9% during 2Q05).

Landing fees per ASK increased 7.8% to 0.69 cents (R\$), due to a 38% increase in departures and a 26% increase in average landing tariffs.

Aircraft and traffic servicing expenses per ASK decreased 31.2% to 0.64 cents (R\$), as a result of higher productivity and reduced costs of third-party service contracts.

Maintenance, materials and repairs per ASK increased 100.0% to 0.34 cents (R\$), primarily due to a one-time insurance re-imbursement in 2Q04 for extraordinary repair services performed in 1Q04 on aircraft GOO, offset by the 19% appreciation of the Brazilian Real.

Depreciation per ASK was 0.27 cents (R\$), an 17.4% increase, due to a higher volume of fixed assets, particularly spare parts inventory and, to a lesser extent, the increase of our technology equipment, due to our expansion of operations.

Other operating expenses per ASK were 0.64 cents (R\$), a 16.9% decrease when compared to the same period of the previous year, due to higher productivity.

COMMENTS ON EBITDA AND EBITDAR¹

The impact of a CASK increase of 1.28 cents (R\$) and a 0.45 cents (R\$) RASK decrease, resulted in a reduction of EBITDA per available seat kilometer from 4.72 cents (R\$) in 2Q04 to 3.03 cents (R\$) in 2Q05. GOL was 100% hedged on USD operating expenses in 2Q05, which resulted in R\$20mm of operating losses recorded in accordance with SFAS 133. Excluding hedge results, our EBITDA was positively affected by the 49.4% increase in operating capacity, and totaled R\$113.2mm compared to R\$97.6mm in 2Q04.

¹EBITDA (earnings before interest, taxes, depreciation and amortization) and EBITDAR (earnings before interest, taxes, depreciation, amortization and rent) are presented as supplemental information because we believe they are useful indicators of our operating performance and are useful in comparing our performance with other companies in the airline industry. We usually present EBITDAR, in addition to EBITDA, because aircraft leasing represents a significant operating expense of our business, and we believe the impact of this expense should also be considered. However, neither figure should be considered in isolation, as a substitute for net income prepared in accordance with US GAAP, BR GAAP or as a measure of a company's profitability. In addition, our calculations may not be comparable to other similarly titled measures of other companies.

Aircraft rent represents a significant operating expense for GOL. As GOL leases all of its aircraft, we believe that EBITDAR (equivalent to EBITDA before aircraft rent expenses) is an important measure of operating performance. On a per available seat kilometer basis, EBITDAR was 5.05 cents (R\$) in 2Q05, compared to 7.11 cents (R\$) in 2Q04. EBITDAR amounted to R\$155.7mm in 2Q05, compared to R\$146.9mm in the same period last year.

FINANCIAL RESULTS

Interest expense increased R\$2.4mm due to a higher amount of short-term working capital debt, related to increased operations, and a negative variation on dollar-denominated deposits (a non-cash effect). Financial income increased R\$13.1mm, primarily due to a R\$187.1mm increase in cash balances.

SPECIAL REVIEW REPORT

The Board of Directors and Shareholders Gol Linhas Aéreas Inteligentes S.A.

1. We have performed a special review of the Quarterly Information - ITR of Gol Linhas Aéreas Inteligentes S.A. and subsidiaries for the quarter ended June 30, 2005, comprising the balance sheets of the parent company and consolidated and the respective statements of income, the performance report and relevant information prepared in accordance with the accounting practices adopted in Brazil.
2. We conducted our review in accordance with standards of the IBRACON – Brazilian Institute of Independent Auditors, coupled with the Federal Accounting Council, consisting mainly of: (a) inquiry and discussion with the managers in charge of the Company's accounting, financial and operating areas in relation to the main criteria adopted in the preparation of the Quarterly Information; and (b) review of information and subsequent events which have or may have relevant effects on the financial situation and operations of the Company and its subsidiaries.
3. Based on our special review, we are not aware of any material modifications that should be made to the Quarterly Information referred to above for them to be in conformity with the accounting practices adopted in Brazil, in accordance with the rules issued by the Brazilian Securities and Exchange Commission, specifically applicable to the preparation of the Quarterly information.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
