**Clarifications on BM-S-9**

(Rio de Janeiro, April 14, 2008). PETRÓLEO BRASILEIRO S/A - PETROBRAS, [Bovespa: PETR3/PETR4, NYSE: PBR/PBRA, Latibex: XPBR/XPBRA, BCBA: APBR/APBRA], a Brazilian international energy company, in response to Bovespa written notice GAE/SAE 0882-08 and CVM written notice CVM/SEP/GEA-2/Nº 076/08, regarding the article published by Reuters news agency, on 04/14/2008, which states, among other things, that the general director of the National Oil, Natural Gas, and Biofuel Agency ANP, Haroldo Lima, said unofficial information from Petrobras has assessed that reserves at the Carioca field, in the Santos Basin, may be five times bigger than those found in the Tupi field; according to Lima, the field may hold reserves of some 33 billion barrels of oil equivalent (oil & gas), clarifies that:

The consortium formed by Petrobras (45% - Operator), BG (30%), and Repsol YPF Brasil (25%) is still following its exploratory program for Block BM-S-9, in the Santos Basin. The Block is composed of two exploratory areas. Well 1-BRSA-491-SPS (1-SPS-50) was drilled in the largest of them, and resulted in the discovery announced on September 05 2007. On that occasion, the market was informed that more investments are required to drill new wells, the Assessment Plan for which is in its final preparation phase and is expected to be submitted to the ANP in the upcoming days.

Following the normal exploration schedule, on March 22 2008, the Company started drilling the second well, the 1-BRSA-594-SPS (1-SPS-55), which is located in the smaller area of the block, but it has yet to reach the pre-salt layer. The ongoing exploratory activities include drilling new wells, long-duration formation tests, and new geological studies to prove the range of the discovery.

More conclusive data on the discovery's potential will only be known after the other phases involved in the assessment process have been completed, and they will be announced to the market in a timely manner.

## FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
