**PETROBRAS ANNOUNCES RESULTS FOR THE FIRST QUARTER OF 2009**

**(Rio de Janeiro May 11, 2009) PETRÓLEO BRASILEIRO S.A. Petrobras announces today its consolidated results expressed in millions of Brazilian Reais, in accordance with generally accepted accounting practices in Brazil (BR GAAP) and the norms issued by the CVM (Brazilian Securities and Exchange Commission). In order to facilitate comparisons, the accounting data for the periods ended in 2008 have been adjusted in line with the accounting practices determined by Law 11,638/07 and Presidential Decree 449/08.**

Petrobras' market capitalization grew by 27% over the 4Q-2008, reflecting market perception of the Company's strategic plan released in January 2009, as well as the recovery of oil prices.

In comparison with the 4Q-2008, operating income moved up 117% to R\$ 10,220 million, demonstrating the capital discipline that has underpinned all the Company's activities, as well as the greater impact in the previous quarter of losses from impairment and the devaluation of inventories. These effects offset the downturn in domestic and international demand, the reduction in the financial result and the non-recurrence of the tax benefit related to interest on equity.

Consolidated net income in the 1Q-2009 fell 20% year-on-year, chiefly due to lower commodity prices and the decline in domestic demand for oil products, although these effects were partially offset by the 6% upturn in oil and gas production in Brazil and the increase in diesel and gasoline prices in May 2008, as well as the reduction in imports and the reduced government take due to the lower oil prices.

Total oil and gas production (Brazil and International) climbed 2% over the 4Q-2008, thanks to the recently installed platforms in Marlim Sul (P-51) and Marlim Leste (P-53). In relation to the 1Q-2008, production moved up by 6%, due to the operational start-up of the P-53 and P-51 platforms and the Agbami field in Nigeria, as well as increased output from the P-52 and P-54 platforms, more than offsetting the natural decline of the mature fields.

Expanding future oil and gas production capacity in Brazil was the 1Q-2009 investment priority, in line with the targets defined in the Petrobras System's strategic plan.

**PETROBRAS SYSTEM**

**Statement by the CEO, José Sergio Gabrielli de Azevedo**

Dear shareholders and investors,

At the same time as we are disclosing our results for the first quarter of 2009, Petrobras is reaching a milestone in its history. Eleven days ago, we began the Extended Well Test (EWT) for Tupi, the first oil from the pre-salt layer of the Santos Basin. If the beginning of Tupi production points to a bright future, our excellent current results indicate a comfortable present.

The Tupi Test marks the beginning of a new era. The development of a new exploratory frontier not only brings enormous reserve potential, but also implies a series of technological and logistics challenges. The EWT, which will last for 15 months, will initiate production via the FPSO BW Cidade de São Vicente in a 2,140 meter water table, and will be absolutely crucial for the collection of technical data regarding the development of the pre-salt reservoirs. It is extremely gratifying to see Petrobras, through its technical specialists and all those who believe in the Company, initiating output in one of the world's most promising and challenging oil-producing regions.

Nevertheless, although the pre-salt possibilities really are exciting, we must not forget that we also have enormous resources awaiting development in the traditional areas of the Campos Basin which will make a decisive contribution to continued production growth. In the first quarter of 2009, Brazil's oil output increased by 5% over the previous quarter and 7% year-on-year. On May 4, we achieved a new daily production record of 2,059,000 bpd, confirming our growth projections.

We also recorded some notable achievements on the exploration front, including the discovery of a new deposit in the pre-salt layer of Block BMS-9 in the area of well 4-BRSA-709, known as Iguaçú. In another area of the Campos Basin, closer to the coast and in shallower water, we discovered oil in the pre-salt layer of Block BM-S-52, known as Corcovado-1. Confirming potential light oil and gas production in the shallow waters in the south of the Campos Basin, we declared the commercial feasibility of a new field, called Pirarucá, with an estimated volume of 550 million barrels of oil equivalent.

Our healthy results, even in an adverse economic climate, underline the robustness of our portfolio and the solidity of our management. In a quarter when Brent crude averaged US\$ 44 per barrel, versus an average of US\$ 97 per barrel in the 1Q08 (55% down year-on-year), we posted a net income of R\$ 5.8 billion and continued to generate strong cash flow, with EBITDA of R\$ 13.4 billion.

During the 1<sup>st</sup> quarter our capital spending totaled R\$ 14.4 billion, largely financed from internally generated funds. We continue to enjoy access to capital from a wide range of sources; this quarter we raised R\$ 5.6 billion from the international debt capital markets, commercial banks and export credit agencies (ECAs). We are confident that internal cash generation and the availability of funding from different sources will ensure adequate resources to grow our production and integrating it with our downstream businesses.

**PETROBRAS SYSTEM**

Investing in growth is our priority, but always underpinned by capital discipline and cost optimization. We are doing everything possible to ensure that the costs for all our projects are compatible with the current state of the market and the industry. Concepts such as simplification, standardization and duplication, together with initiatives to stimulate the expansion and diversification of the supply chain, will all contribute towards meeting the goals of our business plan at competitive prices.

Even during this period of instability and uncertainty, we continued investing, confident that we have one of the best project and opportunity portfolios in the world. Thanks to our efficiency and capital discipline, we are in a comfortable position in regard to cash flow capacity and access to financing. Oil prices are beginning to recover, and the markets are picking up steam once again. Petrobras will follow its path of investment, growth and value creation, producing increasing quantities of oil, energy and wealth for its shareholders, investors and society as a whole.

## PETROBRAS SYSTEM

## Financial Performance

## Net Income and Consolidated Economic Indicators

Petrobras posted consolidated net income of R\$ 5,816 million in the 1Q-2009, 20% down on the 1Q-2008.

		R\$ million		
		1st Quarter

933	Loss on assets recovery	-	-	-

<b>9,204</b>	<b>EBITDA</b>	<b>13,423</b>	<b>14,183</b>	<b>(5)</b>
<b>18</b>	<b>EBITDA Margin (%)</b>	<b>32</b>	<b>30</b>	<b>2</b>

EBITDA is not a measure recognized by the accounting practices adopted in Brazil and other companies may define it in different ways. It should not be considered as an alternative indicator for measuring operating income, or as the best form of measuring liquidity or cash flow from operating activities. EBITDA is an additional measure of the Company's capacity to amortize debt, maintain investments and cover working capital needs

## PETROBRAS SYSTEM

## Financial Performance

The main factors contributing to the year-on-year variation in consolidated net income are shown below:

R\$ million	
Consolidated	1Q09 x 1Q08
<b>Operating Income (1Q08)</b>	<b>11,616</b>
Prices Effect	(4,444)
Import of oil, oil products and gas	2,394
Government Take	928
Expenses with generation/trading of electrical energy	695
Write-off of dry wells	(271)
Impairment	(244)
Expenses with freight in the international market	(239)
Others	(215)
<b>Operating Income (1Q09) <sup>(1)</sup></b>	<b>10,220</b>

The behavior of the various components of consolidated net income is shown below:

A R\$ 504 million reduction in gross profit:

Gross Profit Analysis - Main Items	R\$ million		
	Change		
	1Q-2009 X 1Q-2008		
	Net Revenues	Cost of Goods Sold	Gross Profit
<b>. Domestic Market:</b>			
- volumes sold	(1,250)	611	(639)
- domestic prices	45	-	45
<b>. International Market:</b>			
- export volumes	1,812	(714)	1,098
- export price	(4,489)	-	(4,489)
<b>. Increase (decrease) in expenses: (*)</b>	-	3,470	3,470
<b>. Increase (decrease) in profitability of distribution segment</b>	143	(166)	(23)
<b>. Increase (decrease) in profitability of trading operations</b>	(1,251)	1,232	(19)
<b>. Increase (decrease) in international sales</b>	(1,312)	1,010	(302)
<b>. FX effect on controlled companies abroad</b>	2,167	(1,855)	312
<b>. Other</b>	(105)	148	43
	(4,240)	3,736	(504)

(*) Expenses Composition:	Value
- import of crude oil and oil products and gas	2,394
- domestic Government Take	928
- generation and purchase of energy for commercialization	695
- transportation: maritime and pipelines <sup>(2)</sup>	133

- nitrogens	(88)
- salaries, benefits and charges	(97)
- third-party services	(146)
- non-oil products, including alcohol, biodiesel and other	(165)
- materials, services, rent and depreciation	(184)
	3,470

(1) Operating income before the financial result, equity income and taxes.

(2) Expenses from transportation, terminals and pipelines.

## PETROBRAS SYSTEM

## Financial Performance

**An R\$ 892 million increase in operating expenses, notably:**

- Exploration costs (R\$ 326 million), due to the increase in the write-off of dry and economically unviable wells in Brazil (R\$ 195 million) and abroad (R\$ 76 million), in turn caused by the intensification of the Company's investment program;
- Selling expenses (R\$ 306 million), due to higher exports and trading, which pushed up ship chartering, higher personnel expenses and the devaluation of the Real, offset by the reduction in provisions for doubtful debts;
- General and administrative expenses (R\$ 200 million), due to the rise in personnel costs as a result of the increase in the workforce and pay rises in Brazil (R\$ 82 million), the inclusion of expenses from the NSS refinery in Japan (R\$ 18 million) and the negative exchange variation (R\$ 59 million);
- Other operating expenses (R\$ 126 million), due to the booking in 2009 of provisions for the devaluation of inventories (R\$ 244 million), caused by the decline in commodity prices, offset by lower expenses from institutional relations and cultural projects (R\$ 88 million) and unscheduled stoppages of production facilities and equipment (R\$ 65 million).

**The reduced financial result (R\$ 613 million), due to higher exchange losses on funds invested abroad, as shown below:**

	R\$ million		
	1Q-2009	1Q-2008	Change
FX Effect on Net Debt	160	(42)	202
Monetary Variation in Financing	39	(61)	100
Net Financial Expenses	(839)	(400)	(439)
<b>Financial Result on Net Debt</b>	<b>(640)</b>	<b>(503)</b>	<b>137</b>
FX Variation - International Subsidiaries	(471)	(128)	(343)
FX Result - Financial Leasing - SPCs	51	34	17
Hedge for commercial operations	(14)	130	(144)
Marketable Securities	229	270	(41)
Other Net Financial Income (Expenses)	190	(59)	249
Other Net FX and Monetary Variation	(193)	21	(214)
<b>Net Financial Results</b>	<b>(848)</b>	<b>(235)</b>	<b>(613)</b>

**The decline in equity income (R\$ 391 million), due to the constitution of provisions for losses from the investments in the USA (R\$ 341 million), due to the difference between the estimated fair value of the net assets and that defined by the arbitration panel relative to the acquisition of the remaining 50% interest in the Pasadena refinery.**

## PETROBRAS SYSTEM

## Financial Performance

The main factors contributing to the quarterly variation in consolidated net income are shown below:

R\$ million	
Consolidated	1Q09 x 4Q08
<b>Operating Income (4Q08)</b>	<b>4,703</b>
Prices Effect	(4,324)
Import of oil, oil products and gas	3,812

- third-party services	98
- non-oil products, including alcohol, biodiesel and other	58
- salaries, benefits and charges	7
- nitrogens	(75)
- materials, services, rent and depreciation	(214)
	6,058

(2) Expenses from transportation, terminals and pipelines

**PETROBRAS SYSTEM**

Financial Performance

Considering that the turnover for Petrobras oil and oil products inventories correspond to approximately 60 days, the behavior of oil and oil products prices, as well as the FX rate on imports and government take (special participation), do not entirely affect the sales cost of the current quarter what will only fully happen in the subsequent period.

(\*) The effect of the realized inventories acquired at higher unit costs in previous periods was bigger in the 4Q08 than in the 1Q09, resulting in a positive effect when we compare the COGS between these quarters.

## PETROBRAS SYSTEM

## Financial Performance

**A R\$ 3,257 million reduction in the following operating expenses:**

- Selling expenses (R\$ 287 million), due to the decline in export volume, lower freight prices, a reduction in the number of oil product vessels chartered in the cabotage segment, and a decline in provisions for doubtful debts;
- General and administrative expenses (R\$ 411 million), due to higher personnel expenses in the 4Q-2008 from the ACT 2008/09 (collective bargaining agreement) related to retroactive periods, and reduced expenses from consulting and data processing;
- Exploration costs (R\$ 369 million) due to the reduction in geological and geophysical costs abroad (R\$ 281 million); abandonment costs in Brazil (R\$ 50 million), due to the revision of estimated future expenses in December 2008; and lower expenses with the write-off of dry or economically unviable wells (R\$ 28 million);
- Provisions for the impairment of Exploration and Production assets (R\$ 933 million) in the 4Q-2008;
- Tax expenses (R\$ 280 million), due to the 4Q-2008 booking of foreign taxes on intercompany loans and dividend remittances, as well as the reduction in IOF (financial operations tax) on financial investments.
- Other operating expenses (R\$ 886 million), due to higher provisions for the devaluation of oil and oil product inventories in the 4Q-2008 (R\$ 806 million).

**A reduction in the financial result (R\$ 3,254 million), due to the exchange loss on the use of funds abroad, offset by reduced exchange losses on financing.**

	R\$ millions		
	1Q-2009	4Q-2008	Change
FX Effect on Net Debt	160	(1,286)	1,446
Monetary Variation in Financing	39	(64)	103
Net Financial Expenses	(839)	(1,093)	254
<b>Financial Result on Net Debt</b>	<b>(640)</b>	<b>(2,443)</b>	<b>1,803</b>
FX Variation - International Subsidiaries	(471)	4,370	(4,841)
FX Result - Financial Leasing - SPCs	51	(1,275)	1,326
Hedge for comercial and financial operations			
Comercial	(14)	553	(567)
Financial	-	9	(9)
Total Hedge	(14)	562	(576)
Marketable Securities	229	177	52
Other Net Financial Income (Expenses)	190	540	(350)
Other Net FX and Monetary Variation	(194)	474	(668)
<b>Net Financial Results</b>	<b>(849)</b>	<b>2,405</b>	<b>(3,254)</b>

**An increase in equity income (R\$ 735 million), chiefly due to the lower result from the petrochemical sector in the 4Q-2008 (R\$ 586 million), in turn caused by the impact of the exchange variation on the debt of its investees in the 4Q-2008.**

**A negative minority interest impact (R\$ 2,290 million), due to the result from the Special Purpose Companies in the 4Q-2008, in turn caused by the impact of the exchange variation on their debt.**

**An increase in income tax and social contributions (R\$ 1,081 million), due to the tax benefit resulting from the provisioning of interest on equity in the 4Q-2008.**

**PETROBRAS SYSTEM**

Operating Performance

Increased output from P-52 and P-54 (Roncador) and the start-up of P-53 (Marlim Leste) and P-51 (Marlim Sul), in the 4Q-2008 and the 1Q-2009, respectively, more than offset the natural decline in the mature fields.

The increase in production was due to the platforms recently installed in the Marlim Sul (P-51) and Marlim Leste (P-53) fields.

International oil and NGL production increased due to the start-up of production from the Agbami field in Nigeria in July 2008, partially offset by the reduction in Ecuador due to the sale of part of the interest in Block 18, and in the USA, due to the hurricane damage in September 2008, which is not yet fully repaired.

Gas production fell by 8% due to the reduction in Brazil's imports of Bolivian gas, in turn caused by the shut-down of gas-powered thermal plants as a result of increased production by the hydroelectric plants, which were operating at high levels due to heavy rainfall.

International oil and NGL production fell due to the sale of part of the interest in Block 18 in Ecuador in the 4Q-2008, offset by the increase in Nigerian production thanks to the start-up of the new well in the Agbami field (AGB-16) in January 2009 and the start-up of the Akpo field in March 2009.

Gas production fell by 6%, due to the reduction in Brazil's imports of Bolivian gas in the 1Q-2009, offset by the increase in Argentina due to the start-up of the new plant in the Medanito field.

**PETROBRAS SYSTEM**

Operating Performance

Processed crude volume in the Brazilian refineries in the 1Q-2009 was virtually identical to the 1Q-2008.

The quarterly increase was due to the resumption of operations in the REVAP distillation unit after the scheduled stoppage in the 4Q-2008.

Processed crude in the overseas refineries rose by 58% due to the inclusion of the Japanese refinery acquired in April/08, in addition to the resumption of normal activities in the Pasadena refinery in the USA following the programmed stoppage.

In comparison with the 4Q-2008, processed crude in the overseas refineries increased by 4% due to the return to normal operations in the USA, after the passage of hurricane Ike in September 2008, and the conclusion of the repairs to the catalytic cracking plant.

Excluding the impact of the appreciation of the Real, the lifting cost in Brazil climbed by 7% over the 1Q-2008 due to the increased well interventions and equipment maintenance, the higher initial unit cost of the new production systems, which will gradually come down as production moves up, and the increase in personnel expenses arising from the 2008/09 collective bargaining agreement.

Excluding the impact of the appreciation of the Real, the unit lifting cost in Brazil fell by 4% due to higher expenses with well interventions in the 4Q-2008.

**PETROBRAS SYSTEM**

Operating Performance

The decline in the average Brazilian oil price, following the sharp drop in international prices, led to a reduction in the lifting cost, partially offset by the increase in the tax rate, especially in the Roncador and Espadarte fields, due to increased output from the new platforms.

The unit lifting cost fell by 19% chiefly due to the decline in the average Brazilian oil price used to calculate the government take, based on the international price.

The international unit lifting cost increased due to decreased output caused by the sale of part of Block 18 in Ecuador, which has a lower cost than the international average, associated with initial production costs in the Akpo field in Nigeria.

The quarter-over-quarter reduction was due to higher material and third-party service costs in Argentina in the 4Q-2008 and increased well interventions, as well as the adjustment of contracted services, partially offset by the increase generated by the decline in production.

**PETROBRAS SYSTEM**

Operating Performance

Excluding the impact of the appreciation of the Real, the domestic refining cost fell by 4% year-on-year due to reduced expenses from scheduled stoppages and third-party services, and lower electricity costs.

Excluding the exchange impact, the domestic refining cost increased by 12% over the 4Q-2008 due to the upturn in catalyst prices, higher consumption of materials and chemical products and greater expenditure on conservation and repairs.

The international refining cost fell due to the higher volume of processed crude and reduced maintenance costs, thanks to the return to normal operations of the Pasadena refinery after the scheduled stoppage in the 1Q-2008, associated with the inclusion of the Japanese refinery as of April 2008 which has a lower refining cost than the international average.

The quarter-over-quarter upturn was chiefly due to third-party services arising from the scheduled stoppage to the alkylation unit in the USA in February 2009.

**PETROBRAS SYSTEM**

Operating Performance

Excluding the impact of the depreciation of the Real, corporate overhead fell by 2% over the 1Q-2008 due to the Company's cost optimization measures, especially reduced expenses from advertising and data-processing services, partially offset by the upturn in personnel expenses.

Discounting the appreciation of the Real, corporate overhead fell by 21% over the previous quarter, also due to the Company's cost optimization measures, especially reduced expenses from specialized technical services, data processing, advertising and sponsorships.

**Sales Volume    thousand barrels/day**

Domestic sales volume fell by 8% over the 1Q-2008, led by diesel, naphtha and natural gas sales. Diesel sales were impacted by the non-operation of the emergency diesel-powered thermal plants in the 1Q-2009 (as occurred last year), the increase in the percentage of biodiesel to 3% as of July/2008 and the substantial decline in industrial output. Naphtha sales fell due to the crisis that affected the entire petrochemical chain as of the final quarter of 2008, resulting in reduced orders from the cracking plants. Natural gas sales were also jeopardized by lower consumption in the non-thermal market thanks to the economic crisis. Other factors contributing to the downturn included the bursting of the Transpetro gas pipeline due to the heavy rainfall in the south of Brazil and the replacement of gas by fuel oil due to the price differential.

Exports increased 16% year-on-year, led by oil, thanks to increased output, especially from the operational start-up of FPSO Cidade de Rio das Ostras (Badejo), P-53 (Marlim Leste), P-51 (Marlim Sul) and FPSO Cidade de Niterói (Marlim Leste).

International sales increased 22% year-on-year, primarily due to the inclusion of sales volume from the Japanese refinery acquired in April 2008, as well as the increase in trading operations.

<sup>(1)</sup> Comments on the results by business area begin on page 16 and their respective financial statements on page 26.

<sup>(2)</sup> In the international business segment, given that all operations are executed abroad, comparisons between the periods are influenced by foreign exchange variations in dollars or in the currency of those countries in which the companies in question are headquartered. As a result, there may be substantial variations in Reais, primarily arising from and reflecting changes in the exchange rate.

**PETROBRAS SYSTEM**

Operating Performance

**RESULTS BY BUSINESS AREA**

Petrobras is a company that operates in an integrated manner, with the greater part of oil and gas production from the Exploration and Production area being sold or transferred to other Company areas.

The main criteria used to report results per business area are as follows:

- a) Net operating revenues: revenues from sales to external clients, plus intra-Company sales and transfers, using internal transfer prices established between the various areas as a benchmark, with assessment methodologies based on market parameters;
- b) Operating income: net operating revenues, plus the cost of goods and services sold, which are reported per business area considering the internal transfer price and other operating costs for each area, plus the operating expenses effectively incurred by each area;
- c) The entire financial result is allocated to the corporate group;
- d) Assets: refers to the assets as identified by each area. Equity accounts of a financial nature are allocated to the corporate group.

The lower result reflected the new level of international oil prices and the decrease in natural gas sale/transfer volume, due to reduced demand, and the increase in exploratory costs due to the write-off of dry or economically unviable wells and higher geological and geophysical costs.

Part of these effects were offset by the 7% increase in average daily oil and NGL production and the lower government take.

The spread between the average domestic oil sale/transfer price and the average Brent price widened from US\$ 10.77/bbl in the 1Q-2008 to US\$ 12.17/bbl in the 1Q09.

The quarter-over-quarter reduction was due to the decline in international oil prices and the reduction in gas sale/transfer volume, due to reduced demand, partially offset by the following factors:

The lower government take;

The 5% increase in daily oil and NGL production;

Estimated losses from the impairment of assets booked in the 4Q-2008.

The spread between the average domestic oil sale/transfer price and the average Brent price rose from US\$ 6.96/bbl in the 4Q-2008 to US\$ 12.17/bbl in the 1Q09.

The improvement in the Supply result was due to lower oil acquisition/transfer and oil products imports costs, reflecting the change in international price levels.

These effects were partially offset by higher freight charges on exports and trading transactions due to increased sales volume.

**PETROBRAS SYSTEM**

Operating Performance

The increase in the quarter-over-quarter result was due to the following factors:

Reduced oil acquisition/transfer costs and the decline in oil product import costs;

Lower SG&A expenses due to the reduction in freight costs;

The decline in provisions for the reduction of inventories to market value;

Higher equity income, reflecting the impact of the devaluation of the Real against the dollar on the debt of petrochemical investees in the 4Q-2008.

These effects were partially offset by:

The decrease in domestic sales volume, reflecting the seasonal behavior of the agricultural and industrial sectors;

The 7% reduction in average realization prices in Brazil, despite the maintenance of gasoline and diesel prices.

The improved result was due to the reduction in penalties for failure to supply thanks to the greater availability of infrastructure and greater gas supply flexibility, as well as lower electricity purchase costs due to the reduction in the difference settlement price. These effects were partially offset by reduced thermoelectric output thanks to the increased level of the hydroelectric reservoirs and the decline in natural gas sales volume.

The quarter-over-quarter operating result recorded an improvement due to lower costs from the sale of electricity (thanks to the reduction in spot market acquisition costs) and natural gas imports (due to the decline in the international natural gas price). These effects were partially offset by reduced demand for thermal energy (thanks to the increased level of the hydroelectric reservoirs) and the decline in gas sales volume.

However, this was more than offset by the reduction in minority interests, reflecting improved results from the Special Purpose Companies and subsidiaries in which Petrobras does not retain a 100% stake, which led to a reduction in the net result.

**PETROBRAS SYSTEM**

Operating Performance

The decline was caused by narrower sales margins, in turn due to lower average realization prices. This was partially offset by the 7.9% upturn in sales volume, primarily thanks to the consolidation of ALVO Distribuidora, despite the consequent increase in SG&A expenses.

The Company's share of the fuel distribution market climbed from 35.9% in the 1Q-2008 to 38.8% in the 1Q-2009.

The lower result reflected the narrower sales margins due to the reduction in average realization prices, partially offset by the decrease in SG&A expenses caused by the reduction in provisions for doubtful debts and expenses from the 2008/09 collective bargaining agreement booked in the 4Q-2008.

The segment recorded a 38.8% share of the fuel distribution market in the 1Q-2009, versus 34.7% in the previous quarter.

The main events impacting the reduction were: i) the constitution of provisions for losses on investments in the USA (R\$ 341 million); and ii) the decline in international oil prices.

Higher refining volumes and margins in the USA and Japan, together with the improved performance of joint refining and distribution operations in Argentina, increased gross profit by R\$ 592 million.

The following factors also contributed to the improvement:

The reduction in exploration costs, especially seismic and geological expenses (R\$ 281 million) and the write-off of dry or economically unviable wells (R\$ 103 million);

Estimated impairment of assets in the 4Q-2008 (R\$ 325 million);

The reduction in losses from the devaluation of inventories in the USA and Japan (R\$ 436 million);

Losses from the devolution of Block 31 in Ecuador in the 4Q-2008 (R\$ 182 million).

These events were partially offset by the constitution of provisions for losses on investments in the USA (R\$ 341 million).

**PETROBRAS SYSTEM**

Operating Performance

The increase in the negative result was due to the upturn in the negative financial result (R\$ 613 million), as dealt with on page 5, partially offset by the increase in income tax and social contribution credits.

The reduced result was due to the reduction in the net financial result (R\$ 3,254 million), as mentioned on page 7, and the reversal of minority interest, reflecting the impact of the 4Q-2008 devaluation of the Real against the dollar on the debt of Special Purpose Companies and subsidiaries in which Petrobras and its subsidiaries do not retain a 100% stake.

<b>Total</b>	<b>30,368</b>	<b>27,691</b>	<b>10</b>

The net debt of the Petrobras System increased by 4% over the 4Q-2008 due to financing operations in the international market, especially the issue of global notes, and pre-shipment export financing. Most of the proceeds were allocated to financing the Company's 2009/2013 business plan and its oil imports.

The level of indebtedness, measured by the net debt/EBITDA ratio, increased from 0.85 on December 31, 2008, to 0.95 on March 31, 2009. The portion of the capital structure represented by third parties was 49%, one percentage point down on the close of December 31, 2008.

## PETROBRAS SYSTEM

## Operating Performance

## Consolidated Investments

In compliance with the goals outlined in its strategic plan, Petrobras continues to prioritize investments in the expansion of its oil and natural gas production capacity by investing its own funds and by structuring ventures with strategic partners. On March 31, 2009, total investments amounted to R\$ 14,380 million, 41% up on the total on March 31, 2008.

In line with its strategic objectives, PETROBRAS acts in consortiums with other companies as a concessionaire of oil and natural gas exploration, development and production rights. Currently the Company is a member of 108 consortiums. These ventures will require total investments of around US\$ 15,325 million by the end of 2009.

## PETROBRAS SYSTEM

## Appendices

**1. Petroleum and Ethanol Accounts National Treasury**

In order to settle the accounts with the federal government, in accordance with Provisional Measure No. 2181 of August 24, 2001, Petrobras, after having submitted all the information required by the National Treasury (STN), is seeking to reconcile the remaining differences between the parties.

The account balance of R\$ 813 million on March 31, 2009 (R\$ 810 million on December 31, 2008), may be paid by the federal government through the issuance of National Treasury bonds, in an amount equal to the final settlement amount or with other amounts that Petrobras may owe to the federal government, including those related to taxes, or through a combination of these options.

**2. Consolidated Taxes and Contributions**

The economic contribution of Petrobras to the country, measured through the generation of current taxes, duties and social contributions, totaled R\$ 13,211 million.

		R\$ million		
		1st Quarter		
4Q-2008		2009	2008	Δ %
	<b>Economic Contribution - Country</b>			
	<b>Value Added Tax on Sales and Services</b>

<b>14.520</b>	<b>Total</b>	<b>14.290</b>	<b>15.494</b>	(8)

<sup>(1)</sup> CIDE ECONOMIC DOMAIN CONTRIBUTION CHARGE.

**3. Government Take**

		R\$ million		
		1st Quarter		
4Q-2008		2009	2008	Δ %
	<b>Country</b>			

Edgar Filing: PETROBRAS - PETROLEO BRASILEIRO SA - Form 6-K

1,934	<i>Royalties</i>	1,646	2,397	(31)
2,073	Special Participation	1,278	2,430	(47)
34	Surface Rental Fees	29	30	(3)
<b>4,041</b>	<b>Subtotal Country</b>	<b>2,953</b>	<b>4,857</b>	<b>(39)</b>
162	<b>Foreign</b>	96	146	(34)
<b>4,203</b>	<b>Total</b>	<b>3,049</b>	<b>5,003</b>	<b>(39)</b>

The government take in the country in the 1Q-2009 fell by 39% over the 1Q-2008, due to the 41% decline in the reference price for local oil, which averaged R\$ 84.14 (US\$ 36.41) in the 1Q-2009, versus R\$ 142.47 (US\$ 82.12) in the same period in 2008, reflecting the average Brent price on the international market.

In relation to the 4Q-2008, the government take fell by 27%, due to the 15% reduction in the reference price for local oil, which averaged R\$ 84.14 (US\$ 36.41) in the 1Q-2009, versus R\$ 98.64 (US\$ 43.79) in the 4Q-2008, reflecting the average Brent price in the international market, exceeding the impact of the change in the tax rate due to increased output from the new systems throughout 2008.

## PETROBRAS SYSTEM

## Appendices

## 4. Reconciliation of Consolidated Shareholders Equity and Net Income

	R\$ millions	
	Shareholders Equity	Results
. According to PETROBRAS information	150,390	6,161
. Profit in the sales of products in affiliated inventories	(508)	(508)
. Reversal of profits on inventory in previous years	-	660
. Capitalized interest	(409)	6
. Absorption of negative net worth in affiliated companies *	(4,727)	(508)
. Other eliminations	(339)	5
. According to consolidated information	144,407	5,816

\* Pursuant to CVM Instruction 247/96, losses considered temporary on investments evaluated by the equity method, where the investee shows no signs of stoppage or the need for financial support from the investor, must be limited to the amount of the controlling company's investment. Thus losses generated by unfunded liabilities (negative shareholders' equity) of the controlled companies did not affect the results or shareholders' equity of Petrobras on March 31, 2009, generating a conciliatory item between the Financial Statements of Petrobras and the Consolidated Financial Statements.

## 5. Performance of Petrobras Shares and ADRs

4Q-2008	Nominal Change	
	1st Quarter	
	2009	2008
-34.89% Petrobras ON	28.70%	-14.60%
-34.93% Petrobras PN	25.00%	-16.30%

## FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
