December 2011 – adjusted management figures; November 2012 – National Civil Aviation Industry (ANAC)

### Domestic Market

During the month of December, **GOL continued with its strategy of streamlining supply in the domestic market.** The closing of Webjet's operations, at the end of November, contributed to a 21.0% decrease in supply on the domestic market. GOL is focused on accelerating the resumption of its positive operating margins and it has **shown a 5.4% reduction in domestic supply, year over year, approximately 1 p.p. above the forecast announced for 2012.** As such, the Company is reaffirming its commitment to the **rational addition of supply to the domestic market.**

The domestic market's load factor was up 2.9 p.p. from December 2011, reaching 72.7% for the period. Due to the reduced supply cited above, **demand** for the period dropped 13.9% from the previous year.

### International Market

The international **supply** for the month of December increased 13.9% over the same period last year, mainly due to the approximately 50% increase in international charter operations seeking to meet the additional international demand for the high season and the new daily operations to Santo Domingo and Miami, which began in December 2012.

**GOL Linhas Aéreas Inteligentes S.A**

---

**Demand** for the period increased 10.8% due to the increased supply described above. The international load decreased by 1.6 p.p. year over year.

### Load Factor, Yield and Fuel Prices

GOL's **total load factor reached 70.9%, up 4.9 p.p.** from the same month last year.

In the same period, consolidated net yield increased by close to 7%\*, to between 23.0 and 23.5 centavos (R\$). The consolidated net yield for 4Q12 increased by approximately 5%YoY, to between 21.9 and 22.4 centavos (R\$).

PRASK once again showed double digit growth in the year over year comparison, up approximately 14% from December 2011\*. This increase was due to steps taken to rationalize the domestic supply, which GOL began in March 2012. PRASK in 4Q12 was up approximately 11% over 4Q11.\*

Fuel prices\*\* for the month increased approximately 25% year over year. Fuel prices in 4Q12 were up approximately 20% over 4Q11, to between R\$2.39 and R\$2.44.

(\*) 2011 RPK adjusted in accordance with operating data recalculated based on the current ANAC Manual. (\*\*) Fuel prices are calculated by dividing the total cost of fuel and lubricants by the estimated consumption for the period.

### 4Q12 Traffic Figures

<i>Total System</i>			
ASK (mm)	12,353.9	14,422.2	-14.3%

**FORWARD-LOOKING STATEMENTS**

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
