In 1Q16, net operating revenue, including construction revenue, reached R\$ 3.0 billion; a 22.7% increase compared to the same period of 2015.

Costs and expenses, including construction costs, totaled R\$ 2.4 billion, 76.3% higher than the R\$ 1.4 billion recorded in 1Q15.

Adjusted EBIT, in the amount of R\$ 623.1 million, dropped 43.6% from R\$ 1,104.2 million recorded in 1Q15.

Adjusted EBITDA, in the amount of R\$ 907.8 million, reduced 33.1% from R\$ 1,357.5 million recorded in 1Q15 (R\$ 3,524.6 million in the last 12 months).

The adjusted EBITDA margin was 30.0% in 1Q16, versus 55.0% in 1Q15 (28.7% in the last 12 months). Excluding construction revenues and construction costs, the adjusted EBITDA margin was 37.2% in 1Q16 (71.6% in 1Q15 and 38.8% in the last 12 months).

In 1Q16 the Company recorded a net income of R\$ 628.8 million, in comparison to a net income of R\$ 318.2 million in 1Q15.

2. Gross operating revenue

Gross operating revenue from water and sewage, not including construction revenue, totaled R\$ 2.6 billion, an increase of R\$ 566.1 million or 28.2%, when compared to the R\$ 2.0 billion recorded in 1Q15.

The main factors that led to this variation were:

- 15.2% tariff increase (7.8% ordinary tariff adjustment and 6.9% extraordinary tariff revision) since June 2015;
- Lower bonus granted within the Water Consumption Reduction Incentive Program, with a R\$ 153.8 million impact in 1Q16, versus the R\$ 211.2 million recorded in 1Q15;
- Application of contingency tariff, in the amount of R\$ 160.6 million in 1Q16 (R\$ 79.3 million in 1Q15); and
- Increase of 1.9% in the Company's total billed volume (1.0% in water and 3.0% in sewage).

3. Construction revenue

Construction revenue increased R\$ 36.9 million or 6.3%, when compared to the previous year. The variation was mainly due to higher investments in the municipalities served by the Company.

5. Costs, administrative, selling and construction expenses

In 1Q16, costs, administrative, selling and construction expenses, grew 76.3% (R\$ 1,041.3 million). Excluding construction costs, total costs and expenses increased by 127.4%.

Excluding the effects of the non-recurring GESP Reimbursement transaction, costs and expenses increased by 16.7%.

As a percentage of net revenue, costs and expenses were 55.3% in 1Q15 and 79.5% in 1Q16. Excluding the effects of the GESP Reimbursement effects, costs and expenses as a percentage of net revenue came to 83.5% in 1Q15.

5.1. Payroll and benefits and pension plan obligations

In 1Q16 payroll and benefits increased R\$ 39.8 million or 7.4%, due to the following:

- R\$ 18.8 million in the provision for the pension plan, arising from changes in actuarial assumptions;
- R\$ 14.5 million, mainly due to the average wage increase of 9.7% in May 2015 and by the application of 1% related to the career and wage plan, since July 2015; and
- R\$ 5.9 million, due to the adjustment in healthcare expenses since July 2015.

5.2. Supplies

In 1Q16, expenses with supplies decreased R\$ 12.5 million or 25.7%, from R\$ 48.7 million to R\$ 36.2 million, mostly due to the following:

- Fuel, in the amount of R\$ 6.7 million, mostly due to the fact that the generators used to pump water from the Cantareira System technical reserve were turned off in December 2015; and
- Lower use of materials in preventive and corrective maintenance in water and sewage systems, in computerized systems and conservation of properties and installations, in the amount of R\$ 5.9 million.

PAGE: 16 de 72

5.3. Services

Services expenses, in the amount of R\$ 282.4 million, dropped R\$ 13.5 million or 4.6%, in comparison to R\$295.9 million in 1Q15. The main factors that led to this decrease were:

- Water and sewage systems and connections maintenance, in the amount of R\$ 10.3 million; and
- Advertising campaigns, in the amount of R\$ 4.0 million, mainly due to the intensification in 1Q15, for the rational use of water.

5.4. Electric power

Electric power expenses totaled R\$ 240.4 million, an increase of R\$ 81.3 million or 51.1% in comparison to the R\$ 159.1 million in 1Q15. The main factors that contributed to this increase were:

- Average increase of 38.3% in the regulated market tariffs, with no significant variation in consumption;
- Average increase of 165.2% in the grid market tariffs (TUSD), with a 5.3% decrease in consumption; and
- Average increase of 10.5% in the free market tariff, with a 7.5% decrease in consumption.

In 1Q16 the regulated market accounted for 39.3% of the total electric power consumed by the Company, the free market accounted for 31.0% and the grid market accounted for 29.7% of total consumption.

5.5. General expenses

General expenses increased R\$ 170.2 million, totaling R\$ 224.6 million, versus the R\$ 54.4 million recorded in 1Q15, mainly due to:

- R\$ 138.7 million increase in the provision for lawsuits; and
- Higher provision for the Municipal Fund for Environmental Sanitation and Infrastructure, in the amount of R\$ 27.7 million, as a result of the increase in revenues with the municipality of São Paulo.

5.6. São Paulo state government reimbursement

In 1Q15, the Company entered into an agreement with the São Paulo state government to receive the undisputed amount, related to the state's debt with the Company, for the payment of the benefits to former employees (G0) dealt with by state Law #4,819, of August 26, 1958, that generated a credit in the result in the amount of R\$ 696.3 million.

PAGE: 17 de 72

5.7. Depreciation and amortization

R\$ 31.4 million increase or 12.4%, reaching R\$ 284.7 million in comparison to the R\$ 253.3 million recorded in 1Q15, largely due to the beginning of operations of intangible assets, in the amount of R\$ 2.4 billion.

5.8. Provision for doubtful credits

Increased R\$ 8.8 million, mainly due to the lower recovery of amounts through settlements in 1Q16, in the amount of R\$ 12.8 million, partially offset by the reduction in provisions for revenue losses, in the amount of R\$ 4.0 million.

6. Other operating revenues (expenses), net

Other net operational revenues and expenses reported a negative variation of R\$ 26.6 million, mainly due to the R\$ 21.5 million drop from the sale of surplus electricity between the analyzed periods.

Financial expenses net of revenues	(99.8)	(63.8)	(36.0)	56.4

7.1.1. Financial expenses

Financial expenses grew R\$ 48.0 million. The main reasons were:

- R\$ 7.2 million in interest and charges on international borrowings and financing, due to the increase in the debt balance, despite the depreciation of the US dollar and the Yen versus the Brazilian Real in 1Q16 (-8.9% and -2.4%, respectively);
- R\$ 8.5 million in interest and charges on domestic borrowings and financing, especially due to the funding of the 20th debenture issue, in December 2015; and
- R\$ 32.3 million in other financial expenses, largely due to the higher provision of interest on lawsuits in 1Q16.

7.1.2. Financial income

Financial income increased R\$ 12.0 million, largely due to the increased recognition of interest on installment agreements and financial investments in 1Q16.

1**7.2. Monetary and exchange rate variation on assets and liabilities**

	<i>R\$ million</i>			
Monetary variation on loans and financing	(52.9)	(56.2)	3.3	(5.9)
Currency exchange variation on loans and financing	483.3	(884.5)	1,367.8	(154.6)

Monetary/exchange rate variation, net	440.0	(922.0)	1,362.0	(147.7)

The effect in 1Q16 was R\$ 1,362.0 million, lower than in 1Q15, especially due to the positive variation of R\$ 1,367.8 million in expenses with exchange rate variation on borrowings and financing, due to the depreciation of the US dollar and the Yen versus the Brazilian Real in 1Q16 (-8.9% and -2.4%, respectively), when compared to the appreciation recorded in 1Q15 (20.8% and 20.3%, respectively). This amount was partially offset by the increase of R\$ 32.9 million from higher provisions for the monetary restatement of lawsuits in 1Q16.

8. Income tax and social contribution

Grew R\$ 507.7 million, due to the increase in taxable income in 1Q16, when compared to the net loss recorded in 1Q15.

9. Indicators

9.1. Operating

In the first quarter of 2016, due to the greater availability of water, production volume increased by 8.8%.

Water losses moved up this quarter, although this was already expected given that the reduction observed until now was not only due to the loss control initiatives, but was also to the water crisis and the consequent need to lower network pressures as a means of managing demand.

Notes to the Interim Financial Information

1 Operations

Companhia de Saneamento Básico do Estado de São Paulo ("SABESP" or the "Company") is a mixed-capital company headquartered in São Paulo, at Rua Costa Carvalho, 300, CEP 05429-900, controlled by the São Paulo State Government. The Company is engaged in the provision of basic and environmental sanitation services in the State of São Paulo, as well as it supplies treated water and sewage services on a wholesale basis.

In addition to providing basic sanitation services in the State of São Paulo, SABESP may perform these activities in other states and countries, and can operate in drainage, urban cleaning, solid waste handling and energy markets. The objective set in the new vision of SABESP is to be recognized as the company that ensured universal access to water and sewage services in its marketplace, in a sustainable and competitive manner, with excellence in customer service.

As of March 31, 2016, the Company operated water and sewage services in 365 municipalities of the State of São Paulo. Most of these municipalities operations are based on 30-year concession, program and services contracts. The Company has two partial contracts with the municipality of Mogi das Cruzes, however, since most of municipality is serviced by wholesale, it was not included in the 365 municipalities. As of March 31, 2016, the Company had 367 contracts.

SABESP is not temporarily operating in some municipalities due to judicial orders. The lawsuits in progress refer to Cajobi, Iperó and Macatuba, and the carrying amount of these municipalities' intangible assets was R\$9,573 as of March 31, 2016 (R\$9,574 as of December 31, 2015).

As of March 31, 2016, 53 concession agreements had expired and are being negotiated. From March 31, 2016 to 2030, 36 concession agreements will expire. Management believes that concession agreements expired and not yet renewed will result in new contracts, disregarding the risk of discontinuity in the provision of municipal water supply and sewage services. By March 31, 2016, 278 program and services contracts were signed (278 contracts as of December 31, 2015).

As of March 31, 2016, the carrying amount of the underlying assets used in the 53 concessions of the municipalities under negotiation totaled R\$6,203,708, accounting for 21.47% of the total, and the related gross revenue for the three-month period then ended totaled R\$404,268, accounting for 12.65% of the total.

The Company's operations are concentrated in the municipality of São Paulo, which represents 52.83% of the gross revenues as of March 31, 2016 (46.75% as of March 31, 2015) and 43.89% of intangible assets (43.37% as of December 31, 2015).

On June 23, 2010, the State of São Paulo, the Municipality of São Paulo, the Company and the regulatory agency "Sanitation and Energy Regulatory Agency – ARSESP" signed an agreement to share the responsibility for water supply and sewage services to the Municipality of São Paulo based on a 30-year concession agreement. This agreement is extendable for another 30 years, pursuant to the law. This agreement sets forth SABESP as the exclusive service provider and designates ARSESP as regulator, establishing prices, controlling and monitoring services.

Also, on June 23, 2010, the State of São Paulo, the Municipality of São Paulo and SABESP signed the "Public service provision agreement of water supply and sewage services", a 30-year concession agreement which is extendable for another 30 years. This agreement involves the following activities:

- i. protection of the sources of water in collaboration with other agencies of the State and the City;
- ii. capture, transport and treat of water;
- iii. collect, transport, treatment and final dispose of sanitary sewage; and
- iv. adoption of other actions of basic and environmental sanitation.

The Company operates under an authorization by public deed in some municipalities in the Santos coast region and in the Vale do Ribeira, where the Company started to operate after the merger of the companies that formed it. In September 2015, the Company entered into a water supply and sewage public utility services agreement with the municipality of Santos. Additional information is presented in Note 9(d) of the Annual Financial Statements of December 31, 2015.

Notes to the Interim Financial Information

Article 58 of Law 11,445/07 determines that precarious and overdue concessions, as well as those effective for an undetermined period of time, including those that do not have an instrument formalizing them, will be valid until December 31, 2010. However, Article 2 of Law 12,693 of July 24, 2012, which amended Article 7-A of Law 11,578 of November 26, 2007, allows program agreements to be executed until December 31, 2016.

The Company's Management understands that the concession agreements not yet renewed are valid and will be governed by Laws 8,987/95 and 11,445/07, including those municipalities served without an agreement.

Public deeds are valid and governed by the Brazilian Civil Code.

The Company's shares have been listed in the Novo Mercado (New Market) segment of BM&FBovespa under the ticker symbol SBSP3 since April 2002 and on the New York Stock Exchange (NYSE) as American Depositary Receipts ("ADRs") Level III, under the SBS code, since May 2002.

Since 2008, the Company has been setting up partnerships with other companies, which resulted in the following companies: Sesamm, Águas de Andradina, Saneaqua Mairinque, Aquapolo Ambiental, Águas de Castilho, Attend Ambiental and Paulista Geradora de Energia. Although SABESP has no majority interest in the capital stock of these companies, the shareholders' agreements provide for the power of veto and casting vote in certain issues jointly with associates, indicating the shared control in the management of investees.

In the first quarter of 2016, the Company's operations were still influenced by the 2014-2015 water shortage, which presented the lowest rainfall and inflow ever seen in 85 years, especially in the reservoirs composing the Cantareira System. During the rainy season, from October 2015 to March 2016, rainfall in the region returned to the normal levels expected for the period. Improved rainfall during the rainy season, which began in October 2015, the various measures adopted by the Company to mitigate water shortage impacts and continue serving the population, the

collaboration of the population in water saving and the emergency works undertaken in 2014 and 2015 resulted in the partial recovery of water levels in the reservoirs of the Cantareira System.

The Company has adopted several between February 2014 and the first months of 2016, such as:

- Using pumps to remove water below the catchment level of the Cantareira System, the so-called “technical reserve”;
- Offering of financial incentives to reduce consumption through bonus granted to consumers, whose volume consumed is below the average stipulated;
- Using treated water from other producing systems to serve consumers previously supplied by the Cantareira System;
- Intensifying the advertising campaigns towards the rational use of water;
- Reducing pressure in the distribution network, in order to prevent water losses;
- Adjusting the treated water volume sold to municipalities which operate their own distribution networks, due to lower availability;
- Anticipating investments to expand water safety in the Metropolitan Region of São Paulo - RMSP
- Performing short-term emergency works to increase water availability in the reservoirs, improving and optimizing supply systems in the RMSP, thereby lessening the impacts arising from the drought;
- Installing of ultrafiltration membranes which enabled rapid increase in the Guarapiranga and in the Rio Grande Systems’ water production; and
- Implementing of the contingency tariff for consumers whose volume consumed is above the average stipulated.

At the end of September 2015, the main work was concluded and delivered to contribute to the water supply in the Metropolitan Region of São Paulo. This interconnection will enable the transfer of up to 4m³/s of the Rio Grande Reservoir (Billings) to the Alto Tietê System, bringing more water safety so that this system expand to regions previously served only by the Cantareira System.

Notes to the Interim Financial Information

Due to the normalization of rainfall in the rainy season, between October 2015 and January 2016, it was no longer necessary to pump water from the technical reserve of the PCJ Basin and the rules to obtain discounts (bonus) were changed in February 2016. As of March 24, 2016, in view of the increased rainfall and the predictability of water levels in the reservoirs, the Company requested ARSESP to cancel the Water Consumption Reduction Incentive Program and the Contingency Tariff. ARSESP complied with the Company's request as of March 31, 2016 and the cancellation of the Water Consumption Reduction Incentive Program and the Contingency Tariff will be applied to the hydrometer readings as of May 1, 2016. Additionally, since December 2015, the period in which the pumping of the water pressure is reduced in the pipelines is returning to normal, i.e., only at night, as it was before the water crisis.

The water reservation volume at the reservoirs relies on several factors, such as levels of rain, temperature and atmospheric humidity, as well as the type and humidity of soil in water resources regions.

This scenario of water shortage also had adverse effects for the Company. As a result, since 2014, the Company has taken decisions to minimize these effects, such as:

- Rearrangement of investments;
- Expense budget reduction,
- Negotiation of overdue receivables (until March 31, 2016, the Company included in the State CADIN a total of 39 municipalities with unpaid water bills, including those municipalities served by wholesale);
- Contracting guarantee insurance for escrow deposits; and
- Application of the extraordinary tariff revision since June 2015.

The Company's Management expects that these measures and its impacts in generating of operating cash and the lines of credit available for investments, will be sufficient to meet its short-term liabilities and not compromise the actions necessary to overcome the water shortage, preserving consumers' supply.

See other disclosures about this matter in Note 24 – operating revenue.

The interim financial information was approved by the Board of Directors on May 12, 2016.

2 Basis of preparation and presentation of the financial statements

Presentation of the quarterly financial information

The quarterly financial information as of March 31, 2016, was prepared based on the provisions of CPC 21 (R1) – Interim Financial Information and the international standard IAS 34 – Interim Financial Reporting, issued by the International Accounting Standards Board (IASB), applicable to the preparation of Quarterly Information Form– ITR and they are fairly presented consistent with the rules issued by the Brazilian Securities and Exchange Commission (CVM). Therefore, this Interim Financial Information takes into consideration the official letter CVM/SNC/SEP 003 of April 28, 2011, which allows the entities to present selected notes to the financial statements, in cases of redundant information already disclosed in the Annual Financial Statements. The interim financial information for March 31, 2016, therefore, does not include all the notes and reporting required by the annual financial statements, and accordingly, shall be read jointly with the Annual Financial Statements as of December 31, 2015, prepared pursuant to the International Financial Reporting Standards – IFRS, issued by the International Accounting Standards Board – IASB and pursuant to the accounting practices adopted in Brazil which observe the pronouncements issued by the Brazilian Accounting Pronouncements Committee- CPC.

3 Summary of significant accounting policies

The accounting policies used in the preparation of the quarterly financial information for the quarter ended March 31, 2016 are consistent with those used to prepare the Annual Financial Statements for the year ended December 31, 2015. These policies are disclosed in Note 3 to the Annual Financial Statements.

Notes to the Interim Financial Information

4 Risk Management

4.1 Financial Risk Management

Financial risk factors

The Company's activities are affected by Brazilian economic scenario, making it exposed to market risk (exchange rate and interest rate), credit risk and liquidity risk. The Company's financial risk management is focused on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance.

The Company has not utilized derivative instruments in any of the reported periods.

(a) Market risk Foreign currency risk

SABESP's foreign exchange exposure implies market risks associated with currency fluctuations, since the Company has foreign currency-denominated liabilities, mainly US dollar and yen-denominated short and long-term borrowings.

The management of SABESP's foreign currency exposure considers several current and projected economic factors, besides market conditions.

This risk arises from the possibility that the Company may incur in losses due to exchange rate fluctuations that would impact liability balances of foreign currency-denominated borrowings and financing raised in the market and related financial expenses. The Company does not maintain hedge or swap contracts or any derivative financial instrument to hedge against this risk.

A significant amount of the Company's financial debt is indexed to the U.S. dollar and Yen, in the total amount of R\$6,285,244 as of March 31, 2016 (R\$6,640,256 as of December 31, 2015). Below, the Company's exposure to exchange risk:

The 5% decrease in foreign-currency denominated debt between March 31, 2016 and December 31, 2015, was mainly due to the following:

- 1) Exchange rate changes, due to the 8.9% decrease in the US dollar, from R\$3.9048 as of December 31, 2015 to R\$3.5589 as of March 31, 2016. The US dollar-denominated debt accounts for 71.2% of foreign currency-denominated debts;
- 2) A 3.1% increase in Yen-denominated debt, due to the funding of JICA 19 loan agreement, in the amount of R\$137,167. This increase was reduced due to the 2.4% drop in the Yen exchange rate, from R\$0.03243 as of December 31, 2015, to R\$0.03166 as of March 31, 2016.

As of March 31, 2016, if the Brazilian real had depreciated or appreciated by 10% against the US dollar and Yen, effects on results before taxes on the three-month period ended March 31, 2016, considering the other variables are as remaining constant, in addition to the impacts mentioned above, would have been R\$628,524 (R\$664,026 December 31, 2015), lower or higher, mainly as a result of exchange losses or gains on the translation of foreign currency-denominated borrowings.

Scenario I below presents the effect in income statements for the next 12 months, considering the projected rates of the U.S. dollar and the Yen. Considering the other variables as remaining constant, the impacts for the next 12 months are shown in scenarios II and III with possible depreciations of 25% and 50%, respectively, in the Brazilian real.

(*) For the probable scenario in US dollar, the exchange rate estimated for March 31, 2017 was used, pursuant to the Focus Report – BACEN, while for the Yen, the average exchange rate was considered for the 12-month period after March 31, 2016, according to BM&FBovespa Reference Rate report.

Interest rate risk

This risk arises from the possibility that the Company could incur losses due to fluctuations in interest rates, increasing the financial expenses related to borrowings and financing.

The Company has not entered into any derivative contract to hedge against this risk; however continually monitors market interest rates, in order to evaluate the possible need to replace its debt.

The table below provides the Company's borrowings and financing subject to variable interest rate:

(v) LIBOR – London Interbank Offered Rate

PAGE: 26 de 72

Notes to the Interim Financial Information

Another risk to which the Company is exposed, is the mismatch of the monetary restatement indices of its debts with those of its service revenues. Water supply and sewage services tariff adjustments do not necessarily follow the increases in the inflation indexes to adjust borrowings, financing and interest rates affecting the Company's indebtedness.

As of March 31, 2016, if interest rates on borrowings and financing had been 1% higher or lower with all other variables held constant, the effects on profit before taxes for the three-month period ended March 31, 2016 would have been R\$80,829 (R\$89,246 in December 31, 2015), lower or higher, mainly as a result of lower or higher interest expense on floating rate borrowings and financing.

(b) Credit risk

Credit risk arises from cash and cash equivalents, deposits in banks and financial institutions, as well as credit exposures to wholesale basis and retail customers, including outstanding accounts receivable, restricted cash and accounts receivable from related parties. Credit risk exposure to customers is mitigated by sales to a dispersed base.

The maximum exposures to credit risk as of March 31, 2016 are the carrying amounts of instruments classified as cash equivalents, deposits in banks and financial institutions, restricted cash, trade receivables and accounts receivable from related parties in the balance sheet date. See additional information in Notes 6, 7, 8 and 9.

Regarding the financial assets held with financial institutions, the credit quality that is not past due or subject to provision for impairment can be assessed by reference to external credit ratings (if available) or to historical information about counterparty default rates. The credit quality of counterparties which are banks, such as deposits and financial investments, the Company considers the lower rating of the counterparty published by three main international rating agencies (Fitch, Moody's and S&P), according to internal policy of market risk management:

(*)This category includes current accounts and investment funds in banks, which have no credit rating information available.

The available credit rating information of the banks in which the Company made deposit transactions and financial investments in domestic currency (R\$ - domestic rating) during the period is as follows:

(c) Liquidity risk

The Company's liquidity is primarily reliant upon cash provided by operating activities, borrowings from Brazilian Federal and State governmental financial institutions, and financing in the domestic and international capital markets. The liquidity risk management considers the assessment of its liquidity requirements to ensure it has sufficient cash to meet its operating and capital expenditures needs, as well as the payment of debts.

PAGE: 27 de 72

Notes to the Interim Financial Information

The funds held by the Company are invested in interest-bearing current accounts, time deposits and securities, selecting instruments with appropriate maturity or liquidity sufficient to provide margin as determined by projections mentioned above.

The table below shows the financial liabilities of the Company and São Lourenço PPP's commitments, into relevant maturities, including the installment of principal and future interest to be paid according to the agreement.

	April to December 2016	2017	2018	2019	2020	2021 onwards	Total

Program contract commitments	208,958	38,818	28,358	28,569	851	17,198	322,752

(*)The Company also considered future commitments (construction not yet performed) not yet recognized in the financial statements related to São Lourenço PPP, due to the relevance of future cash flows, the impacts on its operations and the fact the Company already has formalized this commitment through an agreement signed by the parties.

Future interest

Future interest was calculated based on the contractual clauses for all agreements. For agreements with floating interest rate, the interest rates used correspond to the base dates above.

Cross default

The Company has borrowings and financing agreements including cross default clauses, i.e., the early maturity of any debt, may imply the early maturity of these agreements. The indicators are continuously monitored in order to avoid the execution of this clause.

(d) Other price risks

The Company is exposed to the price risk of investment in equity instruments of Companhia de Transmissão de Energia Elétrica Paulista – CTEEP, solely held for trading purposes in the short term. These shares were received in March 2015 as payment for the 24 initial installments of the GESP Agreement (further information about the GESP Agreement can be found in Note 10 (a) (vii) to the Annual Financial Statements of December 31, 2015). The balance totaled R\$107,275 as of March 31, 2016 and is recorded under “other receivables” in current assets. As disclosed in Note 30, these shares were sold on April 20, 2016 for R\$111.1 million.

Sensitivity analysis of equity instruments price

The sensitivity analysis was determined based on the exposure to the equity instruments price at the end of the reporting period.

As of March 31, 2016, if the equity instrument had appreciated or depreciated by 10%, compared to its market value, with all other variables held constant, the effect on results before taxes on the period would R\$10,727, higher or lower.

Notes to the Interim Financial Information**(e) Sensitivity analysis on interest rate risk**

The table below shows the sensitivity analysis of the financial instruments, prepared in accordance with CVM Rule 475/2008 in order to evidence the balances of main financial assets and liabilities, calculated at a rate projected until the final settlement of each contract, considering a probable scenario (scenario I), appreciation of 25% (scenario II) and 50% (scenario III).

The purpose of the sensitivity analysis is to measure the impact of changes in the market over the financial instruments of the Company, considering constant all other variables. In the time of settlement, the amounts can be different from those presented, due to the estimates used in the measurement.

Notes to the Interim Financial Information**4.2 Capital management**

The Company's objectives when managing capital are ensure its ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders, and to maintain an optimal capital structure to reduce the cost of capital.

The Company monitors capital based on the leverage ratio. This ratio corresponds to net debt divided by total capital. Net debt corresponds to total borrowings and financing less cash and cash equivalents. Total capital is calculated as total equity as shown in the balance sheet plus net debt.

	March 31, 2016	December 31, 2015
Total borrowings and financing (Note 15)	12,193,176	13,121,600
(-) Cash and cash equivalents (Note 6)	(1,431,876)	(1,639,214)
Net debt	10,761,300	11,482,386
Total equity	14,345,395	13,716,606
Total capital	25,106,695	25,198,992
Leverage ratio	43%	46%

The leverage ratio decreased from 46% as of December 31, 2015 to 43% as of March 31, 2016, due to the decreased balance of foreign-currency denominated borrowings and financing as a result of 8.9% and 2.4% depreciations of the US dollar and the Yen, respectively, on March 31, 2016.

4.3 Fair value estimates

It is assumed that balances from trade receivables (current) and accounts payable to suppliers by carrying amount, less impairment, approximate their fair values, considering the short maturity. Long-term trade receivables also approximate their fair values, as they will be adjusted by inflation and/or will bear contractual interest rates over time.

4.4 Financial instruments

The Company has CTEEP's shares, which are classified as financial asset held for trading and are recognized at fair value through profit or loss. This is the only financial instrument item of this category at March 31, 2016 and December 31, 2015. The Company's financial instruments included in the borrowings and receivables category comprise cash and cash equivalents, trade receivables, related party balances, other receivables, balances receivable from the Water National Agency – ANA, and the financial instruments under other liabilities category comprised accounts payable to contractors and suppliers, borrowings and financing, balances payable deriving from the Public Private Partnership-PPP and program contract commitments, which are non-derivative financial assets and liabilities with fixed or determinable payments, not quoted in an active market.

As of March 31, 2016, the Company did not have financial liabilities classified as fair value through profit or loss.

The estimated fair values of financial instruments are as follows:

Additionally, SABESP has financial instrument assets receivables from related parties, in the amount of R\$871,344 as of March 31, 2016 (R\$872,107 as of December 31, 2015), which were calculated in accordance with the conditions negotiated between related parties. The conditions and additional information referring to these financial instruments are disclosed in Note 9 to this interim financial information and Note 10 to the Annual Financial Statements of December 31, 2015. Part of this balance, totaling R\$777,063 (R\$786,501 as of December 31, 2015), refers to reimbursement of additional retirement and pension plan - G0 and is indexed by IPCA plus simple interest of 0.5% p.m. This interest rate approximates that one practiced by federal government bonds (NTN-b) with terms similar to those of related-party transactions.

For financial assets held for trading, the balance of which is measured at fair value at the end of each reporting period and recorded in the financial statements, SABESP measured such fair value at level 1 inputs, as required by the international financial reporting standards and the accounting practices adopted in Brazil, considering share price through quotation at the São Paulo Stock Exchange (Bovespa) as of March 31, 2016.

Public-Private Partnership - PPP	1,230,928	1,230,928	1,035,033	1,035,033
----------------------------------	-----------	-----------	-----------	-----------

The criteria adopted to obtain the fair values of borrowings and financing, in preparing the interim financial information as of March 31, 2016, are consistent with those adopted in the Annual Financial Statements for the fiscal year ended December 31, 2015. In the Annual Financial Statements, these criteria are disclosed in Note 5.4.

Considering the nature of other financial instruments, assets and liabilities of the Company, the balances recognized in the balance sheet approximate the fair values, taking into account the maturities close to the end of the reporting period, comparison of contractual interest rates with market rates in similar operations at the end of the reporting period, their nature and maturity terms.

5 Key accounting estimates and judgments

Estimates and judgments are continually evaluated and are based on historical experience and on other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The key accounting estimates and judgments are disclosed in Note 6 to the Annual Financial Statements as of

Notes to the Interim Financial Information

(i) General customers - residential and small and mid-sized companies

(ii) Special customers - large consumers, commercial, industries, condominiums and special billing consumers (industrial waste, wells, etc.).

(iii) Agreements - installment payments of past-due receivables, plus monetary restatement and interest, when provided for in the agreements.

(iv) Wholesale basis customers - municipal governments - This balance refers to the sale of treated water to municipalities, which are responsible for distributing to, billing and charging final customers. Some of these municipalities are questioning in court the tariffs charged by SABESP, which have full allowance for doubtful accounts. Additionally, the overdue amounts are included in the allowance for doubtful accounts.

Changes in accounts receivables on a wholesale basis are as follows:

	Three-month period ended March 31, 2016	Three-month period ended March 31, 2015
Balance at beginning of the period	2,311,344	2,158,798

As mentioned above, as of March 31, 2016 and December 31, 2015, SABESP had contingent assets with GESP, not recorded in assets referring to the additional retirement and pension paid (Law 4,819/58), as follows:

	March 31, 2016	December 31, 2015

Total	870,842	855,054

(c) Use of reservoirs – EMAE

Empresa Metropolitana de Águas e Energia S.A. - EMAE plans to receive for the credit and to obtain financial compensation for the use of water from the Guarapiranga and Billings reservoirs, which SABESP uses in its operations, as well as the reimbursement of damages related to the failure to pay appropriately.

The Company understands that no amounts are due for the use of these reservoirs given the grants already made. Should these reservoirs not be available for use to the Company, there could be the need to collect water in more distant places. There is a risk of not properly rendering services in the region, besides increasing water supply cost.

Several lawsuits were filed by EMAE. Currently, an arbitration proceeding is in progress related to the Guarapiranga reservoir and a lawsuit related to the Billings reservoir, both pleading for financial compensation due to SABESP's water collect for public supply, alleging that this conduct has been causing permanent and growing loss in the capacity of generating electricity of Henry Borden hydroelectric power plant with financial losses.

On April 10, 2014, the Company issued a Notice to the Market including the information we have been discussing with EMAE about an eventual future agreement. However, no adjustment was confirmed and no agreement was executed by either party up to date.

On April 11, 2016, SABESP was named in legal proceedings commenced by minority shareholders of EMAE, claimed that SABESP should abstain from using the water resources of the Henry Borden hydroelectric power plant, without appropriate definition of financial compensation due to EMAE, and determining the resumption of water pumping to the reservoirs used by the Henry Borden hydroelectric power plant, in detriment of the flow of these reservoirs and the generation of electric power by EMAE. The plaintiffs in these proceedings allege that the São Paulo State, in its capacity as controlling shareholder of EMAE, has acted unduly to EMAE's detriment and in favor of SABESP's interests by allowing and consenting water intake from the Billings and Guarapiranga reservoirs, both of them belonging to EMAE, without the necessary financial compensation, making impracticable the satisfactory use of the Henry Borden hydroelectric power plant.

SABESP understands that the expectation for all cases is of possible losses, and for the time being, it is not feasible to estimate the amounts involved, since they were not determined.

(d) Agreements with reduced tariffs with State and Municipal Government Entities that joined the Rational Water Use Program (PURA)

The Company has signed agreements with government entities related to the State Government and municipalities where it operates that benefit from a reduction of 25% in the tariff of water supply and sewage services when they are not in default. These agreements provide for the implementation of the rational water use program, which takes into consideration the reduction in water consumption.

(e) Guarantees

The State Government provides guarantees for some borrowings and financing of the Company and does not charge any fee with respect to such guarantees.

Notes to the Interim Financial Information

(f) Personnel assignment agreement among entities related to the State Government

The Company has personnel assignment agreements with entities related to the State Government, whose expenses are fully passed on and monetarily reimbursed. From January to March 2016 and 2015, the expenses related to personnel assigned by SABESP to other state government entities amounted to R\$2,247 and R\$2,962, respectively.

From January to March 2016 and 2015, expenses related to personnel assigned by other entities to SABESP totaled R\$4 and R\$52, respectively.

(g) Services obtained from state government entities

As of March 31, 2016 and December 31, 2015, SABESP had an outstanding amounts payable of R\$1,698 and R\$2,210, respectively, for services rendered by São Paulo State Government entities.

(h) Non-operating assets

As of March 31, 2016 and December 31, 2015, the Company had an amount of R\$969 related to a free land lent to DAEE (Department of Water and Electricity).

(i) Sabesprev

The Company sponsors a private defined benefit pension plan, which is operated and administered by Sabesprev. The net actuarial liability recognized as of March 31, 2016 amounted to R\$690,890 (R\$665,274 as of December 31, 2015), according to Note 19 (b).

(j) Compensation of Management Key Personnel

Expenses related to the compensation to the members of its Board of Directors, Fiscal Council and Board of Executive Officers amounted to R\$983 and R\$977 from January to March 2016 and 2015, respectively. An additional amount of R\$124 and R\$141, related to the Officers' bonus program, was recorded from January to March 2016 and 2015, respectively.

(k) Loan agreement through credit facility

The Company holds interest in certain Special Purpose Entities (SPEs), not holding the majority interest but with cast vote and power of veto in some issues, with no ability to use such power of veto in a way to affect returns over investments. Therefore, these SPEs are considered for accounting purposes as jointly-owned subsidiaries.

The Company has loan agreement through credit facility with the SPEs Aquapolo Ambiental S/A and Attend Ambiental S/A, respectively, to finance the operations of these companies, until the borrowings and financing requested with financial institutions is cleared. These agreements have the following characteristics:

SPE	Principal disbursed amount	Interest balance	Total	Interest rate	Maturity
				SELIC + 3.5 %	
Attend Ambiental	5,400	2,158	7,558	p.a.	(i)
Aquapolo Ambiental	5,629	5,094	10,723	CDI + 1.2% p.a.	04/30/2016 (ii)
Aquapolo Ambiental	19,000	10,014	29,014	CDI + 1.2% p.a.	10/30/2015 (ii)
Total	30,029	17,266	47,295		

PAGE: 38 de 72

Notes to the Interim Financial Information

(i) The loan agreement with SPE Attend Ambiental S/A matures within 180 days, from the date when the respective amount is available in the borrower's account, renewable for the same period. The credit has been overdue since May 11, 2015 and is subject to contractual default charges (inflation adjustment considering the IGP-M variation, 2% fine and default interest of 1% p.m.). The agreement has being renegotiated between the parties.

(ii) The agreement expired on April 30, 2015 was amended and its maturity was extended to October 30, 2015. The Company and Aquapolo Ambiental S/A are renegotiating the payment terms and the maturity of both agreements.

As a result of the renegotiations, the principal, in the amount of R\$30,029, and interest, in the amount of R\$17,266, were classified in noncurrent assets until new payment conditions are agreed upon. As of March 31, 2016, the balance of principal and interest rates of these agreements was R\$47,295 (R\$45,289 as of December 31, 2015). From January to March 2016, a financial income recognized was R\$2,006 (R\$2,334 from January to March 2015).

(l) “Se Liga na Rede” (Connect to the Network Program)

The State Government enacted the State Law 14,687/12, creating the pro-connection program, destined to financially subsidize the execution of household branches necessary to connect to the sewage collecting networks, in low-income households, which agreed to adhere to the program. The program expenditures, except for indirect costs, construction margin and borrowing costs are financed with 80% of funds deriving from the State Government and the remaining 20% invested by SABESP, which is also liable for the execution of works. As of March 31, 2016, the program total amount was R\$78,859 (R\$78,447 as of December 31, 2015), R\$19,305 (R\$19,305 as of December 31, 2015) recorded in balances receivable from related parties, the amount of R\$34,501 (R\$34,089 as of December 31, 2015) recorded in the group of intangible assets and R\$25,053 (R\$25,053 as of December 31, 2015) reimbursed by GESP.

10 Water National Agency - ANA

The Company has agreements executed within the scope of the Hydrographic Basin Depollution Program (PRODES), also known as "Treated Sewage Purchase Program".

(k) Loan agreement through credit facility

This program does not finance works or equipment, remunerates by results achieved, i.e., by effectively treated sewage. In this program, the Water National Agency (ANA) makes available funds, which are restricted to a specific current account and applied in investment funds at the Caixa Econômica Federal - Federal Savings Banks (CEF), until the fulfillment of treated sewage volume is evidenced, as well as, the reduction of polluting cargoes of each agreement.

When resources are made available, liabilities are recorded until funds are released by ANA. After the evidence of targets stipulated in each contract, the revenue deriving from these funds is recognized, but if these targets are not met, funds will return to the National Treasury with the appropriate funds earnings. As of March 31, 2016, the balances of assets and liabilities were R\$89,913 (R\$88,368 as of December 31, 2015), and the liabilities are recorded under "other liabilities" of noncurrent liabilities.

11 Investments

The Company holds interest in certain Special Purpose Entities (SPE). Although SABESP has no majority shares of its investees, the shareholders' agreement provides for the power of veto in certain management issues, with no ability to use such power of veto in a way to affect returns over investments, indicating participating shared control (joint venture – CPC 19 (R2)).

The Company holds interest valued by the equity method.

See information on the operations of each investee in Note 12 to the Annual Financial Statements as of December 31, 2015.

Margin	5,908	6,182	12,090

(d) General information

During the period ended March 31, 2016 there were no relevant changes in the criteria to account for intangible assets and types of contracts. See further information in Note 14 (d) to the Annual Financial Statements as of December 31, 2015.

The Company has obligations recorded in “Program Contract– Commitments” in current liabilities in the amount of R\$209,875 and R\$228,659 as of March 31, 2016 and December 31, 2015, respectively, and noncurrent liabilities in the amount of R\$87,703 and R\$92,055 as of March 31, 2016 and December 31, 2015, respectively.

(e) Capitalization of interest and other finance charges

From January to March 2016, the Company capitalized interest and inflation adjustment in concession intangible assets totaling R\$123,717, including the São Lourenço Production System and Leases (R\$72,472 from January to March 2015), during the construction period.

(f) Construction margin

The Company acts as a primary responsible to construct and install the infrastructure related to the concession, using own efforts or hiring outsourcing services, receiving the risks and benefits.

PAGE: 42 de 72

Notes to the Interim Financial Information

As a consequence, the Company recognizes revenue from construction service corresponding to the cost of construction increased by margin. Generally, the constructions related to the concessions are performed by third parties, in such case, the margin of the Company is lower, normally, to cover eventual administration costs, and the responsibility of the primary risk. As of March 31, 2016 and 2015 the margin was 2.3%.

Construction margin for the period ended March 31, 2016 and 2015 was R\$12,894 and R\$12,090, respectively.

(g) Expropriations

As a result of the construction of priority projects related to water and sewage systems, the Company was required to expropriate third-parties' properties, and the owners of these properties will be compensated either amicably or through courts.

The costs of these expropriations are recorded as concession intangible assets after the transaction is concluded. From January to March 2016, the total amount related to expropriations was R\$2,216 (R\$6,762 from January to March 2016).

(h) Public-Private Partnership - PPP

SABESP carries out operations related to the PPPs mentioned below. These operations and their respective obligations and guarantees are supported by agreements executed according to Law 11,079/04.

Alto Tietê Production System

As of March 31, 2016 and December 31, 2015, the amounts recognized as intangible asset related to PPP were R\$390,482 and R\$393,275, respectively.

In the first quarter of 2016, a discount rate of 8.06% p.a. was used to calculate the adjustment to present value of the agreement. The obligations assumed by the Company as of March 31, 2016 and December 31, 2015 are shown in the table below.

On a monthly basis, SABESP assigns funds from tariffs to the SPE CAB Sistema Produtor Alto Tietê S/A, in the amount of R\$9,164, corresponding to the monthly remuneration. This amount is annually adjusted by the IPC – FIPE and is recorded in a restricted account, pursuant to the contractual operating proceeding. Should SABESP comply with its monthly obligations with the SPE, the funds from the restricted account will be released.

The guarantee has been effective since the beginning of the operation and will be valid until the conclusion, termination, intervention, annulment or caducity of the Administrative Concession, or other extinction events provided for in the Concession Agreement or in the law applicable to administrative concessions, including in the event of bankruptcy or extinction of the SPE.

São Lourenço Production System

As of March 31, 2016 and December 31, 2015, the amounts recognized in intangible assets related to the PPP were R\$907,101 and R\$699,335, respectively. As of March 31, 2016, a discount rate of 7.80% p.a. was used to calculate the adjustment to present value of this agreement.

The obligations assumed by the Company as of March 31, 2016 and December 31, 2015 are shown in the table below, and the increase in liabilities and intangible assets was due to the progress of the work in 2016.

Payment is scheduled to start in January 2018, four (4) months after the beginning of assisted operations.

After the beginning of the operations, every month SABESP will transfer to the SPE Sistema Produtor São Lourenço S/A funds from tariffs arising from the services provided, in the amount of R\$24.4 million, equivalent to the monthly remuneration plus interest and charges. The amount above will be annually restated by the IPC - FIPE and should be monthly recorded in a restricted account, in accordance with the operating procedures of the agreements. Should SABESP perform its monthly obligations with the SPE, the funds from the restricted

Additional information is presented in Note 14 (h) to the Financial Statements for the fiscal year ended December 31, 2015.

(i) Works in progress

The amount of R\$7,055 million is recorded under intangible assets as works in progress as of March 31, 2016 (R\$6,596 million on December 31, 2015), and as of March 31, 2016, the major projects are located in the municipalities of São Paulo, Praia Grande and Franca, totaling R\$3,813 million (including R\$907 million from PPP São Lourenço), R\$282 million and R\$206 million, respectively.

(j) Amortization of intangible assets

The amortization average rate totaled 3.9% as of March 31, 2016 and 3.8% as of March 31, 2015.

(k) Software license of use

The software license of use is capitalized based on the costs incurred to acquire software and make them ready for use. The project to implement an integrated business management solution (ERP system), which includes the administrative/financial module and the commercial module, is in progress.

Notes to the Interim Financial Information

SABESP, in order to comply with its Capex plan relies on a fund-raising plan.

Financing resources contracted have specific purposes, which have been released for the execution of their respective investments, according to the progress of the works.

Additional information on borrowings and financing is presented in Note 16 to the Annual Financial Statements as of December 31, 2015.

16 Taxes payable**(a) Current assets**

Other federal taxes	5,148	3,661
Other municipal taxes	275	275
Total	15,931	77,828

The reduction in recoverable taxes is mainly due to decrease in “income tax and social contribution” item, which was offset by these taxes.

(b) Current liabilities

	March 31, 2016	December 31, 2015
Taxes and contributions payable		
Cofins and Pasep	42,518	40,505

(b) Explanation on the nature of main classes of lawsuits**(i) Customer claims**

Approximately 1,150 lawsuits were filed by commercial customers, which claim that their tariffs should correspond to other consumer categories, and 715 lawsuits which claim a reduction in the sewage tariff due to losses in the system, consequently requesting the refund of amounts charged by the Company and 55 lawsuits where customers plead the reduction in tariff under the category as “Social Welfare Entity”. The Company was granted both favorable and unfavorable final decisions at several court levels and recognized provisions when the chances of losses are probable.

(ii) Supplier claims

Suppliers’ claims include lawsuits filed by some suppliers alleging underpayment of monetary restatements, withholding of amounts related to the understated inflation rates deriving from Real economic plan, and the economic and financial imbalance of the agreements. These lawsuits are in progress at different courts and a provision is recognized when the chances of losses are probable.

(b) Explanation on the nature of main classes of lawsuits

(iii) Civil claims

These mainly refer to indemnities for property damage, pain and suffering, and loss of profits allegedly caused to third parties, filed at different court levels, dully accrued when classified as probable losses.

(iv) Tax claims

Tax claims refers mainly to issues related to tax collections challenged due to differences in the interpretation of legislation by the Company's management, accrued when classified as probable loss.

(v) Labor claims

The Company is a party to labor lawsuits, involving issues such as overtime, shift schedule, health hazard premium and hazardous duty premium, prior notice, change of function, salary equalization, outsourcing and other. Part of the amount involved is in provisional or final execution at various court levels, and this is classified as of probable loss and accordingly, accrued.

PAGE: 57 de 72

Notes to the Interim Financial Information

(vi) Environmental claims

Environmental claims refer to several administrative proceedings and lawsuits filed by government entities, including Companhia de Tecnologia de Saneamento Ambiental – Cetesb, Public Prosecution Office of the State of São Paulo and others, that aim affirmative and negative covenants and penalty is estimated due to failure to comply in addition to the imposition of indemnity due to environmental damages allegedly caused by the Company. The amounts accrued represent the best estimate of the Company at this moment, however, may differ from the amount to be disbursed as indemnity to alleged damages, in view of the current stage of referred proceedings.

(c) Lawsuits with possible likelihood of loss

The Company is party to lawsuits and administrative proceedings relating to environmental, tax, civil and labor claims, which are assessed by Management whose chances of loss are possible and are not recorded. The value of the obligation to all participants who migrated from Plan G1 to the Sabesprev Mais Plan amounted to R\$7,738 as of March 31, 2016 (R\$7,907 as of December 31, 2015) referred to active participants, recorded in current liabilities, under "Other obligations".

(iii) Plan G0

Pursuant to Law 4,819/58, employees who started services prior to May 1974 and were retired as an employee of the Company acquired a legal right to receive supplemental pension payments, which rights are referred as "Plan G0". The Company pays these supplemental benefits on behalf of the State Government and makes claims for reimbursements from the State Government, which are recorded as accounts receivable from related parties, limited to the amounts considered virtually certain that will be reimbursed by the State Government. As of March 31, 2016, the Company recorded a defined benefit obligation for Plan G0 of R\$2,201,471 (R\$2,166,942 as of December 31, 2015).

(c) Profit sharing

The Company recorded as reference to the 2015 Profit Sharing Program, the amount corresponding to one month salary for each employee, depending on performance goals reached. From January to March 2016 and 2015, R\$18,729 and R\$17,307, respectively, were accrued.

Notes to the Interim Financial Information

20 Services payable

The services account records the balances payable, mainly from services received from third parties, such as supply of electric power, reading of hydrometers and delivery of water and sewage bills, cleaning, surveillance and security services, collection, legal counsel services, audit, marketing and advertising and consulting services, among others. This account also records the amounts payable from the percentage in the revenues of São Paulo local government. The balances as of March 31, 2016 and December 31, 2015 were R\$482,976 and R\$387,279, respectively.

21 Equity

(a) Authorized capital

The Company is authorized to increase capital by up to R\$15,000,000, based on a Board of Directors' resolution, after submission to the Fiscal Council.

In the event of capital increase, issue of convertible debentures and/or warrants by means of private subscription, shareholders will have preemptive right in the proportion of number of shares held, pursuant to Article 171 of Law 6,404/76.

(b) Subscribed and paid-in capital

As of March 31, 2016 and December 31, 2015, subscribed and paid-in capital is represented by 683,509,869 registered, book-entry common shares, held as follows:

REPORT ON REVIEW OF INTERIM FINANCIAL INFORMATION

To the Shareholders, Board of Directors and Management of

Companhia de Saneamento Básico do Estado de São Paulo - SABESP

São Paulo - SP

Introduction

We have reviewed the accompanying interim financial information of Companhia de Saneamento Básico do Estado de São Paulo - SABESP (the “Company”) included in the Quarterly Information Form (ITR), for the quarter ended March 31, 2016, which comprises the financial position as of March 31, 2016 and the related statements of income, comprehensive income, changes in equity and cash flows for the three-month period then ended, including the explanatory notes.

The Company’s Management is responsible for the preparation of the interim financial information in accordance with technical pronouncement CPC 21 (R1) - Interim Financial Information and in accordance with international standard IAS 34 - *Interim Financial Reporting*, issued by the International Accounting Standards Board (IASB), as well as for the presentation of such information in accordance with the standards issued by the Brazilian Securities and Exchange Commission, applicable to the preparation of Interim Financial Information - ITR. Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and international standards on review of interim financial information (NBC TR 2410 and ISRE 2410 - *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*, respectively). A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with standards on auditing and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information included in the ITR referred to above was not prepared, in all material respects, in accordance with CPC 21 (R1) and IAS 34, applicable to the preparation of Interim Financial Information - ITR, and presented in accordance with the standards issued by the Brazilian Securities and Exchange Commission.

Other matters

Statements of value added

We have also reviewed the statements of value added (DVA) for the three-month period ended March 31, 2016, prepared under the responsibility of the Company's Management, the presentation of which is required by the standards issued by the CVM - Brazilian Securities and Exchange Commission applicable to the preparation of Interim Financial Information - ITR and considered as supplemental information by IFRSs, which does not require the presentation of DVA. These statements were subject to the same review procedures described above, and, based on our review, nothing has come to our attention that causes us to believe that they were not prepared, in all material respects, consistently with the interim financial information taken as a whole.

The accompanying interim financial information has been translated into English for the convenience of readers outside Brazil.
