Telephone Number (859) 815-3333

Edgar Filing: ASHLAND INC. - Form 10-Q

Indicate by check mark whether the Registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files). Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check One):

Large Accelerated Filer Accelerated Filer
Non-Accelerated Filer Smaller Reporting
Company
(Do not check if a smaller reporting company.)

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No

At June 30, 2010, there were 78,730,445 shares of Registrant's Common Stock outstanding.

(a) The three and nine months ended June 30, 2009 include \$9 million and \$13 million, respectively, within the cost of sales caption and \$4 million and \$39 million, respectively, within the selling, general and administrative expenses caption for restructuring charges related to the ongoing integration and reorganization from the Hercules Incorporated (Hercules) acquisition and other cost reduction programs. In addition, a charge of \$37 million for the

nine months ended June 30, 2009 was recorded within the cost of sales caption for a one-time fair value assessment of Hercules inventory as of the date of the transaction.

- (b) The nine months ended June 30, 2009 includes a \$10 million charge related to the valuation of the ongoing research and development projects at Hercules as of the merger date. In accordance with GAAP and SEC accounting regulations applicable at the date of acquisition, these purchased in-process research and development costs were expensed upon acquisition.
- (c) The nine months ended June 30, 2010 includes a \$66 million charge related to the refinancing of the Senior Credit Facility and related extinguishment of debt during the March quarter.
- (d) Includes a gain of \$23 million for the three and nine months ended June 30, 2010 related to Ashland's acquisition of the additional 50% interest in Ara Quimica S.A. (Ara Quimica).
- (e) The nine months ended June 30, 2009 includes a \$54 million loss on currency swaps related to the Hercules acquisition and a \$32 million loss on auction rate securities.

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE A – BASIS OF PRESENTATION

The accompanying unaudited Condensed Consolidated Financial Statements have been prepared in accordance with generally accepted accounting principles for interim financial reporting and Securities and Exchange Commission regulations. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. These statements omit certain information and footnote disclosures required for complete annual financial statements and, therefore, should be read in conjunction with Ashland's Annual Report on Form 10-K for the fiscal year ended September 30, 2009. Results of operations for the period ended June 30, 2010 are not necessarily indicative of results to be expected for the year ending September 30, 2010. Certain prior period data has been reclassified in the Condensed Consolidated Financial Statements and accompanying footnotes to conform to current period presentation.

In November 2008, Ashland completed the acquisition of Hercules which changed Ashland's reporting structure. Ashland is composed of five reporting segments: Ashland Aqualon Functional Ingredients (Functional Ingredients), previously Hercules' Aqualon Group, Ashland Hercules Water Technologies (Water Technologies), which includes Hercules' Paper Technologies and Ventures segment as well as Ashland's legacy Water Technologies segment, Ashland Performance Materials (Performance Materials), Ashland Consumer Markets (Consumer Markets), and Ashland Distribution (Distribution). See Notes C and P for additional information on the Hercules acquisition and reporting segment results.

The preparation of Ashland's Condensed Consolidated Financial Statements requires management to make estimates and assumptions that affect the reported amounts of certain assets, liabilities, revenues, expenses and related disclosures of contingent assets and liabilities as well as qualifying subsequent events. Significant items that are subject to such estimates and assumptions include, but are not limited to, long-lived assets (including goodwill and intangible assets), employee benefit obligations, income taxes, and liabilities and receivables associated with asbestos litigation, environmental remediation and asset retirement obligations. Although management bases its estimates on historical experience and various other assumptions that are believed to be reasonable under the circumstances, actual results could differ significantly from the estimates under different assumptions or conditions.

NOTE B – NEW ACCOUNTING STANDARDS

Changes to estimates of financial statement impacts due to the adoption of new accounting standards and new accounting standards issued during the current fiscal year are included in interim financial reporting. A detailed listing of all new accounting policies material to Ashland is included in the Annual Report on Form 10-K for the fiscal year ended September 30, 2009.

In October 2009, the Financial Accounting Standards Board (FASB) issued accounting guidance related to separating consideration in multiple-deliverable revenue arrangements (ASC 605-25 Revenue Recognition – Multiple-Element Arrangements). Under this guidance, multiple-deliverable arrangements will be accounted for separately (rather than as a combined unit) by selecting the best evidence of selling price among vendor-specific objective evidence, third-party evidence or estimated selling price. Additionally, this guidance eliminates the residual method of allocation and requires that arrangement consideration be allocated at the inception of the arrangement to all

deliverables using the relative selling price method. This guidance will become effective for Ashland on October 1, 2010. The adoption of this guidance is not expected to have a material impact on the Condensed Consolidated Financial Statements.

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE C – ACQUISITIONS AND DIVESTITURES

Acquisitions

Ara Quimica

In April 2010, Ashland acquired the remaining 50% interest in Ara Quimica, a leading producer of custom unsaturated polyester resin formulations for the composites industry in South America, for \$28 million. Prior to the acquisition, Ashland owned a 50% interest in Ara Quimica, which it recorded as an equity-method investment within the Performance Materials reporting segment. Ara Quimica reported sales of approximately \$50 million from its most recent fiscal year ended December 31, 2009. Ashland recognized a pretax gain of \$23 million as a result of revaluing its existing equity interest held in Ara Quimica before the business combination. The gain is included in the net gain on acquisitions and divestitures caption on the Statements of Consolidated Income for the current quarter.

Hercules

On November 13, 2008, Ashland completed its acquisition of Hercules. The acquisition created a defined core for Ashland composed of three specialty chemical businesses which includes specialty additives and ingredients, paper and water technologies, and specialty resins. The acquisition also created a leadership position in attractive and growing renewable/sustainable chemistries.

The merger was recorded by Ashland using the purchase method of accounting in accordance with applicable United States generally accepted accounting principles (U.S. GAAP or GAAP) whereby the total purchase price, including qualifying transaction-related expenses, was allocated to tangible and intangible assets and liabilities acquired based upon their respective fair values.

The total merger purchase price related to the Hercules acquisition was \$2,594 million. The total merger consideration for outstanding Hercules Common Stock was \$2,096 million in cash and \$450 million in Ashland Common Stock, the remaining value of the transaction related to cash consideration and value for restricted stock units, stock options and transaction costs. Each share of Hercules Common Stock issued and outstanding immediately prior to the effective time of the Hercules acquisition was converted into the right to receive \$18.60 in cash and 0.0930 of a share of Ashland Common Stock, subject to the payment of cash in lieu of fractional shares of Ashland Common Stock. Ashland exchanged 10.5 million Ashland common shares for the 112.7 million shares of outstanding Hercules Common Stock on November 13, 2008.

The Hercules acquisition was financed in part through \$2,600 million in secured financing from Bank of America Securities LLC, Scotia Capital (USA) Inc. and other lenders consisting of a \$400 million revolving credit facility, a \$400 million Term Loan A facility, an \$850 million Term Loan B facility, a \$200 million accounts receivable securitization facility and a \$750 million bridge loan, which was subsequently replaced in May 2009 by \$650 million senior unsecured notes and \$100 million in cash generated from operations. The total debt drawn upon the closing of the completed merger was approximately \$2,300 million with the remaining cash consideration for the transaction paid from Ashland's existing cash, which was used in part to extinguish \$594 million of existing Hercules debt and to

pay transaction fees associated with the financing facilities. A significant amount of this debt has been repaid, and during the March 2010 quarter Ashland refinanced the remaining debt from this transaction. For further information on the refinancing and remaining debt outstanding see Note G.

The following table summarizes the values of the assets acquired and liabilities assumed at the date of acquisition, as well as adjustments that have been made as a result of ongoing valuations.

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE C – ACQUISITIONS AND DIVESTITURES (continued)

	At November 13 2008
Purchase price allocation (in millions)	
Assets:	
Cash	\$ 54
Accounts receivable	355
Inventory	261
Other current assets	57
Intangible assets	1,093
Goodwill	1,808
Asbestos receivable	97
Property, plant and equipment	1,058
Purchased in-process research and development	10
Other noncurrent assets	187
Liabilities:	
Accounts payable	(232)
Accrued expenses	(217)
Debt	(798)
Pension and other postretirement obligations	(316)
Environmental	(106)
Asbestos	(451)
Deferred tax - net	(144)
Other noncurrent liabilities	(122)
Total purchase price	\$ 2,594

The purchase price allocation for the acquisition was essentially completed during the December 2009 quarter. Adjustments made during the December 2009 quarter primarily related to asbestos liabilities and receivables, as a result of the final assessment after completion of the review of the underlying claim files, as well as certain valuation adjustments to previously recorded purchase accounting or pre-acquisition amounts within legal, environmental and income taxes. See Note O for more information related to the assumed asbestos and environmental liabilities. See Note I for more information related to goodwill.

Purchased in-process research and development (IPR&D) represents the value assigned in a business combination to acquired research and development projects that, as of the date of the acquisition, had not established technological feasibility and had no alternative future use. Amounts assigned to IPR&D meeting these criteria were part of the allocation of the purchase price of the business combination. Ashland recorded pretax expense totaling \$10 million associated with the Hercules acquisition within the research and development expenses caption of the Statement of Consolidated Income. The estimated values assigned to the IPR&D projects were determined based on a discounted cash flow model assigned to the following projects:

(In millions)

Functional Ingredients	Corebond	\$ 2
Water Technologies	Biofilm Sensor	\$ 2
Water Technologies	Surface Dry Strength	\$ 2
Functional Ingredients / Water Technologies	Other	\$ 4

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE C – ACQUISITIONS AND DIVESTITURES (continued)

As part of the valuation of the Hercules acquisition, Ashland recorded \$1,093 million of intangible assets. Of these intangible assets, Ashland has identified approximately \$255 million of certain product trade names, within the Functional Ingredients and Water Technologies businesses, that have been designated as indefinite-lived assets. Ashland's designation of an indefinite life for these assets took many factors into consideration, including the current market leadership position of the brands as well as their worldwide recognition in the industry. The remaining \$838 million identified finite-lived intangible assets are being amortized over their respective estimated useful lives. Ashland determined the useful lives of the customer relationships, developed technology and product trade names to be 10 to 24 years, 5 to 20 years and 20 years, respectively. The determination of the useful lives is based upon various industry studies, historical acquisition experience, economic factors, and future cash flows of the combined company. In addition, Ashland reviewed certain technological trends and also considered the relative stability in the current Hercules customer base.

Intangible asset type (in millions)	Value	Life (years)
Customer relationships - Functional Ingredients	\$ 289	10 - 24
Customer relationships - Water Technologies	240	12
Developed technology - Functional Ingredients	217	15
Developed technology - Water Technologies	60	5 - 20
Product trade names - Functional Ingredients	32	20
Product trade names - Functional Ingredients	104	Indefinite
Product trade names - Water Technologies	151	Indefinite
Total	\$ 1,093	

Divestitures

In January 2010, Ashland sold its refined wood rosin and natural wood terpenes business, formerly known as Pinova, a business unit of Functional Ingredients, to TorQuest Partners in a transaction valued at approximately \$75 million before tax, which was comprised of \$60 million in cash and a \$15 million five-year promissory note from TorQuest Partners. The Pinova business, with annual revenues of approximately \$85 million per year, had approximately 200 employees along with an associated manufacturing facility located in Brunswick, Georgia. The transaction resulted in a pretax gain of less than \$1 million, which was included in the net gain on acquisitions and divestitures caption on the Statements of Consolidated Income for the quarter ended March 2010. As part of this sale agreement, TorQuest Partners has agreed to continue to manufacture certain products on behalf of Ashland.

In August 2009, Ashland sold its global marine services business known as Drew Marine, a business unit of Water Technologies, to J. F. Lehman & Co. in a transaction valued at approximately \$120 million before tax, which was subsequently reduced by \$4 million after giving affect to post-closing adjustments related to working capital. Drew Marine had annual revenues of approximately \$140 million per year. The transaction resulted in a pretax gain of \$56 million, which was included in the net gain on acquisitions and divestitures caption on the Statements of Consolidated Income for the quarter ended September 2009. As part of this sale arrangement, Ashland has agreed to continue to manufacture certain products on behalf of Drew Marine.

As a result of these divestitures, the assets and liabilities of these businesses for prior periods have been reflected as assets and liabilities held for sale within the Condensed Consolidated Balance Sheets and are comprised of the following components:

9

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE C – ACQUISITIONS AND DIVESTITURES (continued)

(In millions - unaudited)	June 30 2010	September 30 2009	June 30 2009
Accounts receivable	\$ 1	\$ 13	\$ 42
Inventories	1	28	46
Other current assets	-	-	1
Current assets	\$ 2	\$ 41	\$ 89
Property, plant and equipment, net	\$ -	\$ 39	\$ 42
Goodwill and intangible assets	-	-	15
Deferred income tax	-	-	-
Other noncurrent assets	-	-	6
Noncurrent assets	\$ -	\$ 39	\$ 63
Trade payables	\$ -	\$ 5	\$ 16
Accrued expenses and other liabilities	-	-	1
Current liabilities	\$ -	\$ 5	\$ 17

In addition to the Drew Marine and Pinova assets and liabilities identified above that were previously designated in prior periods as held for sale, Ashland held other noncurrent assets for sale of \$20 million, \$25 million and \$22 million as of June 30, 2010 and 2009 and September 30, 2009, respectively, primarily related to corporate aircraft, non-operational properties and certain Valvoline Instant Oil Change locations. The noncurrent assets held for sale are required to be measured at carrying value or below this level if an impairment is indicated. The fair values were based on definitive agreements of sale or other market quotes which would be considered significant unobservable market inputs (Level 3) within the fair value hierarchy. See also Note F – Fair Value Measurements for further information on the fair value hierarchy.

Other divestiture activity

In December 2008, Ashland completed the sale of its indirectly held 33.5% ownership interest in FiberVisions Holdings, LLC (FiberVisions) to Snow Phipps Group, LLC (Snow Phipps), a New York-based private equity firm and the majority owner of FiberVisions for \$7 million. FiberVisions, a leading global producer of specialty fibers for nonwoven fabrics and textile fibers used in consumer and industrial products, was acquired by Ashland as part of the Hercules acquisition. The sale of Ashland's interest in FiberVisions generated a capital loss of approximately \$220 million for tax purposes that can be used to offset capital gains. The unutilized capital loss benefit was fully offset by a deferred tax asset valuation allowance because Ashland is not permitted to anticipate additional future capital gains; therefore, no tax benefit was initially recognized on this transaction.

NOTE D – RESTRUCTURING ACTIVITIES

During 2008, Ashland implemented operational redesigns (2008 Program), primarily within Ashland's Water Technologies and Performance Materials businesses, to take proactive steps to enhance profitability through streamlined operations and an improved overall cost structure of the businesses. This program continued during 2009 and was further expanded to capture additional cost saving opportunities.

In conjunction with the Hercules acquisition in November 2008, Ashland announced an integration plan (Integration Plan) that targeted certain projected cost savings as part of combining joint and redundant services and facilities. This program focused primarily on capturing operational, selling and administrative savings within the combined company. Additionally, with the prolonged and significant deterioration of global economic demand during 2009, Ashland announced in January 2009 an additional cost reduction and

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE D – RESTRUCTURING ACTIVITIES (continued)

organizational restructuring plan (2009 Program), which was subsequently expanded in July 2009, to further reduce Ashland’s overall cost structure.

In total, Ashland has achieved run-rate cost reductions of \$425 million related to these cost reduction initiatives. The cumulative effect of these restructuring activities has resulted in 12 permanent facility closings through the end of the June 30, 2010 quarter, and in total has reduced the global workforce by over 2,000 employees, or approximately 13%, exceeding the previous estimate by over 100 employees. The total restructuring cost incurred under the cost-structure efficiency programs for the three and nine months ended June 30, 2010 was income of \$2 million and expense of \$1 million, respectively, and was classified within the selling, general and administrative expenses caption. The total restructuring cost incurred under the cost-structure efficiency programs for the three and nine months ended June 30, 2009 was \$16 million and \$73 million, respectively, of which \$4 million and \$39 million, respectively, was classified within the selling, general and administrative expenses caption and \$9 million and \$13 million were charged to the cost of sales caption. For the three and nine months ended June 30, 2009, the remaining cost of \$3 million and \$21 million, respectively, related to established severance reserves associated with Hercules personnel which qualified for purchase method of accounting in accordance with U.S. GAAP and had no effect on the Statement of Consolidated Income. Additional costs from reductions in resources or facilities may occur in future periods, which could include charges related to additional severance, plant closings, reassessed pension plan valuations or other items, although Ashland does not currently expect these to be significant. Ashland anticipates principally completing these restructuring activities during 2010.

The following table details at June 30, 2010 and 2009, the amount of restructuring reserves related to the cost-structure efficiency and Hercules integration programs included in accrued expenses and other liabilities in the Condensed Consolidated Balance Sheets and the related activity in these reserves for the nine months ended June 30, 2010 and 2009.

(In millions)	Severance
Balance as of September 30, 2009	\$38
Restructuring reserve	1
Utilization (cash paid or otherwise settled)	(25)
Balance at June 30, 2010	\$ 14
Balance as of September 30, 2008	\$7
Restructuring reserve	73
Utilization (cash paid or otherwise settled)	(32)
Balance at June 30, 2009	\$48

NOTE E – DISCONTINUED OPERATIONS

Ashland is subject to liabilities from claims alleging personal injury caused by exposure to asbestos. Such claims result primarily from indemnification obligations undertaken in 1990 in connection with the sale of Riley Stoker Corporation (Riley), a former subsidiary of Ashland, and from the acquisition of Hercules during fiscal 2009, a wholly owned subsidiary of Ashland. Adjustments to the recorded litigation reserves and related insurance receivables continue periodically and primarily reflect updates to the estimates. During the three and nine month periods ended June 30, 2010 and 2009, Ashland recorded income from asbestos-related items, as a result of Ashland's ongoing assessment of these matters. See Note O for more information related to the adjustments on asbestos liabilities and receivables.

Ashland's divestiture of Ashland Paving And Construction (APAC) during 2006 qualified as a discontinued operation. As a result, the previous operating results, assets and liabilities related to APAC have been

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE E – DISCONTINUED OPERATIONS (continued)

reflected as discontinued operations in the Condensed Consolidated Financial Statements. Ashland has made subsequent adjustments to the gain on the sale of APAC, primarily relating to the tax effects of the sale, during the three and nine month periods ended June 30, 2010 and 2009. In addition, Ashland recorded an adjustment to the gain on the sale of the Electronic Chemicals business (divested in 2003) as a result of adjustments to environmental claims associated with the transaction. Such adjustments to these and other divested businesses may continue to occur in future periods and are reflected in the period they are determined and recorded in the discontinued operations caption in the Statements of Consolidated Income.

Components of amounts reflected in the Statements of Consolidated Income related to discontinued operations are presented in the following table for the three and nine months ended June 30, 2010 and 2009.

(In millions)	Three months ended		Nine months ended	
	June 30 2010	2009	June 30 2010	2009

Total income (loss) from discontinued operations (net of tax)	\$ 14	\$ (1)	\$ 27	\$ (2)

NOTE F – FAIR VALUE MEASUREMENTS

As required by U.S. GAAP, Ashland uses applicable guidance for defining fair value, the initial recording and periodic remeasurement of certain assets and liabilities measured at fair value and related disclosures for instruments measured at fair value. Fair value accounting guidance establishes a fair value hierarchy, which prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). An instrument's categorization within the fair value hierarchy is based upon the lowest level on input that is significant to the instrument's fair value measurement. The three levels within the fair value hierarchy are described as follows:

Level 1—Observable inputs such as unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2—Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.

Level 3—Unobservable inputs for the asset or liability for which there is little, if any, market activity at the measurement date. Unobservable inputs reflect Ashland's own assumptions about what market participants would use to price the asset or liability. The inputs are developed based on the best information available in the circumstances, which might include occasional market quotes or sales of similar instruments or Ashland's own financial data such as internally developed pricing models, discounted cash flow methodologies, as well as instruments for which the fair value determination requires significant management judgment.

For assets that are measured using quoted prices in active markets (Level 1), the total fair value is the published market price per unit multiplied by the number of units held without consideration of transaction costs. Assets and liabilities that are measured using significant other observable inputs (Level 2) are primarily valued by reference to quoted prices of similar assets or liabilities in active markets (market

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE F – FAIR VALUE MEASUREMENTS (continued)

approach), adjusted for any terms specific to that asset or liability. For all other assets and liabilities for which unobservable inputs are used (Level 3), fair value is derived through the use of fair value models, such as a discounted cash flow model or other standard pricing models that Ashland deems reasonable.

The following table summarizes financial asset instruments subject to recurring fair value measurements as of June 30, 2010. Ashland did not have any financial liability instruments subject to recurring fair value measurements as of June 30, 2010.

(In millions)	Carrying value	Total fair value	Quoted prices in active markets for identical assets Level 1	Significant other observable inputs Level 2	Significant unobservable inputs Level 3

(a) Included in other noncurrent assets in the Condensed Consolidated Balance Sheet.

Level 3 instruments

Auction rate securities

At June 30, 2010, Ashland held \$54 million of student loan auction rate securities, that had a par value \$61 million, for which there was not an active market with consistent observable inputs. During the second quarter of fiscal 2008, the auction rate securities market became largely illiquid, as there was not enough demand to purchase all of the securities that holders desired to sell at par value during certain auctions. Since this time, the market for auction rate securities has failed to achieve equilibrium. Due to the uncertainty as to when active trading will resume in the auction rate securities market, Ashland believes the recovery period for certain of these securities may extend beyond a twelve-month period. As a result, these instruments have been classified as noncurrent assets in the Condensed Consolidated Balance Sheet.

The following details the auction rate securities sold during the applicable periods.

Edgar Filing: ASHLAND INC. - Form 10-Q

(In millions)	Three months ended		Nine months ended	
	June 30 2010	2009	June 30 2010	2009
Par value	\$ 37	\$ 29	\$ 132	\$ 62
Cash received	33	26	117	55
Gain or (loss)	-	-	1	(2)

During the December 2008 quarter, Ashland liquidated \$20 million (par and book value) auction rate securities for \$18 million in cash proceeds and recognized a loss of \$2 million. As a result of this sale, as well as Ashland's debt structure following the Hercules acquisition and the ongoing impact from the global economic downturn, Ashland also determined in the December 2008 quarter that it no longer had the intent to hold these instruments until their maturity date. As a result, Ashland recorded a \$30 million temporary unrealized loss as permanent in the other income and expenses caption of the Statement of Consolidated Income. At that time, a full valuation allowance was established for this tax benefit since Ashland did not have capital gains to offset this capital loss.

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE F – FAIR VALUE MEASUREMENTS (continued)

The following table provides a reconciliation of the beginning and ending balances of Ashland's auction rate securities, as these are Ashland's only assets measured at fair value using significant unobservable inputs (Level 3).

(In millions)	Level 3
Balance as of October 1, 2009	\$ 170

Balance as of October 1, 2008	\$ 243
Sales of auction rate securities	(55)
Balance as of June 30, 2009	\$ 188

Derivative and hedging activities

Currency hedges

Ashland conducts business in a variety of foreign currencies. Accordingly, Ashland regularly uses foreign currency derivative instruments to manage exposure on certain transactions denominated in foreign currencies to curtail the earnings volatility effects of short-term assets and liabilities denominated in currencies other than the functional currency of an entity.

Ashland contracts with counter-parties to buy and sell foreign currencies to offset the impact of exchange rate changes on transactions denominated in non-functional currencies, including short-term inter-company loans. These contracts generally require exchange of one foreign currency for another at a fixed rate at a future date and generally have maturities of less than twelve months. All contracts are marked-to-market with net changes in fair value recorded within the selling, general and administrative expenses caption. For the three and nine months ended June 30, 2010, losses of less than \$1 million and \$1 million, respectively, were recorded in the Statement of Consolidated Income for these contracts. For the three and nine months ended June 30, 2009, losses of less than \$1 million and gains of \$2 million, respectively, were recorded in the Statement of Consolidated Income for these contracts. The impacts of these contracts were largely offset by gains and losses resulting from the impact of changes in exchange rates on transactions denominated in non-functional currencies.

Ashland's net gain position on foreign currency derivatives outstanding in the Condensed Consolidated Balance Sheet as of June 30, 2010 was less than \$1 million, consisting of a gain of \$1 million with a notional amount of \$54 million offset by a loss of less than \$1 million with a notional amount of \$51 million, and was included in other noncurrent assets and liabilities, respectively. The net gain position on foreign currency derivatives outstanding in the Condensed Consolidated Balance Sheet as of June 30, 2009 was less than \$1 million, consisting of a gain of \$1 million with a

notional amount of \$61 million offset by a loss of \$1 million with a notional amount of \$44 million, and was included in other noncurrent assets and liabilities, respectively. As of June 30, 2010, there were no open foreign currency derivatives which qualified for hedge accounting treatment.

Interest rate hedges

During 2009, Ashland purchased a three year interest rate cap on a notional amount of \$300 million of variable rate debt. This interest rate cap fixes Ashland's interest rate on that outstanding variable interest rate debt when LIBOR interest rates equal or exceed 7% on a reset date. This interest rate cap qualifies as an interest rate swap within the provisions of the Senior Credit Agreement. This instrument does not qualify for

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE F – FAIR VALUE MEASUREMENTS (continued)

hedge accounting and therefore gains or losses reflecting changes in fair value, along with the amortization of the upfront premium paid by Ashland to purchase the instrument, are reported in the Statements of Consolidated Income within the net interest and other financing expense caption. As of June 30, 2010 and 2009, the fair value on the interest rate cap was less than \$1 million and recorded within the other noncurrent assets caption of the Condensed Consolidated Balance Sheet.

Other financial instruments

At June 30, 2010, Ashland's long-term debt had a carrying value of \$1,134 million compared to a fair value of \$1,323 million. The fair values of long-term debt are based on quoted market prices or, if market prices are not available, the present values of the underlying cash flows discounted at Ashland's incremental borrowing rates.

NOTE G – DEBT

The following table summarizes Ashland's current and long-term debt as of the reported Condensed Consolidated Balance Sheet dates.

(In millions)	June 30 2010	September 30 2009	June 30 2009

(a) Senior credit facilities. On March 31, 2010, Term Loan A due 2014 was entered into while the Term Loan A due 2013 and Term Loan B due 2014 were paid in full.

(b) Hercules retained instruments.

The scheduled aggregate maturities of debt by fiscal year are as follows: \$15 million remaining in 2010, \$59 million in 2011, \$27 million in 2012, \$323 million in 2013, \$203 million in 2014 and \$794 million in 2015 and thereafter.

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE G – DEBT (continued)

Senior Credit Facilities

On March 31, 2010, as part of a refinancing of its then-existing senior credit facilities, Ashland entered into a Credit Agreement with Bank of America, N.A., as Administrative Agent, The Bank of Nova Scotia, as Syndication Agent, and the other Lenders party thereto, (the “Senior Credit Agreement”). The Senior Credit Agreement provides for an aggregate principal amount of \$850 million in senior secured credit facilities (the “Senior Credit Facilities”), consisting of a \$300 million four-year Term Loan A facility and a \$550 million revolving credit facility. The proceeds from the borrowings from the Term Loan A facility were used, together with proceeds from the accounts receivable securitization facility described below, and cash on hand to repay all amounts outstanding under Ashland’s previous senior secured facilities and to pay for fees and expenses incurred in connection with the Senior Credit Facilities and the related transactions. The new revolving credit facility will provide ongoing working capital and will be used for other general corporate purposes as well as support for the issuance of letters of credit.

The Senior Credit Facilities are guaranteed by Ashland’s present and future subsidiaries (other than certain immaterial subsidiaries, regulated subsidiaries, joint ventures, special purpose finance subsidiaries, certain foreign subsidiaries and certain unrestricted subsidiaries) and are secured by a first priority security interest in substantially all the personal property assets of Ashland and such guarantor subsidiaries, including the capital stock or other equity interests of certain of Ashland’s U.S. and first-tier foreign subsidiaries and a portion of the stock of certain of Ashland’s other first-tier foreign subsidiaries. The Senior Credit Facilities may cease to be secured upon Ashland achieving an Investment Grade corporate family rating as defined in the Senior Credit Agreement.

The Senior Credit Facilities carried an initial interest rate of either LIBOR plus 275 points or base rate plus 175 basis points, at Ashland’s option, and as of June 30, 2010, the weighted-average interest rate on the Term Loan A was 2.8%. Total borrowing capacity remaining under the \$550 million revolving credit facility was \$428 million, representing a reduction of \$122 million for letters of credit outstanding at June 30, 2010. The Term Loan A facility was drawn in full at closing and is required to be repaid by Ashland in consecutive quarterly installments commencing with the installment due on June 30, 2010, with 5% of the original principal amount due during year one, 7.5% of the original principal amount due during year two, 10% of the original principal amount due during year three, and 77.5% of the original principal amount due during year four (in quarterly installments of 5.0%, 5.0%, 5.0% and 62.5%), with a final payment of all outstanding principal and interest on March 31, 2014.

As a result of the new Senior Credit Agreement and prepayments made during the March 2010 quarter, Ashland expensed \$62 million of the remaining \$84 million debt issuance costs related to the loan fees paid to originate the initial term facility and incurred an additional \$4 million of prepayment fee penalties related to the previous Term Loan B facility, which were included in the net interest and other financing expense caption in the Statements of Consolidated Income. In addition, Ashland incurred \$12 million of new debt issuance costs associated with the new Senior Credit Agreement that will be recognized as an expense ratably over the life of the new term of the agreement.

Covenant restrictions

The Senior Credit Facilities include less restrictive covenants than the previous credit facility and no longer contain covenants associated with minimum consolidated net worth and capital expenditure limits. The covenants contain certain usual and customary representations and warranties, and usual and customary affirmative and negative covenants which include financial covenants; limitations on liens, additional indebtedness, further negative pledges, investments, payment of dividends, mergers, sale of assets and restricted payments; and other customary limitations.

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE G - DEBT (continued)

The maximum consolidated leverage ratio permitted under the Senior Credit Facilities are as follows: 3.25 from the period March 31, 2010 through September 30, 2010, 3.00 from the period December 31, 2010 through September 30, 2011 and 2.75 from December 31, 2011 and each fiscal quarter thereafter.

The permitted consolidated fixed charge coverage ratio under the Senior Credit Facility is 1.25 from the period March 31, 2010 through September 30, 2010 and 1.50 from December 31, 2010 and for each fiscal quarter thereafter.

As of June 30, 2010, Ashland is in compliance with all credit facility covenant restrictions. At June 30, 2010, Ashland's calculation of the consolidated leverage ratio per the refinancing was 0.9 compared to the maximum consolidated leverage ratio permitted under Ashland's Senior Credit Agreement of 3.25. At June 30, 2010, Ashland's calculation of the fixed charge coverage ratio was 5.5 compared to the permitted consolidated ratio of 1.25.

Accounts receivable securitization

As part of the refinancing described above, on March 31, 2010, Ashland amended and restated its existing accounts receivable securitization facility, pursuant to (i) a First Amendment to Sale Agreement, between Ashland and CVG Capital II, LLC, a wholly-owned "bankruptcy remote" special purpose subsidiary of Ashland ("CVG"), which amended the Sale Agreement, dated as of November 13, 2008 (as so amended, the "Sale Agreement") and (ii) an Amended and Restated Transfer and Administration Agreement (the "Transfer and Administration Agreement"), among CVG, Ashland, each of Liberty Street Funding LLC, Market Street Funding LLC and Three Pillars Funding LLC, as Conduit Investors and Uncommitted Investors, The Bank of Nova Scotia, as the Agent (the "Agent"), a Letter of Credit Issuer, a Managing Agent, an Administrator and a Committed Investor, PNC Bank, National Association, as a Letter of Credit Issuer, a Managing Agent, an Administrator and a Committed Investor, SunTrust Bank, as a Letter of Credit Issuer and a Committed Investor, SunTrust Robinson Humphrey, Inc., as a Managing Agent and an Administrator and Wells Fargo Bank, National Association, as a Letter of Credit Issuer, a Managing Agent and a Committed Investor, as acknowledged and agreed to by Bank of America, National Association and YC SUSI Trust, as exiting parties.

The primary purposes of the amendment of the accounts receivable securitization facility were to increase the maximum available funds under the facility from \$200 million to \$350 million and to extend the maturity date of the facility to March 29, 2013. During the March 2010 quarter, Ashland incurred an additional \$1 million in fees related to the amendment and restatement of the facility that was capitalized and included within other noncurrent assets within the Condensed Consolidated Balance Sheet. At June 30, 2010, the outstanding amount of accounts receivable sold by Ashland to CVG was \$689 million. Ashland had drawn \$250 million under the facility as of June 30, 2010 of the approximate \$350 million in available funding from qualifying receivables.

As part of the receivables securitization facility, under the Sale Agreement Ashland will sell, on an ongoing basis, substantially all of its qualifying accounts receivable (but not those of its subsidiaries), certain related assets and the right to the collections on those accounts receivable to CVG. Under the terms of the Transfer and Administration Agreement, CVG may, from time to time, obtain up to \$350 million (in the form of cash or letters of credit for the benefit of Ashland and its other subsidiaries) from the Conduit Investors, the Uncommitted Investors and/or the Committed Investors (together the "Investors") through the sale of its interest in such receivables, related assets and

collections or by financing those receivables, related assets and rights to collection. Ashland accounts for its transfers under the facility as secured borrowings, and the receivables sold pursuant to the facility are included in the Condensed Consolidated Balance Sheet as accounts receivable. Borrowings under the facility will be repaid as accounts receivable are collected, with

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE G – DEBT (continued)

new borrowings created as, and when, CVG requests additional fundings from the Investors under the Transfer and Administration Agreement, which will generally occur on a monthly basis. Once sold to CVG, the accounts receivable, related assets and rights to collection described above will be separate and distinct from Ashland's own assets and will not be available to its creditors should Ashland become insolvent. Ashland's equity interest in CVG has been pledged to the lenders under Ashland's new senior secured credit facilities described above. Substantially all of CVG's assets have been pledged to the Agent in support of its obligations under the Transfer and Administration Agreement.

The foregoing summary of the Transfer and Administration Agreement and the First Amendment to Sale Agreement is qualified in its entirety by reference to the text of such agreements, which are filed as Exhibits 10.2 and 10.3 to Ashland's Form 8-K filed on April 6, 2010. The original Sale Agreement dated as of November 13, 2008, was filed as Exhibit 10.4 to Ashland's Form 8-K filed on November 19, 2008.

NOTE H – INVENTORIES

Inventories are carried at the lower of cost or market. Certain chemicals, plastics and lubricants are valued at cost using the last-in, first-out (LIFO) method. During the three and nine month periods ended June 30, 2009 certain inventory quantities valued under the LIFO method were reduced. This reduction resulted in a liquidation of LIFO quantities carried at lower costs prevailing in prior years as compared with the cost of purchases within the periods presented, the effect of which decreased cost of goods sold for the three and nine months ended June 30, 2009 by \$3 million and \$14 million, respectively. The remaining inventories are stated at cost using the average cost method. The following table summarizes Ashland's inventories as of the reported Condensed Consolidated Balance Sheet dates.

(In millions)	June 30 2010	September 30 2009	June 30 2009
Finished products	\$ 598	\$ 486	\$ 468
Raw materials, supplies and work in process	159	166	168
LIFO carrying values	(146)	(125)	(119)
	\$ 611	\$ 527	\$ 517

NOTE I – GOODWILL AND OTHER INTANGIBLES

In accordance with U.S. GAAP, Ashland reviews goodwill and other intangible assets for impairment annually and when events and circumstances indicate an impairment may have occurred. The annual assessment is performed as of July 1 and consists of Ashland determining each reporting unit's current fair value compared to its current carrying value. Ashland has determined its reporting units for allocation of goodwill include the Functional Ingredients, Water Technologies, Consumer Markets and Distribution reportable segments. Within the Performance Materials reportable segment, because further discrete financial information is provided and management regularly reviews this information, this reportable segment is further broken down into the Casting Solutions and Composite

Polymers/Specialty Polymers and Adhesives reporting units. Ashland performed its most recent annual goodwill impairment test as of July 1, 2009, and determined at that time, that no impairment existed.

Ashland's purchase of Hercules increased goodwill by \$1,808 million. In connection with the goodwill associated with this acquisition, Ashland determined that a certain amount of the goodwill should be allocated to all reporting units because each reporting unit is benefiting from synergies related to the acquisition that increases these businesses' overall reported profitability. Ashland calculated the increased value each reporting unit is expected to receive from the estimated synergy savings, which was then multiplied by industry valuation multiples for each specific reporting unit, in determining the appropriate amount of goodwill to allocate for this transaction.

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE I – GOODWILL AND OTHER INTANGIBLES (continued)

The following is a progression of goodwill by segment for the periods ended June 30, 2010 and 2009.

(In millions)	Functional Ingredients	Water Technologies	Performance Materials (a)	Consumer Markets	Distribution	Total
Balance at						
September 30, 2009	\$ 1,106	\$ 626	\$ 293	\$ 115	\$ 80	\$ 2,220
Acquisitions	1	1	42	-	-	44
Currency translation adjustment	(80)	(43)	(10)	-	-	(133)
Balance at June 30, 2010	\$ 1,027	\$ 584	\$ 325	\$ 115	\$ 80	\$ 2,131

(a) Goodwill consisted of \$51 million and \$274 million, respectively, for the Castings Solutions and Composite Polymers/Specialty Polymers and Adhesives reporting units. The addition of \$42 million of goodwill is related to the Ara Quimica acquisition.

(In millions)	Functional Ingredients	Water Technologies	Performance Materials (a)	Consumer Markets (b)	Distribution	Total
Balance at						
September 30, 2008	\$ -	\$ 56	\$ 196	\$ 30	\$ 1	\$ 283
Acquisitions	1,016	508	97	85	79	1,785
Currency translation adjustment	61	24	(3)	-	-	82
Balance at June 30, 2009	\$ 1,077	\$ 588	\$ 290	\$ 115	\$ 80	\$ 2,150

(a) Excludes goodwill of \$15 million as of June 30, 2009 associated with the Drew Marine sale during 2009 that has been classified within assets held for sale.

(b) Goodwill consisted of \$51 million and \$239 million, respectively, for the Castings Solutions and Composite Polymers/Specialty Polymers and Adhesives reporting units.

Intangible assets consist of trademarks and trade names, patents and licenses, non-compete agreements, sales contracts, customer lists and intellectual property. Intangible assets with definite lives are amortized on a straight-line basis over their estimated useful lives. The cost of trademarks and trade names is amortized principally over 15 to 25 years, intellectual property over 5 to 20 years, customer relationships over 3 to 24 years and other intangibles over 2 to 50 years.

Certain intangible assets within trademarks and trade names have been classified as indefinite lived and had a balance of \$290 million as of June 30, 2010 and 2009. In accordance with U.S. GAAP, Ashland annually reviews these assets to determine whether events and circumstances continue to support the indefinite useful life designation. Intangible

assets were comprised of the following as of each period disclosed below.

(In millions)	June 30, 2010		
	Gross carrying amount	Accumulated amortization	Net carrying amount
Trademarks and trade names	\$ 353	\$ (26)	\$ 327
Intellectual property	331	(58)	273

Other intangibles	43	(22)	21
Total intangible assets	\$ 1,286	\$ (108)	\$ 1,178

Amortization expense recognized on intangible assets for the nine months ended June 30 was \$52 million for 2010 and \$46 million for 2009 and is primarily included in the selling, general and administrative expenses caption of the Statements of Consolidated Income.

Estimated amortization expense for future periods is \$67 million in 2010 (includes nine months actual and three months estimated), \$65 million in 2011, \$62 million in 2012, \$62 million in 2013 and \$61 million in 2014.

NOTE J – INCOME TAXES

For the three months ended June 30, 2010 and 2009, Ashland's effective tax rates were 16.3 % and 44.3%, respectively. For the nine months ended June 30, 2010 and 2009, Ashland's effective tax rates were 25.6% and 168.5%, respectively. The significant items that generated the variance between the U.S. federal statutory rate and the effective rates are included in the following table.

(In millions)	Three months ended June 30		Nine months ended June 30	
	2010	2009	2010	2009
Income from continuing operations before income taxes	\$ 160	\$ 91	\$ 308	\$ 29
Income tax expense computed at U.S. Federal statutory rates (35%)	\$ 56	\$ 32	\$ 108	\$ 10
Increase (decrease) in amount computed resulting from:				
Research and development tax credits	(22)	-	(22)	(3)
Non-taxable gain - Ara Quimica	(6)	-	(6)	-
European legal entity restructuring	6	-	6	-
Resolution, evaluation and re-evaluation of tax positions	(5)	8	(10)	19
Foreign rate differential	(3)	(14)	(9)	(22)
Nondeductible (gain) loss on life insurance investments	2	(3)	-	5

Edgar Filing: ASHLAND INC. - Form 10-Q

Unused net operating losses	1	12	2	12
Patient Protection and Affordable Care Act	-	-	14	-
APB 23 repatriated earnings (a)	-	-	-	14
Nondeductible in-process research and development costs	-	-	-	3
(Utilization)/generation of capital loss carryforwards	-	(2)	(5)	9
Other	(3)	7	1	2
Income tax expense	\$ 26	\$ 40	\$ 79	\$ 49

(a) Represents repatriation of historical earnings of certain foreign subsidiaries.

Adjustments in Ashland's effective tax rate are generally due to discrete items and changes within foreign effective tax rates resulting from income or loss fluctuations that usually include varying proportions of income or loss attributable to foreign jurisdictions that have different tax rates.

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE J – INCOME TAXES (continued)

During the June 2010 quarter, the income tax expense caption within the Statement of Consolidated Income included a net favorable benefit of \$16 million related to certain discrete items. This adjustment consisted of a benefit of \$22 million (net of unrecognized tax benefits) for the identification of additional U.S. research and development tax credits within the acquired Hercules businesses, and a charge of \$6 million for unrecognized tax benefits and other tax expense associated with the restructuring of certain European legal entities as part of the ongoing integration of the Hercules businesses. In addition, the current quarter tax expense was impacted by a favorable benefit of \$6 million attributable to a non-taxable book gain which was recorded as the result of the Ara Quimica acquisition.

During the March 2010 quarter, the Patient Protection and Affordable Care Act (PPACA) was signed into law. The PPACA contains a provision that changes the tax treatment related to a federal subsidy available to Ashland under its postretirement plans. The subsidy is known as the Retiree Drug Subsidy (RDS). Ashland is not currently taxed on the RDS payments received. However, as a result of the PPACA, RDS payments will effectively become taxable to Ashland on October 1, 2013, by requiring the amount of the subsidy received to be offset against Ashland's deduction for health care expenses. The change in tax treatment does not affect the taxation of the subsidy itself, but would reduce Ashland's deduction for the costs of health care for retirees by the amount of the subsidy received. As a result, the deductible temporary difference and any related deferred tax asset on Ashland's Condensed Consolidated Balance Sheet associated with the benefit plan will be reduced. In accordance with U.S. GAAP, which states that the impact of the change in tax law should be immediately recognized in the period that includes the enactment date regardless of the effective date of the change in tax law, Ashland recorded a \$19 million charge within the Statement of Consolidated Income during the March 2010 quarter, comprised of a \$14 million income tax charge and a \$5 million net loss on divestitures related to postretirement plans of the businesses divested as part of the MAP Transaction.

Changes in unrecognized tax benefits are summarized as follows for the nine months ended June 30, 2010 and 2009.

(In millions)

Balance at October 1, 2009	\$ 125
Increases related to positions taken on items from prior years	9
Decreases related to positions taken on items from prior years	(20)
Increases related to positions taken in the current year	16
Lapse of statute of limitations	(4)
Settlement of uncertain tax positions with tax authorities	(7)
Balance at June 30, 2010	\$ 119

Balance at October 1, 2008	\$ 79
Increases related to positions taken on items from prior years	13
Decreases related to positions taken on items from prior years	(5)
Increases related to assumed Hercules positions in the current year	35
Increases related to positions taken in the current year	8
Lapse of statute of limitations	(9)

Settlement of uncertain tax positions with tax authorities	(21)
Balance at June 30, 2009	\$ 100

It is reasonably possible that the amount of the unrecognized tax benefits may increase or decrease within the next twelve months as the result of settlements from ongoing audits, which may have material affect on the Condensed Consolidated Financial Statements.

 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE K – EARNINGS PER SHARE

The following is the computation of basic and diluted earnings per share (EPS) from continuing operations. Stock options, SARs and warrants (assumed as part of the Hercules acquisition) available to purchase shares outstanding for each reporting period whose grant price was greater than the average market price of Ashland Common Stock for each applicable period were not included in the computation of income from continuing operations per diluted share because the effect of these instruments would be antidilutive. The total number of these shares outstanding was approximately 2.0 million and 2.9 million as of June 30, 2010 and 2009, respectively.

NOTE L – EMPLOYEE BENEFIT PLANS

For the nine months ended June 30, 2010, \$110 million had been contributed to the U.S. plans, \$100 million of which was an Ashland Common Stock contribution made in November 2009, and \$30 million had been contributed to the non-U.S. plans. Ashland expects to make additional contributions to the U.S. plans of \$2 million and \$5 million in contributions to the non-U.S. plans during the remainder of fiscal year 2010. The following table details the components of pension and other postretirement benefit costs.

(In millions)	Pension benefits		Other postretirement benefits

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE M – CAPITAL STOCK

During the third quarter of fiscal 2010, the Board of Directors of Ashland announced and paid a quarterly cash dividend of 15 cents per share to eligible shareholders of record. This amount was double the previous quarterly dividend of 7.5 cents per share paid in the first two quarters of fiscal 2010 and all four quarters in fiscal 2009.

In November 2009, Ashland made a voluntary pension plan contribution of approximately 3.0 million shares of Ashland Common Stock, valued at \$100 million on the date of transfer.

On November 13, 2008, Ashland completed its acquisition of Hercules. As part of the consideration to acquire the 112.7 million shares of outstanding Hercules Common Stock on that date, Ashland issued 10.5 million shares of Ashland Common Stock, valued at \$450 million on the announcement date.

NOTE N – STOCK INCENTIVE PLANS

Ashland has stock incentive plans under which key employees or directors are granted stock-settled stock appreciation rights (SARs), performance share awards or nonvested stock awards. Each program is typically a long-term incentive plan designed to link employee compensation with increased shareholder value or reward superior performance and encourage continued employment with Ashland. Ashland recognizes compensation expense for the grant date fair value of stock-based awards over the applicable vesting period. Stock-based compensation expense was \$3 million for the three months ended June 30, 2010 and 2009, and \$10 million and \$6 million for the nine month periods ended June 30, 2010 and 2009, respectively, and is included in the selling, general and administrative expenses caption of the Statements of Consolidated Income.

SARs

SARs are granted to employees or directors at a price equal to the fair market value of the stock on the date of grant and typically become exercisable over periods of one to three years. Unexercised SARs lapse essentially ten years after the date of grant. SARs granted for the nine months ended June 30, 2010 and 2009 were 0.6 million and 1.4 million, respectively. In addition, on November 13, 2008, approximately one million options were converted from previous Hercules stock options into stock options for Ashland shares. These shares vested upon closing of the acquisition and the fair value of the converted stock options were recognized as a component of the purchase price with no additional amounts recorded as future compensation expense. As of June 30, 2010, there was \$9 million of total unrecognized compensation costs related to SARs. That cost is expected to be recognized over a weighted-average period of 2.1 years. Ashland estimates the fair value of SARs granted using the Black-Scholes option-pricing model. This model requires several assumptions, which Ashland has developed and updates based on historical trends and current market observations. The accuracy of these assumptions is critical to the estimate of fair value for these equity instruments.

Nonvested stock awards

Nonvested stock awards are granted to employees or directors at a price equal to the fair market value of the stock on the date of grant and generally vest over a one to seven year period. However, such shares are subject to forfeiture upon termination of service before the vesting period ends. Nonvested stock awards entitle employees or directors to vote the shares and to receive any dividends (or dividend equivalents) upon grant. Nonvested stock awards granted for the nine months ended June 30, 2010 and 2009 were 148,950 and 166,500 shares, respectively. As of June 30, 2010, there was \$8 million of total unrecognized compensation costs related to nonvested stock awards. That cost is expected to be recognized over a weighted-average period of 2.4 years.

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE N – STOCK INCENTIVE PLANS (continued)

Performance shares

Performance share/unit awards are granted to certain key employees and are tied to Ashland's overall financial performance relative to the financial performance of a selected industry peer group. Ashland believes that the focus on relative performance encourages management to make decisions that create shareholder value. Awards are granted annually, with each award covering a three-year performance cycle. Historically, each performance share/unit is convertible to one share of Ashland Common Stock or cash. As a result, these plans are recorded as a liability in the Condensed Consolidated Balance Sheets within the other noncurrent liabilities caption. Performance measures used to determine the actual number of performance shares issuable upon vesting include an equal weighting of Ashland's total shareholder return (TSR) performance and Ashland's return on investment (ROI) performance as compared to the performance peer group over the three-year performance cycle. TSR relative to peers is considered a market condition while ROI is considered a performance condition under applicable U.S. GAAP. Nonvested performance shares/units do not entitle employees to vote the shares or to receive any dividends thereon. Performance shares/units granted for the nine months ended June 30, 2010 and 2009 were 0.2 million and 0.3 million, respectively. As of June 30, 2010, there was \$6 million of total unrecognized compensation costs related to performance shares/units. That cost is expected to be recognized over a weighted-average period of 2.0 years.

NOTE O – LITIGATION, CLAIMS AND CONTINGENCIES

Asbestos litigation

Ashland and Hercules, a wholly owned subsidiary of Ashland, have liabilities from claims alleging personal injury caused by exposure to asbestos. To assist in developing and annually updating independent reserve estimates for future asbestos claims and related costs given various assumptions, Ashland retained Hamilton, Rabinovitz & Associates, Inc. (HR&A). The methodology used by HR&A to project future asbestos costs is based largely on recent experience, including claim-filing and settlement rates, disease mix, enacted legislation, open claims, and litigation defense. The claim experience of Ashland and Hercules are separately compared to the results of previously conducted third party epidemiological studies estimating the number of people likely to develop asbestos-related diseases. Those studies were undertaken in connection with national analyses of the population expected to have been exposed to asbestos. Using that information, HR&A estimates a range of the number of future claims that may be filed, as well as the related costs that may be incurred in resolving those claims.

Ashland asbestos-related litigation

The claims alleging personal injury caused by exposure to asbestos asserted against Ashland result primarily from indemnification obligations undertaken in 1990 in connection with the sale of Riley, a former subsidiary.

The amount and timing of settlements and number of open claims can fluctuate significantly from period to period. A summary of Ashland asbestos claims activity, excluding those related to the acquisition of Hercules, follows.

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES

A progression of activity in the asbestos reserve is presented in the following table.

(In millions)	Nine months ended		Years ended September 30		
	June 30		2009	2008	2007
	2010	2009	2009	2008	2007
Asbestos reserve - beginning of period	\$ 543	\$ 572	\$ 572	\$ 610	\$ 635
Reserve adjustment	28	5	5	2	5
Amounts paid	(30)	(26)	(34)	(40)	(30)
Asbestos reserve - end of period	\$ 541	\$ 551	\$ 543	\$ 572	\$ 610

From the range of estimates, Ashland records the amount it believes to be the best estimate of future payments for litigation defense and claim settlement costs, which generally approximates the mid-point of the estimated range of exposure from model results. Ashland reviews this estimate and related assumptions quarterly and annually updates the results of a non-inflated, non-discounted approximate 50-year model developed with the assistance of HR&A. During the most recent annual update of this estimate, completed during the June 2010 quarter, it was determined that the liability for asbestos claims should be increased by \$28 million. Total reserves for asbestos claims were \$541 million at June 30, 2010 compared to \$543 million at September 30, 2009 and \$551 million at June 30, 2009.

Excluding the Hercules asbestos claims further described below, Ashland has insurance coverage for most of the litigation defense and claim settlement costs incurred in connection with its asbestos claims, and coverage-in-place agreements exist with the insurance companies that provide most of the coverage currently being accessed. As a result, increases in the asbestos reserve have been largely offset by probable insurance recoveries. The amounts not recoverable generally are due from insurers that are insolvent, rather than as a result of uninsured claims or the exhaustion of Ashland's insurance coverage.

For the Ashland asbestos-related obligations, Ashland has estimated the value of probable insurance recoveries associated with its asbestos reserve based on management's interpretations and estimates surrounding the available or

applicable insurance coverage, including an assumption that all solvent insurance carriers remain solvent. Approximately 70% of the estimated receivables from insurance companies are expected to be due from domestic insurers, of which approximately 83% have a credit rating of B+ or higher by A. M. Best, as of June 30, 2010. The remainder of the insurance receivable is due from London insurance companies, which generally have lower credit quality ratings, and from Underwriters at Lloyd's, whose insurance policy obligations have been transferred to a Berkshire Hathaway entity. During the December 2009 quarter, Ashland entered into a new agreement with a number of London market insurance companies with respect to coverage for asbestos-related insurance claims. As a result, a \$12 million increase to the Ashland asbestos receivable was recorded within the Condensed Consolidated Balance Sheet as of December 31, 2009, which had a \$9 million (after-tax) effect on the Statement of Consolidated Income for the December 2009 quarter within the discontinued operations caption. As a result of this agreement and other revised estimates, Ashland no longer discounts any portion of the asbestos receivable at this time.

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE O – LITIGATION, CLAIMS AND CONTINGENCIES (continued)

At June 30, 2010, Ashland's receivable for recoveries of litigation defense and claim settlement costs from insurers amounted to \$425 million (excluding the Hercules receivable for asbestos claims), of which \$56 million relates to costs previously paid. Receivables from insurers amounted to \$422 million at September 30, 2009 and \$437 million at June 30, 2009. During the June 2010 quarter, the model used for purposes of valuing the asbestos reserve described above, and its impact on valuation of future recoveries from insurers, was updated. This model update, along with likely settlement adjustments, caused an additional \$24 million net increase in the receivable for probable insurance recoveries.

Hercules asbestos-related litigation

Hercules, a wholly owned subsidiary of Ashland, has liabilities from claims alleging personal injury caused by exposure to asbestos. Such claims typically arise from alleged exposure to asbestos fibers from resin encapsulated pipe and tank products which were sold by one of Hercules' former subsidiaries to a limited industrial market. The amount and timing of settlements and number of open claims can fluctuate significantly from period to period. A summary of Hercules' asbestos claims activity follows.

(In thousands)	Nine months ended June 30		Year ended September 30	
	2010	2009 (a)	2009	(a)
Open claims - beginning of period	21	27	27	
New claims filed	-	1	1	
Claims dismissed/settled	(1)	(4)	(7)	
Open claims - end of period	20	24	21	

(a) Beginning of period represents acquisition date of November 13, 2008.

A progression of activity in the asbestos reserve is presented in the following table.

(In millions)	Nine months ended June 30		Year ended September 30	
	2010	2009	(a)	2009 (a)
Asbestos reserve - beginning of period	\$ 484	\$ 233		\$ 233
Reserve adjustments (b)	(93)	140		261
Amounts paid	(6)	(8)		(10)
Asbestos reserve - end of period	\$ 385	\$ 365		\$ 484

(a) Beginning of period represents acquisition date of November 13, 2008.

(b) Includes purchase accounting adjustments.

In November 2008, Ashland completed its acquisition of Hercules. At that time, Hercules' recorded reserve for asbestos claims was \$233 million for indemnity costs. Hercules' accounting policy in recording reserves for asbestos claims was to reserve at the lowest level of an estimated range of exposure for indemnity claims, excluding estimates of future litigation defense costs. Ashland's accounting policy in recording reserves for asbestos claims is to include amounts for the best estimate of projected indemnity and litigation defense costs, which generally approximates the mid-point of the estimated range of exposure from model results. As a result, Ashland initially recorded a \$105 million increase to the asbestos reserve for Hercules to include projected defense costs. To do so, Ashland utilized several internal models that it employs to estimate defense costs associated with asbestos claims.

During 2009, Ashland included the Hercules claims within its annual assessment of these matters, which includes running various non-inflated, non-discounted approximate 50-year models developed with the assistance of HR&A and determining from the range of estimates in the models the amount it believes to be the best estimate of future payments for litigation defense and claim settlement costs. Based on Ashland's

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE O – LITIGATION, CLAIMS AND CONTINGENCIES (continued)

assessment of the best estimate of the range of exposure from the most recent model results, an additional \$156 million increase was recorded, which was accounted for as an adjustment to Hercules' opening balance sheet because the adjustment related to claims that had been incurred as of the acquisition date.

During the December 2009 quarter, Ashland essentially completed the final valuation assessment of the Hercules asbestos claims liability existing as of the acquisition date and underlying claim files as part of transitioning to a standardized claims management approach. This assessment resulted in a \$35 million and \$22 million reduction to the asbestos liability and receivable, respectively, which was accounted for as an adjustment to Hercules' opening balance sheet since the adjustment related to claims that had been incurred as of the acquisition date. During the most recent annual update of this estimate, completed during the June 2010 quarter, it was determined that the liability for asbestos claims should be reduced by \$58 million. Based upon review of the assumptions underlying the asbestos valuation model and the most recent claim filing and settlement trend rates for both pre- and post-acquisition periods, Ashland determined that \$14 million of the \$58 million adjustment should be recorded to goodwill, which was partially offset by \$6 million for an increase in probable insurance recoveries, totaling to a net \$8 million adjustment to goodwill. Total reserves for Hercules asbestos claims were \$385 million at June 30, 2010 compared to \$484 million at September 30, 2009 and \$365 million at June 30, 2009.

As of Ashland's acquisition date of Hercules, all of the cash previously recovered and placed into a trust from the settlements with certain of Hercules' insurance carriers had been exhausted. With the addition of estimated defense and indemnity costs, the total Hercules asbestos reserve exceeded the amount needed to obtain reimbursements pursuant to coverage-in-place agreements with certain other insurance carriers. Accordingly, Ashland has recorded a \$97 million receivable within the noncurrent asbestos insurance receivable caption of the Condensed Consolidated Balance Sheet for future projected costs that will be reimbursable using a similar methodology that Ashland has historically utilized. As previously mentioned, during the June 2010 quarter, the model used for purposes of valuing the asbestos reserve and its impact on valuation of future recoveries from insurers was updated. This model update along with likely settlement adjustments caused a \$28 million reduction in the receivable for probable insurance recoveries, \$6 million of which was recorded to goodwill. As of June 30, 2010, the receivables from insurers amounted to \$68 million compared to \$118 million at September 30, 2009 and \$57 million at June 30, 2009. This estimated receivable consists exclusively of domestic insurers, of which approximately 97% have a credit rating of B+ or higher by A.M. Best, as of June 30, 2010.

Asbestos litigation cost projection

Projecting future asbestos costs is subject to numerous variables that are extremely difficult to predict. In addition to the significant uncertainties surrounding the number of claims that might be received, other variables include the type and severity of the disease alleged by each claimant, the long latency period associated with asbestos exposure, dismissal rates, costs of medical treatment, the impact of bankruptcies of other companies that are co-defendants in claims, uncertainties surrounding the litigation process from jurisdiction to jurisdiction and from case to case, and the impact of potential changes in legislative or judicial standards. Furthermore, any predictions with respect to these variables are subject to even greater uncertainty as the projection period lengthens. In light of these inherent uncertainties, Ashland believes that the asbestos reserves for Ashland and Hercules represent the best estimate within

a range of possible outcomes. As a part of the process to develop these estimates of future asbestos costs, a range of long-term cost models was developed. These models are based on national studies that predict the number of people likely to develop asbestos-related diseases and are heavily influenced by assumptions regarding long-term inflation rates for indemnity payments and legal defense costs, as well as other variables mentioned previously. Ashland has currently estimated in various approximate 50-year models that it is reasonably possible that total future litigation defense and claim settlement costs on an inflated and undiscounted basis could range as high as approximately \$830 million for the Ashland asbestos-related litigation and

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE O – LITIGATION, CLAIMS AND CONTINGENCIES (continued)

approximately \$570 million for the Hercules asbestos-related litigation (or approximately \$1.4 billion in the aggregate), depending on the combination of assumptions selected in the various models. If actual experience is worse than projected, relative to the number of claims filed, the severity of alleged disease associated with those claims or costs incurred to resolve those claims, Ashland may need to further increase the estimates of the costs associated with asbestos claims and these increases could potentially be material over time.

Environmental remediation and asset retirement obligations

Ashland and Hercules are subject to various federal, state and local environmental laws and regulations that require environmental assessment or remediation efforts (collectively environmental remediation) at multiple locations. At June 30, 2010, such locations included 90 waste treatment or disposal sites where Ashland and/or Hercules have been identified as a potentially responsible party under Superfund or similar state laws, 153 current and former operating facilities (including certain operating facilities conveyed to MAP) and about 1,200 service station properties, of which 121 are being actively remediated.

Ashland's reserves for environmental remediation amounted to \$216 million at June 30, 2010 compared to \$221 million at September 30, 2009 and \$233 million at June 30, 2009, of which \$170 million at June 30, 2010, \$169 million at September 30, 2009 and \$186 million at June 30, 2009 were classified in other noncurrent liabilities on the Condensed Consolidated Balance Sheets. Total Hercules obligations assumed by Ashland were \$106 million, which includes an increase of \$29 million for different remediation approaches than previously assumed under Hercules' valuation models.

The following table provides a reconciliation of the changes in the environmental contingencies and asset retirement obligations during the nine months ended June 30, 2010.

(In millions)	Nine months ended	
	June 30	
	2010	2009
Reserve - beginning of period	\$ 221	\$ 149
Inherited Hercules obligations	6	100
Disbursements, net of cost recoveries	(23)	(28)
Revised obligation estimates and accretion	14	12
Foreign currency translation	(2)	-
Reserve - end of period	\$ 216	\$ 233

The total reserves for environmental remediation reflect Ashland's estimates of the most likely costs that will be incurred over an extended period to remediate identified conditions for which the costs are reasonably estimable, without regard to any third-party recoveries. Engineering studies, probability techniques, historical experience and other factors are used to identify and evaluate remediation alternatives and their related costs in determining the estimated reserves for environmental remediation. Ashland discounts certain environmental sites and regularly

adjusts its reserves as environmental remediation continues. Ashland has estimated the value of its probable insurance recoveries associated with its environmental reserve based on management's interpretations and estimates surrounding the available or applicable insurance coverage. At June 30, 2010, September 30, 2009 and June 30, 2009, Ashland's recorded receivable for these probable insurance recoveries was \$30 million, \$35 million and \$36 million, respectively. Environmental remediation expense, included within the selling, general and administrative expenses caption of the Statements of Consolidated Income, amounted to \$6 million and \$8 million for the three months ended June 30, 2010 and 2009, respectively, and \$11 million and \$14 million for the nine months ended June 30, 2010 and 2009, respectively. Environmental remediation expense, net of receivable activity, was \$4 million and \$8 million for the three months ended June 30, 2010 and 2009, respectively, and \$5 million and \$12 million for the nine months ended June 30, 2010 and 2009, respectively.

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE O – LITIGATION, CLAIMS AND CONTINGENCIES (continued)

Environmental remediation reserves are subject to numerous inherent uncertainties that affect Ashland's ability to estimate its share of the costs. Such uncertainties involve the nature and extent of contamination at each site, the extent of required cleanup efforts under existing environmental regulations, widely varying costs of alternate cleanup methods, changes in environmental regulations, the potential effect of continuing improvements in remediation technology, and the number and financial strength of other potentially responsible parties at multiparty sites. Although it is not possible to predict with certainty the ultimate costs of environmental remediation, Ashland currently estimates that the upper end of the reasonably possible range of future costs for identified sites could be as high as approximately \$360 million. No individual remediation location is material, as the largest reserve for any site is less than 10% of the remediation reserve.

Other legal proceedings and claims

Ashland Consumer Markets has established an engine guarantee associated with its Valvoline® product line. Consumers register their vehicles to qualify for the guarantee. Ashland has established an estimation methodology for quantifying the future potential reserves related to this guarantee program. As of June 30, 2010, the reserve associated with this guarantee was not significant.

In addition to the matters described above, there are other various claims, lawsuits and administrative proceedings pending or threatened against Ashland and its current and former subsidiaries. Such actions are with respect to commercial matters, product liability, toxic tort liability, environmental and other matters, which seek remedies or damages, some of which are for substantial amounts. While these actions are being contested, their outcome is not predictable with assurance.

NOTE P – SEGMENT INFORMATION

Ashland's businesses are managed along five industry segments: Functional Ingredients, Water Technologies, Performance Materials, Consumer Markets and Distribution.

Functional Ingredients is one of the world's largest producers of cellulose ethers. It provides specialty additives and functional ingredients that manage the physical properties of aqueous (water-based) and nonaqueous systems. Many of its products are derived from renewable and natural raw materials and perform in a wide variety of applications.

Water Technologies is a leading global producer of papermaking chemicals and a leading specialty chemicals supplier to the pulp, paper, commercial and institutional, food and beverage, chemical, mining and municipal markets. Its process, water treatment and functional chemistries are used to improve operational efficiencies, enhance product quality, protect plant assets, and ensure environmental compliance.

Performance Materials is a global leader in unsaturated polyester resins and vinyl ester resins. In addition, it provides customers with leading technologies in gelcoats, pressure-sensitive and structural adhesives, and metal casting consumables and design services.

Consumer Markets, which includes the Valvoline® family of products and services, is a leading innovator, marketer and supplier of high-performing automotive lubricants, chemicals and appearance products. Valvoline, the world's first lubricating oil, is the number two passenger car motor oil brand, and Valvoline Instant Oil Change represents the number two quick-lube franchise in the United States.

Distribution is a leading plastics and chemicals distributor in North America. It distributes chemicals, plastics and composite raw materials in North America, as well as plastics in Europe and China. Ashland Distribution also provides environmental services in North America, including hazardous and nonhazardous waste collection, recovery, recycling and disposal services.

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE P – SEGMENT INFORMATION (continued)

The following table presents for each segment the net sales and operating income for the three and nine months ended June 30, 2010 and 2009. Results of Ashland's reportable segments are presented based on its management structure and internal accounting practices. The structure and practices are specific to Ashland; therefore, the financial results of Ashland's business segments are not necessarily comparable with similar information for other comparable companies. Ashland modifies its expense allocation methodologies to the reportable segments from time to time as internal accounting practices are improved, more refined information becomes available and businesses change. Revisions to Ashland's methodologies that are deemed insignificant are applied on a prospective basis, while significant changes are applied on a retroactive basis. The unallocated and other caption includes certain specific company-wide restructuring activities that were significant, such as the restructuring plan related to the Hercules acquisition described in Note D, and other costs or adjustments that relate to former businesses that Ashland no longer operates.

NOTE Q – SUBSEQUENT EVENT

In July 2010, Ashland and Süd-Chemie AG (Süd-Chemie) reached a contractual agreement on the formation of an expanded global joint venture serving the foundry chemical sector. The transaction will combine three

businesses: Ashland's Casting Solutions business group, the Foundry-Products and Specialty Resins business unit of Süd-Chemie, and Ashland-Südchemie-Kernfest GmbH (ASK), the existing European-based joint venture between Ashland and Süd-Chemie, which only reports equity income of the joint venture within Ashland's consolidated results. Ashland's Casting Solutions and ASK businesses recorded sales of \$230 million and \$145 million, respectively, during fiscal year 2009. The Foundry-Products and Specialty Resins business unit of Süd-Chemie AG to be contributed to the joint venture generated sales of approximately \$146 million for the year ended December 31, 2009.

The transaction is expected to close by the end of calendar 2010, subject to customary closing conditions, including regulatory review. At closing, the joint venture will distribute a cash payment to Ashland of approximately €19 million, which is expected to occur during the first quarter of Ashland's 2011 fiscal year. During the fifth year of the joint venture's operations, Ashland will have the option to sell its shares in the new joint venture to Süd-Chemie under mutually agreed terms. If Ashland does not execute this option by

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE Q – SUBSEQUENT EVENT (continued)

the end of the sixth year of the joint venture's operations, Süd-Chemie will have the option to acquire Ashland's shares under mutually agreed terms. Under both options, if mutually agreed terms cannot be reached, then the fair market value of the shares will be determined through an appraisal process set forth in the agreement.

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES

FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These forward-looking statements are based upon a number of assumptions, including those mentioned within this report. Performance estimates are also based upon internal forecasts and analyses of current and future market conditions and trends; management plans and strategies; operating efficiencies and economic conditions; and legal proceedings and claims (including environmental and asbestos matters). Other risks and uncertainties include those that are described in filings made by Ashland with the Securities and Exchange Commission, including its most recent Form 10-K, which are available on Ashland's website at <http://investor.ashland.com> or at www.sec.gov. Ashland believes its expectations are reasonable, but cannot assure they will be achieved. Forward-looking information may prove to be inaccurate, and actual results may differ significantly from those anticipated. Ashland is not obligated to subsequently update or revise the forward-looking statements made in this report.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES MANAGEMENT'S DISCUSSION AND ANALYSIS

The following discussion should be read in conjunction with the Condensed Consolidated Financial Statements and the accompanying Notes to Condensed Consolidated Financial Statements herein.

BUSINESS OVERVIEW

Ashland profile

Ashland is a global specialty chemicals company that provides products, services and solutions that meet customer needs throughout a variety of industries. With approximately 14,700 employees worldwide, Ashland serves customers in more than 100 countries.

During the past several years Ashland has been focused on the objective of creating a dynamic, global specialty chemicals company. In that process, Ashland has divested certain noncore businesses, redesigned business models, and acquired businesses in growth markets like specialty additives, functional ingredients, water and adhesives to enhance Ashland's specialty chemicals offerings. Ashland's acquisition of Hercules, in November 2008, propelled the combined company to a global leadership position with expanded capabilities and promising growth potential in specialty additives and functional ingredients, paper and water technologies, and specialty resins.

Sales by region expressed as a percentage of total consolidated sales were as follows:

Sales by Geography	Three months ended June 30		Nine months ended June 30		(a)
	2010	2009	2010	2009	
North America	68%	66%	67%	69%

Asia Pacific	8%	9%	8%	7%	
Latin America & other	4%	4%	4%	4%	
	100%	100%	100%	100%	

(a) Sales from the acquired operations of Hercules are included herein as of November 14, 2008 through June 30, 2009.

Business segments

Ashland's reporting structure is composed of five reporting segments: Ashland Aqualon Functional Ingredients (Functional Ingredients), Ashland Hercules Water Technologies (Water Technologies), Ashland Performance Materials (Performance Materials), Ashland Consumer Markets (Consumer Markets) and Ashland Distribution (Distribution).

The contribution to sales by each business segment expressed as a percentage of total consolidated sales was as follows:

(a) Sales from the acquired operations of Hercules are included herein as of November 14, 2008 through June 30, 2009.

KEY FISCAL 2010 DEVELOPMENTS

During fiscal 2010, the following operational decisions and economic developments had an impact on Ashland's current and future cash flows, results of operations and financial position.

Economic environment

Ashland's recent financial performance indicates an improvement in demand occurring within the markets Ashland serves, as all of the business segments have reported increased or consistent volume levels from the June 2009 period on a comparable basis. Ashland has continued to emphasize product pricing to offset significant raw material cost increases in the most recent quarters, while internally assessing operations for cost reduction opportunities, to optimize cash flow generation and improve financial flexibility, positioning the company for future opportunities.

Cost-structure efficiency and Hercules integration programs

In conjunction with the Hercules acquisition in November 2008, Ashland announced an integration plan (Integration Plan) that targeted certain projected cost savings as part of combining joint and redundant services and facilities. This program focused primarily on capturing operational, selling and administrative savings within the combined company. Additionally, with the prolonged and significant deterioration of global economic demand, Ashland announced in January 2009 an additional cost reduction and organizational restructuring plan (2009 Program), which was subsequently expanded in July 2009, to further reduce Ashland's overall cost structure.

Combined with previous operational redesigns (2008 Program) completed during 2009, Ashland has achieved run rate cost reductions of \$425 million through June 30, 2010, an increase of \$70 million from the September 30, 2009 run rate cost reductions achieved, which exceeds the previous targeted run rate cost savings of \$400 million estimated for these cost reduction initiatives. The cumulative effect of these restructuring activities has resulted in 12 permanent facility closings through the end of the June 30, 2010 quarter, and in total has reduced the global workforce by over 2,000 employees, or approximately 13%, exceeding the previous estimate by over 100 employees. The total restructuring cost incurred under the cost-structure efficiency programs for the three and nine months ended June 30,

2010 was income of \$2 million and expense of \$1 million, respectively, and was classified within the selling, general and administrative expenses caption. The total restructuring cost incurred under the cost-structure efficiency programs for the three and nine months ended June 30, 2009 was \$16 million and \$73 million, respectively, of which \$4 million and \$39 million, respectively, was classified within the selling, general and administrative expenses caption and \$9 million and \$13 million were charged to the cost of sales caption. For the three and nine months ended June 30, 2009, the remaining cost of \$3 million and \$21 million, respectively, related to established severance reserves associated with Hercules personnel which qualified for purchase method of

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
MANAGEMENT'S DISCUSSION AND ANALYSIS

accounting in accordance with U.S. GAAP and had no effect on the Statement of Consolidated Income. Additional costs from reductions in resources or facilities may occur in future periods, which could include charges related to additional severance, plant closings, reassessed pension plan valuations or other items, although Ashland does not currently expect these to be significant. Ashland anticipates principally completing these restructuring activities during 2010. For further information on Ashland's cost-structure efficiency and Hercules' integration programs, see Note D of Notes to Condensed Consolidated Financial Statements.

During early April, Ashland successfully completed its last major step in the integration of Hercules by integrating its enterprise resource planning (ERP) system within the business units acquired as part of this acquisition.

Senior Credit Facilities refinancing

On March 31, 2010, as part of a refinancing of its then-existing senior credit facilities, Ashland entered into a Credit Agreement with Bank of America, N.A., as Administrative Agent, The Bank of Nova Scotia, as Syndication Agent, and the other Lenders party thereto, (the "Senior Credit Agreement"). The Senior Credit Agreement provided for an aggregate principal amount of \$850 million in senior secured credit facilities (the "Senior Credit Facilities"), consisting of a \$300 million four-year Term Loan A facility and a \$550 million revolving credit facility. The proceeds from the borrowings from the Term Loan A facility were used, together with proceeds from the accounts receivable securitization facility described below, and cash on hand to repay all amounts outstanding under Ashland's previous senior secured facilities and to pay for fees and expenses incurred in connection with the Senior Credit Facilities and the related transactions. The new revolving credit facility will provide ongoing working capital and will be used for other general corporate purposes as well as support for the issuance of letters of credit. The new Senior Credit Agreement has more favorable terms as compared to the previously existing senior credit facility, including less restrictive covenants, which includes the removal of covenants associated with consolidated net worth and capital expenditure limits, and lower interest rates. In conjunction with the new Senior Credit Agreement, Ashland expanded the availability of the accounts receivable securitization from \$200 million to \$350 million, subject to available funding from qualifying receivables. For further information on the new Senior Credit Agreement and accounts receivable securitization, see the "Liquidity" section of the "Financial Position" discussion and Note G within the Notes to Condensed Consolidated Financial Statements.

Corporate credit ratings

As a result of the financing and subsequent debt issued to complete the acquisition of Hercules during November 2008, Standard & Poor's and Moody's Investor Services downgraded Ashland's corporate credit rating to BB- and Ba2, respectively, which did not have a negative effect on Ashland's compliance with the existing covenants in the Senior Credit Agreement at that time.

During the December 2009 quarter, as a result of Ashland's improved financial position, Ashland's corporate credit rating was raised to BB by Standard & Poor's with a stable outlook. In addition, Moody's Investor Services kept Ashland's corporate credit rating at Ba2, while upgrading the outlook to stable from negative. During the March 2010 quarter, Ashland's corporate credit rating was again raised by Standard & Poor's to BB+ with a stable outlook. In addition, Moody's Investor Services also upgraded Ashland's corporate credit rating to Ba1, with a stable outlook.

Both rating agencies cited Ashland's positive cash flows since the Hercules acquisition and Ashland's significant debt reduction as major factors in these ratings actions. Ashland's ability to access capital markets to provide liquidity has remained largely unchanged as a result of these ratings actions; however, the improved corporate credit ratings, along with improvements in the credit markets and Ashland's financial performance, has allowed and should continue in the future to allow Ashland to borrow on more favorable terms, including less restrictive covenants and lower interest rates.

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
MANAGEMENT'S DISCUSSION AND ANALYSIS

Acquisitions/Divestitures

Süd-Chemie joint venture agreement

In July 2010, Ashland and Süd-Chemie AG (Süd-Chemie) reached a contractual agreement on the formation of an expanded global joint venture serving the foundry chemical sector. The transaction will combine three businesses: Ashland's Casting Solutions business group, the Foundry-Products and Specialty Resins business unit of Süd-Chemie, and Ashland-Südchemie-Kernfest GmbH (ASK), the existing European-based joint venture between Ashland and Süd-Chemie, which only reports equity income of the joint venture within Ashland's consolidated results. Ashland's Casting Solutions and ASK businesses recorded sales of \$230 million and \$145 million, respectively, during fiscal year 2009. The Foundry-Products and Specialty Resins business unit of Süd-Chemie AG to be contributed to the joint venture generated sales of approximately \$146 million for the year ended December 31, 2009.

The transaction is expected to close by the end of calendar 2010, subject to customary closing conditions, including regulatory review. At closing, the joint venture will distribute a cash payment to Ashland of approximately €19 million, which is expected to occur during the first quarter of Ashland's 2011 fiscal year. During the fifth year of the joint venture's operations, Ashland will have the option to sell its shares in the new joint venture to Süd-Chemie under mutually agreed terms. If Ashland does not execute this option by the end of the sixth year of the joint venture's operations, Süd-Chemie will have the option to acquire Ashland's shares under mutually agreed terms. Under both options, if mutually agreed terms cannot be reached, then the fair market value of the shares will be determined through an appraisal process set forth in the agreement.

Ara Quimica acquisition

In April 2010, Ashland acquired the remaining 50% of Ara Quimica, a leading producer of custom unsaturated polyester resin formulations for the composites industry in South America, for \$28 million. Prior to the acquisition, Ashland owned a 50% interest in Ara Quimica which it accounted for as an equity-method investment within the Performance Materials reporting segment. Ara Quimica reported sales of approximately \$50 million from its most recent fiscal year ended December 31, 2009. Ashland recognized a pretax gain of \$23 million as a result of remeasuring its prior equity interest held in Ara Quimica before the business combination. The gain is included in the net gain on acquisitions and divestitures caption on the Statements of Consolidated Income for the current quarter.

Pinova divestiture

In January 2010, Ashland sold its refined wood rosin and natural wood terpenes business, formerly known as Pinova, a business unit of Functional Ingredients, to TorQuest Partners in a transaction valued at approximately \$75 million before tax, which was comprised of \$60 million in cash and a \$15 million promissory note from TorQuest Partners. The Pinova business, with annual revenues of approximately \$85 million a year, has approximately 200 employees along with an associated manufacturing facility located in Brunswick, Georgia. The transaction resulted in a pretax gain of less than \$1 million, which was included in the net gain on acquisitions and divestitures caption on the Statements of Consolidated Income for the quarter ended March 2010. As part of this sale agreement, TorQuest Partners has agreed to continue to manufacture certain products on behalf of Ashland.

Quarterly dividend increased

During the June 2010 quarter, Ashland declared and paid a quarterly cash dividend of 15 cents per share on Ashland's Common Stock, double the previous quarterly dividend rate of 7.5 cents per share and equivalent to an annual dividend of 60 cents per share or 45 cents for fiscal 2010. This increase reflects the progress made over the past two years in integrating the Hercules acquisition, paying down debt, creating operating leverage, executing Ashland's business strategies, and Ashland's confidence in future cash generation.

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
MANAGEMENT'S DISCUSSION AND ANALYSIS

RESULTS OF OPERATIONS – CONSOLIDATED REVIEW

Use of non-GAAP measures

Based on clarification and interpretive guidance from the Securities and Exchange Commission Staff in January 2010 regarding the use of non-GAAP measures, Ashland has included within this document certain non-GAAP measures which include EBITDA (operating income plus depreciation and amortization), adjusted EBITDA (EBITDA adjusted for key items, which may include pro-forma affects for significant acquisitions or divestitures, as applicable) and free cash flow (cash flows by operating activities from continuing operations minus cash dividends paid and additions to property, plant and equipment). Such measurements are not prepared in accordance with U.S. GAAP and should not be construed as an alternative to reported results determined in accordance with U.S. GAAP. Management believes the use of such non-GAAP measures on a consolidated and business segment basis assists investors in understanding the ongoing operating performance by presenting the financial results between periods on a more comparable basis. In addition, certain financial covenants related to Ashland's Senior Credit Agreement are based on similar non-GAAP measures. The non-GAAP information provided is unique to Ashland and may not be consistent with the methodologies used by other companies.

Consolidated review

Current Quarter – Ashland recorded net income of \$148 million, or \$1.85 per diluted earnings per share, for the three months ended June 30, 2010 as compared to a net income of \$50 million, or \$.66 per diluted earnings per share, for the three months ended June 30, 2009. Included in net income for the current period is a \$23 million pretax gain (\$20 million after tax), or \$.25 per diluted earnings per share, as a result of remeasuring Ashland's previously held 50% equity interest in Ara Quimica.

Ashland's net income is primarily affected by results within operating income, but is also affected by net interest and other financing expense, income taxes and discontinued operations. Operating income was \$163 million for the current quarter as compared to operating income of \$152 million in the prior quarter. Prior period operating results included \$16 million for severance, asset impairment and accelerated depreciation charges for the ongoing integration and reorganization from the Hercules acquisition and other cost reduction programs. Excluding the key items above in the prior period, operating results decreased slightly from the prior period as a result of significant raw material cost increases particularly within Consumer Markets and Water Technologies; however, demand improved in all business segments, after excluding the effect of acquisitions and divestitures, as volumes increased compared to the prior period.

Operating income for the June 2010 and 2009 quarters included depreciation and amortization of \$74 million and \$88 million (which includes \$8 million of asset impairment and accelerated depreciation charges for the ongoing integration and reorganization from the Hercules acquisition and other cost reduction programs), respectively. EBITDA totaled \$237 million for the June 2010 quarter as compared to \$240 million for the June 2009 quarter. As a result of certain key items in the prior year quarter, adjusted EBITDA results in the table below have been prepared to illustrate the exclusion of these charges.

Edgar Filing: ASHLAND INC. - Form 10-Q

(In millions)	Three months ended	
	June 30

Depreciation and amortization	74	88
EBITDA	237	240
Severance	-	4
Plant closing costs	-	4
Adjusted EBITDA	\$ 237	\$ 248

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
MANAGEMENT'S DISCUSSION AND ANALYSIS

Ashland incurred net interest and other financing expense of \$26 million for the June 2010 quarter, as compared to \$62 million in the prior quarter, which included an additional \$10 million of accelerated amortization for debt issuance costs assumed with the bridge loan facility payoff in May of 2009. Excluding this accelerated amortization charge, interest expense decreased by \$26 million during the quarter, primarily due to the \$572 million decline in debt outstanding compared to the prior quarter. Net gain on acquisitions and divestitures was \$23 million for the current quarter as compared to \$1 million in the prior year, as the current quarter reflects a \$23 million pretax gain as a result of remeasuring Ashland's previously held 50% equity interest in Ara Quimica. Ashland's effective tax rate was 16.3% for the three months ended June 30, 2010 as compared to 44.3% for the prior period as both periods were significantly impacted by discrete tax items discussed further in the income tax section within the Management's Discussion and Analysis. The current quarter included income from discontinued operations in the amount of \$14 million, or \$.18 diluted earnings per share, as compared to a loss of \$1 million, or \$.02 per diluted earnings per share, for the prior period. Both periods' discontinued operations results included favorable adjustments to the net asbestos reserve as a result of Ashland's ongoing assessment of these matters; however, the prior quarter's benefit was more than offset by tax adjustments associated with the previous sale of former Ashland divisions.

Year-to-Date – Ashland recorded net income of \$256 million, or \$3.23 per diluted earnings per share, for the nine months ended June 30, 2010 as compared to a net loss of \$22 million, or \$.30 per diluted earnings per share, for the nine months ended June 30, 2009. Included in net income for the current period is an additional \$66 million, or \$.54 per diluted earnings per share, of accelerated amortization for deferred debt issuance costs and prepayment penalties associated with the senior credit facility refinancing during the March 2010 quarter. In addition, the recent U.S. government's passage of the Patient Protection and Affordable Care Act resulted in a \$19 million, or \$.23 per diluted earnings per share, charge to net income for the current period. These charges were reduced by a \$23 million gain (\$20 million after tax), or \$.25 per diluted earnings per share, as a result of remeasuring Ashland's previously held 50% equity interest in Ara Quimica. Included in the net loss of the prior period were two significant nonrecurring charges totaling \$86 million, or \$.96 per diluted earnings per share, reported below operating income within the other expense caption of the Statement of Consolidated Income as well as three additional charges totaling \$82 million, or \$.74 per diluted earnings per share, that affected operating income discussed further below.

Ashland's net income is primarily affected by results within operating income, but is also affected by net interest and other financing expense, income taxes and discontinued operations. Operating income was \$461 million for the current period as compared to operating income of \$257 million for the prior period. Operating income for the current period, as compared to the prior period, included an additional \$35 million of operating income from the 44 day period the businesses of Hercules (on November 13, 2008) were not owned. Prior period operating results included \$47 million in nonrecurring purchase accounting adjustments related to inventory and in-process research and development associated with the Hercules acquisition and \$35 million in severance charges for the ongoing integration and reorganization from the Hercules acquisition and other cost reduction programs. Excluding the key items above, operating results improved from the prior period as a result of Ashland's focus on aggressive cost reductions and price management over the past year. Compared to the prior period, volumes increased modestly after excluding the effect of acquisitions and divestitures.

Operating income for the nine months ended June 30, 2010 and 2009 included depreciation and amortization (including a \$10 million in-process research and development charge during the prior period) of \$226 million and \$254 million, respectively. EBITDA totaled \$687 million for the current period as compared to \$511 million for the

prior period. As a result of the Hercules acquisition, adjusted EBITDA results in the table below have been prepared to illustrate the ongoing affects of Ashland's acquisition of Hercules, which include the exclusion of certain charges, assuming the acquisition had been consummated on October 1, 2008. The inventory fair value adjustment of \$37 million in the prior period relates to a

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
MANAGEMENT'S DISCUSSION AND ANALYSIS

charge required by U.S. GAAP upon acquisition of a company's inventory, which will no longer occur. The Hercules business results of \$35 million in the prior period relates to the operating income and depreciation and amortization earned for the period during which Ashland did not yet own this business segment.

(In millions)	Nine months ended	
	June 30	
	2010	2009
Operating income	\$ 461	\$ 257
Depreciation and amortization (a)	226	254
EBITDA	687	511
Severance	-	35
Inventory fair value adjustment	-	37
Plant closing costs	-	4
Results of the Hercules business prior to acquisition	-	35
Currency gain on intracompany loan	-	(5)
Adjusted EBITDA	\$ 687	\$ 617

(a) Includes, during the prior year period, amortization for purchased in-process research and development of \$10 million.

Ashland incurred net interest and other financing expense of \$172 million for the current period, as compared to \$144 million in the prior period. The current period increase in expense is a result of an additional \$66 million of accelerated amortization for deferred debt issuance costs and prepayment penalties associated with the senior credit facility refinancing during the March 2010 quarter. Excluding this charge and the \$10 million of accelerated amortization for deferred debt issuance costs associated with the bridge loan payoff in May of 2009 of the prior year, interest expense decreased by \$28 million during the current period, primarily due to the \$572 million decline in debt outstanding compared to the prior period. Net gain on acquisitions and divestitures was \$18 million for the current period as compared to \$2 million in the prior year, as the current period reflects a \$23 million pretax gain as a result of remeasuring Ashland's previously held 50% equity interest in Ara Quimica offset by a decrease in the recorded receivable from Marathon for the estimated present value of future tax deductions related primarily to environmental and other postretirement obligations. Ashland's effective tax rate was 25.6% for the current period compared to 168.5% in the prior period. Both periods' income tax rates were affected by a number of discrete items discussed in further detail within the income tax caption discussion later in Management's Discussion and Analysis. Income from discontinued operations of \$27 million, net of tax, within the current period was primarily due to favorable adjustments to the asbestos reserve and receivables as a result of Ashland's ongoing assessment of these matters as compared to a loss from discontinued operations of \$2 million, net of tax, in the prior period.

A comparative analysis of the Statement of Consolidated Income by caption is provided as follows for the three and nine months ended June 30, 2010 and 2009.

Three months

Nine months

Edgar Filing: ASHLAND INC. - Form 10-Q

(In millions)	2010	2009	Change	2010	2009	Change
Sales	\$ 2,362	\$ 2,037	\$ 325	\$ 6,630	\$ 5,993	\$ 637

Current Quarter – Sales for the three months ended June 30, 2010 increased \$325 million, or 16%, compared to the June 2009 quarter as increased demand led to volume gains in all business segments, after excluding the effect of acquisitions and divestitures, increasing sales by \$208 million, or 10%. Pricing increased sales by \$162 million, or 8%, while unfavorable currency exchange rates decreased sales \$2 million. The prior period included \$43 million, or 2%, in additional sales from net acquisitions and divestitures related to the

MANAGEMENT'S DISCUSSION AND ANALYSIS

August 2009 divestiture of Drew Marine, the January 2010 sale of Pinova, and the April 2010 purchase of Ara Quimica.

Year-to-Date – Sales for the current period increased \$637 million, or 11%, compared to the prior period as increases in volume and favorable currency exchange rates more than offset price declines. Ashland experienced solid volume growth as all operating segments reported volume increases, after excluding the effect of acquisitions and divestitures, increasing sales \$460 million, or 8%. Favorable currency exchange rates increased sales \$136 million, or 2%, while net price and product mix decreased sales by \$96 million, or 1%. The current period included \$137 million, or 2%, in additional sales from net acquisitions and divestitures attributable to the November 2008 acquisition of Hercules, the August 2009 divestiture of Drew Marine, the January 2010 divestiture of Pinova, and the April 2010 purchase of Ara Quimica.

(In millions)	Three months			Nine months		
	2010	2009	Change	2010	2009	Change
Cost of sales	\$ 1,838	\$ 1,544	\$ 294	\$ 5,110	\$ 4,716	\$ 394
Gross profit as a percent of sales	22.2 %	24.2 %		22.9 %	21.3 %	

Current Quarter – Cost of sales for the June 2010 quarter increased \$294 million, or 19%, compared to the June 2009 quarter as increased raw material cost was the primary factor in the 2.0 percentage points decline in gross profit as a percent of sales (gross profit margin). Rising raw material costs increased costs of sales by \$197 million, or 13%, while higher demand for products increased volume and related costs by \$143 million, or 9%. Currency exchange, due to the strengthening of the U.S. dollar as compared to the prior quarter, decreased cost of sales by \$2 million. The net acquisitions/divestitures impact of Drew Marine, Pinova and Ara Quimica represented a \$24 million, or 2%, decrease in cost of sales during the current quarter, with change in product mix decreasing cost of sales by \$20 million, or 1%.

Year-to-Date – Cost of sales for the current period increased \$394 million, or 8%, compared to the prior period primarily due to increases in volume, foreign currency and the acquisition of Hercules. However, improved pricing actions and cost control increased the overall gross profit margin by 1.6 percentage points. Volume increased cost of sales by \$316 million, or 6%. Currency exchange, due to the strengthening of the U.S. dollar as compared to the prior period, increased cost of sales by \$101 million, or 2%, while the net acquisitions and divestitures impact of Hercules, Drew Marine and Pinova represented an \$89 million, or 2%, increase in cost of sales for the current period. Declining raw material costs, generated during the first quarter of fiscal 2010, and savings achieved by Ashland's cost reduction programs led to a decrease in cost of sales of \$60 million, or 1%, compared to the prior year period, which was negatively impacted by a \$37 million nonrecurring charge associated with the inventory fair value adjustment related to the Hercules acquisition. Change in product mix decreased cost of sales by \$52 million, or 1%.

Selling, general and administrative

expenses	\$ 351	\$ 330	\$ 21	\$ 1,038	\$ 976	\$ 62
As a % of sales	14.9 %	16.2 %		15.7 %	16.3 %	

Current Quarter – Selling, general and administrative expenses for the June 2010 quarter increased 6% compared to the prior year quarter. However, expenses as a percent of sales decreased 1.3 percentage points, a direct result of efficiencies gained as part of the overall cost reduction programs implemented by Ashland over the last year. Although nominal increases occurred within pension and incentive compensation expenses during the current quarter compared to the prior quarter, the most significant increase related to the one-time employee furlough program savings, which decreased expenses by \$14 million in the prior quarter.

ASHLAND INC. AND CONSOLIDATED SUBSIDIARIES
MANAGEMENT'S DISCUSSION AND ANALYSIS

Year-to-Date – Selling, general and administrative expenses for the current period increased 6% compared to the prior period; however, expenses as a percent of sales decreased 0.6 percentage points, a direct result of efficiencies gained as part of the overall cost reduction programs implemented by Ashland over the last year. Expenses impacting the comparability of the current period compared to the prior period included \$35 million for severance charges during the prior period, primarily due to the ongoing integration and reorganization from the Hercules acquisition, and a \$21 million reduction in expenses during the prior period as a result of the employee furlough program savings. In addition, the prior period excluded approximately \$50 million of costs related to the former Hercules businesses due to the timing of the acquisition (44 days into the first quarter). Currency exchange also increased costs by an additional \$17 million during the current period compared to the prior period.

	2010	2009	Change	2010	2009	Change
Research and development expenses	\$ 23	\$ 23	\$ -	\$ 63	\$ 73	\$ (10)

Current Quarter and Year-to-Date – Research and development expenses for the June 2010 quarter were comparable to the June 2009 quarter. Research and development expenses for the current nine month period decreased as compared to the prior period, which included a \$10 million charge related to the purchased in-process research and development projects at Hercules as of the acquisition date.

(In millions)	Three months			Nine months		
	2010	2009	Change	2010	2009	Change
Equity and other income						
Equity income	\$ 4	\$ 2	\$ 2	\$ 16	\$ 9	\$ 7
Other income	9	10	(1)	26	20	6
	\$ 13	\$ 12	\$ 1	\$ 42	\$ 29	\$ 13

Current Quarter and Year-to-Date – Total equity and other income increased \$1 million and \$13 million during the current quarter and year-to-date period compared to the same periods in prior year. The increase in the current periods primarily relate to increased equity income from various joint venture affiliations and other income attributable to Consumer Markets, Performance Materials and the unallocated and other business segments.
