-

Item 2.05 Costs Associated with Exit or Disposal Activities

On April 22, 2015, Celanese Corporation (the “Company”) announced its intent to reduce acetate tow production capacity at its Lanaken, Belgium facility. On December 1, 2015, the Company announced that its wholly-owned subsidiary has completed the consultation process with the workers council on its production capacity reduction and social plan related to the permanent reduction of manufacturing capacity of acetate tow at its plant in Lanaken, Belgium and has determined that it will move forward with a 26kt capability reduction of acetate tow.

As a result of the reduction of its acetate tow manufacturing operations at the Lanaken site, the Company expects to record future expense of approximately USD \$35 to \$40 million, consisting of approximately \$25-30 million for personnel-related exit costs and approximately \$10-15 million of other facility-related shutdown costs, which is primarily accelerated depreciation of fixed assets. The Company expects that substantially all of the exit costs (except for accelerated depreciation of fixed assets) will result in future cash outflows, with the majority of cash outflows occurring over the next six months.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
