(1) This Form 4 is being amended to report the number of options granted, calculated pursuant to a formula approved by the Compensation Committee. The number was unknown at the time of the original filing on 6/9/16.

(2) The number is calculated as a function of a percent of base pay and the fair value of the option. The Binomial Lattice option valuation model will be used to estimate the fair value of the option. This model requires the input of certain assumptions, including risk-free interest rate, volatility, dividend yield, and expected life. The formula for determining the number of options granted is: number of options = % of base pay / option fair value.

Note: File three copies of this Form, one of which must be manually signed. If space is insufficient, *see* Instruction 6 for procedure.

Potential persons who are to respond to the collection of information contained in this form are not required to respond unless the form displays a currently valid OMB number.
