QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the quarterly period ended December 31, 2013

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the transition period from to

Commission File Number: 1-7939

VICON INDUSTRIES, INC.

(Exact name of registrant as specified in its charter)

New York

(State or other jurisdiction of
incorporation or organization)

11-2160665

(I.R.S. Employer
Identification No.)

131 Heartland Blvd., Edgewood, New York

(Address of principal executive offices)

11717

(Zip Code)

(631) 952-2288

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

At February 10, 2014, the registrant had outstanding 4,503,885 shares of Common Stock, \$.01 par value.

Table of Contents

VICON INDUSTRIES, INC. AND SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
 December 31, 2013

Note 1: Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and the instructions to Form 10-Q and Rule 8-03 of Regulation S-X. Accordingly, they do not include all the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three months ended December 31, 2013 are not necessarily indicative of the results that may be expected for the fiscal year ended September 30, 2014. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the fiscal year ended September 30, 2013. Certain prior year amounts have been reclassified to conform to the current period presentation.

Note 2: Marketable Securities

Marketable securities consist of mutual fund investments principally in federal, state and local government debt securities of \$114,771 as of December 31, 2013. Such mutual fund investments are stated at market value based on quoted market prices (Level 1 inputs) and are classified as available-for-sale under the provisions of Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 320, with unrealized gains and losses reported in accumulated other comprehensive income (loss) as a component of shareholders' equity. The cost of such securities at December 31, 2013 was \$121,070, with \$6,299 of cumulative unrealized losses reported at December 31, 2013.

Note 3: Accounts Receivable

Accounts receivable is stated net of an allowance for uncollectible accounts of \$985,000 and \$977,000 as of December 31, 2013 and September 30, 2013, respectively.

Note 4: Loss per Share

Basic loss per share (EPS) is computed based on the weighted average number of common shares outstanding for the period. Diluted EPS reflects the maximum dilution that would have resulted from incremental common shares issuable upon the exercise of stock options and under deferred compensation agreements.

The following tables provide the components of the basic and diluted EPS computations for the three month periods ended December 31, 2013 and 2012:

| | Three Months Ended December 31, | |
|-------------------------------------|------------------------------------|--------------|
| | 2013 | 2012 |
| Basic EPS Computation | | |
| Net loss | \$(1,527,527) | \$(476,857) |
| Weighted average shares outstanding | 4,503,885 | 4,484,300 |
| Basic loss per share | \$(.34) | \$(.11) |

Table of Contents

| | Three Months Ended December 31, | |
|-------------------------------------|------------------------------------|--------------|
| | 2013 | 2012 |
| Diluted EPS Computation | | |
| Net loss | \$(1,527,527) | \$(476,857) |
| Weighted average shares outstanding | 4,503,885 | 4,484,300 |
| Stock options | — | — |
| Stock compensation arrangements | — | — |
| Diluted shares outstanding | 4,503,885 | 4,484,300 |
| Diluted loss per share | \$(.34) | \$(.11) |

For the three months ended December 31, 2013 and 2012, 12,068 and 10,034 shares, respectively, have been omitted from the calculation of diluted EPS as their effect would have been antidilutive.

Note 5: Accumulated Other Comprehensive Loss

The Company's accumulated other comprehensive loss balances at December 31, 2013 and September 30, 2013 consisted of the following:

| | December 31, 2013 | September 30, 2013 |
|--|-------------------|--------------------|
| Foreign currency translation adjustment | \$(43,614) | \$(129,384) |
| Unrealized loss on marketable securities | (6,299) | (4,870) |
| Accumulated other comprehensive loss | \$(49,913) | \$(134,254) |

Note 6: Derivative Instruments

The Company enters into forward exchange contracts to hedge certain foreign currency exposures and minimize the effect of such fluctuations on reported earnings and cash flow. The Company's ongoing foreign currency exchange risks include intercompany sales of product and services between subsidiary companies operating in differing functional currencies. At December 31, 2013 and September 30, 2013, the Company had no forward exchange contracts outstanding.

Note 7: Stock-Based Compensation

The Company maintains stock option plans that include both incentive and non-qualified options reserved for issuance to key employees, including officers and directors. All options are issued at fair market value at the grant date and are exercisable in varying installments according to the plans. The plans allow for the payment of option exercises through the surrender of previously owned mature shares based on the fair market value of such shares at the date of surrender.

The Company follows ASC 718 (SFAS No. 123(R), "Share-Based Payment"), which requires that all share based payments to employees, including stock options, be recognized as compensation expense in the consolidated financial statements based on their grant date fair values and over the requisite service period. For the three month periods

ended December 31, 2013 and 2012, the Company recorded non-cash compensation expense of \$35,095 and \$57,882, respectively, (\$.01 and \$.01 per basic and diluted share, respectively) relating to stock compensation.

Table of Contents

Note 8: Recent Accounting Pronouncements

The Company does not expect the adoption of recently issued accounting pronouncements to have a significant impact on its consolidated financial statements.

Note 9: Income Taxes

Deferred tax assets and liabilities are recognized based on the differences between the financial statement carrying amounts and the tax basis of assets and liabilities. Deferred tax assets represent items to be used as a tax deduction or credit in future tax returns for which a tax benefit has been recorded in the income statement. The Company has a valuation allowance against its deferred tax assets due to the uncertainty of future realization. The full valuation allowance is determined to be appropriate due to the Company's operating losses since fiscal year 2010 and the inherent uncertainties of predicting future operating results in periods over which such net tax differences become deductible. At September 30, 2013, the Company had \$5.9 million of unrecognized net deferred tax assets available, which includes approximately \$3.1 million of tax effected U.S. and foreign net operating loss carryforwards.

The Company recognizes potential accrued interest and penalties related to unrecognized tax benefits in income tax expense. The Company files U.S. Federal and State income tax returns and foreign tax returns in the United Kingdom, Germany and Israel. The Company is generally no longer subject to tax examinations in such jurisdictions for fiscal years prior to 2010 in the U.S. and 2008 in the U.K., Germany and Israel.

Note 10: Fair Value

The majority of the Company's non-financial assets and liabilities are not required to be carried at fair value on a recurring basis, but the Company is required on a non-recurring basis to use fair value measurements when analyzing asset impairment as it relates to long-lived assets. The carrying amounts for trade accounts and other receivables and accounts payable approximate fair value due to the short-term maturity of these instruments. The fair value of the Company's foreign currency forward exchange contracts is estimated by obtaining quoted market exchange rates for similar contracts (Level 2 inputs). At December 31, 2013 and September 30, 2013, the Company had no forward exchange contracts outstanding.

Fair value estimates are made at a specific point in time based on relevant market information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

General

Management's Discussion and Analysis of Financial Condition and Results of Operations discusses the Company's consolidated financial statements for the periods indicated, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. On an on-going basis, management evaluates its estimates and judgments, including those related to revenue recognition, bad debts, product warranties, inventories, long lived assets, income taxes and contingencies and litigation. Management bases its estimates and judgments on historical experience and on various other factors including general market conditions that are believed to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. Results for the periods reported herein are not necessarily indicative of results that may be expected in future periods.

Overview

The Company designs, assembles and markets video management systems and system components for use in security, surveillance, safety and communication applications by a broad group of end users worldwide. The Company's product line consists of various elements of a video system, including DVR's, NVR's, video encoders, decoders, servers and related video management software, data storage units, analog, HD and IP fixed and robotic cameras, virtual and analogue matrix video switchers and controls, and system peripherals.

The Company sells video surveillance system components in a highly competitive worldwide marketplace principally to authorized security dealers and system integrators. Such dealers and integrators typically resell and install the Company's products directly to end users, among other services. The Company's sales are principally project based and are largely dependent upon winning projects, construction activities and the timing of funding. Sales will vary from period to period depending upon many factors including seasonal and geographic trends in construction activities and the timing of deliveries due to changes in project schedules and funding. The Company usually does not have a large backlog as its customer orders are typically deliverable within three months or often upon receipt of order.

The Company competes in a market of rapid technology shifts which enhance the performance capability of security systems. As a result, the Company spends a significant amount on new product development. In fiscal 2013 and 2012, the Company incurred \$4.2 million and \$5.2 million of engineering and development expense or 11% and 10% of net sales, respectively. The Company's expenditures for product development are substantially less than its major competitors. The ongoing market shift to IP based products and network technologies will continue to burden the Company's development resources and increase ongoing annual expense for product development. Further, the Company's sales effort requires a high level of customer service and technical support for its products. The Company routinely considers various strategic options that may augment or supplement its present product offerings and technology platforms, among other benefits.

The Company has a foreign sales and distribution subsidiary in Europe that conducts business in British pounds and Euros that represented approximately 25% of the Company's consolidated sales for fiscal 2013. It also has an Israel based engineering and development subsidiary that incurs a majority of its operating expenses in Shekels that represented approximately 20% of the Company's operating expenses for fiscal 2013. The Company has historically entered into selected forward currency exchange contracts during favorable exchange rate conditions to help stabilize the impact of changing exchange rates and will continue to do so in fiscal 2014. However, nothing can totally eliminate the long term effects of foreign currency exchange movements.

Table of Contents

Results of Operations

Three Months Ended December 31, 2013 Compared with December 31, 2012

Net sales for the quarter ended December 31, 2013 decreased 27% to \$8.1 million compared with \$11.1 million in the year ago period. North America sales decreased 40% to \$5.1 million compared with \$8.6 million in the year ago period while Europe, Middle East and Africa (EMEA) sales increased 17% to \$3.0 million compared with \$2.5 million in the year ago period. Order intake for the quarter ended December 31, 2013 decreased 32% to \$8.2 million compared with \$12.1 million in the year ago period. North America order intake decreased 40% to \$5.6 million compared with \$9.5 million in the year ago period while EMEA order intake was flat at \$2.6 million for both periods. The Company's North American sales and order rates were affected by, among other things, cyclical weakness in markets served and lack of major project business. The backlog of unfilled orders increased \$132,000 to \$2.7 million at December 31, 2013 compared with \$2.6 million at September 30, 2013.

Gross profit margins for the first quarter of fiscal 2014 increased to 37.1% compared with 36.7% in the year ago period.

Total operating expenses for the first quarter of fiscal 2014 decreased \$48,000 to \$4.5 million compared with \$4.6 million in the year ago period. Selling, general and administrative expense for the first quarter of fiscal 2014 decreased \$346,000 to \$3.3 million compared with \$3.6 million in the year ago period. Engineering and development expense for the first quarter of fiscal 2014 increased \$138,000 to \$1.1 million compared with \$1.0 million in the year ago period. The Company incurred \$160,000 of financial advisory, legal and Board of Director expenses for the first quarter of fiscal 2014 related to strategic initiative activities.

The Company incurred an operating loss of \$1.5 million in the first quarter of fiscal 2014 compared with an operating loss of \$506,000 in the year ago period.

Interest income was \$4,000 for the first quarter of fiscal 2014 compared with \$31,000 in the year ago period. Other income of \$6,000 for the first quarter of fiscal 2013 represents gains in the market value of certain equity securities held and on the sales of certain marketable securities.

The Company recorded income tax expense of \$8,000 in both periods which represents minimum foreign subsidiary income taxes. The Company provides for a valuation allowance against its deferred tax assets due to the uncertainty of future realization and, thus, no tax benefit has been recognized on reported pretax losses for both periods (see Note 9: Income Taxes).

As a result of the foregoing, the Company reported a net loss of \$1.5 million for the first quarter of fiscal 2014 compared with a net loss of \$477,000 in the year ago period.

Liquidity and Capital Resources

Net cash used in operating activities was \$137,000 for the first quarter of fiscal 2014, which included a net loss of \$1.4 million after non-cash charges and a \$1.4 million pay down of accounts payable and accrued liabilities, substantially offset by reductions in accounts receivable and inventories of \$2.1 million and \$559,000, respectively. Net cash used in investing activities was \$15,000 for the first quarter of fiscal 2014 consisting of general capital expenditures. There were no cash flow effects from financing activities for the first quarter of fiscal 2014. As a result of the foregoing, cash (exclusive of marketable securities) decreased by \$123,000 for the first quarter of fiscal 2014 after the minimal effect of exchange rate changes on the cash position of the Company.

The Company believes that it will have sufficient cash to meet its anticipated operating costs and capital expenditure requirements for at least the next twelve months.

The Company does not have any off-balance sheet transactions, arrangements or obligations (including contingent obligations) that have, or are reasonably likely to have, a material effect on the Company's financial condition, results of operations, liquidity, capital expenditures or capital resources.

Critical Accounting Policies

The Company's significant accounting policies are fully described in Note 1 to the Company's consolidated financial statements included in its September 30, 2013 Annual Report on Form 10-K. Management believes the following critical accounting policies, among others, affect its more significant judgments and estimates used in the preparation of its consolidated financial statements.

Revenue is generally recognized when products are sold and title is passed to the customer. Advance service billings are deferred and recognized as revenues on a pro rata basis over the term of the service agreement. Pursuant to Financial Accounting Standards

Table of Contents

Board (FASB) Accounting Standards Codification (ASC) 605-25-05, the Company evaluates multiple-element revenue arrangements for separate units of accounting, and follows appropriate revenue recognition policies for each separate unit. Elements are considered separate units of accounting provided that (i) the delivered item has stand-alone value to the customer, (ii) there is objective and reliable evidence of the fair value of the undelivered item, and (iii) if a general right of return exists relative to the delivered item, delivery or performance of the undelivered item is considered probable and substantially within the control of the Company. As applied to the Company, under arrangements involving the sale of product and the provision of services, product sales are recognized as revenue when the products are sold and title is passed to the customer, and service revenue is recognized as services are performed.

For products that include software and for separate licenses of the Company's software products, the Company recognizes revenue in accordance with the provisions of FASB Accounting Standards Update (ASU) 2009-13, "Revenue Recognition (Topic 605) — Multiple-Deliverable Revenue Arrangements" (ASU 2009-13). ASU 2009-13 provides revenue recognition guidance for establishing separate units of accounting in a multiple element arrangement and requires the allocation of arrangement consideration to each deliverable in the arrangement based on the fair value of the elements. The fair value for each deliverable is based on vendor-specific objective evidence ("VSOE") if available, third-party evidence ("TPE") if VSOE is not available, or best estimate of selling price ("BESP") if neither VSOE nor TPE is available. BESP must be determined in a manner that is consistent with that used to determine the price to sell the specific elements on a standalone basis.

The Company maintains allowances for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. If the financial condition of its customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

The Company provides for the estimated cost of product warranties at the time revenue is recognized. While the Company engages in product quality programs and processes, including monitoring and evaluating the quality of its component suppliers, its warranty obligation is affected by product failure rates, material usage and service delivery costs incurred in correcting a product failure. Should actual product failure rates, material usage or service delivery costs differ from its estimates, revisions to the estimated warranty liability may be required.

The Company writes down its inventory for estimated obsolescence and slow moving inventory equal to the difference between the carrying cost of inventory and the estimated net realizable market value based upon assumptions about future demand and market conditions. Technology changes and market conditions may render some of the Company's products obsolete and additional inventory write-downs may be required. If actual future demand or market conditions are less favorable than those projected by management, additional inventory write-downs may be required.

The Company evaluates the establishment of technological feasibility of its software in accordance with ASC 985 ("Accounting for the Costs of Computer Software to be Sold, Leased or Otherwise Marketed"). The Company has determined that technological feasibility for its new products is reached shortly before products are released for field testing. Costs incurred after technological feasibility has been established have not been material and are expensed as incurred.

The Company assesses the recoverability of the carrying value of its long-lived assets whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. The Company evaluates the recoverability of such assets based upon the expectations of undiscounted cash flows from such assets. If the sum of the expected future undiscounted cash flows were less than the carrying amount of the asset, a loss would be recognized for the difference between the fair value and the carrying amount.

The Company's ability to recover the reported amounts of deferred income tax assets is dependent upon its ability to generate sufficient taxable income during the periods over which net temporary tax differences become deductible. The Company provides for a valuation allowance against all deferred tax assets due to the uncertainty of future realization. The Company plans to provide a full valuation allowance against its deferred tax assets until such time that it can achieve a sustained level of profitability or other positive evidence arises that would demonstrate an ability to recover such assets.

The Company accrues liabilities for identified tax contingencies that result from positions that are being challenged or could be challenged by tax authorities. The Company believes that its accrual for tax liabilities is adequate for all open years, based on Management's assessment of many factors, including its interpretations of the tax law and judgments about potential actions by tax authorities. However, it is possible that the ultimate resolution of any tax audit may be materially greater or lower than the amount accrued.

The Company is subject to proceedings, lawsuits and other claims related to labor, product and other matters. The Company assesses the likelihood of an adverse judgment or outcomes for these matters, as well as the range of potential losses. A

determination of the reserves required, if any, is made after careful analysis. The required reserves may change in the future due to new developments.

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995

Statements in this Report on Form 10-Q and other statements made by the Company or its representatives that are not strictly historical facts including, without limitation, statements included herein under the Management's Discussion and Analysis captions "Overview", "Results of Operations", "Liquidity and Capital Resources" and "Critical Accounting Policies" are "forward-looking" statements within the meaning of the Private Securities Litigation Reform Act of 1995 that should be considered as subject to the many risks and uncertainties that exist in the Company's operations and business environment. The forward-looking statements are based on current expectations and involve a number of known and unknown risks and uncertainties that could cause the actual results, performance and/or achievements of the Company to differ materially from any future results, performance or achievements, express or implied, by the forward-looking statements. Readers are cautioned not to place undue reliance on these forward-looking statements, and that in light of the significant uncertainties inherent in forward-looking statements, the inclusion of such statements should not be regarded as a representation by the Company or any other person that the objectives or plans of the Company will be achieved. The Company also assumes no obligation to update its forward-looking statements or to advise of changes in the assumptions and factors on which they are based.

ITEM 3. QUALITATIVE AND QUANTITATIVE DISCLOSURES ABOUT MARKET RISK

The Company is exposed to various market risks, including changes in foreign currency exchange rates and interest rates. The Company has a policy that prohibits the use of currency derivatives or other financial instruments for trading or speculative purposes.

The Company enters into forward exchange contracts to hedge certain foreign currency exposures and minimize the effect of such fluctuations on reported earnings and cash flow (see Note 6 "Derivative Instruments" to the accompanying condensed consolidated financial statements). The Company's ongoing foreign currency exchange risks include intercompany sales of product and services between subsidiary companies operating in differing functional currencies.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

The Company's management, with the participation of its Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures, as required by Exchange Act Rule 13a-15. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified by the Securities and Exchange Commission's rules and forms and such information is accumulated and communicated to management as appropriate to allow timely decisions regarding required disclosures.

Changes in Internal Controls

There were no changes in the Company's internal control over financial reporting identified in connection with the evaluation referred to above that occurred during the quarter ended December 31, 2013 that have materially affected, or are reasonably likely to materially affect, the registrant's internal control over financial reporting.
