Exhibit 99.1

**AMERISERV FINANCIAL REPORTS EARNINGS FOR THE SECOND QUARTER AND FIRST SIX MONTHS OF 2017**

JOHNSTOWN, PA AmeriServ Financial, Inc. (NASDAQ: ASRV) reported second quarter 2017 net income available to common shareholders of \$1,389,000, or \$0.07 per diluted common share. This earnings performance was consistent with the second quarter of 2016 where net income available to common shareholders totaled \$1,362,000, or \$0.07 per diluted common share. For the six month period ended June 30, 2017, the Company reported net income available to common shareholders of \$2,737,000, or \$0.15 per diluted common share. This represents a significant improvement of \$2.7 million from the six month period of 2016 where net income available to common shareholders totaled \$80,000, which rounds to \$0.00 per diluted common share. The following table highlights the Company's financial performance for both the three and six month periods ended June 30, 2017 and 2016:

	Second Quarter 2017	Second Quarter 2016	Six Months Ended June 30, 2017	Six Months Ended June 30, 2016
Net income	\$1,389,000	\$1,362,000	\$2,737,000	\$95,000
Net income available to common shareholders	\$1,389,000	\$1,362,000	\$2,737,000	\$80,000
Diluted earnings per share	\$ 0.07	\$ 0.07	\$ 0.15	\$ 0.00

Jeffrey A. Stopko, President and Chief Executive Officer, commented on the 2017 financial results: In the first half of 2017, we have carefully managed our balance sheet to achieve controlled growth which provides us with the flexibility to return more capital to our shareholders. This growth in earning assets, combined with favorable positioning for higher interest rates, contributed to a 3.4% increase in net interest income which helped support earnings per share growth. As a result of our improved net income, we returned 89% of our earnings for the first six months of 2017 to our shareholders through accretive stock buybacks and cash dividends.

The Company's net interest income in the second quarter of 2017 increased by \$413,000, or 4.9%, from the prior year's second quarter and for the first six months of 2017 increased by \$576,000, or 3.4%, when compared to the first six months of 2016. The Company's net interest margin was 3.27% for both the second quarter and for the first six months of 2017 representing an improvement of four basis points from the prior year's second quarter while matching the level achieved in the first six months of 2016. The quarter versus quarter improvement in net interest income is a result of a higher level of total earning assets and the improved net interest margin performance. The Company continues to grow earning assets while also controlling its cost of funds through disciplined deposit pricing.

Specifically, the earning asset growth occurred in both the investment securities portfolio and the loan portfolio. Total investment securities averaged \$173 million in the second quarter of 2017 which is \$28.1 million, or 19.4%, higher than the \$145 million average for the second quarter of 2016. Investment securities have also averaged \$171 million for the six month time period which is \$27.1 million, or 18.9%, higher than the six month 2016 average. Total loans averaged \$900 million in the second quarter of 2017 which is \$11.3 million, or 1.3%, higher than the \$889 million average for the second quarter of 2016. Total loans averaged \$895 million in the first half of 2017 which is \$10.1 million, or 1.1%, higher than the 2016 first six month average.

The growth in the investment securities portfolio is the result of management electing to diversify the mix of the investment securities portfolio through purchases of high quality corporate and taxable municipal securities. This revised strategy for securities purchases was facilitated by the increase in national interest rates that resulted in improved opportunities to purchase additional securities and grow the portfolio. As a result, interest on investments increased between the second quarter of 2017 and the second quarter of 2016 by \$293,000 or 29.9% and increased in the first half of 2017 from the first half of 2016 by \$528,000 or 27.3%. The growth in the loan portfolio reflects the successful results of the Company's business development efforts, with an emphasis on generating commercial loans and commercial real estate loans particularly through its loan production offices. Loan interest income increased by \$369,000, or 3.9%, between the second quarter of 2017 and the second quarter of 2016 and also increased by \$460,000, or 2.4%, in the first six months of 2017 when compared to last year. The higher loan interest income also reflects the upward repricing of certain loans tied to LIBOR or the prime rate as both of these indices have moved up with the Federal Reserve's decision to increase the target federal funds interest rate by 25 basis points in December of 2016, March of 2017, and again in June of 2017. Overall, total interest income increased by \$988,000, or 4.7%, in the first half of 2017.

Total interest expense for the second quarter of 2017 increased by \$249,000, or 13.1%, and increased by \$412,000, or 10.9%, in the first six months of 2017 when compared to 2016, due to higher levels of both deposit and borrowing interest expense. The Company experienced growth in deposits which we believe reflects the loyalty of our core deposit base that provides a strong foundation upon which this growth builds. Management's ability to acquire new core deposit funding from outside of our traditional market areas as well as our ongoing efforts to offer new loan customers deposit products were the primary reasons for this growth. Specifically, total deposits averaged \$975 million for the first half of 2017 which is \$42.9 million, or 4.6%, higher than the \$933 million average for the first half of 2016. Deposit interest expense through six months in 2017 increased by \$356,000, or 13.8%, due to the higher balance of deposits along with certain indexed money market accounts repricing upward after the Federal Reserve interest rate increases. As a result of the strong deposit growth, the Company's loan to deposit ratio averaged 91.8% in the first half of 2017 which indicates that the Company has ample room to further grow its loan portfolio in 2017. The Company experienced a \$56,000 increase in the interest cost for borrowings in the first six months of 2017 due to the immediate impact that the increases in the Federal Funds Rate had on the cost of borrowed funds. In the first half of 2017, total average FHLB borrowed funds of \$62 million decreased slightly by \$3.5 million, or 5.3%.

The Company recorded a \$325,000 provision for loan losses in the second quarter of 2017 compared to a \$250,000 provision for loan losses in the second quarter of 2016. For the six month period in 2017, the Company recorded a \$550,000 provision for loan losses compared to \$3,350,000 provision for loan losses in 2016 or a decrease of \$2.8 million between years. Both, the loan loss provision and net charge-offs were at more typical levels this year than the substantially higher levels that were necessary early last year to resolve a troubled loan exposure to the energy industry. The provision recorded in 2017 supported the continuing loan growth, a higher level of criticized loans and more than covered the low level of net loan charge-offs incurred in the first six months of 2017. For the six month

timeframe, the Company experienced net loan charge-offs of \$91,000, or 0.02% of total loans in 2017 compared to net loan charge-offs of \$3.5 million, or 0.80%, of total loans in 2016. Overall, the Company continued to maintain strong asset quality as its non-performing assets totaled \$2.4 million, or 0.26%, of total loans, at June 30, 2017. In summary, the allowance for loan losses provided a strong 440% coverage of non-performing loans, and 1.16% of total loans, at June 30, 2017, compared to 612% coverage of non-performing loans, and 1.12% of total loans, at December 31, 2016.

Total non-interest income in the second quarter of 2017 increased by \$13,000, or 0.3%, from the prior year's second quarter, and for the first six months of 2017 increased by \$138,000, or 1.9%, when compared to the first six months of 2016. For the second quarter of 2017, the increase was due to higher revenue from bank owned life insurance (BOLI) by \$141,000 due to the receipt of a death claim. This more than offset lower trust and investment advisory fees by \$43,000, service charges on deposits declining by \$19,000 due to reduced overdraft fee income and a lower level of mortgage related fees by \$15,000. For the six month period, a \$115,000 increase in revenue from BOLI as well as a greater level of other income by \$88,000 and trust and investment advisory fees increasing by \$48,000 more than offset lower levels of service charges on deposits by \$60,000 and a reduced recognition of gains from security sales by \$58,000. Within other income there was an increase in revenue from our financial services business unit by \$153,000 as wealth management continues to be an important strategic focus of the Company.

The Company's total non-interest expense in the second quarter of 2017 increased by \$278,000, or 2.8%, when compared to the second quarter of 2016, and for the first half of 2017 decreased by \$348,000, or 1.7%. The increase in the second quarter of 2017 is attributed to a higher level of professional fees by \$223,000 and salaries & employee benefits by \$111,000. The increase to professional fees was due to higher legal costs and additional professional services expenses that were related to technology improvements. These items more than offset reduced occupancy expense by \$51,000 due to improved efficiencies and lower FDIC insurance expense by \$36,000. For the six month period, the \$348,000 decrease in non-interest expense in 2017 was primarily attributable to the Company's ongoing profitability improvement initiatives. Specifically, salaries and employee benefits were down by \$45,000 as there were seven fewer full time equivalent employees in the first half of 2017 due primarily to a branch consolidation and closure of an unprofitable loan production office. This ongoing focus to reduce and control non-interest expense was also evident in occupancy expense, which decreased by \$114,000, or 8.0% and other expenses which decreased by \$100,000 or 2.9% in the first half of 2017. Finally, reduced FDIC insurance by \$55,000 also contributed to the favorable six month comparison. Overall, the continued focus on expense control and rationalization results in the efficiency ratio improving through six months from 85.61% in 2016 to 81.75% in 2017. The Company recorded an income tax expense of \$1,248,000, or an effective tax rate of 31.3%, in the first half of 2017. This compares to an income tax expense of \$28,000, or an effective tax rate of 22.8%, for the first half of 2016.

The Company had total assets of \$1.17 billion, shareholders' equity of \$96.3 million, a book value of \$5.21 per common share and a tangible book value of \$4.57 per common share at June 30, 2017. In accordance with the common stock buyback program announced on January 24, 2017, the Company returned \$1,870,000 of capital to its shareholders through the repurchase of 465,956 shares of its common stock in the first half of 2017. The Company continued to maintain strong capital ratios that exceed the regulatory defined well capitalized status.
