FORM 10-K

UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549

(Mark One)

SECTION 13 OR 15(d)

ANNUAL REPORT PURSUANT TO

OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2011

OR

SECTION 13 OR 15(d)

TRANSITION REPORT PURSUANT TO

OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission File Number: 1-8610

AT&T INC.

Incorporated under the laws of the State of Delaware  
I.R.S. Employer Identification Number 43-1301883

208 S. Akard St., Dallas, Texas, 75202  
Telephone Number 210-821-4105

Securities registered pursuant to Section 12(b) of the Act: (See attached Schedule A)

Securities registered pursuant to Section 12(g) of the Act: None.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.  
Yes  No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Edgar Filing: AT&T INC. - Form 10-K

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).  
Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).  
Yes  No

Based on the closing price of \$31.41 per share on June 30, 2011, the aggregate market value of our voting and non-voting common stock held by non-affiliates was \$186.1 billion.

At January 31, 2012, common shares outstanding were 5,928,751,656.

DOCUMENTS INCORPORATED BY REFERENCE

- (1) Portions of AT&T Inc.'s Annual Report to Stockholders for the fiscal year ended December 31, 2011 (Parts I and II).
- (2) Portions of AT&T Inc.'s Notice of 2012 Annual Meeting and Proxy Statement dated on or about March 9, 2012 to be filed within the period permitted under General Instruction G(3) (Parts III and IV).

SCHEDULE A

Securities Registered Pursuant To Section 12(b) Of The Act:

Title of each class	Name of each exchange on which registered
Common Shares (Par Value \$1.00 Per Share)	New York Stock Exchange

AT&T Inc.

## PART I

### ITEM 1. BUSINESS

#### GENERAL

AT&T Inc. (“AT&T,” “we” or the “Company”) is a holding company incorporated under the laws of the State of Delaware in 1983 and has its principal executive offices at 208 S. Akard St., Dallas, Texas, 75202 (telephone number 210-821-4105). We maintain an Internet website at [www.att.com](http://www.att.com). (This website address is for information only and is not intended to be an active link or to incorporate any website information into this document.) We make available, free of charge, on our website our annual report on Form 10-K, our quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments to those reports as soon as reasonably practicable after such reports are electronically filed with, or furnished to, the Securities and Exchange Commission (SEC). We also make available on that website, and in print, if any stockholder or other person so requests, our code of business conduct and ethics entitled “Code of Ethics” applicable to all employees and Directors, our “Corporate Governance Guidelines,” and the charters for all committees of our Board of Directors, including Audit, Human Resources and Corporate Governance and Nominating. Any changes to our Code of Ethics or waiver of our Code of Ethics for senior financial officers, executive officers or Directors will be posted on that website.

#### History

AT&T, formerly known as SBC Communications Inc. (SBC), was formed as one of several regional holding companies created to hold AT&T Corp.’s (ATTC) local telephone companies. On January 1, 1984, we were spun-off from ATTC pursuant to an anti-trust consent decree, becoming an independent publicly traded telecommunications services provider. At formation, we primarily operated in five southwestern states. Our subsidiaries merged with Pacific Telesis Group in 1997, Southern New England Telecommunications Corporation in 1998 and Ameritech Corporation in 1999, thereby expanding our wireline operations as the incumbent local exchange carrier (ILEC) into a total of 13 states. In November 2005, one of our subsidiaries merged with ATTC, creating one of the world’s leading telecommunications providers. In connection with the merger, we changed the name of our company from “SBC Communications Inc.” to “AT&T Inc.” In December 2006, one of our subsidiaries merged with BellSouth Corporation (BellSouth) making us the ILEC in an additional nine states. With the BellSouth acquisition, we thereby acquired BellSouth’s 40% economic interest in AT&T Mobility LLC (AT&T Mobility), formerly Cingular Wireless LLC, and BellSouth’s 34% economic interest in YELLOWPAGES.COM (YPC), resulting in 100% ownership of AT&T Mobility and YPC. Our services and products are marketed under the AT&T brand name, including alliances such as AT&T Yahoo! and AT&T | DIRECT TV.

#### Scope

We are a leading provider of telecommunications services in the United States and the world. We offer our services and products to consumers in the U.S. and services and products to businesses and other providers of telecommunications services worldwide.

The services and products that we offer vary by market, and include: wireless communications, local exchange services, long-distance services, data/broadband and Internet services, video services, telecommunications equipment, managed networking, wholesale services and directory advertising and publishing. We group our operating subsidiaries as follows, corresponding to our operating segments for financial reporting purposes:

- wireless subsidiaries provide both wireless voice and data communications services across the U.S. and, through roaming agreements, in a substantial number of foreign countries.

- wireline subsidiaries provide primarily landline voice and data communication services, AT&T U-verse® TV, high-speed broadband and voice services (U-verse) and managed networking to business customers.
- advertising solutions subsidiaries publish Yellow and White Pages directories and sell directory advertising and Internet-based advertising and local search.
  - other subsidiaries provide results from customer information services and all corporate and other operations.

Our local exchange subsidiaries operate as the ILEC in 22 states: Alabama, Arkansas, California, Connecticut, Illinois, Indiana, Florida, Georgia, Kentucky, Louisiana, Kansas, Michigan, Mississippi, Missouri, Nevada, North Carolina, Ohio, Oklahoma, South Carolina, Tennessee, Texas and Wisconsin (22-state area). Our local exchange subsidiaries are subject to regulation by each state in which they operate and by the Federal Communications Commission (FCC). Wireless service providers are regulated by the FCC. Additional information relating to regulation is contained under the heading “Government Regulation” and in the Annual Report under the heading “Operating Environment and Trends of the Business,” and is incorporated herein by reference pursuant to General Instruction G(2).

AT&T Inc.

With the expansion of our company through acquisitions and the resulting ownership consolidation of AT&T Mobility, and with continuing advances in technology, our services offerings now combine our traditional wireline and wireless services. We make our customers' lives more convenient and productive and foster competition and further innovation in the communications and entertainment industry. In 2012, we plan to focus on the areas discussed below.

#### Wireless

AT&T Mobility began operations in October 2000 as a joint venture between us and BellSouth and, in 2004, acquired AT&T Wireless Services, Inc. Upon our acquisition of BellSouth in 2006, AT&T Mobility became a wholly-owned subsidiary.

We cover most major metropolitan areas of the United States with our Universal Mobile Telecommunications System/High-Speed Downlink Packet Access (HSPA) and HSPA+ network technology, with HSPA+ providing 4G speeds when combined with our upgraded backhaul. At the end of 2011, over 80% of our data traffic was carried over this enhanced backhaul. Our network provides superior mobile broadband speeds for data and video services, as well as operating efficiencies using the same spectrum and infrastructure for voice and data on an IP-based platform. Our wireless network also relies on digital transmission technologies known as GSM, General Packet Radio Services and Enhanced Data Rates for GSM Evolution for data communications. As of December 31, 2011, we served 103 million subscribers. We have also begun transitioning our network to next generation LTE technology and expect this network to cover approximately 80% of the U.S. population and to be largely complete by the end of 2013. We continue to expand the number of locations, including airports and cafés, where customers can access broadband Internet connections using wireless fidelity (local radio frequency commonly referred to as Wi-Fi) wireless technology.

As the wireless industry continues to mature, we believe that future wireless growth will increasingly depend on our ability to offer innovative data services to customers, which in turn, will depend on the availability of additional spectrum. We are facing significant spectrum and capacity constraints on our wireless network in certain markets. We expect such constraints to increase and expand to additional markets in the coming years. While we are continuing to invest significant capital in expanding our network capacity, our capacity constraints could affect the quality of existing voice and data services and our ability to launch new, advanced wireless broadband services, unless we are able to obtain more spectrum. Any spectrum solution will require that the FCC makes new spectrum available to the wireless industry and allows us to obtain the spectrum we need more immediately to meet the needs of our customers. We will continue to attempt to address spectrum and capacity constraints on a market-by-market basis.

#### Business Customers

We expect to continue to strengthen the reach and sophistication of our network facilities and our ability to offer a variety of communications services, both wireless and wireline, to large businesses and wholesale customers worldwide. We expect to offer similar services to small- and medium-businesses and to increase the attractiveness of our services to governmental customers. We also expect to extend our wholesale business offerings to other service products and systems integration services.

#### Data/Broadband

As the communications industry continues to move toward Internet-based technologies that are capable of blending traditional wireline and wireless services, we plan to offer services that take advantage of these new and more sophisticated technologies. In particular, we intend to continue to focus on expanding our AT&T U-verse high-speed broadband and video offerings and on developing IP-based services that allow customers to unite their home or business wireline services with their wireless service.

U-verse Services During 2011, we continued to expand our offerings of U-verse High Speed Internet and TV services.

As of December 31, 2011, we reached our deployment goal of 30 million living units and have now passed 30.3 million living units (constructed housing units as well as platted housing lots). We are marketing U-verse services to 78% of those units and had 3.8 million subscribers by year-end 2011. During 2012, we will continue our efforts to increase sales to this base.

We believe that our U-verse TV service is a “video service” under the Federal Communications Act. However, some cable providers and municipalities have claimed that certain IP services should be treated as a traditional cable service and therefore subject to the applicable state and local cable regulation. Certain municipalities have delayed our requests to offer this service or have refused us permission to use our existing or new right-of-ways to deploy or activate our U-verse-related equipment, services and products, resulting in litigation. Petitions have been filed at the FCC alleging that the manner in which we provision “public, educational and governmental” (PEG) programming over our U-verse TV service conflicts with federal law, and a lawsuit has been filed in a California state superior court raising similar allegations under California law. If courts having jurisdiction where we have significant deployments of our U-verse services were to decide that federal, state and/or local cable regulation were applicable to our U-verse services, or if the FCC, state agencies or the courts were to rule that we must deliver PEG programming in a manner substantially different from the way we do today or in ways that are inconsistent with our current network architecture, it could have a material adverse effect on the cost and extent of our U-verse offerings.

AT&T Inc.

Voice over Internet Protocol (VoIP) VoIP is generally used to describe the transmission of voice using IP-based technology rather than a traditional wire and switch-based telephone network. A company using this technology can often provide voice services at a lower cost because this technology uses bandwidth more efficiently than a traditional network and because this technology has not been subject to traditional telephone industry regulation. While the development of VoIP has resulted in increased competition for our wireless and wireline voice services, it also presents growth opportunities for us to develop new products for our customers.

## BUSINESS OPERATIONS

### OPERATING SEGMENTS

Our segments are strategic business units that offer different products and services over various technology platforms and are managed accordingly. We analyze our various operating segments based on segment income before income taxes. We make our capital allocations decisions based on our strategic direction of the business, needs of the network (wireless or wireline) providing services and other assets needed to provide emerging services to our customers. Actuarial gains and losses from pension and other postretirement benefits, interest expense and other income (expense) – net, are managed only on a total company basis and are, accordingly, reflected only in consolidated results. Therefore, these items are not included in the calculation of each segment's percentage of our total segment income. Each segment's percentage of total segment operating revenue and income calculations is derived from our segment results, and income percentage may total more than 100 percent due to losses in one or more segments. We have four reportable segments: (1) Wireless; (2) Wireline; (3) Advertising Solutions; and (4) Other.

Additional information about our segments, including financial information, is included under the heading "Segment Results" on pages 32 through 40 and in Note 4 of the Annual Report and is incorporated herein by reference pursuant to General Instruction G(2).

### WIRELESS

Wireless consists of our subsidiary, AT&T Mobility, which operates as a wireless provider to both business and consumer customers. Our Wireless segment provided approximately 50% of 2011 total segment operating revenues and 94% of our 2011 total segment income. At December 31, 2011, we had more than 103 million wireless subscribers. We classify our customers as either postpaid, prepaid, connected device or reseller.

#### Services and Products

We offer a comprehensive range of high-quality nationwide wireless voice and data communications services in a variety of pricing plans, including postpaid and prepaid service plans. Our offerings are tailored to meet the communications needs of targeted customer segments, including youth, family, active professionals, small businesses, government and major national corporate accounts.

Service – Our voice service is generally offered on a contract basis for one- or two-year periods, referred to as postpaid. Under the terms of these contracts, service is billed and provided on a monthly basis according to the applicable rate plan chosen. Our wireless services include basic local wireless communications service, long-distance service and roaming services. Roaming services enable our subscribers to utilize other carriers' networks when they are "roaming" outside our network footprint. We also charge fees to other carriers for providing roaming services to their customers when their customers utilize our network. We also offer prepaid voice service to certain customers who prefer to control usage or pay in advance.

Wireless data revenues continue to be a growing area of our business, representing an increasing share of our overall subscriber revenue. We are experiencing solid growth from both consumer and enterprise wireless data services, as an increasing number of our subscribers have upgraded their handsets to more advanced integrated devices. We are also seeing rapid growth in demand for new data-centric devices such as notebooks, tablets, eReaders, direction and navigation aids and monitoring devices. Customers in our “connected device” category (e.g., users of eReaders and navigation aids) purchase those devices from third-party suppliers which buy data access supported by our network. Other data-centric device users are classified as either postpaid customers (primarily netbook and notebook users) or prepaid customers (primarily tablet users) since they purchase service directly from us. We continue to upgrade our network and coordinate with equipment manufacturers and applications developers in order to further capitalize on the continued growth in the demand for wireless data services. As of December 31, 2011, we were a leading provider of wireless data in the U.S. wireless industry based on subscribers.

3

---

AT&T Inc.

Equipment – We sell a wide variety of handsets, wirelessly enabled computers (i.e., notebooks and tablets) and personal computer wireless data cards manufactured by various suppliers for use with our voice and data services. We sell through our own company-owned stores or through agents or third-party retail stores. We also sell accessories, such as carrying cases, hands-free devices, batteries, battery chargers and other items, to consumers, as well as to agents and other third-party distributors for resale. Like other wireless service providers, we often provide postpaid contract subscribers substantial equipment subsidies to initiate or upgrade service.

Additional information on our Wireless segment is contained in the Annual Report in the “Operating Environment Overview” section under the heading “Expected Growth Areas,” “Wireless” beginning on page 41 and is incorporated herein by reference pursuant to General Instruction G(2).

#### WIRELINER

Our Wireline subsidiaries provide both retail and wholesale communication services domestically and internationally. Our Wireline segment provided approximately 47% of 2011 segment operating revenues and 45% of our 2011 total segment income. We divide our wireline services into three product-based categories: voice, data and other. Revenues from our traditional voice services have been declining as customers have been switching to wireless, cable and other Internet-based providers. In addition, the continuing weak economy has caused wireline customers to terminate their residential or business phone service as individuals have lost jobs or otherwise combined households and businesses have closed or reduced operations. We have responded by offering packages of combined voice and data services, including broadband and video, and intend to continue this strategy during 2012.

#### Services and Products

Data – We provide data services that rely on IP-based technology and data services that rely on older, circuit-based technology. We provide businesses voice applications over IP-based networks (i.e., Enhanced Virtual Private Networks or “EVPN”). Over the past several years, we have built out our new multi-protocol label switching/asynchronous transfer mode, or MPLS/ATM network, to supplement, and eventually replace, our other extensive global networks. These products allow us to provide highly complex global data networks. Additional IP-based services include Internet access and network integration, dedicated Internet and enterprise networking services, U-verse services and related data equipment sales.

Our circuit-based, traditional data products include switched and dedicated transport that allow business customers to transport data at high speeds, as well as DSL and dial-up Internet access. Our private line offering uses high-capacity digital circuits to transmit from point-to-point in multiple configurations and allows customers to create internal data networks and to access external data networks. Switched Transport services transmit data using switching equipment to transfer the data between multiple lines before reaching its destination. Dedicated Transport services use a single direct line to transmit data between destinations. DSL is a digital modem technology that converts existing twisted-pair telephone lines into access paths for multimedia and high-speed data communications to the Internet or private networks. DSL allows customers to simultaneously make a phone call and access information via the Internet or an office local area network. Digital Services use dedicated digital circuits to transmit digital data at various high rates of speed.

Network integration services include installation of business data systems, local area networking and other data networking offerings. Internet access services include a wide range of products for residences and businesses including basic dial-up access service, dedicated access, web hosting, managed services, e-mail and high-speed access services. Our managed web-hosting services for businesses provide network, server and security infrastructure as well

as built-in data storage and include application performance management, database management, hardware and operating system management. Our hosting services also provide customers with secure access to detailed reporting information about their infrastructure and applications.

Packet services consist of data networks using packet switching and transmission technologies, including traditional circuit-based, and IP connectivity services. Packet services enable customers to transmit large volumes of data economically and securely and are used for local area network (LAN) interconnection, remote site, point of sale and branch office communications. High-speed packet services are used extensively by enterprise (large business) customers.

4

---

AT&T Inc.

Enterprise networking services provide comprehensive support from network design, implementation and installation to ongoing network operations and management for networks of varying scales, including LANs, wide area networks, and virtual private networks. These services include applications such as e-mail, order entry systems, employee directories, human resource transactions and other database applications.

We also offer Wi-Fi services (local radio frequency commonly known as wireless fidelity).

We provide local, interstate and international wholesale networking capacity to other service providers. We offer a combination of high-volume transmission capacity and conventional dedicated line services on a regional, national and international basis to wireless carriers, interexchange carriers, Internet service providers (ISPs) and facility-based and switchless resellers. Our wholesale customers are primarily large ISPs, wireless carriers, competitive local exchange carriers (CLECs), regional phone companies, interexchange carriers, cable companies and systems integrators.

Voice – Voice includes traditional local and long-distance service provided to retail customers and wholesale access to our network and individual network elements provided to competitors. At December 31, 2011, our wireline subsidiaries served approximately 19 million retail consumer access lines, 16 million retail business access lines and 2 million wholesale access lines. We also have a number of integrated voice and data services, such as integrated network connections, that provide customers the ability to integrate access for their voice and data services, the data component of which is included in the data category. Additionally, voice revenues do not include any of our VoIP revenues, which are included in data revenues.

Long distance consists of traditional long distance and international long distance for customers that select us as their primary long-distance carrier. Long distance also includes services provided by calling card, 1-800 services and conference calling. These services are used in a wide variety of business applications, including sales, reservation centers or customer service centers. We also provide wholesale switched access service to other service providers.

Voice also includes calling features, fees to maintain wire located inside customer premises and other miscellaneous voice products. Calling features are enhanced telephone services available to retail customers such as Caller ID, Call Waiting and voice mail. These calling features services are generally more profitable than basic local phone service.

Other – Other includes application management, security service, integration services, customer premises equipment, outsourcing, government-related services, and satellite video services. Security services include business continuity and disaster recovery services as well as premise and network based security products.

Customer premises equipment and other equipment sales range from single-line and cordless telephones to sophisticated digital Private Branch Exchange (PBX) systems. PBX is a private telephone switching system, typically used by businesses and usually located on a customer's premises, which provides intra-premise telephone services as well as access to our network.

#### ADVERTISING SOLUTIONS

Advertising Solutions includes our directory operations, which publish Yellow and White Pages directories and sell directory advertising and Internet-based advertising and local search. The Advertising Solutions segment provided approximately 3% of total segment operating revenues in 2011. In 2011, segment operating expenses exceeded revenues due to a recorded impairment of goodwill and a trade name. This segment sells advertising services throughout the United States, with our print directory operations primarily covering our 22-state area.

AT&T Inc.

#### OTHER

Our Other segment includes customer information services (i.e., operator services) and corporate and other operations, as well as impacts from corporate-wide decisions for which the individual operating segments are not being evaluated, including interest cost and expected return on pension and postretirement benefits. The Other segment provided less than 1% of total segment operating revenues in 2011. In 2011, segment operating expenses exceeded revenues. We also include in this segment the equity income (loss) from our investments in Telefonos de México, S.A. de C.V. and América Móvil, S.A. de C.V.

#### MAJOR CLASSES OF SERVICE

The following table sets forth the percentage of total consolidated reported operating revenues by any class of service that accounted for 10% or more of our consolidated total operating revenues in any of the last three fiscal years:

	Percentage of Total Consolidated Operating Revenues		
	2011	2010	2009
<b>Wireless Segment</b>			
Wireless service	45%	43%	40%
<b>Wireline Segment</b>			
Data	23%	22%	21%
Voice	20%	23%	26%

#### GOVERNMENT REGULATION

Wireless communications providers must be licensed by the FCC to provide communications services at specified spectrum frequencies within specified geographic areas and must comply with the rules and policies governing the use of the spectrum as adopted by the FCC. The FCC's rules have a direct impact on whether the wireless industry has sufficient spectrum available to support the high quality, innovative services our customers demand. Wireless licenses are issued for a fixed time period, typically ten years, and we must seek renewal of these licenses. While the FCC has generally renewed licenses given to operating companies such as us, the FCC has authority to both revoke a license for cause and to deny a license renewal if a renewal is not in the public interest. Additionally, while wireless communications providers' prices and service offerings are generally not subject to regulation, the federal government and an increasing number of states are considering new regulations and legislation relating to various aspects of wireless services.

Our wireline subsidiaries are subject to regulation by state commissions which have the power to regulate intrastate rates and services, including local, long-distance and network access services, provided such state regulation is consistent with federal law. These subsidiaries are also subject to the jurisdiction of the FCC with respect to intercarrier compensation, interconnection, and interstate and international rates and services, including interstate access charges. Access charges are a form of intercarrier compensation designed to compensate our wireline subsidiaries for the use of their networks by other carriers.

Our subsidiaries operating outside the United States are subject to the jurisdiction of national and supranational regulatory authorities in the market where service is provided. Regulation is generally limited to operational licensing authority for the provision of enterprise services.

Additional information relating to regulation of our subsidiaries is contained in the Annual Report under the headings “Operating Environment Overview” beginning on page 40 and “Regulatory Developments” beginning on page 42 and are incorporated herein by reference pursuant to General Instruction G(2).

6

---

AT&T Inc.

#### IMPORTANCE, DURATION AND EFFECT OF LICENSES

Certain of our subsidiaries own or have licenses to various patents, copyrights, trademarks and other intellectual property necessary to conduct business. Many of our subsidiaries also hold government-issued licenses or franchises to provide wireline or wireless services and regulation affecting those rights is contained in the Annual Report under the heading "Operating Environment Overview" beginning on page 40 and is incorporated herein by reference pursuant to General Instruction G(2). We actively pursue patents, trademarks and service marks to protect our intellectual property within the U.S. and abroad. We maintain a significant global portfolio of patents, trademarks and service mark registrations. We have also entered into agreements that permit other companies, in exchange for fees and subject to appropriate safeguards and restrictions, to utilize certain of our trademarks and service marks. We periodically receive offers from third parties to obtain licenses for patent and other intellectual rights in exchange for royalties or other payments. We also receive notices asserting that our products or services infringe on their patents and other intellectual property rights. These claims, whether against us directly or against third-party suppliers of products or services that we, in turn, sell to our customers, such as wireless handsets, could require us to pay damages, royalties, stop offering the relevant products or services and/or cease other activities. While the outcome of any litigation is uncertain, we do not believe that the resolution of any of these infringement claims or the expiration or non-renewal of any of our intellectual property rights would have a material adverse effect on our results of operations.

#### MAJOR CUSTOMER

No customer accounted for 10% or more of our consolidated revenues in 2011, 2010 or 2009.

#### COMPETITION

Information relating to competition in each of our operating segments is contained in the Annual Report under the heading "Competition" beginning on page 42, and is incorporated herein by reference pursuant to General Instruction G(2).

#### RESEARCH AND DEVELOPMENT

AT&T Labs' scientists and engineers conduct research in a variety of areas, including IP; advanced network design and architecture; network operations support systems; data mining technologies and advanced speech technologies. The majority of the development activities are performed by AT&T Services. The developers within AT&T Services work with our business units and AT&T Labs to create new services and invent tools and systems to manage secure and reliable networks for us and our customers. We also have a research agreement with Telcordia Technologies, formerly Bell Communications Research, Inc. Research and development expenses were \$1,197 million in 2011, \$1,280 million in 2010, and \$993 million in 2009.

#### EMPLOYEES

As of January 31, 2012, we employed approximately 256,000 persons. Approximately 55% of our employees are represented by the Communications Workers of America, the International Brotherhood of Electrical Workers or other unions. Contracts covering approximately 120,000 employees will expire during 2012. For contracts covering approximately 80,000 (mainly wireline) employees, the union is entitled to call a work stoppage in the absence of a new contract being reached.

At December 31, 2011, we had approximately 335,000 retirees who, along with their dependents, were eligible to receive retiree benefits.

7

AT&T Inc.

## ITEM 1A. RISK FACTORS

Information required by this Item is included in the Annual Report under the heading “Risk Factors” on pages 53 through 55 which is incorporated herein by reference pursuant to General Instruction G(2).

### CAUTIONARY LANGUAGE CONCERNING FORWARD-LOOKING STATEMENTS

The following factors could cause our future results to differ materially from those expressed in the forward-looking statements:

- Adverse economic and/or capital access changes in the markets served by us or in countries in which we have significant investments, including the impact on customer demand and our ability and our suppliers’ ability to access financial markets at favorable rates.
- Changes in available technology and the effects of such changes, including product substitutions and deployment costs.
- Increases in our benefit plans’ costs, including increases due to adverse changes in the U.S. and foreign securities markets, resulting in worse-than-assumed investment returns and discount rates and adverse medical cost trends and unfavorable healthcare legislation and regulations.
- The final outcome of FCC and other federal agency proceedings and reopenings of such proceedings and judicial reviews, if any, of such proceedings, including issues relating to access charges, universal service, broadband deployment, E911 services, competition, net neutrality, unbundled loop and transport elements, availability of new spectrum from the FCC on fair and balanced terms, wireless license awards and renewals and wireless services, including data roaming agreements.
- The final outcome of regulatory proceedings in the states in which we operate and reopenings of such proceedings and judicial reviews, if any, of such proceedings, including proceedings relating to Interconnection terms, access charges, universal service, unbundled network elements and resale and wholesale rates; broadband deployment including our U-verse services; net neutrality; performance measurement plans; service standards; and traffic compensation.
- Enactment of additional state, federal and/or foreign regulatory and tax laws and regulations pertaining to our subsidiaries and foreign investments, including laws and regulations that reduce our incentive to invest in our networks, resulting in lower revenue growth and/or higher operating costs.
- Our ability to absorb revenue losses caused by increasing competition, including offerings that use alternative technologies (e.g., cable, wireless and VoIP) and our ability to maintain capital expenditures.
- The extent of competition and the resulting pressure on customer and access line totals and wireline and wireless operating margins.
- Our ability to develop attractive and profitable product/service offerings to offset increasing competition in our wireless and wireline markets.
- The ability of our competitors to offer product/service offerings at lower prices due to lower cost structures and regulatory and legislative actions adverse to us, including state regulatory proceedings relating to unbundled network elements and nonregulation of comparable alternative technologies (e.g., VoIP).
- The development of attractive and profitable U-verse service offerings; the extent to which regulatory, franchise fees and build-out requirements apply to this initiative; and the availability, cost and/or reliability of the various technologies and/or content required to provide such offerings.
  - Our continued ability to attract and offer a diverse portfolio of wireless devices, some on an exclusive basis.
- The availability and cost of additional wireless spectrum and regulations and conditions relating to spectrum use, licensing and technical standards and deployment and usage, including network management rules.

- Our ability to manage growth in wireless data services, including network quality and acquisition of adequate spectrum at reasonable costs and terms.
- The outcome of pending, threatened or potential litigation, including patent and product safety claims by or against third parties.
- The impact on our networks and business from major equipment failures; security breaches related to the network or customer information; our inability to obtain handsets, equipment/software or have handsets, equipment/software serviced in a timely and cost-effective manner from suppliers; or severe weather conditions, natural disasters, pandemics, energy shortages, wars or terrorist attacks.
- The issuance by the Financial Accounting Standards Board or other accounting oversight bodies of new accounting standards or changes to existing standards.
- The issuance by the Internal Revenue Service and/or state tax authorities of new tax regulations or changes to existing standards and actions by federal, state or local tax agencies and judicial authorities with respect to applying applicable tax laws and regulations and the resolution of disputes with any taxing jurisdictions.
- Our ability to adequately fund our wireless operations, including payment for additional spectrum network upgrades and technological advancements.
- Changes in our corporate strategies, such as changing network requirements or acquisitions and dispositions, which may require significant amounts of cash or stock, to respond to competition and regulatory, legislative and technological developments.

Readers are cautioned that other factors discussed in this report, although not enumerated here, also could materially affect our future earnings.

AT&T Inc.

## ITEM 2. PROPERTIES

Our properties do not lend themselves to description by character and location of principal units. At December 31, 2011, approximately 81% of our property, plant and equipment was owned by our wireline subsidiaries and approximately 19% was owned by our wireless subsidiaries. Central office equipment represented 32%; Outside Plant (including cable, wiring and other non central office network equipment) represented approximately 30% of our telephone plant; other equipment, comprised principally of furniture and office equipment and vehicles and other work equipment, represented 20%; land, building and wireless communications towers represented 11%; and other miscellaneous property represented 6%.

Substantially all of the installations of central office equipment are located in buildings and on land we own. Many garages, administrative and business offices, and telephone centers and retail stores are in leased quarters. Property on which communication towers are located, may be either owned or leased.

## ITEM 3. LEGAL PROCEEDINGS

We are a party to numerous lawsuits, regulatory proceedings and other matters arising in the ordinary course of business. Additional information regarding litigation is included in the Annual Report under the headings "Retiree Phone Concession Litigation," "Wage and Hour Litigation," "NSA Litigation" and "Universal Service Fees Litigation" on pages 46 through 47, which is incorporated herein by reference pursuant to General Instruction G(2). As of the date of this report, we do not believe any pending legal proceedings to which we or our subsidiaries are subject are required to be disclosed as material legal proceedings pursuant to this item.

We are subject from time to time to judicial and administrative proceedings brought by various governmental authorities under federal, state or local environmental laws. We are required to discuss one of these proceedings in our Forms 10-Q and 10-K, this proceeding is listed below because each could result in monetary sanctions (exclusive of interest and costs) of one hundred thousand dollars or more. However, we do not believe that any of them currently pending will have a material adverse effect on our results of operations.

(a) The U.S. Environmental Protection Agency (EPA) is seeking civil penalties from AT&T Mobility in connection with alleged violations of federal environmental statutes in connection with management of back-up power systems at AT&T Mobility facilities. The EPA's allegations include noncompliance with requirements to obtain air emission permits for generators and to prepare spill prevention plans for fuel storage tanks. We expect to settle those allegations on terms that would include civil penalties in the range of \$1 to \$3 million dollars.

## ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

AT&amp;T Inc.

EXECUTIVE OFFICERS OF THE REGISTRANT  
(As of February 1, 2012)

Name	Age	Position	Held Since
Randall L. Stephenson	51	Chairman of the Board, Chief Executive Officer and President	6/2007
William A. Blase Jr.	56	Senior Executive Vice President – Human Resources	6/2007
James W. Cicconi	59	Senior Executive Vice President – External and Legislative Affairs, AT&T Services, Inc.	11/2008
Catherine M. Coughlin	54	Senior Executive Vice President and Global Marketing Officer	6/2007
Ralph de la Vega	60	President and Chief Executive Officer, AT&T Mobility	10/2008
John M. Donovan	51	Senior Executive Vice President – AT&T Technology and Network Operations	1/2012
Andrew M. Geisse	55	Senior Executive Vice President – AT&T Business and Home Solutions	1/2012
Forrest E. Miller*	59	Group President – Corporate Strategy and Development	6/2007
John T. Stankey	49	Group President and Chief Strategy Officer	2/2012
John J. Stephens	52	Senior Executive Vice President and Chief Financial Officer	6/2011
Wayne Watts	58	Senior Executive Vice President and General Counsel	6/2007
Rayford Wilkins, Jr.*	60	Chief Executive Officer – AT&T Diversified Businesses	10/2008

\*Retiring March 30, 2012.

All of the above executive officers have held high-level managerial positions with AT&T or its subsidiaries for more than the past five years, except for Mr. Donovan. Mr. Donovan was executive vice president of product, sales, marketing and operations at VeriSign Inc., a technology company that provides Internet infrastructure services, from November 2006 to April 2008. Mr. Donovan joined AT&T as Chief Technology Officer in April 2008. Executive officers are not appointed to a fixed term of office.

AT&T Inc.

## PART II

### ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock is listed on the New York Stock Exchange. The number of stockholders of record as of December 31, 2011 and 2010 was 1,301,479 and 1,372,019. The number of stockholders of record as of February 17, 2012, was 1,291,207. We declared dividends, on a quarterly basis, totaling \$1.73 per share in 2011 and \$1.69 per share in 2010.

Other information required by this Item is included in the Annual Report under the headings "Quarterly Financial Information" on page 91, "Selected Financial and Operating Data" on page 30, and "Stock Trading Information" on the back cover, which are incorporated herein by reference pursuant to General Instruction G(2).

### ITEM 6. SELECTED FINANCIAL DATA

Information required by this Item is included in the Annual Report under the heading "Selected Financial and Operating Data" on page 30, which is incorporated herein by reference pursuant to General Instruction G(2).

### ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

Information required by this Item is included in the Annual Report on pages 31 through 56, which is incorporated herein by reference pursuant to General Instruction G(2).

### ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Information required by this Item is included in the Annual Report under the heading "Market Risk" on pages 51 through 52, which is incorporated herein by reference pursuant to General Instruction G(2).

### ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Information required by this Item is included in the Annual Report on pages 57 through 91, which is incorporated herein by reference pursuant to General Instruction G(2).

### ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

During our two most recent fiscal years, there has been no change in the independent accountant engaged as the principal accountant to audit our financial statements and the independent accountant has not expressed reliance on other independent accountants in its reports during such time period.

### ITEM 9A. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The registrant maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed by the registrant is recorded, processed, summarized, accumulated and communicated to its management, including its principal executive and principal financial officers, to allow timely decisions regarding required disclosure, and reported within the time periods specified in the SEC's rules and forms. The Chief Executive Officer and Chief Financial Officer have performed an evaluation of the effectiveness of the design and operation of the registrant's disclosure controls and procedures as of December 31, 2011. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the registrant's disclosure controls and procedures were effective as of December 31, 2011.

AT&T Inc.

#### Internal Control Over Financial Reporting

(a) Management's Annual Report on Internal Control over Financial Reporting

The management of AT&T is responsible for establishing and maintaining adequate internal control over financial reporting. AT&T's internal control system was designed to provide reasonable assurance as to the integrity and reliability of the published financial statements. AT&T management assessed the effectiveness of the company's internal control over financial reporting as of December 31, 2011. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control – Integrated Framework. Based on its assessment, AT&T management believes that, as of December 31, 2011, the Company's internal control over financial reporting is effective based on those criteria.

(b) Attestation Report of the Registered Public Accounting Firm

The registered public accounting firm that audited the financial statements included in the Annual Report containing the disclosure required by this Item, Ernst & Young LLP, has issued an attestation report on the Company's internal control over financial reporting. The attestation report issued by Ernst & Young LLP is included in the Annual Report on page 94, which is incorporated herein by reference pursuant to General Instruction G(2).

#### ITEM 9B. OTHER INFORMATION

There is no information that was required to be disclosed in a report on Form 8-K during the fourth quarter of 2011 but was not reported.

12

AT&T Inc.

### PART III

#### ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Information regarding executive officers required by Item 401 of Regulation S-K is furnished in a separate disclosure at the end of Part I of this report since the registrant did not furnish such information in its definitive proxy statement prepared in accordance with Schedule 14A. Information regarding directors required by Item 401 of Regulation S-K is incorporated herein by reference pursuant to General Instruction G(3) from the registrant's definitive proxy statement, dated on or about March 9, 2011 (Proxy Statement) under the heading "Election of Directors."

There is no disclosure in this Form 10-K of reporting person delinquencies in response to Item 405 of Regulation S-K and the registrant, at the time of filing this Annual Report on Form 10-K, has reviewed the information necessary to ascertain, and has determined that Item 405 disclosure is not expected to be contained in this Form 10-K or incorporated herein by reference.

The registrant has a separately-designated standing audit committee established in accordance with Section 3(a)(58)(A) of the Securities Exchange Act of 1934. The members of the committee are Messrs. Chico, Kelly and Madonna and Ms. Tyson. The additional information required by Item 407(d)(5) of Regulation S-K is incorporated herein by reference pursuant to General Instruction G(3) from the registrant's Proxy Statement under the heading "Audit Committee."

The registrant has adopted a code of ethics entitled "Code of Ethics" that applies to the registrant's principal executive officer, principal financial officer, principal accounting officer, or controller or persons performing similar functions. The additional information required by Item 406 of Regulation S-K is provided in this report under the heading "General" under Part I, Item 1. Business.

#### ITEM 11. EXECUTIVE COMPENSATION

Information required by Item 402(k) of Regulation S-K is incorporated herein by reference pursuant to General Instruction G(3) from the registrant's Proxy Statement under the heading "Compensation of Directors." Information regarding officers is included in the registrant's Proxy Statement on the pages beginning with the heading "Compensation Discussion and Analysis" and ending with, and including, the pages under the heading "Potential Payments upon Change in Control" which are incorporated herein by reference pursuant to General Instruction G(3). Information required by Item 407(e)(5) of Regulation S-K is included in the registrant's Proxy Statement under the heading "Compensation Committee Report" and is incorporated herein by reference pursuant to General Instruction G(3) and shall be deemed furnished in this Annual Report on Form 10-K and will not be deemed incorporated by reference into any filing under the Securities Act of 1933 or the Securities Exchange Act of 1934.

AT&amp;T Inc.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Information required by Item 403 of Regulation S-K is included in the registrant's Proxy Statement under the heading "Common Stock Ownership," which is incorporated herein by reference pursuant to General Instruction G(3).

Equity Compensation Plan Information

The following table provides information as of December 31, 2011, concerning shares of AT&T common stock authorized for issuance under AT&T's existing equity compensation plans.

Equity Compensation Plan Information

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation Plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by security holders	54,719,855 (1)	\$30.17	120,659,837 (2)
Equity compensation plans not approved by security holders	14,409,771 (3)	\$34.37	0
Total	69,129,626 (4)	\$31.65	120,659,837

(1) Includes the issuance of stock in connection with the following stockholder approved plans: (a) 20,978,906 stock options under the 1996 Stock and Incentive Plan, 2001 Incentive Plan, and Stock Purchase and Deferral Plan (SPDP), (b) 2,016,811 phantom stock units under the Stock Savings Plan (SSP), 5,641,603 phantom stock units under the SPDP, and 3,876,413 restricted stock units under the 2006 Incentive Plan, (c) 13,933,552 target number of stock-settled performance shares under the 2006 Incentive Plan, and (d) 12,808 target number of stock-settled performance shares under the 2011 Incentive Plan. At payout, the target number of performance shares may be reduced to zero or increased by up to 150% (220,432 of the performance shares under the 2006 Incentive Plan may be increased by up to 200%). Each phantom stock unit and performance share is settleable in stock on a 1-to-1 basis. The weighted-average exercise price in the table does not include outstanding performance shares or phantom stock units.

The SSP was approved by stockholders in 1994 and then was amended by the Board of Directors in 2000 to increase the number of shares available for purchase under the plan (including shares from the Company match and reinvested dividend equivalents) and shares subject to options. Stockholder approval was not required for the amendment. To the extent applicable, the amount shown for approved plans in column (a), in addition to the above amounts, includes 2,889,928 phantom stock units (computed on a first-in-first-out basis) and 5,360,513 stock options that were approved by the Board in 2000. Under the SSP, shares could be purchased with payroll deductions and reinvested dividend equivalents by mid-level and above managers and limited Company partial

matching contributions. No new contributions may be made to the plan. In addition, participants received approximately 2 options for each share purchased with employee payroll deductions. The options have a 10-year term and a strike price equal to the fair market value of the stock on the date of grant.

(2) Includes 10,301,866 shares that may be issued under the SPDP, 89,888,357 shares that may be issued under the 2011 Incentive Plan, and up to 4,172,934 shares that may be purchased through reinvestment of dividends on phantom shares held in the SSP.

14

---

AT&T Inc.

(3) Number of outstanding stock options under the 1995 Management Stock Option Plan (1995 MSOP), which has not been approved by stockholders. The 1995 MSOP provides for grants of stock options to management employees (10-year terms) subject to vesting requirements and shortened exercise terms upon termination of employment. No further options may be issued under this plan.

(4) Does not include certain stock options issued by companies acquired by AT&T that were converted into options to acquire AT&T stock. As of December 31, 2011, there were 25,383,452 shares of AT&T common stock subject to the converted options, having a weighted-average exercise price of \$29.00. Also, does not include 88,242 outstanding phantom stock units that were issued by companies acquired by AT&T that are convertible into stock on a 1-to-1 basis, along with up to 64,270 shares that may be purchased with reinvested dividend equivalents paid on the outstanding phantom stock units. These units have no exercise price. No further phantom stock units, other than reinvested dividends, may be issued under the assumed plans. The weighted-average exercise price in the table does not include outstanding performance shares or phantom stock units.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Information required by Item 404 of Regulation S-K is included in the registrant’s Proxy Statement under the heading “Related Person Transactions,” which is incorporated herein by reference pursuant to General Instruction G(3).

Information required by Item 407(a) of Regulation S-K is included in the registrant’s Proxy Statement under the heading “Independence of Directors,” which is incorporated herein by reference pursuant to General Instruction G(3).

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

Information required by this Item is included in the registrant’s Proxy Statement under the heading “Principal Accountant Fees and Services,” which is incorporated herein by reference pursuant to General Instruction G(3).

Part IV

ITEM 15. EXHIBITS and FINANCIAL STATEMENT SCHEDULES

(a) Documents filed as a part of the report:
