Yes [-]      No [x]

**Magic Software Named a "Strong Performer in Integration-Centric BPM Market" by Independent Research Firm**

*Independent Report notes Magic Software's "comprehensive solution," pricing, and partnership with SAP make it an "appealing alternative for mid-market users seeking an integration-centric, business process management suite*

Or Yehuda, Israel; February 20, 2007 Forrester Research, has named Magic Software Enterprises (NASDAQ: MGIC) as a "Strong Performer" in Forrester's recently published report, "The Forrester Wave: Integration-Centric Business Process Management Suites, Q4 2006." (December 2006). In all, 35 vendors were interviewed for the report, 13 qualified for review, and only five, including Magic Software, were rated as "Strong Performers."

The report, released in December 2006 and authored by Ken Vollmer and Henry Peyret, states, "Magic has a midmarket focus, and its pricing makes it an appealing alternative, coupled with a partnership with SAP that accelerates connection of SAP Business One customers to their SME-based applications. Its comprehensive coverage makes it a good fit for midsize companies looking for an all-in-one solution for their integration, BPM, and service-oriented architecture (SOA) needs.

The Forrester report also noted Magic Software's "surprising number of strategic alliances for a vendor of that size", its "strong product roadmap", and its position "at the lower end of the pricing scale for products in this category.

Magic Software's market share buildup in the IBM midrange System i category, has also contributed to Forrester's assessment.

Magic Software's iBOLT™ is a cost-effective and straightforward business process integration framework that rationalizes diverse standards and proprietary formats and quickly creates, and dynamically deploys, new business processes, services, and applications. Its innovative visual design tools, including Data Mapper and integration wizards, assure fast, end-to-end business integration across the enterprise.

"Magic is gaining increased recognition and mindshare as a significant player in the SME middleware market," said Avigdor Luttinger, Magic Software's vice president of corporate strategy. "Our increasing presence in ecosystems such as SAP Business One and Oracle's J.D. Edwards World is recognized by Forrester as a very focused strategy for addressing midmarket needs with a comprehensive product set."

### ***About Magic Software Enterprises***

Magic Software Enterprises (NASDAQ: MGIC) has been a leader in enterprise application development, deployment and integration technology for more than two decades. The company's service-oriented platform is used by companies worldwide to develop, maintain, and deploy both legacy and new business solutions, while integrating these applications across both internal and external, heterogeneous environments. Magic Software's platform-independent methodology lets companies achieve agility by quickly assembling composite applications, allowing programmers to create services and architects and business analysts to orchestrate and reuse these services to enable business processes. Through partnerships with industry leaders such as IBM and SAP and more than 2500 ISVs worldwide, Magic Software technology is used by more than 1.5 million customers around the globe.
