```

Panama City, Republic of Panama, August 17, 2004 - Banco Latinoamericano de Exportaciones, S.A. - Bladex (NYSE: BLX or the "Bank"), announced today its results for the second quarter ended June 30, 2004. (The Bank's financial statements are prepared in accordance with U.S. GAAP, and all figures are stated in U.S. dollars.)

For the quarter, the Bank reported net income of US\$24.3 million, or US\$0. 62 per share, compared to net income of US\$29.8 million, or US\$0.76 per share, in the previous quarter, and net income of US\$67.1 million, or US\$3.65 per share, in the second quarter of 2003. Net income for the second quarter reflected Argentine provision reversals of US\$18.3 million, compared to Argentine provision reversals of US\$18.9 million for the first quarter due to payments and prepayments on the Argentine restructured loans.

First half 2004 net income amounted to US\$54.1 million, or US\$1.37 per share, compared to US\$77.5 million, or US\$4.32 per share, for the same period in 2003 . The results for the first half of 2004 reflected Argentine provision reversals of US\$37.2 million, compared to provision reversals and gain on the sale of securities for US\$57.5 million in the first half of 2003 . The 2003 results reflected the sale of US $\$ 169.5$ million of Argentine assets. No such sales have taken place during 2004.

(*) Earnings per share calculations are based on the average number of shares outstanding during each period. During the first quarter of 2004 the average number of common shares outstanding was 39.4 million, an amount unchanged from the first quarter of 2004 , and compared to 18.3 million during the second quarter of 2003.

Comments from the Chief Executive Officer:

Jaime Rivera, Chief Executive Officer of Bladex, stated, "The second quarter saw
continued progress with respect to our client, product, and portfolio strategies.

We are working in an environment that plays to Bladex's strengths. Although overall economic growth levels are not as robust as we had envisioned, trade flows are benefiting from strong commodity prices and from policies geared towards promoting foreign trade as one of the cornerstones of economic growth. With the completion of the CAFTA negotiations, and with the ongoing talks among the United States, the European Community and several countries in the Region, we are now more confident than ever about our strategic premise calling for increased business opportunities for Bladex.

The second quarter highlights for Bladex were the following:

First, the obligors under our rescheduled credit portfolio in Argentina met all of their US\$18.7 million in principal payments due. In addition, the Bank received US\$19.6 million in prepayments, a reflection of the improving liquidity and, in some cases, improved balance sheet strength of some of our clients in the country.

Second, the Bank's new client coverage model is yielding results. Disbursements in the second quarter totaled US\$1.2 billion, 41\%, or US\$343 million, above the levels of the first quarter. We were thus able to grow the credit portfolio by $2 \%$ in spite of significant reductions in our stock of non-trade portfolio.

Third, we are encouraged by the continued increase in deposit balances, which have risen 64\% to US\$841 million in the last year.

Fourth, Bladex took action on the capital management front. The increased common dividend, the special dividend, and the stock repurchase program announced on August 5, 2004, comprise a balanced package designed with the long-term interests of the Bank and its shareholders in mind.

The second quarter showed the initial results of our new product deployment strategy, as we booked US\$43.4 million of new country risk guarantee transactions. Continued work along the new product front holds the key to operating earnings growth. With all other issues addressed, operating earnings growth has now become the principal priority of the Bank." Mr. Rivera concluded.

NET INTEREST INCOME
(In US\$ million)

|  | 6M03 | 6M0 4 | 2 Q 03 | 1204 | 2 Q 04 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Net Interest Income | \$27.3 | \$22.4 | \$13.5 | \$11.3 | \$11.1 |

The US\$4.9 million decline in net interest income during the first six months of 2004 compared to the same period of 2003 was mainly due to:
i) Lower spreads over LIBOR on the accruing loan and investment securities portfolio, resulting both from the generally improved risk perception in the Region, and from the reduction of the stock of higher-spread, non-trade and medium-term loans; and
ii) Reduced levels of interest collection from the Bank's portfolio in Argentina, reflecting smaller average balances in the country.

Net interest margin

The table below provides the net interest margin (net interest income divided by the average balance of interest-earning assets) and net interest spread (average yield earned on interest-earning assets, less the average rate paid on interest-bearing liabilities) for the periods indicated:

|  | 6M03 | 6M0 4 | 2 Q 03 | 1204 | 2 Q 04 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Net Interest Margin | 1.76\% | 1.70\% | 1.78\% | 1.69\% | 1.72\% |
| Net Interest Spread | 1.15\% | 1.15\% | 1.18\% | 1.11\% | 1.19\% |

$2 Q 04$ vs. 1204

The 3 basis points increase in the net interest margin for the second quarter of 2004 compared to the first quarter of 2004 , was mainly due to higher market interest rates, which had a positive impact on the asset-sensitive interest rate gap, and generated a higher return on the Bank's available capital funds; this was offset by lower spreads over LIBOR and smaller interest collections on the non-accruing portfolio.

The 8 basis points increase in the net interest spread reflects the re-pricing of assets in an increasing interest rate environment, partially offset by lower lending spreads over LIBOR.

6M04 vs. 6M03

The 6 basis points decrease in the net interest margin for the six months of 2004, compared to the same period in 2003 was mainly due to lower spreads over LIBOR, and a lower interest rate environment, which had a negative impact on the asset-sensitive interest rate gap, and generated a lower return on the Bank's available capital funds.

## COMMISSION INCOME

The following table shows the components of commission income for the periods indicated:

| (In US\$ thousands) | 6M03 | 6M0 4 | 2 Q 03 | 1Q04 | $2 Q 04$ |
| :---: | :---: | :---: | :---: | :---: | :---: |

| Commission Income, net | \$4,264 | \$3,157 | \$1,835 | \$1,686 | \$1,471 |

Net commission income for the second quarter of 2004 decreased by 13\% compared to the first quarter of 2004 mostly due to lower revenues from letter of credit

## Edgar Filing: LATIN AMERICAN EXPORT BANK - Form 6-K

activity in certain countries where the Bank chose to reduce its exposure due to risk considerations.

The $26 \%$ decline in net commission income during the first six months of 2004 , compared to the same period in 2003, was mainly due to: i) a 59\% decline in commission income on loans and other, mostly related to a one-time loan commitment fees of US $\$ 344$ thousand that was recognized during the first quarter of 2003, and ii) decreased volumes in letters of credit and guarantees, reflecting risk-based action on the Bank's part, or the decision to exit non-trade related activities.

## REVERSAL OF PROVISIONS FOR CREDIT LOSSES

During the second quarter of 2004 , the Bank reversed US\$17.4 million of its allowance for credit losses (which includes reversal of provisions for loan losses and provisions for losses on off-balance sheet
credit risk), in comparison to a reversal of US\$21.4 million in the first quarter of 2004 . The second quarter reversals were mainly the result of:
(i) Principal payments and prepayments on the Argentine restructured loans, as well as a loan recovery in the amount of US\$1.3 million on an Argentine loan charged-off in 1999;
(ii) An increase in the Bank's general reserve coverage for credits in Brazil and Ecuador, in line with increased credit exposure levels in these countries;
(iii) A reduction of specific reserves due to a principal prepayment of a loan by a Brazilian client in non-accrual status; and
(iv) A decrease in general reserves for Venezuela, in line with reduced credit exposure levels in the country.

For the first six months of 2004 , provision reversals amounted to US\$38.8 million, compared to US\$44.3 million reversals during the first six months of 2003. The US $\$ 5.5$ million difference is mainly due to the impact of the US\$169.5 million Argentine asset sales during the first six months of 2003 . No such sales have taken place during 2004. (For additional information, please refer to Asset Quality section on page 11.)

OPERATING EXPENSES

The following table shows a breakdown of the components of operating expenses for the periods indicated:

| (In US\$ thousands) | 6M03 | 6M04 | 2203 | 1204 | 2004 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Salaries and other employee expenses | \$4,990 | \$4,870 | \$2,441 | \$2,377 | \$2,493 |
| Depreciation | 753 | 697 | 377 | 359 | 338 |
| Professional services | 1,531 | 1,376 | 1,043 | 507 | 870 |
| Maintenance and repairs | 538 | 605 | 324 | 256 | 349 |

| Other operating expenses | 2,183 | 2,867 | 1,225 | 1,190 | 1,676 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Total Operating Expenses | \$9,994 | \$10,415 | \$5,410 | \$4,689 | \$5,727 |

2 Q04 vs. 1204
Total operating expenses for the second quarter of 2004 increased by US\$1.0 million, or $22 \%$, compared to the first quarter of 2004 , mainly due to an increase in expenses related to the annual shareholder's meeting, regulatory related expenses, costs associated with the incorporation of the new commercial team, and business promotion expenses, including the launching of the new brand and corporate image.

6M04 vs. 6M03
Total operating expenses for the first six months of 2004 increased by US\$421 thousand, or $4 \%$, mostly due to higher insurance premiums, expenses related to new product development, branding, and increased business promotion efforts.

At the end of the second quarter 2004, the Bank's Brazilian portfolio had no past due interest or principal amounts. At June 30, 2004, the Brazilian portfolio included one restructured loan on non-accrual status, which is current in interest and principal for, US\$43 million to a Brazilian corporation, compared to US\$47 million as of March 31, 2004 (the decrease was due to a principal prepayment). As of June 30,2004 , the specific allowance for loan losses on this credit was US\$14 million, compared to US\$16 million as of March 31, 2004.

## ARGENTINE EXPOSURE

[The following table represents a bar chart in the printed report.]

US\$ million

(1) Exposure net of specific allowances for credit losses and net of fair value adjustments on investment securities (impairment loss).

As of June 30, 2004, the Bank's US\$202 million exposure in Argentina, net of the allowance for credit losses, represented $32 \%$ of the total stockholders' equity of the Bank, compared to 36\% as of March 31, 2004, and 64\% as of June 30, 2003.

The Bank's exposure in Argentina is denominated in U.S. dollars (93\%) and Euros (7\%). The Bank's Argentine credit exposure at the dates indicated is presented in the following table:

| Net Exposure at June 30, 2003 | \$313.5 | \$20.5 | \$16.4 | \$350.4 |

As of June 30, 2004, the Bank's credit portfolio in Argentina amounted to US\$360 million, a reduction of US\$39 million, or 10\%, since March 31, 2004, and US\$224 million, or $38 \%$ since June 30 , 2003. (Please refer to Exhibit VIII).

## Edgar Filing: LATIN AMERICAN EXPORT BANK - Form 6-K

The US\$39 million reduction in the second quarter of 2004 was mainly due to: i) scheduled repayments of Argentine restructured and performing loans of US\$19 million, representing a 100\% of the amounts due and payable during the quarter, and ii) principal loan prepayments of US\$20 million.

The reduction in the Bank's credit portfolio in Argentina of $\mathbf{U} \$ 224$ million, or 38\%, from June 30, 2003 to June 30, 2004, was mainly due to the following factors: i) the sale of Argentine assets of US\$138 million, (equivalent to US\$105 million net of fair value adjustments of investment securities) that occurred during the second half of 2003 , ii) payments and prepayments of US\$42 million and US\$74 million during the second half of 2003 and the first half of 2004, respectively, iii) changes in fair value adjustments of investment securities for (US\$4 million) and US\$262 thousand during the second half of 2003 and the first half of 2004, respectively, and iv) Euro currency revaluation of US\$2 million and (US\$1 million) during the second half of 2003 and the first half of 2004, respectively.

The Argentine credit portfolio distribution by industry type as of June 30, 2004 was as follows:
(In US\$ million, except percentages)

Interest payments on Argentine credits (loans and investment securities) are recorded on a cash basis. The Bank collected interest from Argentine borrowers of approximately US\$4 million during the second quarter of 2004 , compared to US\$5 million during the first quarter of 2004 , and compared to US\$6 million during the second quarter of 2003. The decline in interest income from Argentine borrowers was mainly due to smaller average balances, which resulted in a reduction in the amount of scheduled interest payment maturities. The ratio of

## Edgar Filing: LATIN AMERICAN EXPORT BANK - Form 6-K

interest collected from Argentine borrowers to total interest payments due and payable from these borrowers during the second quarter of 2004 was 97\%, compared to $98 \%$ during the first quarter 2004 , and $81 \%$ during the second quarter of 2003 . Although significant amounts of interest have been received on a consistent basis from most of the Bank's borrowers in the country, the ultimate collection of principal on these credits is evaluated separately.

The composition and maturity profile of the remaining Bank's Argentine credit portfolio in terms of restructured loans as of June 30, 2004 was as follows:
(In US\$ million, except percentages)

(1) As of June 30, 2004, these credits had a specific allowance for credit losses of US\$27 million.

The portfolio of restructured and performing loans, under the renegotiated terms, has an average life of approximately 2 years. None of the restructurings have involved reduction of the face amount of the debt. Assets not yet restructured and not paying interest consist of obligations from four companies in the utilities sector.

(1) Includes reversals in the provision for loan losses of US\$44.1 million, US\$9.9 million and US\$8.7 million during the 2Q03, 3Q03 and 4Q03, respectively, as a result of the sale of Argentine loans.
(2) Principal recovery of an Argentine loan previously charged-off against the allowance.

The US\$16 million decrease in the allowance for credit losses in the second quarter of 2004 was principally due to: i) a US\$18 million reduction in specific reserves for Argentine credits as a result of principal payments and prepayments; ii) a US\$2 million reduction in specific reserves relating to a Brazilian non-accruing loan; iii) a US\$2 million reduction in general reserves for to Venezuela due to a reduction in the Bank's credit exposure in the country; and iv) a US\$6 million increase in general reserves, mainly in Brazil and Ecuador, due to increased credit exposure in these countries.

As of June 30, 2004, the allowance for credit losses and net exposure on a per country basis was as follows:
(In US\$ million)

|  | At March 31, 2004 |  | At June 30, 2004 |  |
| :---: | :---: | :---: | :---: | :---: |

| Other Countries | 1,180 | (27) | 1,102 | (28) |
| Total | \$2,631 | \$ (237) | \$2,696 | \$ (221) |

As of June 30, 2004, the Bank's credit portfolio outside Argentina had no past due principal or interest amounts.

## LIQUIDITY

The following table shows the net cash position of the Bank as a percentage of its overall balance sheet and as a percentage of total deposits, at the following dates:

30-JUN-03 31-MAR-04 30-JUN-04

| Net cash position (1) / balance sheet | $15.8 \%$ | $7.6 \%$ | $8.9 \%$ |
| :--- | :--- | ---: | ---: |
| Net cash position (1) / deposits | $82.5 \%$ | $25.6 \%$ | $26.5 \%$ |

(1) The Bank's net cash position is determined as follows: cash due from banks, plus interest- bearing deposits with banks, less pledge certificates of deposit.

As of June 30, 2004, the Bank's deposits increased by 17\% or US\$122 million to US $\$ 841$ million since March 31, 2004, and $64 \%$ or US $\$ 328$ million, from a year ago, primarily reflecting new deposits from central and commercial banks in the Region.

PERFORMANCE AND CAPITAL RATIOS

At June 30, 2004 the number of common shares outstanding was 39.4 million, an amount unchanged since June 30, 2003.

|  | 2 Q 03 | 1004 | 2 Q 04 |
| :---: | :---: | :---: | :---: |
| ROE (return on average stockholders' equity) | 70.25\% | 20.20\% | 15.81\% |
| ROA (return on average assets) | 9.79\% | 4.71\% | 3.97\% |

Although the Bank is not subject to the capital adequacy requirements of the Federal Reserve Board, if the Federal Reserve Board risk-based capital adequacy requirements were applied, the Bank's Tier 1 and Total Capital Ratios as of June 30, 2004 would have been $41.1 \%$ and $42.3 \%$, respectively. Equivalent figures for March 31, 2004, would have been $37.9 \%$ and $39.2 \%$, respectively, and $32.2 \%$ and $33.5 \%$ respectively, for June 30, 2003.

## RECENT EVENTS

- Capital Management Program - On August 5, 2004, Bladex announced a capital management program consisting of an increase in quarterly dividends from US\$0.10 to US\$0.15 per common share, a special dividend of US\$1.00 per share payable on October 7, 2004, and a three-year stock repurchase program under which Bladex may repurchase up to an aggregate amount of US\$50
million of common stock. These three elements are designed to preserve the Bank's solid capitalization and ability to withstand volatility in its markets, as well as to allow for the execution of its business plan.
- Launch of New Brand and Corporate Image - On July 6, 2004, Bladex launched a new corporate identity in an event held in Panama City. The branding strategy seeks to capitalize on the value of Bladex's unique name in Latin America.
- Chief Operations Officer - On July 1, 2004, Mr. Ernesto Bruggia joined Bladex as the new Chief Operations Officer, responsible for Human Resources, Technology, Operations, and Accounting.
- Master Agreement with Ex-Im Bank - A Master Guarantee Agreement (MGA) with the Export-Import Bank of the United States (Ex-Im Bank) was signed on June 15, of 2004, to provide medium-term loans for U.S. exports to Latin America and the Caribbean, supported by guarantees from Ex-Im Bank.

ABOUT Bladex

Bladex is a multinational bank originally established by the Central Banks of Latin American and Caribbean countries to promote trade finance in the Region. Based in Panama, its shareholders include central banks and state-owned entities in 23 countries in the Region, Latin American and international commercial banks, and institutional and retail investors. Through June 30, 2004, over its 25 years of operations, Bladex had disbursed accumulated credits of over US\$126 billion in Latin America.

Note: Various numbers and percentages set out in this press release have been rounded, and accordingly, may not total exactly.

This press release contains forward-looking statements of expected future developments. The Bank wishes to ensure that such statements are accompanied by meaningful cautionary statements pursuant to the safe harbor established by the Private Securities Litigation Reform Act of 1995. The forward-looking statements in this press release refer to the environment in which Bladex is working playing to Bladex's strengths, the ability of Bladex to do business under specific market conditions, the improving liquidity of Bladex's clients in Argentina and the ability of Bladex to withstand volatility in its markets. These forward-looking statements reflect the expectations of the Bank's management and are based on currently available data; however, actual experience with respect to these factors is subject to future events and uncertainties, which could materially impact the Bank's expectations. Among the factors that can cause actual performance and results to differ materially are as follows: a decline in the willingness of international lenders and depositors to provide funding to the Bank, causing a contraction of the Bank's credit portfolio, adverse economic or political developments in the Region, particularly in Argentina or Brazil, which could increase the level of impaired loans in the Bank's loan portfolio and, if sufficiently severe, result in the Bank's allowance for probable credit losses being insufficient to cover losses in the portfolio, unanticipated developments with respect to international banking transactions (including among other things, interest rate spreads and competitive conditions), a change in the Bank's credit ratings, events in Argentina and Brazil or other countries in the Region unfolding in a manner that is detrimental to the Bank, or which might result in adequate liquidity being unavailable to the Bank, or the Bank's operations being less profitable than anticipated.

There will be a conference call to discuss the quarterly results on August 18, 2004 at 11:00 a.m. New York City time. For those interested in participating, please call (888) 208-1814 in the United States or, if outside the United States, please dial (719) 457-2655. All participants should give the conference ID\#816466 to the telephone operator five minutes before the call is set to begin. There will also be a live audio webcast of the event at www.blx.com.

Bladex's conference call will become available for review on Conference Replay one hour after the conclusion of the conference, and will remain available through August 19, 2004. Please dial (888) 203-1112 or (719) 457-0820 and follow the instructions. The Conference ID\#, for the call that will be replayed is 816466 .
