Form 10-Q  
May 11, 2009

---

UNITED STATES SECURITIES AND EXCHANGE COMMISSION  
WASHINGTON, DC 20549

FORM 10-Q

(Mark One)

☒

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES  
EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2009

OR

☐

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES  
EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission File Number 0-422

MIDDLESEX WATER COMPANY

(Exact name of registrant as specified in its charter)

New Jersey  
(State of incorporation)

22-1114430  
(IRS employer identification no.)

1500 Ronson Road, Iselin, NJ 08830  
(Address of principal executive offices, including zip code)

(732) 634-1500  
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or such shorter period that the registrant was required to submit and post files).

Yes ☐ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company.

Large accelerated filer ☐ Accelerated filer ☒ Non-accelerated filer ☐ Smaller reporting company ☐

Edgar Filing: MIDDLESEX WATER CO - Form 10-Q

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

Yes " No ☒

The number of shares outstanding of each of the registrant's classes of common stock, as of May 8, 2009: Common Stock, No Par Value: 13,429,080 shares outstanding.

MIDDLESEX WATER COMPANY  
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1 – Basis of Presentation

Middlesex Water Company (Middlesex or the Company) is the parent company and sole shareholder of Tidewater Utilities, Inc. (Tidewater), Tidewater Environmental Services, Inc. (TESI), Pinelands Water Company (Pinelands Water) and Pinelands Wastewater Company (Pinelands Wastewater) (collectively, Pinelands), Utility Service Affiliates, Inc. (USA), and Utility Service Affiliates (Perth Amboy) Inc. (USA-PA). Southern Shores Water Company, LLC (Southern Shores) and White Marsh Environmental Systems, Inc. (White Marsh) are wholly-owned subsidiaries of Tidewater. The financial statements for Middlesex and its wholly-owned subsidiaries (the Company) are reported on a consolidated basis. All significant intercompany accounts and transactions have been eliminated.

The consolidated notes within the 2008 Form 10-K are applicable to these financial statements and, in the opinion of the Company, the accompanying unaudited condensed consolidated financial statements contain all adjustments necessary (including normal recurring accruals) to present fairly the financial position as of March 31, 2009, the results of operations for the three month periods ended March 31, 2009 and 2008, and cash flows for the three month periods ended March 31, 2009 and 2008. Information included in the Condensed Consolidated Balance Sheet as of December 31, 2008, has been derived from the Company's audited financial statements for the year ended December 31, 2008.

Certain reclassifications have been made to the prior year financial statements to conform with the current period presentation.

Recent Accounting Pronouncements – In April 2009, the Financial Accounting Standards Board (FASB) issued FASB Staff Position (FSP) No. FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly (FSP FAS 157-4). FASB Statement 157, Fair Value Measurements, defines fair value as the price that would be received to sell the asset or transfer the liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. FSP FAS 157-4 provides additional guidance on determining when the volume and level of activity for the asset or liability has significantly decreased. The FSP also includes guidance on identifying circumstances when a transaction may not be considered orderly.

FSP FAS 157-4 provides a list of factors that a reporting entity should evaluate to determine whether there has been a significant decrease in the volume and level of activity for the asset or liability in relation to normal market activity for the asset or liability. When the reporting entity concludes there has been a significant decrease in the volume and level of activity for the asset or liability, further analysis of the information from that market is needed and significant adjustments to the related prices may be necessary to estimate fair value in accordance with Statement 157.

This FSP clarifies that when there has been a significant decrease in the volume and level of activity for the asset or liability, some transactions may not be orderly. In those situations, the entity must evaluate the weight of the evidence to determine whether the transaction is orderly. The FSP provides a list of circumstances that may indicate that a transaction is not orderly. A transaction price that is not associated with an orderly transaction is given little, if any, weight when estimating fair value.

Index

This FSP is effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. An entity early adopting FSP FAS 157-4 must also early adopt FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments. The Company is currently reviewing the effect this new pronouncement will have on its consolidated financial statements.

In April 2009, the FASB issued FSP No. FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments (FSP FAS 115-2 and FAS 124-2). FSP FAS 115-2 and FAS 124-2 clarifies the interaction of the factors that should be considered when determining whether a debt security is other-than-temporarily impaired. For debt securities, management must assess whether (a) it has the intent to sell the security and (b) it is more likely than not that it will be required to sell the security prior to its anticipated recovery. These steps are done before assessing whether the entity will recover the cost basis of the investment. Previously, this assessment required management to assert it has both the intent and the ability to hold a security for a period of time sufficient to allow for an anticipated recovery in fair value to avoid recognizing an other-than-temporary impairment. This change does not affect the need to forecast recovery of the value of the security through either cash flows or market price.

In instances when a determination is made that an other-than-temporary impairment exists but the investor does not intend to sell the debt security and it is not more likely than not that it will be required to sell the debt security prior to its anticipated recovery, FSP FAS 115-2 and FAS 124-2 changes the presentation and amount of the other-than-temporary impairment recognized in the income statement. The other-than-temporary impairment is separated into (a) the amount of the total other-than-temporary impairment related to a decrease in cash flows expected to be collected from the debt security (the credit loss) and (b) the amount of the total other-than-temporary impairment related to all other factors. The amount of the total other-than-temporary impairment related to the credit loss is recognized in earnings. The amount of the total other-than-temporary impairment related to all other factors is recognized in other comprehensive income.

This FSP is effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. An entity early adopting FSP FAS 115-2 and FAS 124-2 must also early adopt FSP FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly. The Company is currently reviewing the effect this new pronouncement will have on its consolidated financial statements.

In April 2009, the FASB issued FSP No. FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments (FSP FAS 107-1 and APB 28-1). FSP FAS 107-1 and APB 28-1 amends FASB Statement No. 107, Disclosures about Fair Value of Financial Instruments, to require disclosures about fair value of financial instruments for interim reporting periods of publicly traded companies as well as in annual financial statements. This FSP also amends APB Opinion No. 28, Interim Financial Reporting, to require those disclosures in summarized financial information at interim reporting periods.

This FSP is effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. An entity early adopting FSP FAS 107-1 and APB 28-1 must also early adopt FSP FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly and FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments. The Company is currently reviewing the effect this new pronouncement will have on its consolidated financial statements.

In December 2008, the Financial Accounting Standards Board (FASB) issued FASB Staff Position (FSP) FAS 132(R)-1, "Employers' Disclosures about Postretirement Benefit Plan Assets". This FSP amends Statement of Financial Accounting Standards (SFAS) 132(R), "Employers' Disclosures about Pensions and Other Postretirement

Benefits”, to provide guidance on an employer’s disclosures about plan assets of a defined benefit pension or other postretirement plan. The disclosures about plan assets required by this FSP shall be provided for fiscal years ending after December 15, 2009. The Company is currently reviewing the effect this new pronouncement will have on its consolidated financial statements.

Index

Note 2 – Rate Matters

In accordance with the tariff established for Southern Shores, an annual rate increase of 3% was implemented on January 1, 2009. The increase cannot exceed the lesser of the regional Consumer Price Index or 3%. The contracted rate schedule is set to expire on December 31, 2009. The Company is in the process of renegotiating the rate schedule.

Effective January 1, 2009, Tidewater received approval from the Delaware Public Service Commission (PSC) to increase their Distribution System Improvement Charge (DSIC) from 2.94% to 5.25%.

On January 12, 2009, Middlesex filed an application with the New Jersey Board of Public Utilities (BPU) seeking permission to establish a Purchased Water Adjustment Clause (PWAC) and implement a tariff rate sufficient to recover increased costs of \$1.0 million to purchase untreated water from the New Jersey Water Supply Authority and treated water from a non-affiliated regulated water utility. We cannot predict whether the BPU will ultimately approve, deny, or reduce the amount of the request.

On January 26, 2009 Tidewater filed an application with the PSC seeking permission to increase its base rates by 32.54%. Approximately 5.25% of the requested increase is already collected from customers through the DSIC. The request was made necessary by increased costs of operations, maintenance and taxes, as well as capital investment of approximately \$26.7 million since Tidewater's last rate filing in April of 2006. We cannot predict whether the PSC will ultimately approve, deny, or reduce the amount of the request. Concurrent with the rate filing, Tidewater also submitted a request for a 12.79% interim rate increase subject to refund as allowed under PSC regulations. The interim rate increase includes the 5.25% DSIC rate. The interim rates of 12.79% were approved by the PSC and went into effect on March 27, 2009 and the DSIC rate was set to zero simultaneously.

Note 3 – Capitalization

Common Stock –During the three months ended March 31, 2009, there were 20,481 common shares (approximately \$0.3 million) issued under the Company's Dividend Reinvestment and Common Stock Purchase Plan (DRP).

Long-term Debt – On March 19, 2009, Tidewater closed on a \$22.0 million PSC approved loan and immediately used \$7.0 million of the available funds to retire short-term debt. Terms for the new long-term debt include an interest rate of 6.59%, final maturity in April 2029 and equal principal payments over the life of the loan. Tidewater can borrow the remaining \$15.0 million in whole or in increments at its discretion until December 31, 2009, at an interest rate based on market conditions and with a maximum term of twenty years.

On February 29, 2009 Middlesex filed an application with the BPU seeking approval to issue up to \$4.0 million of first mortgage bonds through the New Jersey Environmental Infrastructure Trust under the New Jersey State Revolving Fund (SRF) program. The BPU approved the Company's application. The Company expects to complete the transaction in November 2009. Proceeds from this financing will be used for the ongoing main cleaning and lining project in 2010.

Note 4 – Earnings Per Share

Basic earnings per share (EPS) are computed on the basis of the weighted average number of shares outstanding during the period presented. Diluted EPS assumes the conversion of both the Convertible Preferred Stock \$7.00 Series and the Convertible Preferred Stock \$8.00 Series.

Index

	(In Thousands Except per Share Amounts)

## Note 5 – Business Segment Data

The Company has identified two reportable segments. One is the regulated business of collecting, treating and distributing water on a retail and wholesale basis to residential, commercial, industrial and fire protection customers in parts of New Jersey and Delaware. This segment also includes regulated wastewater systems in New Jersey and Delaware. The Company is subject to regulations as to its rates, services and other matters by the States of New Jersey and Delaware with respect to utility services within these States. The other segment is primarily comprised of non-regulated contract services for the operation and maintenance of municipal and private water and wastewater systems in New Jersey and Delaware. Inter-segment transactions relating to operational costs are treated as pass-through expenses. Finance charges on inter-segment loan activities are based on interest rates that are below what would normally be charged by a third party lender.

Note 6 – Short-term Borrowings

As of March 31, 2009, the Company has established lines of credit aggregating \$53.0 million. At March 31, 2009, the outstanding borrowings under these credit lines were \$37.0 million at a weighted average interest rate of 1.67%.

The weighted average daily amounts of borrowings outstanding under the Company's credit lines and the weighted average interest rates on those amounts were \$36.2 million and \$7.5 at 1.98% and 4.65% for the three months ended March 31, 2009 and 2008, respectively.

Interest rates for short-term borrowings under the lines of credit are below the prime rate with no requirement for compensating balances.

Note 7 – Commitments and Contingent Liabilities

Guarantees - USA-PA operates the City of Perth Amboy, New Jersey (Perth Amboy) water and wastewater systems under contract through June 30, 2018. The agreement was effected under New Jersey's Water Supply Public/Private Contracting Act and the New Jersey Wastewater Public/Private Contracting Act. Under the agreement, USA-PA receives a fixed fee and in addition, a variable fee based on increased system billing. Scheduled fixed fee payments for 2009 are \$8.2 million. The fixed fees will increase over the term of the contract to \$10.2 million per year.

In connection with the agreement, Perth Amboy, through the Middlesex County Improvement Authority, issued approximately \$68.0 million in three series of bonds. Middlesex guaranteed one of those series of bonds, designated the Series C Serial Bonds, in the principal amount of approximately \$26.3 million. Perth Amboy guaranteed the two other series of bonds. The Series C Serial Bonds have various maturity dates with the final maturity date on September 1, 2015. As of March 31, 2009, approximately \$21.4 million of the Series C Serial Bonds remained outstanding.

Middlesex is obligated to perform under the guarantee in the event notice is received from the Series C Serial Bonds trustee of an impending debt service deficiency. If Middlesex funds any debt service obligations as guarantor, Perth Amboy is required to reimburse the Company. There are other provisions in the agreement that make it unlikely that we would be required to perform under the guarantee, such as scheduled annual rate increases for water and wastewater services as well as rate increases that may be implemented at anytime by Perth Amboy. In the event revenues from customers could not satisfy the reimbursement requirements, Perth Amboy has Ad Valorem taxing powers, which could be used to raise the needed amount.

Water Supply - Middlesex has an agreement with the New Jersey Water Supply Authority (NJWSA) for the purchase of untreated water through November 30, 2023, which provides for an average purchase of 27 million gallons per day (mgd). Pricing is set annually by the NJWSA through a public rate making process. The agreement has provisions for additional pricing in the event Middlesex overdrafts or exceeds certain monthly and annual thresholds.

Middlesex also has an agreement with a non-affiliated regulated water utility for the purchase of treated water. This agreement, which expires February 27, 2011, provides for the minimum purchase of 3 mgd of treated water with provisions for additional purchases.

Index

Purchased water costs are shown below:

	(In Thousands)	
	Three Months Ended	
	March 31,	
	2009	2008
Purchased Water		
Treated	\$ 541	\$ 522
Untreated	598	605
Total Costs	\$ 1,139	\$ 1,127

Construction – The Company expects to spend approximately \$28.8 million on its construction program in 2009.

Litigation – The Company is a defendant in lawsuits in the normal course of business. We believe the resolution of pending claims and legal proceedings will not have a material adverse effect on the Company's consolidated financial statements.

Change in Control Agreements – The Company has Change in Control Agreements with its Officers that provide compensation and benefits in the event of termination of employment in connection with a change in control of the Company.

#### Note 8 – Employee Retirement Benefit Plans

Pension – The Company has a noncontributory defined benefit pension plan, which covers all employees with more than 1,000 hours of service in a year. Employees hired after March 31, 2007 are not eligible to participate in this plan, but do participate in a defined contribution plan that provides an annual contribution at the discretion of the Company based upon a percentage of the participants' compensation. In order to be eligible for an annual contribution, the eligible employee must be employed by the Company on December 31st of the year to which the award pertains. During the first quarter the Company contributed \$0.5 million of cash to the plan. The Company expects to make additional cash contributions of approximately \$3.1 million to the defined benefit pension plan over the remainder of the current year. The Company also maintains an unfunded supplemental retirement benefit plan for certain active and retired company officers and currently pays \$0.3 million in annual benefits to the retired participants.

Postretirement Benefits Other Than Pensions – The Company maintains a postretirement benefit plan other than pensions for substantially all of its retired employees. Employees hired after March 31, 2007 are not eligible to participate in this plan. Coverage includes healthcare and life insurance. Retiree contributions are dependent on credited years of service. During the first quarter the Company contributed \$0.3 million of cash to the plan. The Company expects to make additional cash contributions of approximately \$1.7 million to the plan over the remainder of the current year.

Index

The following table sets forth information relating to the Company's periodic costs for its retirement plans.

	(In Thousands)			
	Pension Benefits		Other Benefits	
	Three Months Ended March 31,

Amortization of Transition Obligation	-	-	34	34
Net Periodic Benefit Cost	\$ 623	\$ 342	\$ 503	\$ 427

#### Note 9 – Stock Based Compensation

The Company maintains an escrow account for 58,775 shares of the Company's common stock which were awarded under the 1997 Restricted Stock Plan, which has expired and 21,807 shares of the Company's common stock which were awarded under the 2008 Restricted Stock Plan. Such stock is subject to an agreement requiring forfeiture by the employee in the event of termination of employment within five years of the award other than as a result of retirement, death, disability or change in control. Shareholders approved the 2008 Restricted Stock Plan at the Company's 2008 annual meeting of shareholders. The maximum number of shares authorized for grant under the 2008 Restricted Stock Plan is 300,000.

The Company recognizes compensation expense at fair value for its restricted stock awards in accordance with SFAS 123(R), "Shared Based Payment". Compensation expense is determined by the market value of the stock on the date of the award and is being amortized over a five-year period. Compensation expense for the three months ended March 31, 2009 and 2008 was \$0.1 million. Total unearned compensation related to restricted stock was \$0.8 million at March 31, 2009 and 2008.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with the unaudited condensed consolidated financial statements of the Company included elsewhere herein and with the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2008.

Forward-Looking Statements

Certain statements contained in this periodic report and in the documents incorporated by reference constitute "forward-looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934 and Section 27A of the Securities Act of 1933. The Company intends that these statements be covered by the safe harbors created under those laws. These statements include, but are not limited to:

- statements as to expected financial condition, performance, prospects and earnings of the Company;
- statements regarding strategic plans for growth;
- statements regarding the amount and timing of rate increases and other regulatory matters;
- statements regarding expectations and events concerning capital expenditures;
- statements as to the Company's expected liquidity needs during fiscal 2008 and beyond and statements as to the sources and availability of funds to meet its liquidity needs;
- statements as to expected rates, consumption volumes, service fees, revenues, margins, expenses and operating results;
- statements as to the Company's compliance with environmental laws and regulations and estimations of the materiality of any related costs;
- statements as to the safety and reliability of the Company's equipment, facilities and operations;
- statements as to financial projections;
- statements as to the ability of the Company to pay dividends;
- statements as to the Company's plans to renew municipal franchises and consents in the territories it serves;
- expectations as to the amount of cash contributions to fund the Company's retirement benefit plans, including statements as to anticipated discount rates and rates of return on plan assets;
- statements as to trends; and
- statements regarding the availability and quality of our water supply.

These forward-looking statements are subject to risks, uncertainties and other factors that could cause actual results to differ materially from future results expressed or implied by the forward-looking statements. Important factors that could cause actual results to differ materially from anticipated results and outcomes include, but are not limited to:

- the effects of general economic conditions;
- increases in competition in the markets served by the Company;
- the ability of the Company to control operating expenses and to achieve efficiencies in its operations;
- the availability of adequate supplies of water;
- actions taken by government regulators, including decisions on base rate increase requests;
- new or additional water quality standards;
- weather variations and other natural phenomena;
- the existence of attractive acquisition candidates and the risks involved in pursuing those acquisitions;
- acts of war or terrorism;

- significant changes in the housing starts in Delaware;
- the availability and cost of capital resources; and
- other factors discussed elsewhere in this quarterly report.

## Index

Many of these factors are beyond the Company's ability to control or predict. Given these uncertainties, readers are cautioned not to place undue reliance on any forward-looking statements, which only speak to the Company's understanding as of the date of this report. The Company does not undertake any obligation to release publicly any revisions to these forward-looking statements to reflect events or circumstances after the date of this report or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws.

For an additional discussion of factors that may affect the Company's business and results of operations, see Item 1A. - Risk Factors in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2008.

## Overview

The Company has operated as a water utility in New Jersey since 1897, and in Delaware, through our wholly-owned subsidiary, Tidewater, since 1992. We are in the business of collecting, treating, distributing and selling water for residential, irrigation, commercial, municipal, industrial and fire protection purposes. We also operate a New Jersey municipal water and wastewater system under contract and provide wastewater services in New Jersey and Delaware through our subsidiaries. Our utility companies are regulated as to rates charged to customers for water and wastewater services in New Jersey and Delaware, as to the quality of service provided and as to certain other matters. Our USA, USA-PA and White Marsh subsidiaries are not regulated utilities.

Our New Jersey water utility system (the Middlesex System) provides water services to approximately 59,700 retail, commercial and fire service customers, primarily in central New Jersey. The Middlesex System also provides water service under contract to municipalities in central New Jersey with a total population of approximately 303,000. Through our subsidiary, USA-PA, we operate the water supply system and wastewater collection system for the City of Perth Amboy, New Jersey. Pinelands Water and Pinelands Wastewater provide water and wastewater services to residents in Southampton Township, New Jersey.

Tidewater and Southern Shores provide water services to approximately 32,700 retail customers in New Castle, Kent, and Sussex Counties, Delaware. Our TESI subsidiary provides regulated wastewater service to approximately 1,800 residential retail customers. White Marsh serves approximately 7,100 customers under unregulated operating contracts with various owners of small water and wastewater systems in Kent and Sussex Counties.

USA provides customers both inside and outside of our service territories a service line maintenance program called LineCareSM. We offer a similar program for wastewater customers called LineCare+SM.

The majority of our revenue is generated from regulated water services to customers in our franchise areas. We record water service revenue as such service is rendered and include estimates for amounts unbilled at the end of the period for services provided since the end of the last billing cycle. Fixed service charges are billed in advance by our subsidiary, Tidewater, and are recognized in revenue as the service is provided.

Our ability to increase operating income and net income is based significantly on four factors: weather, adequate and timely rate relief, effective cost management, and customer growth. These factors are evident in the discussions below which compare our results of operations with prior periods.

## Index

### Recent Developments

#### Rate Increases

In accordance with the tariff established for Southern Shores, an annual rate increase of 3% was implemented on January 1, 2009. The increase cannot exceed the lesser of the regional Consumer Price Index or 3%. The contracted rate schedule is set to expire on December 31, 2009. The Company is in the process of renegotiating the rate schedule.

Effective January 1, 2009, Tidewater received approval from the Delaware Public Service Commission (PSC) to increase their Distribution System Improvement Charge (DSIC) from 2.94% to 5.25%.

On January 12, 2009, Middlesex filed an application with the New Jersey Board of Public Utilities (BPU) seeking permission to establish a Purchased Water Adjustment Clause (PWAC) and implement a tariff rate sufficient to recover increased costs of \$1.0 million to purchase untreated water from the New Jersey Water Supply Authority and treated water from a non-affiliated regulated water utility. We cannot predict whether the BPU will ultimately approve, deny, or reduce the amount of the request.

On January 26, 2009 Tidewater filed an application with the PSC seeking permission to increase its base rates by 32.54%. Approximately 5.25% of the requested increase is already collected from customers through the DSIC. The request was made necessary by increased costs of operations, maintenance and taxes, as well as capital investment of approximately \$26.7 million since our last rate filing in April of 2006. We cannot predict whether the PSC will ultimately approve, deny, or reduce the amount of the request. Concurrent with the rate filing, Tidewater also submitted a request for a 12.79% interim rate increase subject to refund as allowed under PSC regulations. The interim rate increase includes the 5.25% DSIC rate. The interim rates of 12.79% were approved by the PSC and went into effect on March 27, 2009 and the DSIC rate was set to zero simultaneously.

Middlesex is currently evaluating the timing and level of a base rate increase petition with the BPU. As more fully described in the Operating Results by Segment section, there have been declining revenues from commercial and industrial (C&I) customers and higher costs for retirement benefit plans and other operating costs. There can be no assurance that the ultimate rate increase requested will be approved in whole or in part, by the BPU. It is unlikely that any base rate filing by Middlesex would be decided upon in 2009.

### Operating Results by Segment

The Company has two operating segments, Regulated and Non-Regulated. Our Regulated segment contributed 87% of total revenues and 80% of net income for the three months ended March 31, 2009. This segment contributed 88% of total revenues and 85% of net income over the same three month period ended March 31, 2008. The discussion of the Company's results of operations is on a consolidated basis, and includes significant factors by subsidiary. The segments in the tables included below consist of the following companies: Regulated-Middlesex, Tidewater, Pinelands, Southern Shores, and TESI; Non-Regulated- USA, USA-PA, and White Marsh.

Index

## Results of Operations – Three Months Ended March 31, 2009

(In Thousands)						
Three Months Ended March 31,						
	2009 Regulated	2009 Non- Regulated	Total	2008 Regulated	2008 Non- Regulated	Total
Revenues	\$ 17,976	\$ 2,607	\$ 20,583	\$ 18,422	\$ 2,433	\$ 20,855
Operations and maintenance expenses	10,937	2,106	13,043	10,208	1,890	12,098
Depreciation expense	2,049	37	2,086	1,902	29	1,931
Other taxes	2,391	61	2,452	2,421	58	2,479
Operating income	2,599	403	3,002	3,891	456	4,347
Other income, net	311	98	409	176	122	298
Interest expense	1,335	57	1,392	1,446	71	1,517
Income taxes	489	169	658	920	204	1,124
Net income	\$ 1,086	\$ 275	\$ 1,361	\$ 1,701	\$ 303	\$ 2,004

Operating revenues for the three months ended March 31, 2009 decreased \$0.3 million, or 1.3%, from the same period in 2008. Revenues in our Middlesex system decreased \$0.6 million as a result of lower water consumption across all customer classes. We experienced a 6.5% decline in water use by our general retail metered customers, which includes C&I customers. Several of the larger industrial customer's consumption demands have dropped due to reduced output from their production processes. We have also seen a decline in consumption from our commercial customers, which are generally office facilities, guest facilities and multi-family residential facilities certain of our C&I customers are unable to determine when their water demands may return to previous levels or if the declines will continue. Revenues improved \$0.1 million in our Tidewater system due to a combination of customer growth, higher consumption and higher rates. Revenues from our Perth Amboy operations contract rose \$0.2 million due to scheduled fee increases.

Operation and maintenance expenses for the three months ended March 31, 2009 increased \$0.9 million or 7.8%. Labor costs increased \$0.4 million due to increases in wages and resources necessary to meet the growing needs of our Delaware service territory. Expenses for our qualified employee retirement benefit plans increased by \$0.1 million compared to the first quarter of 2008. Recently completed actuarial valuations indicate that benefit plan expenses could increase by up to \$1.1 million for the remainder of 2009 as compared to the same period in 2008. The actual expense will be reduced by the amount of benefits ultimately allocated to capital projects.

Water Production costs were \$0.2 million higher due to increased sales in Delaware and higher costs for water, electric power and chemicals in New Jersey. During the quarter we increased our uncollectible account reserve to reflect the current economic conditions, which resulted in additional expense of \$0.1 million. We incurred additional inspection fees of \$0.1 million for our LineCare program in the first quarter of 2009 compared to the same period in 2008.

Depreciation expense increased by \$0.2 million, or 8.0%, primarily as a result of a higher level of utility plant. Since March 31, 2008 our utility plant in service balance has increased by \$21.0 million.

Interest expense decreased by \$0.1 million due to a substantial decline in interest rates on short-term borrowings compared to the prior year period.

Income taxes decreased \$0.5 million as a result of decreased operating income as compared to the prior year.

Net income declined by \$0.6 million from \$2.0 million to \$1.4 million. Basic and diluted earnings per share decrease to \$0.10 for the three months ended March 31, 2009 compared to \$0.15 for the same period in 2008.

Index

Liquidity and Capital Resources

Cash flows from operations are largely dependent on three factors: the impact of weather on water sales, adequate and timely rate increases, and customer growth. The effect of those factors on net income is discussed in results of operations. For the three months ended March 31, 2009 and 2008, cash flows from operating activities were \$5.7 million. Lower earnings were offset by an increase in accounts payable due to timing. The \$5.7 million of net cash flow from operations enabled us to fund approximately 91% of our utility plant expenditures internally for the period, with the remainder funded by drawing upon our available lines of credit.

The capital spending program for 2009 is currently estimated to be \$28.8 million. Through March 31, 2009, we have expended \$6.2 million. For the remainder of 2009 we expect to incur \$22.6 million of costs. We expect to spend an additional \$6.7 million for additions and improvements to our Delaware water systems; \$0.9 million for infrastructure additions for our Delaware wastewater systems; \$3.1 million towards implementation of a Company-wide information system upgrade; \$0.6 million for other information systems equipment and software; and \$3.5 million for the RENEW program, to complete the cleaning and cement lining of approximately nine miles of unlined water mains in the Middlesex system. There remains a total of approximately 109 miles of unlined mains in the 730-mile Middlesex system. The capital program also includes an additional \$7.8 million to be incurred over the remainder of 2009 for scheduled upgrades to our existing systems in New Jersey. The remaining spending for scheduled upgrades include \$1.5 million for improvements to existing plant, \$4.5 million for mains, \$0.7 million for service lines, \$0.5 million for meters, \$0.2 million for hydrants and \$0.4 million for other infrastructure needs.

To fund our capital program in 2009, we have utilized internally generated funds, and funds available under existing New Jersey SRF program loans (currently, \$3.5 million) and Delaware SRF program loans (currently, \$1.9 million). These programs provide low cost financing for projects that meet certain water quality and system improvement benchmarks. If needed, we will also borrow funds through \$53.0 million of available lines of credit with several financial institutions. As of March 31, 2009, \$37.0 million was outstanding against the lines of credit.

We periodically issue shares of common stock in connection with our dividend reinvestment and stock purchase plan (DRP). From time to time, we may issue additional equity to reduce short-term indebtedness, fund our capital program, and for other general corporate purposes.

We currently project that we may be required to expend between \$56.3 million and \$73.6 million for capital projects in 2010 and 2011 combined. The exact amount is dependent on customer growth, residential housing sales and project scheduling.

To the extent possible and because of favorable interest rates available to regulated water utilities, we expect to finance our capital expenditures under the SRF loan programs. We also expect to use internally generated funds and proceeds from the sale of common stock through the Dividend Reinvestment and Common Stock Purchase Plan. In addition to the effect of weather conditions on revenues, increases in certain operating costs will impact our liquidity and capital resources. Changes in operating costs and timing of capital projects will have an impact on revenues, earnings, and cash flows and will also impact the timing of filings for future rate increases.

We received rate relief for our Pinelands Companies in December 2008 and for Tidewater and Southern Shores on January 1, 2009. In addition, we implemented an interim rate increase on March 27, 2009 for Tidewater in connection with their base rate increase request. We are seeking recovery of increased purchased water costs for Middlesex and are also evaluating the need to seek approval to increase base rates for Middlesex customers.

Index

Recent Accounting Pronouncements – See Note 1 of the Notes to Unaudited Condensed Consolidated Financial Statements for a discussion of recent accounting pronouncements.

Item 3. Quantitative and Qualitative Disclosures of Market Risk

The Company is subject to the risk of fluctuating interest rates in the normal course of business. Our capital program is partially financed with fixed rate, long-term debt and, to a lesser extent, short-term debt. The Company's interest rate risk related to existing fixed rate, long-term debt is not material due to the term of the majority of our Amortizing Secured Notes and First Mortgage Bonds, which have final maturity dates ranging from 2018 to 2038. Over the next twelve months, approximately \$3.3 million of the current portion of twenty-four existing long-term debt instruments will mature. Applying a hypothetical change in the rate of interest of 10% on those borrowings would not have a material effect on earnings.

Item 4. Controls and Procedures

As required by Rule 13a-15 under the Exchange Act, an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures was conducted by the Company's Chief Executive Officer along with the Company's Chief Financial Officer. Based upon that evaluation, the Company's Chief Executive Officer and the Company's Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective as of the end of the period covered by this Report. There were no changes in our internal control over financial reporting that occurred during our most recent fiscal quarter that have materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in Company reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in Company reports filed under the Exchange Act is accumulated and communicated to management, including the Company's Chief Executive Officer and Chief Financial Officer as appropriate, to allow timely decisions regarding disclosure.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Reference is made to the Company's Annual Report on Form 10-K for the year ended December 31, 2008. Note 7 to the unaudited Condensed Consolidated Financial Statements for the period ended March 31, 2009, included in Part 1 of this Quarterly Report on Form 10-Q, is hereby incorporated by reference.

Item Risk Factors

1A.

We expect our revenues to increase from customer growth in Delaware for our regulated water operations and, to a lesser degree, our regulated wastewater operations as a result of the anticipated construction and sale of new housing units in the territories we serve. Although the residential building market in Delaware has experienced growth in recent years, this growth may not continue in the future. If housing starts in the Delaware territories we serve decline significantly as a result of economic conditions or otherwise, our revenue growth may not meet our expectations and our financial results could be negatively impacted.

Except as described above, information about risk factors for the three months ended March 31, 2009 does not differ materially from those set forth in Part I, Item 1A. of the Company's Annual Report on Form 10-K for the year ended December 31, 2008.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Submission of Matters to a Vote of Security Holders

None.

Item 5. Other Information

None.
