INFORMATION CONTAINED IN THIS FORM 6-K REPORT

Attached as Exhibit 1 is a press release of Nordic American Tanker Shipping Limited, dated November 7, 2008, announcing its financial results for the third quarter of 2008.

Nordic American Tanker Shipping Ltd. (NYSE:NAT) – Announces Dividend and Earnings in respect of the 3rd Quarter of 2008

Hamilton, Bermuda, November 7th, 2008

Nordic American Tanker Shipping Ltd. (“NAT” or “the Company”) today announced its results for the 3rd quarter of 2008. Based on its results for the quarter, the Company will pay a dividend of \$1.61 per share on or about December 2nd to shareholders of record as of November 21st. Following this dividend payment, the Company will have paid a dividend for 45 consecutive quarters since the autumn of 1997 when the first three vessels in the Company’s fleet were delivered and commenced operations.

The spot Suezmax tanker market has been strong during the third quarter and up to the time of this writing.

The present instability in the international financial markets is challenging for the shipping industry. NAT has a very strong position in this environment with no debt on its balance sheet. Furthermore, the Company has an unused, revolving credit line of \$500 million with a term up to September 2013, giving flexibility and financial strength going forward.

It is our policy to continue our simple, transparent and predictable operating model

The Company does not engage in any type of derivatives.

Highlights:

- The Board of Directors has declared a dividend of \$1.61 per share in respect of the 3rd quarter of 2008. For the last four quarters, including the dividend to be paid for 3Q08, a total of \$4.89 has been declared in dividend, which represents 14.2% of the average daily share price over the same period.
- Net income for 3Q08 was \$1.24 per share based on number of shares outstanding during the quarter of 34,373,271.
- In 3Q08 total offhire was 50 days of which 33 days were directly related to two scheduled drydockings. These drydockings were accomplished on time and on budget. There are no further planned drydockings for any of the Company’s vessels until 2010.
- Notwithstanding the volatility in the financial and commodities markets, the positive Suezmax tanker spot market has to date continued into the fourth quarter. The Company does not predict future spot rates.

Financial Information:

Net income for 3Q08 was \$42.7m, or \$1.24 per share (EPS). This compares to net income of \$35.5m or \$1.10 per share for 2Q08. In 3Q07, net income was -\$1.2m, or -\$0.04 per share. In 3Q08 the Company had an alternative cost equal to \$0.10 per share due to loss of income related to the offhire.

The Company's operating cash flow¹ was \$56.4m for 3Q08, compared to \$52.2m for 2Q08 and \$13.8m for 3Q07.

The Board has declared a dividend of \$1.61 per share in respect of 3Q08. A dividend of \$1.60 per share was declared in respect of 2Q08 and \$0.40 per share in respect of 3Q07. The amount of the dividend per share is above all a direct reflection of the level of the spot tanker market during the relevant quarter and shares outstanding. For 3Q08 the number of shares outstanding was fixed at 34,373,271. During 2Q08 the weighted average number of shares outstanding was 32,198,452 due to the issuance of shares in the Company's follow-on offering completed in May 2008.

Following the payment of the dividend in respect of 3Q08 the Company has for the last four quarters, including the dividend to be paid for 3Q08, paid dividends in the aggregate amount of \$4.89 per share, representing a yield of 14.2% per annum based on the average daily share price over the same period. The Company has now declared a dividend for 45 consecutive quarters since the autumn of 1997 when its first three vessels were delivered.

A report published by Morgan Stanley Research November 3rd, 2008 stated that the NAT common stock had the best performance of all the listed shipping stocks internationally so far in 2008. The criterion was based on total return to shareholders and includes the price for our common shares plus dividends reinvested in our common shares. In a research report by J.P. Morgan of October 14, 2008 referring to the Company's strong financial position, it is said that "NAT is best positioned for a storm"².

We consider our general and administrative costs per day per ship to be at a low level. We also continue to have a strong focus on keeping the operating costs of our vessels low, while always focusing on safe vessel operation.

As of the end of 3Q08, NAT does not have any net debt. At the same time, the Company has not drawn on its \$500million revolving credit facility. The credit facility, maturing in September 2013, is not subject to reduction by the lenders and there is no repayment obligation during the term of the facility. The Company pays interest only on drawn amounts and a commitment fee for undrawn amounts. The undrawn credit facility gives the Company a high degree of flexibility for future expansion.

We estimate that our average cash breakeven for our trading fleet of 12 vessels is about \$9,000 per day per vessel. When the freight market is above this level, the Company can be expected to pay a dividend based on its strategy. The breakeven rate is the amount of average daily revenues for our vessels in the spot market which would cover our vessel operating expenses, voyage expenses, if any, cash general and administrative expenses, interest expense and other financial charges.

For further details on our financial results, please see later in this release.

The Fleet:

Eleven of the Company's 12 trading vessels are employed in the spot market, while one vessel remains employed on a long-term fixed rate charter.

By way of comparison, in the autumn of 2004 the Company had three vessels; at the end of 2005 the Company had eight vessels; and at the end of 2006 the Company had 12 vessels. During 3Q08, we had 12 vessels in operation. With the two newbuildings announced in November 2007, the Company is expected to have a fleet of 14 vessels operating from April 2010.

Vessel	Dwt	Employment.
Gulf Scandic	151,475	Long term fixed charter
Nordic Hawk	151,475	Spot
Nordic Hunter	151,400	Spot
Nordic Voyager	149,591	Spot
Nordic Fighter	153,328	Spot
Nordic Freedom	163,455	Spot
Nordic Discovery	153,328	Spot
Nordic Saturn	157,332	Spot
Nordic Jupiter	157,411	Spot
Nordic Cosmos	159,998	Spot
Nordic Moon	159,999	Spot
Nordic Apollo	159,999	Spot
Newbuilding	163,000	Delivery scheduled in 4Q09
Newbuilding	163,000	Delivery scheduled by end April 2010
Total	2,194,791	

Two scheduled drydockings were undertaken during 3Q08 with an aggregate offhire of 33 days. The drydockings were completed on time and on budget. There are no further planned drydockings for our vessels until 2010.

Financial Instability and the Tanker Market:

In our quarterly reports to shareholders we have often stressed the significance of the development of the world economy for the tanker industry. The present downturn can be expected to influence our industry. Production and consumption locations are, however, of particular importance to our industry. Transportation volume times distance – or ton miles – is a key measurement. With these factors in mind, the tanker spot market may not be affected as negatively as the anticipated recession in the world economy may indicate. Suezmax tanker rates are maintaining satisfactory levels to date as indicated elsewhere in this report.

It is apparent that some shipping companies are now facing challenges when it comes to the financing of their large newbuilding programs, as shipping banks are more restrictive than before in granting credit. Such an environment offers the Company the opportunity to improve its relative competitive position.

On the supply side, it is expected that the current financial upheaval may delay deliveries of newbuildings and may also lead to the cancellation of newbuilding orders. There are reports of cancellations of tanker newbuildings from the yards. We may also see that shipping companies with high debt or other financial commitments may get problems which could lead to foreclosures.

All other things being equal, the total debt of the Company spread across 14 ships is expected to be about \$9 million per ship on delivery of our second newbuilding suezmax tanker, expected to take place by the end of April 2010. This is indeed a comfortable debt level. The two newbuildings can be expected to increase the earnings and dividend capacity of the company by approximately 16%.

1 Operating cash flow is a non-GAAP financial term often used by investors to measure financial performance of shipping companies. Operating cash flow represents income from vessel operations before depreciation and non-cash

administrative charges. Please see page 6 for a reconciliation of this non-GAAP measure as used in this release to the most directly comparable GAAP financial measure.

2 The Company does not take responsibility for the material contained in these research reports and does not endorse the reports.

The average daily rate for our spot vessels was \$68,362 per day net to us during 3Q08 compared with \$64,900 for 2Q08.

The graph shows the average yearly spot rates from 2000 as reported by R.S. Platou Economic Research a.s. The rates as reported by shipbrokers may vary from the actual rates we achieve in the market.

The level of the tanker market is essentially a function of supply and demand for tanker tonnage. In addition to the supply of new vessels from the ship yards, adjusted for phasing out single hull tonnage and for other vessel deletions, the level of the tanker market in the foreseeable future is above all dependent on the development of the world economy.

Strategy going forward

The fact that according to a leading banker the Company had the best total return among internationally listed shipping companies for the first nine months of this year and at the same time very limited financial risk by having no net debt on its balance sheet, shows, in our opinion, that the unique and transparent operating model of the Company is working to the benefit of shareholders.

The financial turmoil may represent opportunities for our Company. However, we expect to pursue a conservative philosophy and are not rushing to expand.

Our policy is to grow when it is profitable and accretive to do so; that is, after an acquisition of vessels or other forms of expansion, the Company should be able to produce higher earnings per share and pay a higher dividend per share than before such an event. We believe that our full dividend payout policy, with high spot market exposure combined with a strong balance sheet should continue to enable us to achieve a competitive yield compared with other shipping companies. In the midst of the financial instability, it is our policy to continue our simple, transparent and predictable operating model.

Going forward, we believe that our Company is well positioned.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

Matters discussed in this press release may constitute forward-looking statements. The Private Securities Litigation Reform Act of 1995 provides safe harbor protections for forward-looking statements in order to encourage companies to provide prospective information about their business. Forward-looking statements include statements concerning plans, objectives, goals, strategies, future events or performance, and underlying assumptions and other statements, which are other than statements of historical facts.

The Company desires to take advantage of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 and is including this cautionary statement in connection with this safe harbor legislation. The words “believe,” “anticipate,” “intend,” “estimate,” “forecast,” “project,” “plan,” “potential,” “may,” “should,” “expect,” “pending” and similar words identify forward-looking statements.

The forward-looking statements in this press release are based upon various assumptions, many of which are based, in turn, upon further assumptions, including without limitation, our management’s examination of historical operating trends, data contained in our records and other data available from third parties. Although we believe that these assumptions were reasonable when made, because these assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond our control, we cannot assure you that we will achieve or accomplish these expectations, beliefs or projections. We undertake no obligation to update any forward-looking statement, whether as a result of new information, future events or otherwise.

Important factors that, in our view, could cause actual results to differ materially from those discussed in the forward-looking statements include the strength of world economies and currencies, general market conditions, including fluctuations in charter rates and vessel values, changes in demand in the tanker market, as a result of changes in OPEC’s petroleum production levels and world wide oil consumption and storage, changes in our operating expenses, including bunker prices, drydocking and insurance costs, the market for our vessels, availability of financing and refinancing, changes in governmental rules and regulations or actions taken by regulatory authorities, potential liability from pending or future litigation, general domestic and international political conditions, potential disruption of shipping routes due to accidents or political events, vessels breakdowns and instances of off-hire, failure on the part of a seller to complete a sale to us and other important factors described from time to time in the reports filed by the Company with the Securities and Exchange Commission, including the prospectus and related prospectus supplement, our Annual Report on Form 20-F, and our Reports on Form 6-K.
