JACK HENRY & ASSOCIATES, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(In Thousands, Except Per Share Amounts)
(Unaudited)

NOTE 1. NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES
DESCRIPTION OF THE COMPANY

Jack Henry & Associates, Inc. and Subsidiaries ("JHA" or the "Company") is a leading provider of integrated computer systems and services that has developed and acquired a number of banking and credit union software systems. The Company's revenues are predominately earned by marketing those systems to financial institutions nationwide together with computer equipment (hardware), by providing the conversion and software implementation services for financial institutions to utilize JHA software systems, and by providing other related services. JHA also provides continuing support and services to customers using in-house or outsourced systems.

CONSOLIDATION

The consolidated financial statements include the accounts of JHA and all of its subsidiaries, which are wholly-owned, and all significant intercompany accounts and transactions have been eliminated.

STOCK-BASED COMPENSATION

For the three months ended December 31, 2008 and 2007, there was \$590 and \$368, respectively, in compensation expense from equity-based awards. Pre-tax operating income for the first six months of fiscal 2009 and 2008 includes \$982 and \$479 of equity-based compensation costs, respectively.

Changes in stock options outstanding and exercisable are as follows:

Edgar Filing: HENRY JACK & ASSOCIATES INC - Form 10-Q

	Number of Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value
	<u> </u>	<u> </u>	<u> </u>
Outstanding July 1, 2008	3,977	\$ 17.42	
Granted	50	17.45	
Forfeited	-	-	
Exercised	(144)	11.75	
	<u> </u>	<u> </u>	
Outstanding December 31, 2008	3,883	\$ 17.63	\$ 12,563
Exercisable December 31, 2008	3,809	\$ 17.58	\$ 12,462

For the six months ended December 31, 2008 and 2007, the weighted average fair value of options granted was \$7.87 and \$11.83, respectively, using the Black-Scholes option pricing model. In both years, all options were granted during the second quarter.

The assumptions used in this model to estimate fair value and resulting values are as follows:

	Six Months Ended December 31,	
	<u>2008</u>	<u>2007</u>

Weighted Average Assumptions:

Expected life (years)	3.72	7.41
Volatility	30%	28%
Risk free interest rate	1.4%	4.1%
Dividend yield	1.72%	0.98%

As of December 31, 2008, there was \$350 of total unrecognized compensation cost related to outstanding options that is expected to be recognized over a weighted-average period of 0.75 years. The weighted-average remaining contractual term on options currently exercisable as of December 31, 2008 was 2.70 years.

The Restricted Stock Plan was adopted by the Company on November 1, 2005, for its employees. Up to 3,000 shares of common stock are available for issuance under the Plan. Upon issuance, shares of restricted stock are subject to forfeiture and to restrictions which limit the sale or transfer of the shares during the restriction period.

The following table summarizes non-vested share awards as of December 31, 2008, as well as activity for the six months then ended:

	Shares	Weighted Average Grant Date Fair Value
	<u> </u>	<u> </u>
Non-vested shares at July 1, 2008	130	\$ 24.87
Granted	139	19.21
Vested	(9)	25.60
Forfeited	-	-

Non-vested shares at December 31, 2008	260	\$	21.81
--	-----	----	-------

The non-vested shares will not participate in dividends during the restriction period. As a result, the weighted-average fair value of the non-vested share awards is based on the fair market value of the Company's equity shares on the grant date, less the present value of the expected future dividends to be declared during the restriction period.

At December 31, 2008, there was \$4,352 of compensation expense that has yet to be recognized related to non-vested restricted stock share awards, which will be recognized over a weighted-average period of 2.98 years.

INCOME TAXES

At December 31, 2008, the Company had \$4,383 of gross unrecognized tax benefits, \$4,068 of which, if recognized would affect our effective tax rate. Our policy is to include interest and penalties related to unrecognized tax benefits in income tax expense. As of December 31, 2008, we had accrued interest and penalties of \$775 related to uncertain tax positions.

During the fiscal year ended June 30, 2008, the Internal Revenue Service concluded its examination of the Company's U.S. federal income tax returns for fiscal years ended June 2005 through 2006. However, the U.S. federal and state income tax returns for these two years and all subsequent fiscal years still remain open to examination as of December 31, 2008 under statute of limitations rules. We anticipate potential changes of up to \$733 could reduce the unrecognized tax benefits balance within twelve months of December 31, 2008.

COMPREHENSIVE INCOME

Comprehensive income for the three and six-month periods ended December 31, 2008 and 2007 equals the Company's net income.

COMMON STOCK

The Board of Directors has authorized the Company to repurchase shares of its common stock. Under this authorization, the Company may finance its share repurchases with available cash reserves or short-term borrowings on its existing credit facility. The share repurchase program does not include specific price targets or timetables and may be suspended at any time. At June 30, 2008, there were 11,301 shares in treasury stock and the Company had the remaining authority to repurchase up to 3,690 additional shares. On August 25, 2008, the Company's Board of Directors approved an additional 5,000 share increase to the stock repurchase authorization. During the six months ended December 31, 2008, the Company repurchased 2,606 treasury shares for \$50,237. The total cost of treasury shares at December 31, 2008 is \$301,417. At December 31, 2008, there were 13,907 shares in treasury stock and the Company had the authority to repurchase up to 6,084 additional shares.

INTERIM FINANCIAL STATEMENTS

The accompanying condensed consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q of the Securities and Exchange Commission and in accordance with accounting principles generally accepted in the United States of America applicable to interim condensed consolidated financial statements, and do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete consolidated financial statements. The condensed consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements and accompanying notes, which are included in its Annual Report on Form 10-K ("Form 10-K") for the year ended June 30, 2008. The accounting policies followed by the Company are set forth in Note 1 to the Company's consolidated financial statements included in its Form 10-K for the year ended June 30, 2008.

In the opinion of management of the Company, the accompanying condensed consolidated financial statements reflect all adjustments necessary (consisting solely of normal recurring adjustments) to present fairly the financial position of the Company as of December 31, 2008, and the results of its operations for the three and six-month periods ended December 31, 2008 and 2007 and its cash flows for the six-month periods ended December 31, 2008 and 2007.

The results of operations for the three and six-month periods ended December 31, 2008 are not necessarily indicative of the results to be expected for the entire year.

NOTE 2. ADDITIONAL INTERIM FOOTNOTE INFORMATION

The following additional information is provided to update the notes to the Company's annual consolidated financial statements for the developments during the three and six months ended December 31, 2008.

ACQUISITIONS

On January 1, 2005, the Company acquired all of the membership interests in RPM Intelligence, LLC, doing business as Stratika ("Stratika"). Stratika provides customer and product profitability solutions for financial institutions. As part of the purchase agreement, contingent purchase consideration was payable to the former members based upon the attainment of certain net operating income targets. As of June 30, 2008, up to \$9,752 of the purchase consideration was still contingent. During the first quarter of fiscal 2009, the Company paid \$3,000 in full settlement of this contingency to the former members of Stratika. This amount is included in goodwill. This acquired goodwill has been allocated to the banking systems and services segment and is deductible for federal income tax purposes.

Pro Forma results of recent acquisitions are not material; therefore, they are not presented.

DEBT

The Company renewed a bank credit line on March 7, 2008 which provides for funding of up to \$8,000 and bears interest at the Federal Reserve Board's prime rate (3.25%

at December 31, 2008). The credit line expires March 7, 2009 and is secured by \$1,000 of investments. At December 31, 2008, no amount was outstanding.

The Company obtained a bank credit line on April 28, 2008 which provides for funding of up to \$5,000 and bears interest at the bank's prime rate less 1% (2.25% at December 31, 2008). The credit line matures on April 29, 2010. At December 31, 2008, the outstanding balance for this line of credit was \$551. At June 30, 2008, no amount was outstanding.

An unsecured revolving bank credit facility allows short-term borrowings of up to \$150,000 which may be increased by the Company at any time until maturity to \$225,000. The unsecured revolving bank credit facility bears interest at a rate equal to (a) LIBOR or (b) an alternate base rate (the greater of (a) the Federal Funds Rate plus 0.5% or (b) the Prime Rate), plus an applicable percentage in each case determined by the Company's leverage ratio. The unsecured revolving credit line terminates May 31, 2012. At June 30, 2008, the revolving bank credit facility balance was \$70,000. At December 31, 2008, the revolving bank credit facility balance was \$60,000. This outstanding balance bears interest at a weighted-average rate of 3.33%. This credit line is subject to various financial covenants that require the Company to maintain certain financial ratios as defined in the agreement. As of December 31, 2008, the Company was in compliance with all such covenants.

The company has entered into various capital lease obligations for the use of certain computer equipment. Included in property and equipment are related assets of \$7,093, less accumulated depreciation of \$608. At December 31, 2008, \$6,283 was outstanding, of which \$3,177 was included in current maturities.

During the six months ended December 31, 2008, the Company incurred interest totaling \$1,000, of which \$49 was capitalized.

COMMITMENTS AND CONTINGENCIES

For fiscal 2009, the Board of Directors approved bonus plans for its executive officers and general managers for the current fiscal year. Under the plan, bonuses may be paid following the end of the current fiscal year based upon achievement of operating income targets and upon attainment of a superior return on average assets in comparison with a group of peer companies selected by the Compensation Committee. For general managers, one half of each manager's bonus is contingent upon meeting individualized business unit objectives established by the executive officer to whom the general manager reports.

The Company has also entered into agreements that provide its executive officers with compensation totaling two years' base salary and target bonus in the event the Company terminates the executive without cause within the period from 90 days before to two years after a change in control of the Company. The Company has also entered into agreements that provide its general managers with compensation totaling one year of base salary and target bonus under circumstances identical to those contained in the executive officer agreements.

NOTE 3. RECENT ACCOUNTING PRONOUNCEMENTS

In September 2006, the Financial Accounting Standards Board ("FASB") issued Statement on Financial Accounting Standards ("SFAS") No. 157, "*Fair Value Measurements*" ("SFAS 157"). SFAS 157 defines fair value, establishes a framework for measuring fair value in GAAP and requires enhanced disclosures about fair value measurements. SFAS 157 does not require any new fair value measurements. Relative to SFAS 157, the FASB issued Staff Positions ("FSP") 157-1, 157-2 and 157-3. FSP 157-1 amends SFAS 157 to exclude SFAS No. 13, "*Accounting for Leases*" ("SFAS 13"), and its related interpretive accounting pronouncements that address leasing transactions. FSP 157-2 delays the effective date of the application of SFAS 157 to fiscal years beginning after November 15, 2008 for all nonfinancial assets and nonfinancial liabilities that are recognized or disclosed at fair value in the financial statements on a nonrecurring basis. FSP 157-3 clarifies the application of SFAS 157 in a market that is not active and provides an example to illustrate key considerations in determining the fair value of a financial asset when the market for that financial asset is not active. SFAS 157 was effective for the Company beginning on July 1, 2008. Its adoption did not have a material impact on the Company's financial statements.

In December 2007, the FASB issued SFAS No. 141(R), "*Business Combinations*," ("SFAS 141(R)") which replaces SFAS No. 141. SFAS 141(R) establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, any non-controlling interest in the acquired entity and the goodwill acquired. The Statement also establishes disclosure requirements which will enable users of the financial statements to evaluate the nature and financial effects of the business combination. SFAS 141(R) is effective for the Company on July 1, 2009. SFAS 141(R) will have an impact on the Company's accounting for business combinations on a prospective basis once adopted; however, the materiality of that impact cannot be determined at this time.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

RESULTS OF OPERATIONS

Background and Overview

We provide integrated computer systems for in-house and outsourced data processing to commercial banks, credit unions and other financial institutions. We have developed and acquired banking and credit union application software systems that we market, together with compatible computer hardware, to these financial institutions. We also perform data conversion and software implementation services of our systems and provide continuing customer support services after the systems are implemented. For our customers who prefer not to make an up-front capital investment in software and hardware, we provide our full range of products and services on an outsourced basis through our eight data centers in six physical locations and 16 item-processing centers located throughout the United States.

The US financial crisis is a primary concern at this time as it threatens our customers and our industry. The profits of many financial institutions have decreased and this may result in some reduction of demand for new products and services. We remain cautiously optimistic, however, with increasing portions of our business coming from recurring revenue, increases in backlog and encouraging sales pipeline in specific areas. Our customers will continue to face

regulatory and operational challenges which our products and services address, and in these times have an even greater need for some of our solutions that directly address institutional profitability and efficiency. We face these uncertain times with a strong balance sheet and an unwavering commitment to superior customer service, and we believe that we are well positioned to address current opportunities as well as those which will arise when the economic rebound occurs

A detailed discussion of the major components of the results of operations for the three and six-month periods ended December 31, 2008 follows. All amounts are in thousands and discussions compare the current three and six-month periods ended December 31, 2008, to the prior year three and six-month periods ended December 31, 2007.

License revenue represents the delivery of application software systems contracted with us by the customer. We license our proprietary software products under standard license agreements that typically provide the customer with a non-exclusive, non-transferable right to use the software on a single computer and for a single financial institution location.

As a result of the current economic downturn, we have seen some of our customers postpone making large capital investments in technology, including software. In addition, our customers are often electing to contract for our products via an outsourced delivery rather than a traditional license arrangement. Our outsourced delivery does not require our customers to make a large, up-front capital investment in license fees or in hardware. There was a decrease in license revenue during the current quarter and year-to-date compared to the prior year for most of our software products, particularly within our complementary software solutions. Among our core product offerings, license revenue from Episys®, our flagship core solution for credit unions decreased due to a decrease in the average size of contracts delivered during the current fiscal year. Within our suite of complementary product offerings, most products had decreases in license revenue for both the quarter and year-to-date, particularly ArgoKeys®, a fully integrated CRM platform solution and Enterprise Exception Management Suite, a risk management solution.

Support and service fees are generated from implementation services (including conversion, installation, configuration and training), annual support to assist the customer in operating their systems and to enhance and update the software, outsourced data processing services and EFT Support services.

There was growth in most support and service revenue components for the second quarter and the first half of fiscal 2008. In-house support and other services increased partially as a result of new license agreements for which implementation was completed during the period since the second quarter of fiscal 2008. In addition, because annual maintenance fees are usually based on supported institutions' asset size, in-house support revenues increase as our customers' assets grow. EFT support, including ATM and debit card transaction processing, online bill payment services, remote deposit capture and Check 21 transaction processing services, experienced the largest percentage growth due to increased customer activity and expansion of our customer base. Overall, Outsourcing services revenue remained fairly flat. However, our core data processing revenue increased over 12% year to date compared to last year as our customers continue to choose outsourcing for the delivery of our solutions. These gains have been offset by a decrease in deconversion fee revenue and in item-processing revenue. We expect the trend towards outsourced product delivery to continue to benefit Outsourcing services revenue; however, we further expect item-processing revenue to decline as fewer paper checks are processed in favor of check images and remote deposit capture. The decrease in implementation services revenue is related to fewer convert/merge implementations for our bank customers due to the slowdown in bank merger and acquisition activity in the current market environment. In addition, the decreases in license revenue for recent quarters are also negatively impacting revenues from implementations.

Hardware Revenue

The Company has entered into remarketing agreements with several hardware manufacturers under which we sell computer hardware, hardware maintenance and related services to our customers. Revenue related to hardware sales is recognized when the hardware is shipped to our customers.

Hardware revenue decreased mainly due to a decrease in the number of hardware systems and components delivered in the current quarter compared to a year ago. This revenue line has been negatively impacted by the decrease in delivery of large license contracts. Additionally, during the prior fiscal year, hardware revenue was increased by IBM System i upgrades.

BACKLOG

Our backlog increased 16% at December 31, 2008 to \$277,900 (\$61,400 in-house and \$216,500 outsourcing) from \$240,200 (\$61,600 in-house and \$178,600 outsourcing) at December 31, 2007. The current quarter backlog increased 4% from September 30, 2008, where backlog was \$266,200 (\$65,100 in-house and \$201,100 outsourcing). These backlog figures underscore the current shift in our customer's preference towards our outsourced delivery solutions.

COST OF SALES AND GROSS PROFIT

Edgar Filing: HENRY JACK & ASSOCIATES INC - Form 10-Q

Cost of license represents the cost of software from third party vendors through remarketing agreements. These costs are recognized when license revenue is recognized. Cost of support and service represents costs associated with conversion and implementation efforts, ongoing support for our in-house customers, operation of our data and item processing centers providing services for our outsourced customers, EFT processing services and direct operating costs. These costs are recognized as they are incurred. Cost of hardware consists of the direct and related costs of purchasing the equipment from the manufacturers and delivery to our customers. These costs are recognized at the same time as the related hardware revenue is recognized. Ongoing operating costs to provide support to our customers are recognized as they are incurred.

Gross Profit Margin

Cost of license increased for the current quarter and the first half of fiscal 2009 due to greater third party reseller agreement software vendor costs. Cost of support and service increased for the quarter and year to date in fiscal 2009 commensurate with the increase in support and service revenue. Cost of hardware decreased due to a decrease in

hardware delivered during the current year.

Gross margin on license revenue decreased to 86% for the current quarter and 89% for the first half of the fiscal year compared to 92% for last year's quarter and 93% last year-to-date due to an increase in third party software sales, where the gross margins on third party software are lower than on our owned products. We expect third party reseller agreement software to continue to be a higher percentage of our total license revenue in the future. The gross profit increase for the second quarter and year to date in support and service is due to consistent revenue growth. Gross margin for support and service was 38% for the current quarter and 37% for the six-month period, which was down slightly from the prior year. This decrease was primarily due to a significant decrease in one-time early termination fees in our EFT and OutLink offerings, which were mostly offset by cost controls and changes in our holiday bonus compared to prior year. Hardware gross margin decreased from 31% in the second quarter last year to 30% in the second quarter of the current year due to the mix of hardware equipment delivered during the quarter, but remained at 28% for both the first half of fiscal 2009 and for the first six months of last year.

Dedicated sales forces, inside sales teams, technical sales support teams and channel partners conduct our sales efforts for our two market segments, and are overseen by regional sales managers. Our sales executives are responsible for pursuing lead generation activities for new core customers. Our account executives nurture long-term relationships with our client base and cross sell our many complementary products and services.

For the three and six months ended December 31, 2008, selling and marketing expenses remained flat in comparison to the prior year as small increases to most personnel costs were offset by lower commission expense.

Research and Development

	Three Months Ended December 31,		% Change	Six Months Ended December 31,		% Change
	<u>2008</u>	<u>2007</u>		<u>2008</u>	<u>2007</u>

We devote significant effort and expense to develop new software, service products and continually upgrade and enhance our existing offerings. Typically, we upgrade all of our core and complementary software applications once per year. We believe our research and development efforts are highly efficient because of the extensive experience of our research and development staff and because our product development is highly customer-driven.

Research and development expenses decreased for the quarter primarily due to cost control measures undertaken by the Company. These measures included a significant reduction in the use of consultants and independent contractors compared to the same period a year ago, also the Company has been managing headcount closely, leading to a net 2%

Edgar Filing: HENRY JACK & ASSOCIATES INC - Form 10-Q

decrease in research and development headcount compared to last year. Research and development expenses increased for the first half of fiscal 2009 by 2%; however they remained at 6% of total revenue for both fiscal years to date.

General and Administrative

	Three Months Ended December 31,		%	Six Months Ended December 31,		%
	<u>2008</u>	<u>2007</u>	Change	<u>2008</u>	<u>2007</u>	Change

Percentage of total revenue	6%	7%		6%	6%	

General and administrative costs include all expenses related to finance, legal, human resources, employee benefits, plus all administrative costs. General and administrative expenses decreased for the second quarter and for the first half of fiscal 2009, primarily due to cost control measures that have slowed the growth in personnel costs and reduced travel and other operating expenses, including bonus pay, contract labor and aircraft fuel expenses, compared to the same periods last year. General and administrative expenses have remained fairly level as a percentage of revenue (6-7%) for the quarter and year-to-date compared to the same periods a year ago.

INTEREST INCOME (EXPENSE)

- Net interest expense for the three months ended December 31, 2008 totaled \$378, compared to the prior year when the Company had net interest income of \$235. Interest income decreased \$193, while interest expense increased \$420. Net interest expense for the current six month period totaled \$242, which represents a decrease from the prior year of \$1,743, when there was net interest income of \$1,501 during the first six months. Interest income decreased \$979 during this year's six month period to \$709, from \$1,688 in the prior year. Interest expense increased \$764 to \$951, compared to \$187 for the first half of fiscal 2008. For both periods, the changes in interest income are due to fluctuating cash and cash equivalent balances while the increased interest expense is primarily due to an increase in the average outstanding balances on the Company's lines of credit.

PROVISION FOR INCOME TAXES

- The provision for income taxes was \$13,249 and \$26,468 for the three and six-month periods ended December 31, 2008 compared with \$17,101 and \$30,759 for the same periods last year. For the current quarter, the rate of income taxes was 32.1% of income before income taxes compared to 36.8% as reported for the same period in fiscal 2008. The decrease in the effective tax rate is primarily attributable to the renewal of the Research and Experimentation Credit retroactive to January 1, 2008. Passage of this legislation had a significant tax benefit (approximately \$2,000) in the second quarter of fiscal 2009 since research credits generated from January 1, 2008 through December 31, 2008 were recognized.

INCOME FROM CONTINUING OPERATIONS

- Income from continuing operations decreased 5% for the three months ended December 31, 2008. Income from continuing operations for the second quarter of fiscal 2009 was \$27,985 or \$0.33 per diluted share compared to \$29,430 or \$0.32 per diluted share in the same period last year. Income from continuing operations also decreased for the six-month period ended December 31, 2008 to \$50,494 or \$0.59 per diluted share compared to \$53,193, also \$0.59 per diluted share, for the same six month period last year.

DISCONTINUED OPERATIONS -

There was no gain or loss from discontinued operations for the quarter or six month period ended December 31, 2008. For the quarter ended December 31, 2007, loss on discontinued operations, net of income tax, was \$279. The income tax benefit on the loss amount was \$161. For the six month period ended December 31, 2007, loss on discontinued operations, net of income tax, was \$503. The income tax benefit on the loss amount was \$289.

BUSINESS SEGMENT DISCUSSION

Edgar Filing: HENRY JACK & ASSOCIATES INC - Form 10-Q

The Company is a leading provider of integrated computer systems that perform data processing (available for in-house or outsourced installations) for banks and credit unions. The Company's operations are classified into two business segments: bank systems and services ("Bank") and credit union systems and services ("Credit Union"). The Company evaluates the performance of its segments and allocates resources to them based on various factors, including prospects for growth, return on investment, and return on revenue.

Bank Systems and Services

	Three Months Ended December 31,		Percent Change	Six Months Ended December 31,		Percent Change
	<u>2008</u>	<u>2007</u>		<u>2008</u>	<u>2007</u>	
Revenue	\$ 156,019	\$ 159,674	-2%	\$ 305,940	\$ 303,719	+1%
Gross Profit	\$ 62,729	\$ 70,481	-11%	\$ 121,933	\$ 127,621	-4%
Gross Profit Margin	40%	44%		40%	42%	

The decrease in revenue for the bank systems and services segment is primarily due to a drop off in significant new license contracts delivered. This has negatively impacted both license and hardware revenue. The decreases in license and hardware revenue were partially offset by an increase in support and service revenue. Contributing to this increase was revenue for in-house maintenance which experienced 8% growth for the quarter and 10% growth year to date. In addition, EFT support has increased 14% or \$3,919 for the current quarter and 13% or \$7,119 year-to-date compared to last year. Bank segment gross profit and margins decreased from last year due to a decrease in license revenue and an increase in 3rd party costs related to license and support and service revenue.

Credit Union Systems and Services

	Three Months Ended December 31,		Percent Change	Six Months Ended December 31,		Percent Change
	<u>2008</u>	<u>2007</u>		<u>2008</u>	<u>2007</u>

Gross Profit Margin	43%	45%		42%	43%	

Revenue in the credit union systems and services segment grew in all components of support and service revenue, particularly EFT Support, which experienced 45% growth year to date. This increase in support and services revenue was opposed by decreases in license and hardware revenue. License revenue was impacted by a decrease in the average dollar size of core product license agreements in comparison to the same period last year. Hardware revenue decreased due to sales mix and the amount of hardware delivered during the quarter. Credit union gross profit increased 1% for the quarter and 4% year to date, but gross margins have slipped from 45% for last year's quarter to 43% this year and from 43% for the prior year to date, to 42% this year.

FINANCIAL CONDITION

Liquidity

The Company's cash and cash equivalents decreased to \$40,602 at December 31, 2008, from \$65,565 million at June 30, 2008 and increased from \$28,136 at December 31, 2007. The decrease in the cash balance from June 30, 2008 is primarily due to the purchase of 2,606 additional shares for the treasury.

The following table summarizes net cash from operating activities in the statement of cash flows:

Edgar Filing: HENRY JACK & ASSOCIATES INC - Form 10-Q

Six months ended
December 31,

	<u>2008</u>	<u>2007</u>
Net income	\$ 50,494	\$ 52,690
Non-cash expenses	34,587	31,665
Change in receivables	91,281	82,959
Change in deferred revenue	(75,996)	(70,326)
Change in other assets and liabilities	(24,658)	(13,567)
	<hr/>	<hr/>
Net cash provided by operating activities	\$ 75,708	\$ 83,421

The decrease in cash provided by operating activities is primarily attributable to cash used to prepay various costs to be expensed in future periods and to reduce accrued liabilities, including accrued income taxes. During the six months ended December 31, 2008, \$6,528 of cash was used to increase prepaid assets while the net balance in accrued liabilities was reduced by \$20,516.

Net cash used in investing activities for the current year was \$29,960 and included acquisition-related payments of \$3,012, capital expenditures of \$14,051, and capitalized software development of \$12,910. Cash used for investing activities in the first half of fiscal 2009 was offset by \$13 net proceeds from the sale of property and equipment and from sale of investments. In the first half of fiscal 2008, net cash used in investing activities of \$79,732 consisted mainly of \$49,026 payment for acquisitions, \$21,071 in capital expenditures and \$11,651 for capitalized software development. Cash used for investing activities in the first half of fiscal 2008 was offset by \$2,016 net proceeds from sale of property and equipment, from sale of investments, and other.

Net cash used in financing activities for the current year of \$70,711 included a net repayment of the revolving bank credit facility of \$9,583, payment of dividends of \$12,688 and the purchase of treasury stock of \$50,237. Cash used was offset by proceeds of \$1,797 from the exercise of stock options, sale of common stock and the excess tax benefits from stock-based compensation. For the first half of fiscal 2008, cash used in financing activities was \$64,170 and consisted of \$11,617 for dividends paid, a net repayment of the revolving bank credit facility of \$44,920, and \$23,313 for the purchase of treasury stock. Cash used in the first half of fiscal 2008 was offset by \$15,680 proceeds from the proceeds from the exercise of stock options, sale of common stock and the excess tax benefits from stock-based compensation.

At December 31, 2008, the Company had negative working capital of \$21,331; however, the largest component of current liabilities was deferred revenue of \$136,776, which primarily relates to our annual in-house maintenance agreements. The cash outlay necessary to provide the services related to these deferred revenues is significantly less than this recorded balance. Therefore, we do not anticipate any liquidity problems arising from this condition.

US financial markets and many of the largest US financial institutions have recently been shaken by negative developments in the home mortgage industry and the mortgage markets, and particularly the markets for subprime mortgage-backed securities. While we believe it is too early to predict what effect, if any, these developments may have, we have not experienced any significant issues with our current collection efforts, and we believe that any future impact to our liquidity would be minimized by our access to available lines of credit.

Capital Requirements and Resources

The Company generally uses existing resources and funds generated from operations to meet its capital requirements. Capital expenditures totaling \$14,051 and \$21,071 for the six-month periods ended December 31, 2008 and 2007, respectively, were made for facilities and additional equipment. These additions were primarily funded from cash

generated by operations. Total consolidated capital expenditures for the Company are not expected to exceed \$50,000 for fiscal year 2009.

The Company renewed a bank credit line on March 7, 2008 which provides for funding of up to \$8,000 and bears interest at the Federal Reserve Board's prime rate (3.25%

at December 31, 2008). The credit line expires March 7, 2009 and is secured by \$1,000 of investments. At December 31, 2008, no amount was outstanding.

The Company obtained a bank credit line on April 28, 2008 which provides for funding of up to \$5,000 and bears interest at the bank's prime rate less 1% (2.25% at December 31, 2008). The credit line matures on April 29, 2010. At December 31, 2008, the outstanding balance for this line of credit was \$551. At June 30, 2008, no amount was outstanding.

An unsecured revolving bank credit facility allows short-term borrowings of up to \$150,000 which may be increased by the Company at any time until maturity to \$225,000. The unsecured revolving bank credit facility bears interest at a rate equal to (a) LIBOR or (b) an alternate base rate (the greater of (a) the Federal Funds Rate plus 0.5% or (b) the Prime Rate), plus an applicable percentage in each case determined by the Company's leverage ratio. The unsecured revolving credit line terminates May 31, 2012. At June 30, 2008, the revolving bank credit facility balance was \$70,000. At December 31, 2008, the revolving bank credit facility balance was \$60,000. This outstanding balance bears interest at a weighted-average rate of 3.33%. This credit line is subject to various financial covenants that require the Company to maintain certain financial ratios as defined in the agreement. As of December 31, 2008, the Company was in compliance with all such covenants.

The company has entered into various capital lease obligations for the use of certain computer equipment. Included in property and equipment are related assets of \$7,093, less accumulated depreciation of \$608. At December 31, 2008, \$6,283 was outstanding, of which \$3,177 was included in current maturities.

The Board of Directors has authorized the Company to repurchase shares of its common stock. Under this authorization, the Company may finance its share repurchases with available cash reserves or short-term borrowings on its existing credit facility. The share repurchase program does not include specific price targets or timetables and may be suspended at any time. At June 30, 2008, there were 11,301 shares in treasury stock and the Company had the remaining authority to repurchase up to 3,690 additional shares. On August 25, 2008, the Company's Board of Directors approved an additional 5,000 share increase to the stock repurchase authorization. During the six months ended December 31, 2008, the Company repurchased 2,606 treasury shares for \$50,237. The total cost of treasury shares at December 31, 2008 is \$301,417. At December 31, 2008, there were 13,907 shares in treasury stock and the Company had the authority to repurchase up to 6,084 additional shares.

Critical Accounting Policies

The Company regularly reviews its selection and application of significant accounting policies and related financial disclosures. The application of these accounting policies requires that management make estimates and judgments. The estimates that affect the application of our most critical accounting policies and require our most significant judgments are outlined in Management's Discussion and Analysis of Financial Condition and Results of Operations - "Critical Accounting Policies" - contained in our annual report on Form 10-K for the year ended June 30, 2008.

Forward Looking Statements

The Management's Discussion and Analysis of Results of Operations and Financial Condition and other portions of this report contain forward-looking statements within the meaning of federal securities laws. Actual results are subject to risks and uncertainties, including both those specific to the Company and those specific to the industry, which could

cause results to differ materially from those contemplated. The risks and uncertainties include, but are not limited to, the matters detailed at Risk Factors in its Annual Report on Form 10-K for the fiscal year ended June 30, 2008. Undue reliance should not be placed on the forward-looking statements. The Company does not undertake any obligation to publicly update any forward-looking statements.

CONCLUSION

Even in this current challenging market, the Company's results of operations and its financial position continue to be solid. While revenue and gross profit have remained flat or decreased slightly compared to a year ago, we continue to be cautiously optimistic as we see the increases in our recurring revenue and the increases in our backlog of contracts for products and services yet to be delivered. Our overall results reflect a tough economic environment, but also the continuing attitude of cooperation and commitment by each employee, management's ongoing cost control efforts and our commitment to continue delivering top quality products and superior services to all of our customers in the markets we serve. We believe that we are well positioned to address current challenges and opportunities as well as those which will arise when the economic rebound occurs.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market risk refers to the risk that a change in the level of one or more market prices, interest rates, indices, volatilities, correlations or other market factors such as liquidity, will result in losses for a certain financial instrument or group of financial instruments. We are currently exposed to credit risk on credit extended to customers and interest risk on investments in U.S. government securities. We actively monitor these risks through a variety of controlled procedures involving senior management. We do not currently use any derivative financial instruments. Based on the controls in place, credit worthiness of the customer base and the relative size of these financial instruments, we believe the risk associated with these exposures will not have a material adverse effect on our consolidated financial position or results of operations.

ITEM 4. CONTROLS AND PROCEDURES

As of the end of the period covered by this Quarterly Report on Form 10Q, an evaluation was carried out under the supervision and with the participation of our management, including our Company's Chief Executive Officer (CEO) and Chief Financial Officer (CFO), of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Exchange Act Rules 13a-15 and 15d-15. Based upon that evaluation, the CEO and CFO concluded that our disclosure controls and procedures are effective to ensure that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms. For this purpose, disclosure controls and procedures include controls and procedures designed to ensure that information that is required to be disclosed under the Exchange Act is accumulated and communicated to the Company's management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.
