First Quarter Trading Statement 2003

Basel, Switzerland, April 29, 2003

Sales in the first quarter of 2003 increased by 8% to \$2 billion (2002: \$1.84 billion), reflecting a positive impact from the further weakening of the dollar. At constant exchange rates sales were 1% lower.

In Crop Protection, sales at constant exchange rates were 2% lower. Regional performance for Europe, Africa and the Middle East was affected by competition in fungicides in France, while performance in Germany was stable. In NAFTA, sales advanced in both Canada and the USA, with notable progress across all product lines except non-selective herbicides. In Latin America there was a marked recovery in Brazil and ongoing growth in Argentina. Asian sales were impacted by a decline in South Korea.

Growth in new products contributed \$116 million to sales, driven by CALLISTO[®], which tripled, reflecting the success of new combinations and underpinning performance in the US selective herbicide market. In insecticides, ACTARA[®] and CRUISER[®] also registered strong progress. Range rationalization resulted in a negative sales impact of \$20 million.

Seeds sales rose by 3% at constant exchange rates. Corn sales in the USA benefited from early spring shipments. Vegetables continued their strong growth in Europe and Flowers performed well in both NAFTA and Europe due to distribution chain improvements and new products.

For the full year sales are expected to benefit from ongoing recovery in Brazil and Argentina, as well as growth in new products. Cash flow generation will remain strong with improved business performance delivering increased EBITDA and significant earnings per share growth, notwithstanding the constraining effects of currency movements on the EBITDA margin.

Syngenta is a world-leading agribusiness committed to sustainable agriculture through innovative research and technology. The company is a leader in crop protection and ranks third in the high-value commercial seeds market. Sales in 2002 were approximately US \$6.2 billion.
