Prospectus Supplement dated  
September 28, 2012 and Product  
Supplement EQUITY INDICES  
SUN-1  
dated March 5, 2014)

Units	Pricing Date*	May , 2015
\$10 principal amount per unit	Settlement Date*	June , 2015
Term Sheet No. SUN-56	Maturity Date*	May , 2017
CUSIP No.	*Subject to change based on the actual date the notes are priced for initial sale to the public (the "pricing date")	

Autocallable Market-Linked Step Up Notes Linked to the S&P Oil & Gas Exploration & Production Select Industry Index®

- § Maturity of approximately two years if not called prior to maturity
- § Automatic call of the notes per unit at \$10 plus the Call Premium of [\$1.20 to \$1.40] if the Index is flat or increases above 100% of the Starting Value on the Observation Date
- § The Observation Date will occur approximately one year after the pricing date
- § If the notes are not called, at maturity:
  - § a return of 30% if the Index is flat or increases up to the Step Up Value
  - § a return equal to the percentage increase in the Index if the Index increases above the Step Up Value
- § 1-to-1 downside exposure to decreases in the Index, with up to 100% of your principal at risk
- § All payments are subject to the credit risk of Deutsche Bank AG
- § No periodic interest payments
- § Limited secondary market liquidity, with no exchange listing

The notes are being issued by Deutsche Bank AG ("Deutsche Bank") through its London Branch. There are important

differences between the notes and a conventional debt security, including different investment risks and certain additional costs. See “Risk Factors” and “Additional Risk Factors” beginning on page TS-8 of this term sheet and “Risk Factors” beginning on page PS-7 of product supplement EQUITY INDICES SUN-1.

The initial estimated value of the notes as of the pricing date is expected to be between \$9.17 and \$9.37 per unit, which is less than the public offering price listed below. See “Summary” on the following page, “Risk Factors” beginning on page TS-8 of this term sheet and “Structuring the Notes” on page TS-14 of this term sheet for additional information. The actual value of your notes at any time will reflect many factors and cannot be predicted with accuracy. By acquiring the notes, you will be deemed to agree to be bound by any Resolution Measure imposed by our competent resolution authority. See “Consent to Potential Imposition of Resolution Measures” on page TS-4 of this term sheet.

---

None of the Securities and Exchange Commission (the “SEC”), any state securities commission, or any other regulatory body has approved or disapproved of these securities or determined if this Note Prospectus (as defined below) is truthful or complete. Any representation to the contrary is a criminal offense.

---

	Per Unit	Total
Public offering price(1)(2)	\$10.00	\$
Underwriting discount(1)(2)	\$ 0.20	\$
Proceeds, before expenses, to Deutsche Bank	\$ 9.80	\$

(1)For any purchase of 500,000 units or more in a single transaction by an individual investor, the public offering price and the underwriting discount will be \$9.95 per unit and \$0.15 per unit, respectively.

(2)For any purchase by certain fee-based trusts and discretionary accounts managed by U.S. Trust operating through Bank of America, N.A., the public offering price and underwriting discount will be \$9.80 per unit and \$0.00 per unit, respectively.

Autocallable Market-Linked Step Up Notes

Linked to the S&P Oil & Gas Exploration & Production Select Industry Index®, due May , 2017

Summary

The Autocallable Market-Linked Step Up Notes Linked to the S&P Oil & Gas Exploration & Production Select Industry Index®, due May , 2017 (the “notes”) are our senior unsecured obligations. The notes are not guaranteed or insured by the Federal Deposit Insurance Corporation or secured by collateral. The notes will rank equally with all of our other unsecured and unsubordinated debts except for debts required to be preferred by law. Any payments due on the notes, including any repayment of principal, will be subject to the credit risk of Deutsche Bank and to any Resolution Measure (as described herein) imposed by our competent resolution authority. The notes will be automatically called at the applicable Call Amount if the Observation Level of the Market Measure, which is the S&P Oil & Gas Exploration & Production Select Industry Index® (the “Index”), is equal to or greater than the Call Level on the Observation Date. If not called, at maturity, the notes provide you with a Step Up Payment if the Ending Value of the Index is equal to or greater than its Starting Value, but is not greater than the Step Up Value. If the Ending Value is greater than the Step Up Value, you will participate on a 1-for-1 basis in the increase in the level of the Index above the Starting Value. If the Ending Value is less than the Starting Value, you will lose all or a portion of the principal amount of your notes. Payments on the notes, including the amount you receive at maturity or upon an automatic call, will be calculated based on the \$10 principal amount per unit and will depend on the performance of the Index, subject to our credit risk. See “Terms of the Notes” below.

On the cover page of this term sheet, we have provided the initial estimated value range for the notes. Our initial estimated value of the notes was determined based on our valuation of two theoretical components of the notes: (i) a theoretical bond component and (ii) a theoretical derivative component. The value of the bond component of the notes is calculated based on an internal funding rate, which is determined primarily based on the rates at which our conventional debt securities of comparable maturity may trade, adjusted to account for our funding needs and objectives for the period matching the term of the notes. The value of the derivative component is calculated based on our internal pricing models using relevant parameter inputs.

The economic terms of the notes (including the Call Premium and Call Amount) are based on the internal funding rate and the economic terms of certain related hedging arrangements. The internal funding rate is typically lower than the rate we would pay when we issue conventional debt securities on equivalent terms. This difference in funding rate, as well as the underwriting discount and the estimated cost of hedging our obligations under the notes (which includes the hedging related charge described below) will reduce the economic terms of the notes to you and the initial estimated value of the notes on the pricing date. Due to these factors, the public offering price you pay to purchase the notes will be greater than the initial estimated value of the notes. The initial estimated value of the notes calculated on the pricing date will be set forth in the final term sheet made available to investors in the notes. For more information about the initial estimated value and the structuring of the notes, see “Structuring the Notes” on page TS-14.

Terms of the Notes

Issuer:	Deutsche Bank AG, London Branch	Call Settlement Date:	Approximately the fifth business day following the Observation Date, subject to postponement if the Observation Date is postponed, as described on page PS-20 of product supplement EQUITY INDICES SUN-1.
Principal Amount:	\$10.00 per unit	Call Premium:	

Term:	Approximately two years, if not called	Ending Value:	[\$1.20 to \$1.40] per unit if called on the Observation Date (which represents a return of [12.00% to 14.00%] over the principal amount). The actual Call Premium will be determined on the pricing date. The closing level of the Market Measure on the scheduled calculation day. The calculation day is subject to postponement in the event of Market Disruption Events, as described beginning on page PS-21 of product supplement EQUITY INDICES SUN-1.
Market Measure:	The S&P Oil & Gas Exploration & Production Select Industry Index® (Bloomberg symbol: “SPSIOP”), a price return index.	Step Up Value:	130% of the Starting Value.
Starting Value:	The closing level of the Market Measure on the pricing date.	Step Up Payment:	\$3.00 per unit, which represents a return of 30% over the principal amount.
Observation Level:	The closing level of the Market Measure on the Observation Date.	Threshold Value:	100% of the Starting Value.
Observation Date:	May , 2016, subject to postponement in the event of Market Disruption Events, as described on page PS-20 of product supplement EQUITY INDICES SUN-1.	Calculation Day:	Approximately the fifth scheduled Market Measure Business Day immediately preceding the maturity date.
Call Level:	100% of the Starting Value	Fees and Charges:	The underwriting discount of \$0.20 per unit listed on the cover page and the hedging related charge of \$0.075 per unit described in “Structuring the Notes” on page TS-14.
Call Amount (per Unit):	[\$11.20 to \$11.40] if called on the Observation Date. The actual Call Amount will be determined on the pricing date.	Calculation Agent:	Merrill Lynch, Pierce, Fenner & Smith Incorporated (“MLPF&S”) and Deutsche Bank, acting jointly.

§ Prospectus addendum dated December 24, 2014:  
[http://www.sec.gov/Archives/edgar/data/1159508/000095010314009034/crt\\_52088.pdf](http://www.sec.gov/Archives/edgar/data/1159508/000095010314009034/crt_52088.pdf)

These documents (together, the “Note Prospectus”) have been filed as part of a registration statement with the SEC, which may, without cost, be accessed on the SEC website as indicated above or obtained from MLPF&S by calling 1-800-294-1322. Before you invest, you should read the Note Prospectus, including this term sheet, for information about us and this offering. Any prior or contemporaneous oral statements and any other written materials you may have received are superseded by the Note Prospectus. Capitalized terms used but not defined in this term sheet have the meanings set forth in product supplement EQUITY INDICES SUN-1. Unless otherwise indicated or unless the context requires otherwise, all references in this document to “we,” “us,” “our,” or similar references are to Deutsche Bank. The trustee has appointed Deutsche Bank Trust Company Americas as its authenticating agent with respect to our Series A global notes.

#### Consent to Potential Imposition of Resolution Measures

Under the German Recovery and Resolution Act, which went into effect on January 1, 2015, the notes may be subject to any Resolution Measure by our competent resolution authority under relevant German and/or European law if we become, or are deemed by our competent supervisory authority to have become, “non-viable” (as defined under the then applicable law) and are unable to continue our regulated banking activities without a Resolution Measure becoming applicable to us. A “Resolution Measure” may include: (i) a write down, including to zero, of any payment (or delivery obligations) on the notes; (ii) a conversion of the notes into ordinary shares or other instruments qualifying as core equity tier 1 capital; and/or (iii) any other resolution measure, including (but not limited to) any transfer of the notes to another entity, the amendment of the terms and conditions of the notes or the cancellation of the notes. By acquiring the notes, you will be deemed to agree:

- to be bound by any Resolution Measure,
- that you would have no claim or other right against us, the trustee and the paying agent arising out of any Resolution Measure, and
- that the imposition of any Resolution Measure will not constitute a default or an event of default under the notes, under the senior indenture or for the purpose of the Trust Indenture Act of 1939, as set forth in the accompanying prospectus addendum dated December 24, 2014.

Please read “Risk Factors” in this term sheet and see the accompanying prospectus addendum for further information.

Investor Considerations

You may wish to consider an investment in the notes if:

§ You are willing to receive a return on your investment capped at the return represented by the Call Premium if the Observation Level is equal to or greater than the Call Level.

§ You anticipate that the notes will be automatically called or the Index will increase from the Starting Value to the Ending Value.

§ You are willing to risk a loss of principal and return if the notes are not automatically called and the Index decreases from the Starting Value to the Ending Value.

§ You are willing to forgo the interest payments that are paid on conventional interest bearing debt securities.

§ You are willing to forgo dividends or other benefits of owning the stocks included in the Index.

§ You are willing to accept a limited market for sales prior to maturity, and understand that the market prices for the notes, if any, will be affected by various factors, including our actual and perceived creditworthiness, the internal funding rate and fees and charges on the notes.

§ You are willing to assume our credit risk, as issuer of the notes, for all payments under the notes, including the Redemption Amount.

§ You are willing to consent to be bound by any Resolution Measure imposed by our competent resolution authority.

The notes may not be an appropriate investment for you if:

§ You want to hold your notes for the full term.

§ You believe that the notes will not be automatically called and the Index will decrease from the Starting Value to the Ending Value.

§ You seek principal repayment or preservation of capital.

§ You seek interest payments or other current income on your investment.

§ You want to receive dividends or other distributions paid on the stocks included in the Index.

§ You seek an investment for which there will be a liquid secondary market.

§ You are unwilling or are unable to take market risk on the notes or to take our credit risk as issuer of the notes.

§ You are unwilling to consent to be bound by any Resolution Measure imposed by our competent resolution authority.

We urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

## Autocallable Market-Linked Step Up Notes

Linked to the S&amp;P Oil &amp; Gas Exploration &amp; Production Select Industry Index®, due May , 2017

## Hypothetical Payout Profile and Examples of Payments at Maturity

The below graph is based on hypothetical numbers and values. These hypothetical values show a payout profile at maturity, which would only apply if the notes are not called on the Observation Date.

**Market-Linked Step Up Notes** This graph reflects the returns on the notes, based on a Threshold Value of 100% of the Starting Value, the Step Up Payment of \$3.00 per unit and a Step Up Value of 130% of the Starting Value. The green line reflects the returns on the notes, while the dotted gray line reflects the returns of a direct investment in the stocks included in the Index, excluding dividends.

This graph has been prepared for purposes of illustration only.

The following table and examples are for purposes of illustration only. They are based on hypothetical values and show hypothetical returns on the notes, assuming the notes are not called on the Observation Date. They illustrate the calculation of the Redemption Amount and total rate of return based on a hypothetical Starting Value of 100, a Threshold Value of 100, a Step Up Value of 130, the Step Up Payment of \$3.00 per unit and a range of hypothetical Ending Values. The actual amount you receive and the resulting total rate of return will depend on the actual Starting Value, Threshold Value, Ending Value, Step Up Value, whether the notes are called on the Observation Date and whether you hold the notes to maturity. The following examples do not take into account any tax consequences from investing in the notes.

For recent actual levels of the Market Measure, see “The Index” section below. The Index is a price return index and as such the Ending Value will not include any income generated by dividends paid on the stocks included in the Index, which you would otherwise be entitled to receive if you invested in those stocks directly. In addition, all payments on the notes are subject to issuer credit risk.

Ending Value	Percentage Change from the Starting Value to the Ending Value	Redemption Amount per Unit	Total Rate of Return on the Notes
0.00	-100.00%	\$0.00	-100.00%
50.00	-50.00%	\$5.00	-50.00%
60.00	-40.00%	\$6.00	-40.00%
70.00	-30.00%	\$7.00	-30.00%
80.00	-20.00%	\$8.00	-20.00%
90.00	-10.00%	\$9.00	-10.00%
95.00	-5.00%	\$9.50	-5.00%
100.00 (1)(2)	0.00%	\$13.00 (3)	30.00%
102.00	2.00%	\$13.00	30.00%
105.00	5.00%	\$13.00	30.00%
110.00	10.00%	\$13.00	30.00%
120.00	20.00%	\$13.00	30.00%

Edgar Filing: DEUTSCHE BANK AKTIENGESELLSCHAFT - Form FWP

130.00	(4)	30.00%	\$13.00	30.00%
140.00		40.00%	\$14.00	40.00%
143.00		43.00%	\$14.30	43.00%
150.00		50.00%	\$15.00	50.00%
160.00		60.00%	\$16.00	60.00%

(1) The hypothetical Starting Value of 100 used in these examples has been chosen for illustrative purposes only, and does not represent a likely actual Starting Value for the Market Measure.

(2) This is the hypothetical Threshold Value.

(3) This amount represents the sum of the principal amount and the Step Up Payment of \$3.00.

(4) This is the hypothetical Step Up Value.

Autocallable Market-Linked Step Up Notes

TS-6

---

Autocallable Market-Linked Step Up Notes

Linked to the S&P Oil & Gas Exploration & Production Select Industry Index®, due May , 2017

---

Redemption Amount Calculation Examples

Example 1

The Ending Value is 90.00, or 90.00% of the Starting Value:

Starting Value: 100.00

Threshold Value: 100.00

Ending Value: 90.00

Redemption Amount per unit

Example 2

The Ending Value is 110.00, or 110.00% of the Starting Value:

Starting Value: 100.00

Step Up Value: 130.00

Ending Value: 110.00

Redemption Amount per unit, the principal amount plus the Step Up Payment, since the Ending Value is equal to or greater than the Starting Value, but less than the Step Up Value.

Example 3

The Ending Value is 143.00, or 143.00% of the Starting Value:

Starting Value: 100.00

Step Up Value: 130.00

Ending Value: 143.00

Redemption Amount per unit

Autocallable Market-Linked Step Up Notes

Risk Factors

There are important differences between the notes and a conventional debt security. An investment in the notes involves significant risks, including those listed below. You should carefully review the more detailed explanation of risks relating to the notes in the “Risk Factors” sections beginning on page PS-7 of product supplement EQUITY INDICES SUN-1, page PS-3 of the prospectus supplement and page 2 of the prospectus addendum identified above. We also urge you to consult your investment, legal, tax, accounting, and other advisors before you invest in the notes.

§ If the notes are not automatically called, depending on the performance of the Index as measured shortly before the maturity date, your investment may result in a loss; there is no guaranteed return of principal.

§ Your return on the notes may be less than the yield you could earn by owning a conventional fixed or floating rate debt security of comparable maturity.

§ Payments on the notes are subject to our credit risk, and actual or perceived changes in our creditworthiness are expected to affect the value of the notes. If we become insolvent or are unable to pay our obligations, you may lose your entire investment.

§ The notes may be written down to zero, be converted into equity or other instruments or become subject to other Resolution Measures. You may lose some or all of your investment if any such measure becomes applicable to us. The imposition of any Resolution Measure does not constitute a default or an event of default under the notes, the senior indenture or for the purpose of the Trust Indenture Act of 1939 or give you any other right to accelerate or terminate the notes. You may have limited or circumscribed rights to challenge any decision of our competent resolution authority to impose any Resolution Measure. Please see “Consent to Potential Imposition of Resolution Measures” in this term sheet and the “Risk Factors” on page 2 of the accompanying prospectus addendum for more information.

§ If the notes are called, your investment return is limited to the return represented by the Call Premium.

§ Your investment return may be less than a comparable investment directly in the stocks included in the Index.

§ The initial estimated value of the notes is an estimate only, determined as of a particular point in time by reference to an internal funding rate and our pricing models. The internal funding rate is typically lower than the rate we would pay when we issue conventional debt securities of comparable maturity. As a result of this difference, the initial estimated value of the notes would likely be lower if it were based on the rate we would pay when we issue conventional debt securities of comparable maturity. This difference in funding rate, as well as the underwriting discount and the estimated cost of hedging our obligations under the notes (which includes the hedging related charge described below), reduces the economic terms of the notes to you.

§ Our internal pricing models consider relevant parameter inputs such as expected interest rates and mid-market levels of price and volatility of the assets underlying the notes or any futures, options or swaps related to such underlying assets. Our pricing models are proprietary and rely in part on certain forecasts about future events, which may prove to be incorrect. Because our pricing models may differ from other financial institutions’ valuation models, and because funding rates taken into account by other financial institutions (including those with similar creditworthiness) may vary materially from the internal funding rate used by us, our initial estimated value of the notes may not be comparable to the initial estimated values of similar notes of other financial institutions.

§ The public offering price you pay for the notes will exceed the initial estimated value. The difference is due to the inclusion in the public offering price of the underwriting discount and the estimated cost of hedging our obligations under the notes (which includes the hedging related charge described below), all as further described in “Structuring the Notes” on page TS-14. These factors are expected to reduce the price at which you may be able to sell the notes in any secondary market and, together with various credit, market and economic factors over the term of the notes, including changes in the level of the Index, will affect the value of the notes in complex and unpredictable ways.

§ The initial estimated value of the notes on the pricing date does not represent the price at which we, MLPF&S, or any of our respective affiliates would be willing to purchase your notes in the secondary market at any time. Assuming no changes in market conditions or our creditworthiness and other relevant factors, the price, if any, at which we, MLPF&S, or any of our respective affiliates would be willing to purchase the notes from you in secondary market transactions, if at all, would generally be lower than both the public offering price and the initial estimated value of the notes on the pricing date. MLPF&S has advised us that any repurchases by them or their affiliates will be made at prices determined by reference to their pricing models and at their discretion. These prices will include MLPF&S’s trading commissions and mark-ups and may differ materially from the initial estimated value of the notes determined by reference to our internal funding rate and pricing models.

§ A trading market is not expected to develop for the notes. None of us, MLPF&S, or any of our respective affiliates is obligated to make a market for, or to repurchase, the notes. There is no assurance that any party will be willing to purchase your notes at any price in any secondary market.

§ Our business, hedging and trading activities, and those of MLPF&S and our respective affiliates (including trading in securities of companies included in the Index), and any hedging and trading activities we, MLPF&S or our respective affiliates engage in for our clients’ accounts, may affect the market value and return of the notes and may create conflicts of interest with you. Our economic interests in determining the initial estimated value of the notes on the pricing date and the price, if any, at which we

Autocallable Market-Linked Step Up Notes

Linked to the S&P Oil & Gas Exploration & Production Select Industry Index®, due May , 2017

---

or our affiliates would be willing to purchase the notes from you in secondary market transactions, are potentially adverse to your interests as an investor in the notes.

§ The Index sponsor may adjust the Index in a way that affects its level, and has no obligation to consider your interests.

§ You will have no rights of a holder of the securities represented by the Index, and you will not be entitled to receive securities or dividends or other distributions by the issuers of those securities.

§ While we, MLPF&S or our respective affiliates may from time to time own securities of companies included in the Index, we, MLPF&S and our respective affiliates do not control any company included in the Index, and are not responsible for any disclosure made by any company.

§ There may be potential conflicts of interest involving the calculation agent. We have the right to appoint and remove the calculation agent.

§ The U.S. federal income tax consequences of an investment in the notes are uncertain, and may be adverse to you. See “Summary Tax Consequences” below and “U.S. Federal Income Tax Consequences” beginning on page PS-28 of product supplement EQUITY INDICES SUN-1.

#### Additional Risk Factors

The stocks included in the Index are concentrated in one sector.

All of the stocks included in the Index are issued by companies in the oil and gas exploration and production sector. As a result, the stocks that will determine the performance of the notes are concentrated in one sector, which may cause the value of the notes to be subject to greater volatility and be more adversely affected by any economic, political or regulatory occurrence affecting this sector than a different investment linked to a more broadly diversified group of stocks or stocks in a less volatile sector. Although an investment in the notes will not give holders any ownership or other direct interests in the stocks underlying the Index, the return on an investment in the notes will be subject to certain risks associated with a direct equity investment in companies in this sector, including those discussed below. Accordingly, by investing in the notes, you will not benefit from the diversification which could result from an investment linked to companies that operate in multiple sectors.

The stocks of companies in the oil and gas sector are subject to swift price fluctuations.

The issuers of the stocks included in the Index develop and produce, among other things, crude oil and natural gas, and provide, among other things, drilling services and other services related to oil and gas production and distribution. Stock prices for these types of companies are affected by supply and demand both for their specific product or service and for oil and gas products in general. The price of oil and gas, exploration and production spending, government regulation, world events and economic conditions will likewise affect the performance of these companies. Correspondingly, the stocks of companies in this sector are subject to swift price fluctuations caused by events relating to international politics, energy conservation, the success of exploration projects and tax and other governmental regulatory policies. Weak demand for the companies’ products or services or for oil and gas products and services in general, as well as negative developments in these other areas, would adversely impact the value of the

stocks included in the Index and, therefore, the level of the Index and the value of the notes.

---

### The Index

All disclosures contained in this term sheet regarding the Index, including, without limitation, its make-up, method of calculation, and changes in its components, have been derived from publicly available sources. The information reflects the policies of, and is subject to change by, S&P Dow Jones Indices LLC (the “Index sponsor”). The Index sponsor, which licenses the copyright and all other rights to the Index, has no obligation to continue to publish, and may discontinue publication of, the Index. The consequences of the Index sponsor discontinuing publication of the Index are discussed in the section entitled “Description of the Notes—Discontinuance of an Index” beginning on page PS-22 of product supplement EQUITY INDICES SUN-1. None of us, the calculation agent, or MLPF&S accepts any responsibility for the calculation, maintenance or publication of the Index or any successor index.

### The Index

The Index is an equally-weighted index that is designed to measure the performance of the oil and gas exploration and production sub-industry portion of the S&P Total Market Index (“S&P TMI”), an index that measures the performance of the U.S. equity market. The S&P TMI includes all U.S. common equities listed on the NYSE (including NYSE Arca), the NYSE MKT, the NASDAQ Global Select Market, and the NASDAQ Capital Market. Each of the component stocks in the Index is a constituent company within the oil and gas sub-industry portion of the S&P TMI.

To be eligible for inclusion in the Index, companies must be in the S&P TMI and must be included in the relevant Global Industry Classification Standard (GICS) sub-industry. The GICS was developed to establish a global standard for categorizing companies into sectors and industries. In addition, companies must satisfy one of the two following combined size and liquidity criteria:

1. float-adjusted market capitalization above \$500 million and float-adjusted liquidity ratio above 90%; or
2. float-adjusted market capitalization above \$400 million and float-adjusted liquidity ratio above 150%.

A number of companies in the S&P TMI are represented by multiple share class lines. To determine eligibility for the Index, the float-adjusted market capitalization of each share class line of multiple class companies is combined to arrive at a company float-adjusted market capitalization figure. The liquidity of each individual share class line is evaluated independently based on the float-adjusted market capitalization of that individual line. If an individual share class line of a multiple share class company does not meet the liquidity criteria, the remaining share class line has its float-adjusted market capitalization reevaluated independently to ensure that it continues to meet the size criteria on its own.

All U.S. companies satisfying these requirements are included in the Index. The total number of companies in the Index should be at least 35. If there are fewer than 35 companies, companies from a supplementary list of highly correlated sub-industries that meet the market capitalization and liquidity thresholds above are included in order of their float-adjusted market capitalization to reach 35 constituents. Minimum market capitalization requirements may be relaxed to ensure there are at least 22 companies in the Index as of each rebalancing effective date.

### Eligibility Factors

In addition to the requirements discussed above, companies are also subject to the following eligibility factors:

**Market Capitalization:** Float-adjusted market capitalization should be at least \$400 million for inclusion in the Index. Existing index components must have a float-adjusted market capitalization of \$300 million to remain in the Index at each rebalancing.

**Liquidity:** The liquidity measurement used is a liquidity ratio, defined as dollar value traded over the previous 12-months divided by the float-adjusted market capitalization as of the Index rebalancing reference date. Stocks having a float-adjusted market capitalization above \$500 million must have a liquidity ratio greater than 90% to be eligible for addition to the Index. Stocks having a float-adjusted market capitalization between \$400 and \$500 million must have a liquidity ratio greater than 150% to be eligible for addition to the Index. Existing index constituents must have a liquidity ratio greater than 50% to remain in the Index at the quarterly rebalancing. The length of time to evaluate liquidity is reduced to the available trading period for IPOs or spin-offs that do not have 12 months of trading history. In these cases, the dollar value traded available as of the rebalance reference date is annualized.

**Domicile:** U.S. companies only.

**Takeover Restrictions:** At the discretion of the Index sponsor, constituents with shareholder ownership restrictions defined in company organizational documents may be deemed ineligible for inclusion in the Index. Ownership restrictions preventing entities from replicating the index weight of a company may be excluded from the eligible universe or removed from the Index.

**Turnover:** At times, a company may appear to temporarily violate one or more of the addition criteria. However, the addition criteria are for addition to the Index, not for continued membership. As a result, an index constituent that appears to violate the criteria for addition to the Index will not be deleted unless ongoing conditions warrant a change in the composition of the Index.

#### Computation of the Index

The Index is equally-weighted, with adjustments to constituent weights to ensure concentration and liquidity requirements, and calculated by the divisor methodology used in all of the Index sponsor's equity indices.

Autocallable Market-Linked Step Up Notes

Linked to the S&P Oil & Gas Exploration & Production Select Industry Index®, due May , 2017

---

The initial divisor is set to have a base index value of 1,000 on December 17, 1999. The index value is calculated as the index market value divided by the index divisor:

$$\text{Index Value} = \text{Index Market Value} / \text{Divisor}$$

In order to maintain index series continuity, the divisor is also adjusted at each rebalancing.

$$(\text{Index Value}) \text{ before rebalancing} = (\text{Index Value}) \text{ after rebalancing}$$

Therefore,

$$(\text{Divisor}) \text{ after rebalancing} = (\text{Index Market Value}) \text{ after rebalancing} / (\text{Index Value}) \text{ before rebalancing}$$

At each quarterly rebalancing, the stocks composing the Index are initially equally-weighted using closing prices as of the second Friday of the last month of the quarter as the reference price. For those component stocks with multiple share class lines, the weight assigned to each share class line is proportional to its float adjusted market capitalization as of the rebalancing date. Adjustments are then made to ensure that there are no component stocks whose weight in the Index is more than can be traded in a single day for a \$ 500 million portfolio.

The Index sponsor calculates a maximum basket liquidity weight for each component stock in the Index using the ratio of its three-month average daily value traded to \$500 million. Each component stock's weight in the Index is then compared to its maximum basket liquidity weight and is set to the lesser of its maximum basket liquidity weight or its initial equal weight. All excess weight is redistributed across the Index to the uncapped component stocks.

If necessary, a final adjustment is made to ensure that no component stock in the Index has a weight greater than 4.5%. This step of the iterative weighting process may force the weight of those stocks limited to their maximum basket liquidity weight to exceed that weight. In such cases, the Index sponsor will make no further adjustments. If the Index contains exactly 22 companies as of the rebalancing effective date, the Index will be equally weighted without basket liquidity constraints.

#### Index Maintenance

Index maintenance will follow that of the S&P TMI. The membership of the Index is reviewed quarterly. Rebalancing occurs after the closing on the third Friday of the quarter ending month. The reference date for additions and deletions is after the closing of the last trading date of the previous month. However, a company will be deleted from the Index if the S&P TMI drops the constituent. Unless a constituent deletion causes the number of companies in the Index to fall below 22, no addition will be made to the Index until the next rebalancing. At that time, the entire Index will be rebalanced based on all eligibility criteria, including the minimum number of companies. If a constituent deletion causes the number of companies in the Index to fall below 22, an addition is made assuming the weight of the dropped stock. When a stock is removed from the Index at a price of \$0.00, the stock's replacement will be added to the Index at the weight using the previous day's closing value, or the most immediate prior business day that the deleted stock was not valued at \$0.00. No Index adjustment will be made when there are share changes between quarterly share adjustments. In case of GICS changes, where a company no longer qualifies to belong to the oil and gas exploration and production sub-industry after the classification change, it is removed from the Index at the next rebalancing.

The treatment of corporate actions is the same as in the S&P TMI. In case of a spin-off, generally both the parent company and spin-off companies will remain in the Index until the next rebalancing, regardless of whether they conform to the theme of the Index. When there is no market-determined price available for the spin-off company, the spin-off company is added to the Index at zero price at the close of the day before the ex-date. In the case of a rights offering, the price is adjusted to the price of the parent company minus (the price of the rights subscription/rights ratio). The index shares change so that the company's weight remains the same as its weight before the rights offering. In case of stock dividend, stock split or reverse stock split, the index shares are multiplied by and price is divided by the split factor. Share issuance or share repurchase will not cause an Index adjustment. When special dividends are paid, the price of the stock making the special dividend payment is reduced by the per share special dividend amount after the close of trading on the day before the dividend ex-date.

The following graph shows the daily historical performance of the Index in the period from January 2008 through March 2015. We obtained this historical data from Bloomberg L.P. We have not independently verified the accuracy or completeness of the information obtained from Bloomberg L.P. On April 20, 2015, the closing level of the Index was 8,295.91.

Historical Performance of the Index

This historical data on the Index is not necessarily indicative of the future performance of the Index or what the value of the notes may be. Any historical upward or downward trend in the level of the Index during any period set forth above is not an indication that the level of the Index is more or less likely to increase or decrease at any time over the term of the notes.

Before investing in the notes, you should consult publicly available sources for the levels and trading pattern of the Index.

Supplement to the Plan of Distribution

Under our distribution agreement with MLPF&S, MLPF&S will purchase the notes from us as principal at the public offering price indicated on the cover of this term sheet, less the indicated underwriting discount.

We may deliver the notes against payment therefor in New York, New York on a date that is greater than three business days following the pricing date. Under Rule 15c6-1 of the Securities Exchange Act of 1934, trades in the secondary market generally are required to settle in three business days, unless the parties to any such trade expressly agree otherwise. Accordingly, if the initial settlement of the notes occurs more than three business days from the pricing date, purchasers who wish to trade the notes more than three business days prior to the original issue date will be required to specify alternative settlement arrangements to prevent a failed settlement.

The notes will not be listed on any securities exchange. In the original offering of the notes, the notes will be sold in minimum investment amounts of 100 units. If you place an order to purchase the notes, you are consenting to MLPF&S acting as a principal in effecting the transaction for your account.

MLPF&S will not receive an underwriting discount for notes sold to certain fee-based trusts and fee-based discretionary accounts managed by U.S. Trust operating through Bank of America, N.A.

MLPF&S has advised us that they or their affiliates may repurchase and resell the notes, with repurchases and resales being made at prices related to then-prevailing market prices or at negotiated prices, and these prices will include MLPF&S's trading commissions and mark-ups. MLPF&S may act as principal or agent in these market-making transactions; however, it is not obligated to engage in any such transactions. At MLPF&S's discretion, for a short, undetermined initial period after the issuance of the notes, MLPF&S may offer to buy the notes in the secondary market at a price that may exceed the estimated value of the notes at the time of repurchase. Any price offered by MLPF&S for the notes will be based on then-prevailing market conditions and other considerations, including the performance of the Index, the remaining term of the notes, and our creditworthiness. However, none of us, MLPF&S, or any of our respective affiliates is obligated to purchase your notes at any price or at any time, and we cannot assure you that we, MLPF&S, or any of our respective affiliates will purchase your notes at a price that equals or exceeds the estimated value of the notes at the time of repurchase.

MLPF&S has also advised us that, if you hold your notes in a MLPF&S account, the value of the notes shown on your account statement will be based on MLPF&S's estimate of the value of the notes if MLPF&S or another of its affiliates were to make a market in the notes, which it is not obligated to do. That estimate will be based upon the price that MLPF&S may pay for the notes in light of then-prevailing market conditions and other considerations, as mentioned above, and will include transaction costs. This price may be higher than or lower than the initial estimated value of the notes.

The distribution of the Note Prospectus in connection with these offers or sales will be solely for the purpose of providing investors with the description of the terms of the notes that was made available to investors in connection with their initial offering. Secondary market investors should not, and will not be authorized to, rely on the Note Prospectus for information regarding Deutsche Bank or for any purpose other than that described in the immediately preceding sentence.

## Structuring the Notes

The notes are our debt securities, the return on which is linked to the performance of the Index. As is the case for all of our debt securities, including our market-linked notes, the economic terms of the notes reflect our actual or perceived creditworthiness at the time of pricing. The internal funding rate we use in pricing the market-linked note is typically lower than the rate we would pay when we issue conventional debt securities of comparable maturity. This generally relatively lower internal funding rate, which is reflected in the economic terms of the notes, along with the fees and charges associated with market-linked notes, typically results in the initial estimated value of the notes on the pricing date being less than their public offering price.

Payments on the notes, including the amount you receive at maturity or upon an automatic call, will be calculated based on the \$10 per unit principal amount and will depend on the performance of the Index. In order to meet these payment obligations, at the time we issue the notes, we expect to enter into certain hedging arrangements (which may include call options, put options or other derivatives) with MLPF&S or one of its affiliates. The terms of these hedging arrangements are determined by seeking bids from market participants, which may include us, MLPF&S and one of our respective affiliates, and take into account a number of factors, including our creditworthiness, interest rate movements, the volatility of the Index, the tenor of the notes and the tenor of the hedging arrangements. The economic terms of the notes and their initial estimated value depend in part on the terms of these hedging arrangements.

MLPF&S has advised us that the hedging arrangements will include a hedging related charge of approximately \$0.075 per unit, reflecting an estimated profit to be credited to MLPF&S from these transactions. Since hedging entails risk and may be influenced by unpredictable market forces, additional profits and losses from these hedging arrangements may be realized by us, MLPF&S or any other hedge providers.

For further information, see “Risk Factors—General Risks Relating to the Notes” beginning on page PS-7 and “Use of Proceeds and Hedging” on page PS-17 of product supplement EQUITY INDICES SUN-1.

### Summary Tax Consequences

In the opinion of our special tax counsel, Davis Polk & Wardwell LLP, which is based on prevailing market conditions, it is more likely than not that the notes will be treated for U.S. federal income tax purposes as prepaid financial contracts that are not debt. Generally, if this treatment is respected, (i) you should not recognize taxable income or loss prior to the taxable disposition of your notes (including at maturity or pursuant to a call) and (ii) the gain or loss on your notes should be capital gain or loss and should be long-term capital gain or loss if you have held the notes for more than one year. The Internal Revenue Service (the “IRS”) or a court might not agree with this treatment, however, in which case the timing and character of income or loss on your notes could be materially and adversely affected.

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether beneficial owners of these instruments should be required to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; the relevance of factors such as the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. persons should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” regime, which very generally can operate to recharacterize certain long-term capital gain as ordinary income and impose a notional interest charge. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the notes, possibly with retroactive effect.

You should review carefully the section of the accompanying product supplement entitled “U.S. Federal Income Tax Consequences.” The preceding discussion, when read in combination with that section, constitutes the full opinion of our special tax counsel regarding the material U.S. federal income tax consequences of owning and disposing of the notes.

Under current law, the United Kingdom will not impose withholding tax on payments made with respect to the notes.

For a discussion of certain German tax considerations relating to the notes, you should refer to the section in the accompanying prospectus supplement entitled “Taxation by Germany of Non-Resident Holders.”

You should consult your tax advisor regarding the U.S. federal tax consequences of an investment in the notes (including possible alternative treatments and the issues presented by the 2007 notice), as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

### Where You Can Find More Information

We have filed a registration statement (including a product supplement, a prospectus supplement, a prospectus and a prospectus addendum) with the SEC for the offering to which this term sheet relates. Before you invest, you should read the Note Prospectus, including this term sheet, and the other documents that we have filed with the SEC, for more complete information about us and this offering. You may get these documents without cost by visiting EDGAR on the SEC website at [www.sec.gov](http://www.sec.gov). Alternatively, we, any agent, or any dealer participating in this offering

will arrange to send you these documents if you so request by calling MLPF&S toll-free at 1-800-294-1322.

#### Market-Linked Investments Classification

MLPF&S has advised us that it classifies certain market-linked investments (the “Market-Linked Investments”) into categories, each with different investment characteristics. The following description is meant solely for informational purposes and is not intended to represent any particular Enhanced Return Market-Linked Investment or guarantee any performance.

Enhanced Return Market-Linked Investments are short- to medium-term investments that offer you a way to enhance exposure to a particular market view without taking on a similarly enhanced level of market downside risk. They can be especially effective in a flat to moderately positive market (or, in the case of bearish investments, a flat to moderately negative market). In exchange for the potential to receive better-than market returns on the linked asset, you must generally accept market downside risk and capped upside potential. As these investments are not market downside protected, and do not assure full repayment of principal at maturity, you need to be prepared for the possibility that you may lose all or part of your investment.
