Syngenta Group

Notes to Interim Condensed Consolidated Financial Statements

Note 1: Basis of preparation

**Nature of operations:** Syngenta AG (“Syngenta”) is a world leading agribusiness operating in the crop protection, seeds and lawn and garden markets. Crop protection chemicals include herbicides, insecticides, fungicides and seed treatments to control weeds, insects and diseases in crops, and are essential inputs enabling growers around the world to improve agricultural productivity and food quality. In Seeds, Syngenta operates in the high value commercial sectors of field crops (including corn, oilseeds, cereals and sugar beet) and vegetables. The Lawn and Garden business provides professional growers and consumers with flowers, turf and landscape, and professional pest management products.

**Basis of presentation and accounting policies:** The condensed consolidated financial statements for the six months ended June 30, 2016 and 2015 incorporate the financial statements of Syngenta AG and of all of its subsidiaries (“Syngenta Group”). They have been prepared in accordance with IAS 34, “Interim Financial Reporting” and with the accounting policies described in Notes 2 and 29 to Syngenta’s 2015 annual consolidated financial statements. Syngenta prepares its annual consolidated financial statements in accordance with International Financial Reporting Standards (IFRSs) as issued by the International Accounting Standards Board (IASB). The condensed consolidated financial statements were authorized for issue by the Board of Directors on July 21, 2016.

The condensed consolidated financial statements are presented in United States dollars (\$) as this is the major currency in which revenues are denominated. Financial figures are presented in millions of dollars (\$m) except where otherwise stated.

Impairment losses recognized on goodwill in interim financial statements are not reversed in the annual financial statements even if the decline in value which caused the impairment loss to be recognized has reversed by the end of the annual reporting period.

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimated.

Note 2: Seasonality of operations

The timing of Syngenta's sales, profit and cash flows throughout the year is significantly influenced by seasonal factors. Operating in the agriculture sector, sales of Syngenta's products principally occur before and during the growing season. Because many of Syngenta's largest markets are in the northern hemisphere, which has a spring growing season, significantly more sales occur and profit is earned during the first half of the year than in the second half. Collections of trade accounts receivable from customers in these northern hemisphere markets largely occur during the second half of the year. As a result, operating cash flow typically is significantly lower during the first half of the year than during the second half.

Note 3: Adoption of new IFRSs

Syngenta has adopted the following new or revised IFRSs from January 1, 2016. These IFRSs have not been early adopted and their adoption had no material impact on these condensed consolidated financial statements:

- "Accounting for Acquisitions of Interests in Joint Operations", Amendments to IFRS 11;
- "Clarification of Acceptable Methods of Depreciation and Amortization", Amendments to IAS 16 and IAS 38;
- "Agriculture: Bearer Plants", Amendments to IAS 16 and IAS 41;
- Annual Improvements to IFRSs, 2012-2014 cycle;
- "Disclosure Initiative", Amendments to IAS 1.

Note 4: Business combinations, divestments and other significant transactions

Six months ended June 30, 2016

No acquisitions were completed in the six months ended June 30, 2016.

On March 15, 2016, Syngenta divested Syngenta Bioline Ltd. (“Bioline”), its beneficial insect breeding business. On June 1, 2016, Syngenta divested its manufacturing operations in Goa, India to Deccan Fine Chemicals India Private Ltd. Neither transaction had individually material proceeds nor led to a material gain or loss; the aggregate net gains on these divestments were \$12 million. Deferred and contingent receipts and payments for acquisitions completed in prior periods were not material.

Public tender offer for Syngenta AG shares by CNAC Saturn (NL) B.V. (“the Offeror”)

CNAC Saturn (NL) B.V., a subsidiary of China National Chemical Corporation (ChemChina) is offering to acquire all publicly held Shares and American Depositary Shares (ADSs) of Syngenta for \$465 per ordinary share in cash (“the Offer”). Syngenta and its Board of Directors have agreed to support the Offer. The Offer has been extended until September 13, 2016 and is conditional on acceptance by shareholders owning 67 percent of Syngenta AG issued shares and on regulatory approval by all competent merger control and other authorities. If the Offer becomes unconditional, Syngenta AG will pay a special dividend of CHF 5.00 per share immediately before the First Settlement of the Offer. The Offer price will not be adjusted for this dividend. In the event that ChemChina and/or its Subsidiaries hold between 90% and 98% of the voting rights in Syngenta after the Second Settlement of the Offer, ChemChina intends to merge Syngenta with a Swiss company directly or indirectly

Syngenta – July 22, 2016 / Page 7 of 18

controlled by ChemChina in accordance with articles 8 para. 2 and 18 para. 5 of the Swiss Merger Act, whereby the remaining public shareholders of Syngenta would be compensated (in cash or otherwise) and not receive any shares in the surviving company. In the event that ChemChina and/or its Subsidiaries hold more than 98% of the voting rights in Syngenta after the Second Settlement, the Offeror intends to request the cancellation of the remaining publicly held Syngenta Shares in accordance with article 137 of the Financial Markets Infrastructure Act (FMIA). ChemChina agreed to pay Syngenta an amount equal to \$3 billion if, despite all other conditions of the Offer having been satisfied or still being capable of being satisfied, the Offer does not become unconditional and/or is terminated as a result of the failure to obtain Chinese regulatory approvals or antitrust approvals. In certain circumstances, if the Syngenta AG Board of Directors were to withdraw its support for the Offer and as a result the Offer is not successful or does not become unconditional, Syngenta would be required to pay ChemChina \$848 million.

#### Change of control

Syngenta has identified the following contracts where completion of the Offer could trigger an impact:

Syngenta has the following long-term debt instruments outstanding which have a change of control clause under which holders may require early repayment if the credit rating of the instruments falls below Investment grade:

- two US (SEC registered) bonds issued in March 2012 (face values \$250 million and \$500 million);
- three US private placements issued in December 2005 (face values \$75 million, \$75 million and \$100 million).

In accordance with the transaction agreement between Syngenta and ChemChina, after completion of the Offer until the earlier of (i) five years following the First Settlement and (ii) a re-listing of Syngenta's shares through an initial public offering, the consent of at least two independent directors of Syngenta AG is required for raising new debt or making distributions which would lower the rating of the Syngenta Group to a level below Investment grade. Syngenta does not expect these instruments to be called for early repayment in accordance with their change of control clauses.

Further, the current syndicated committed loan facility of \$2,500 million (which serves as a backstop facility for the \$2,500 million Global Commercial Paper program) has a change of control clause that provides for early termination unless renegotiated terms are agreed within 30 days. In order to address the risk of early termination, ChemChina has provided cover for the backstop facility, short-term financing and any refinancing needs via a committed \$5,000 million Target Facilities Agreement accessible by Syngenta.

Syngenta entered into certain agreements which give the respective counterparties early termination rights on a change of control of Syngenta. Syngenta has recognized payments made under certain agreements as intangible assets. Exercise of termination rights on change of control could result in impairment losses or changes to amortization in future periods. Syngenta does not believe that such losses or changes will have a material impact on its consolidated income statement and balance sheet.

Syngenta – July 22, 2016 / Page 8 of 18

## Amendments to Syngenta's Equity Plans

On February 1 and 2, 2016 the Syngenta Board of Directors and the Compensation Committee of the Board of Directors, amended Syngenta's Equity Plans for Directors and Employees, respectively. Under the amended terms of the Equity Plans, if the Offer is successful, all outstanding share awards and Restricted Share Units will be converted into Syngenta shares and deferral and vesting periods will be waived, share blocking/holding periods will be waived and matching shares will be granted, Performance Share Units will vest at target levels of performance and be converted into Syngenta shares, options will vest and their exercise periods lapse, and performance options will vest at target levels of performance and their exercise periods lapse. Phantom awards and ADSs will be treated in an analogous way to the above. Syngenta AG will settle all outstanding awards, other than Syngenta shares to which the Equity Plan participants have acquired valid title before the Offer becomes successful, in cash instead of Syngenta shares on the date of the Second Settlement.

As a result of these amendments, Syngenta has changed the accounting for all outstanding awards made under its Equity Plans, except for vested Syngenta shares, from equity-settled share based payment arrangements to cash-settled share based payment arrangements, in accordance with IFRS 2. The effect of this change was as follows:

- \$85 million credited to equity up to February 2, 2016 under equity-settled share based payment accounting was reclassified as a liability at that date;

- \$41 million share based payment expense was recognized in function expenses according to where the related personnel costs are charged for the six months ended June 30, 2016, in addition to the \$29 million charge that would have been made under equity-settled share based payment accounting;

- \$155 million share based payment liabilities were recognized at June 30, 2016 within Other current liabilities.

The principal assumptions used to measure the share based payment expense and the fair value of the share based payment liability at June 30, 2016 were as follows:

- Syngenta AG share price at June 30, 2016: ordinary shares: CHF 374.10; ADS: \$76.79

- Vesting period remaining at June 30, 2016: 6 months

- Expected option term remaining at June 30, 2016: 6 months

Risk-free interest rate: CHF: -0.77%; \$: 0.35%

Share price volatility: 12.51%

The valuation assumes that the Offer completes by the end of 2016. Because holders of unvested awards would receive the special dividend on completion as part of their cash settlement, a dividend yield of zero has been assumed.

Under cash-settled share based payment accounting, the fair value of the awards is charged to profit or loss and no equity instruments are assumed to be issued on settlement. Therefore, basic and diluted numbers of shares are the same.

Six months ended June 30, 2015

No acquisitions or divestments were completed in the six months ended June 30, 2015. The acquisition accounting for the German and Polish winter wheat and winter oilseed rape breeding and business operations of Lantmännen was finalized during the period, with no material adjustments to the amounts reported in the 2014 annual consolidated financial statements. Goodwill on that acquisition was \$12 million. Deferred and contingent receipts and payments for acquisitions completed in prior periods were not material.

During the period, Syngenta changed its contractual sales terms in Brazil to reduce the flexibility of distributors to return crop protection products. This change, together with the introduction of enhanced processes for forecasting and handling product returns, reduced the uncertainty over the amount of sales returns that may ultimately occur. Sales made after the change in terms have been recognized in accordance with delivery terms, subject to an allowance for returns. Sales made before the change were recognized as was done in prior years when distributors had sold Syngenta products on to growers. The effect of the change in contractual sales terms on the condensed consolidated income statement for the six months ended June 30, 2015 was to increase reported sales by \$186 million, representing amounts invoiced to distributors on the revised terms which would have been recognized in a later period had the previous terms still been in force. The corresponding increase in net income for the six months ended June 30, 2015 was approximately \$55 million. At June 30, 2015, \$228 million of Brazil sales to distributors that had been made before the change in contractual terms, had not been sold on to growers and therefore had not been recognized as sales and receivables at that date.

## Note 5: Segmental information

Syngenta is organized on a worldwide basis into five operating segments: the four geographic regions, comprising the integrated crop protection and seeds business, and the global Lawn and Garden business. Some costs of the integrated organization do not relate to a geographic destination and are reported as non-regional.

No operating segments have been aggregated to form the above reportable segments.

## Note 6: General and administrative

Other general and administrative includes losses of \$27 million (2015: gains of \$28 million) on hedges of forecast transactions, which were recognized during the period. In 2016, Other general and administration includes \$18 million charged for the cash-settlement treatment of equity plans discussed in Notes 4 and 7.

Total restructuring	145	166

Restructuring represents the effect on reported performance of initiating and enabling business changes that are considered major and that, in the opinion of management, will have a material effect on the nature and focus of Syngenta's operations, and therefore require separate disclosure to provide a more thorough understanding of business

performance. Restructuring includes the incremental costs of closing, restructuring or relocating existing operations, and gains or losses from related asset disposals. Restructuring also includes the costs of analyzing and preparing for potential industry consolidation transactions, including costs associated with the ChemChina takeover offer, as well as the effects of completing and integrating significant business combinations and divestments, including related transaction costs, gains and losses. Recurring costs of normal business operations and routine asset disposal gains and losses are excluded.

Impairment includes impairment losses associated with major restructuring as well as impairment losses and reversals of impairment losses resulting from major changes in the markets in which a reported segment operates.

The incidence of these business changes may be periodic and the effect on reported performance of initiating them will vary from period to period. Because each such business change is different in nature and scope, there will be little continuity in the detailed composition and size of the reported amounts which affect performance in successive periods. Separate disclosure of these amounts facilitates the understanding of performance including and excluding items affecting comparability. Syngenta's definition of restructuring and impairment may not be comparable to similarly titled line items in financial statements of other companies.

#### Accelerating operational leverage programs

Cash costs of \$88 million, including \$12 million of severance and pension charges and \$20 million of information system projects, consists of \$32 million for projects to improve the effectiveness of back office support, \$36 million for initiatives to restructure marketing and commercial operations, \$13 million for Research and Development productivity projects, \$5 million for activity to optimize production and supply and \$2 million for project management. Non-cash impairment is a tangible asset write-down and the pension curtailment gain represents the difference between the cash costs for early retirements and the calculation of net pension curtailment costs according to IFRS, with regards to the Swiss defined benefit pension plan. Cash costs for early retirements were included in the cash costs of various projects described above.

#### Integrated crop strategy programs

The integrated crop strategy programs announced in 2011 are substantially complete and final costs in 2016 relate to the completion of certain projects initiated before the end of 2015.

#### Acquisition, divestment and related costs

Cash costs of \$59 million include \$41 million relating to the cash-settlement treatment of equity plans discussed in Note 4 above, \$11 million of transaction costs and \$7 million incurred for integration projects, including the divestment of the Goa manufacturing site and the subsequently cancelled projects to divest the Flowers and

Vegetables businesses.

Divestment gains of \$12 million consist of the aggregate gain on the sale of the Bioline beneficial insects breeding business and the sale of the manufacturing site in Goa.

Other non-cash restructuring

The other non-cash asset impairment is the write-down of a building in the US, now classified as held for sale.

Accelerating operational leverage programs

Cash costs of \$142 million, including \$106 million of severance and pension charges, consisted of \$50 million for initiatives to restructure marketing and commercial operations, \$16 million for projects to drive efficiencies in territory commercial operations, \$31 million to rationalize logistical operations and optimize production capacity, \$28 million for Research and Development productivity projects, \$12 million for projects to increase the effectiveness of back office support services and \$5 million for project management. Non-cash impairment costs of \$16 million consisted of tangible asset write-downs at two sites resulting from the projects to rationalize logistical operations and optimize production capacity. The non-cash pension curtailment gain related to the Swiss defined benefit pension plan and is discussed above in relation to 2016.

Integrated crop strategy programs

Cash costs of \$8 million included \$6 million of charges for the transfer of certain system and process management activities to the internal service center in India, including \$1 million for information system projects, \$1 million to restructure the integrated Research and Development function and \$1 million to restructure the Human Resource organization.

Acquisition, divestment and related costs

Cash costs of \$18 million included \$5 million incurred to integrate previous acquisitions, mainly the German and Polish winter wheat and winter oilseed rape breeding and business operations of Lantmännen, PSB, MRI and Sunfield, and \$13 million of transaction charges, including those related to uncompleted transactions.

Other non-cash restructuring

Other non-current asset impairments of \$9 million included \$7 million of impairment of exclusive distribution rights where the distribution agreement was terminated and \$2 million for two other intangible asset impairments.

The average rates presented above are an average of the monthly rates used to prepare the condensed consolidated income and cash flow statements. The period-end rates were used for the preparation of the condensed consolidated balance sheet.

**Note 10: Issuances, repurchases and repayments of debt and equity securities****Six months ended June 30, 2016**

During the six months ended June 30, 2016, no shares were repurchased. No treasury shares were reissued except in accordance with Syngenta's share based payment plans disclosed in Note 23 to the 2015 annual consolidated financial statements.

On January 29, 2016, the terms of Syngenta's \$1.5 billion committed, revolving, multi-currency syndicated credit facility were amended to increase its amount to \$2.5 billion. The facility supports the Global Commercial Paper program which provides short-term funding for working capital fluctuations due to the seasonality of the business, and will mature in 2019.

**Six months ended June 30, 2015**

During the six months ended June 30, 2015, Syngenta repurchased 32,000 of its own shares at a cost of \$11 million which were to be used to meet future requirements of share based payment plans. No treasury shares were reissued except in accordance with Syngenta's share based payment plans.

During the six months ended June 30, 2015, Syngenta repaid a Eurobond with principal of EUR 500 million at maturity, and issued a EUR 500 million Eurobond with a coupon rate of 1.25 percent and a maturity date in September 2027.

The levels of fair value hierarchy used above are defined as follows:

Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 fair value measurements are those derived from inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data.

Syngenta – July 22, 2016 / Page 17 of 18

The valuation techniques and inputs used by Syngenta to derive level 2 fair value measurements of the above financial assets and liabilities are as described in Note 29 to Syngenta's 2015 annual consolidated financial statements.

At June 30, 2016, the fair values of equity securities at fair value through OCI which are level 3 measurements were \$68 million (December 31, 2015: \$71 million) and are shown in the level 2 column above. During the six month periods ended June 30, 2016 and 2015, there were no material movements in those equity securities or their fair values; no transfers between the fair value and amortized cost categories; no material transfers between level 1 and level 2 of the fair value hierarchy; nor into or out of level 3 of the fair value hierarchy.
