Form 10-Q
May 07, 2010

**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549
FORM 10-Q**

☒ **Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
for the Quarterly Period Ended March 31, 2010.**

☐ **Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
from _____ to _____
Commission file number 001-13790
HCC Insurance Holdings, Inc.**

(Exact name of registrant as specified in its charter)

Delaware

76-0336636

(State or other jurisdiction of
incorporation or organization)

(IRS Employer
Identification No.)

13403 Northwest Freeway, Houston, Texas

77040-6094

(Address of principal executive offices)

(Zip Code)

(713) 690-7300

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes ☐ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☒

Accelerated filer ☐

Non-accelerated filer ☐
(Do not check if a smaller
reporting company)

Smaller reporting
company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes ☐ No ☒

Edgar Filing: HCC INSURANCE HOLDINGS INC/DE/ - Form 10-Q

Indicate the number of shares outstanding of each of the registrant's classes of common stock as of the latest practicable date.

On April 30, 2010, there were approximately 115.0 million shares of common stock outstanding.

FORWARD-LOOKING STATEMENTS

This report on Form 10-Q contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, which are intended to be covered by the safe harbors created by those laws. We have based these forward-looking statements on our current expectations and projections about future events. These forward-looking statements include information about possible or assumed future results of our operations. All statements, other than statements of historical facts, included or incorporated by reference in this report that address activities, events or developments that we expect or anticipate may occur in the future, including such things as growth of our business and operations, business strategy, competitive strengths, goals, plans, future capital expenditures and references to future successes may be considered forward-looking statements. Also, when we use words such as anticipate, believe, estimate, expect, intend, plan, probably or similar expressions, we are making forward-looking statements.

Many risks and uncertainties may have an impact on the matters addressed in these forward-looking statements, which could affect our future financial results and performance, including, among other things:

the effects of catastrophic losses,

the cyclical nature of the insurance business,

inherent uncertainties in the loss estimation process, which can adversely impact the adequacy of loss reserves,

the impact of the credit market downturn and subprime market exposures,

the effects of emerging claim and coverage issues,

the effects of extensive governmental regulation of the insurance industry,

potential credit risk with brokers,

the effects of industry consolidations,

our assessment of underwriting risk,

our retention of risk, which could expose us to potential losses,

the adequacy of reinsurance protection,

the ability and willingness of reinsurers to pay balances due us,

the occurrence of terrorist activities,

our ability to maintain our competitive position,

changes in our assigned financial strength ratings,

our ability to raise capital and funds for liquidity in the future,

attraction and retention of qualified employees,

fluctuations in securities markets, which may reduce the value of our investment assets, reduce investment income or generate realized investment losses,

*our ability to successfully expand our business through the acquisition of insurance-related companies,
impairment of goodwill,*

the ability of our insurance company subsidiaries to pay dividends in needed amounts,

fluctuations in foreign exchange rates,

failures or constraints of our information technology systems,

changes to the country's health care delivery system,

the effect, if any, of climate change, on the risks we insure,

change of control, and

difficulties with outsourcing relationships.

We describe these risks and uncertainties in greater detail in Item 1A, Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2009.

These events or factors could cause our results or performance to differ materially from those we express in our forward-looking statements. Although we believe that the assumptions underlying our forward-looking statements are reasonable, any of these assumptions, and, therefore, also the forward-looking statements based on these assumptions, could themselves prove to be inaccurate. In light of the significant uncertainties inherent in the forward-looking statements that are included in this Report, our inclusion of this information is not a representation by us or any other person that our objectives or plans will be achieved.

Our forward-looking statements speak only at the date made, and we will not update these forward-looking statements unless the securities laws require us to do so. In light of these risks, uncertainties and assumptions, any forward-looking events discussed in this Report may not occur.

HCC Insurance Holdings, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements
(unaudited, in thousands except per share data)

(1) General Information

HCC Insurance Holdings, Inc. and its subsidiaries (collectively, we, us or our) include domestic and foreign property and casualty and life insurance companies and underwriting agencies. We provide specialized property and casualty, surety, and group life, accident and health insurance coverages and related agency services to commercial customers and individuals. We market our products both directly to customers and through a network of independent brokers, producers, agents and third party administrators. Our lines of business include diversified financial products (which includes directors and officers liability, errors and omissions liability (known as professional indemnity outside the U.S.), employment practices liability, surety, credit, and fidelity coverages); group life, accident and health (which includes medical stop-loss, short-term medical, occupational accident, and other coverages); aviation; our London market account (which includes energy, property, property treaty, marine, and accident and health coverages); and other specialty lines of insurance (which includes public entity, U.K. liability, event cancellation, contingency, and other coverages). We operate primarily in the United States, the United Kingdom, Spain and Ireland, although some of our operations have a broader international scope.

Basis of Presentation

Our unaudited condensed consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) and include the accounts of HCC Insurance Holdings, Inc. and its subsidiaries. We have made all adjustments that, in our opinion, are necessary for a fair statement of results of the interim periods, and all such adjustments are of a normal recurring nature. All significant intercompany balances and transactions have been eliminated in consolidation. The condensed consolidated financial statements should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2009. The condensed consolidated balance sheet at December 31, 2009 was derived from the audited financial statements, but does not include all disclosures required by GAAP.

Management must make estimates and assumptions that affect amounts reported in our condensed consolidated financial statements and in disclosures of contingent assets and liabilities. Ultimate results could differ from those estimates. We have reclassified certain amounts in our 2009 condensed consolidated financial statements to conform to the 2010 presentation. None of our reclassifications had an effect on our consolidated net earnings, shareholders equity or cash flows.

Accounting Guidance Adopted in 2010

A new accounting standard, originally issued as SFAS No. 167, *Amendments to FASB Interpretation No. 46(R)*, became effective January 1, 2010. The guidance, which was incorporated into Accounting Standards Codification (ASC) Topic 810, *Consolidation*, changes various aspects of accounting for and disclosures of interests in variable interest entities. Our adoption of this guidance as of January 1, 2010 had no material impact on our condensed consolidated financial statements.

Effective January 1, 2010, we adopted Accounting Standards Update No. 2010-06, which incorporated changes in disclosure requirements into ASC Topic 820, *Fair Value Measurements and Disclosures*. When applicable, we have included the additional required disclosures in the notes to our condensed consolidated financial statements.

Derivative Financial Instruments

At December 31, 2009, we had interests in two long-term mortgage impairment insurance contracts that are denominated in British pound sterling. The exposure with respect to these two contracts is measured based on movement in a specified United Kingdom housing index. In the first quarter of 2010, we commuted our interest in one contract for \$8.3 million cash. We recognized a gain of \$8.0 million, which is included in other operating income in our condensed consolidated statements of earnings. The remaining contract qualifies as a derivative financial instrument, is unhedged and is reported at fair value in other assets in our condensed consolidated balance sheets. We record changes in fair value and any foreign exchange gain/loss on this contract as a component of other operating income.

HCC Insurance Holdings, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements
(unaudited, in thousands except per share data)

Stock-based Compensation

In the first quarter of 2010, we granted the following shares of restricted stock, restricted stock units and stock options for the purchase of shares of our common stock. The fair value of the restricted stock, restricted stock units and stock options will be expensed over the vesting period.

	Number of shares	Weighted-average grant date fair value	Aggregate fair value	Vesting period
Restricted stock	601	\$28.24	\$16,986	3-10 years
Restricted stock units	22	28.30	636	4-10 years
Stock options	130	6.78	882	5 years

Income Taxes

For the three months ended March 31, 2010 and 2009, the income tax provision was calculated based on an estimated effective tax rate for each fiscal year. Our effective tax rate differs from the United States Federal statutory rate primarily due to the effect of tax-exempt municipal bond interest.

Disposition

In 2010, we sold an inactive subsidiary, HCC Insurance Company, for \$14.7 million cash.

(2) Fair Value Measurements

We value financial assets and financial liabilities at fair value. In determining fair value, we generally apply the market approach, which uses prices and other relevant data based on market transactions involving identical or comparable assets and liabilities. We classify our financial instruments into the following three-level hierarchy:

Level 1 Inputs are based on quoted prices in active markets for identical instruments.

Level 2 Inputs are based on observable market data (other than quoted prices), or are derived from or corroborated by observable market data.

Level 3 Inputs are unobservable and not corroborated by market data.

Our Level 1 investments are primarily U.S. Treasuries listed on stock exchanges. We use quoted prices for identical instruments to measure fair value.

Our Level 2 investments include most of our fixed income securities, which consist of U.S. government agency securities, municipal bonds, certain corporate debt securities, and certain mortgage-backed and asset-backed securities. Our Level 2 instruments also include our interest rate swap agreements, which were reflected as liabilities in our condensed consolidated balance sheets. We measure fair value for the majority of our Level 2 investments using quoted prices of securities with similar characteristics. The remaining investments are valued using pricing models or matrix pricing. The fair value measurements consider observable assumptions, including benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers, default rates, loss severity and other economic measures.

We use independent pricing services to assist us in determining fair value for over 99% of our Level 1 and Level 2 investments. The pricing services provide a single price or quote per security. We use data provided by our third party investment manager to value the remaining Level 2 investments. To validate that these quoted and modeled prices are reasonable estimates of fair value, we perform various quantitative and qualitative procedures, including: 1) evaluation of the underlying methodologies, 2) analysis of recent sales activity, 3) analytical review of our fair values against current market prices, and 4) comparison of the pricing services' fair value to other pricing services' fair value for the same investment. Based on these procedures, we did not adjust the prices or quotes provided by our

independent pricing services or third party investment managers as of March 31, 2010 or

HCC Insurance Holdings, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements
(unaudited, in thousands except per share data)

December 31, 2009. In addition, we did not apply GAAP criteria for determining the fair value of securities in inactive markets since no markets for our investments were judged to be inactive as of March 31, 2010 or December 31, 2009.

Our Level 3 securities include certain fixed income securities and two insurance contracts that we account for as derivatives. We determine fair value based on internally developed models that use assumptions or other data that are not readily observable from objective sources. Because we use the lowest level significant input to determine our hierarchy classifications, a financial instrument may be classified in Level 3 even though there may be significant readily-observable inputs. We commuted our interest in one insurance contract in the first quarter of 2010. For the remaining insurance contract, we determine fair value based on our estimate of the present value of expected future cash flows, modified to reflect specific contract terms.

The following tables present our assets and interest rate swap liabilities that were measured at fair value.

	Level 1	Level 2	Level 3	Total
<u>March 31, 2010</u>				
Fixed income securities				
U.S. government and government agency securities	\$175,950	\$ 181,059	\$	\$ 357,009

Total assets measured at fair value	\$ 178,941	\$ 4,354,884	\$ 4,694	\$ 4,538,519
Accounts payable and accrued liabilities	\$	\$ (2,367)	\$	\$ (2,367)
Total liabilities measured at fair value	\$	\$ (2,367)	\$	\$ (2,367)

We excluded from our fair value disclosures our held to maturity investment portfolio measured at amortized cost and two other investments measured at cost. Our held to maturity portfolio had a fair value of \$137.6 million at March 31, 2010 and \$104.0 million at December 31, 2009. The two other investments collectively were valued at \$4.1 million at both balance sheet dates.

The following table presents the changes in fair value of our Level 3 assets.

	2010			2009		
	Fixed income securities	Other assets	Total	Fixed income securities	Other assets	Total
Balance at beginning of year	\$ 4,262	\$ 432	\$ 4,694	\$ 6,515	\$ 16,100	\$ 22,615

Gains and (losses) unrealized	62	(141)	(79)	567	363	930
Gains realized		8,342	8,342	30		30
Transfers out of Level 3				(1,746)		(1,746)

Balance at March 31	\$4,224	\$ 291	\$ 4,515	\$ 5,085	\$16,463	\$21,548
----------------------------	---------	--------	----------	----------	----------	----------

Unrealized gains and losses on our Level 3 fixed income securities are reported in other comprehensive income within shareholders' equity, and unrealized gains and losses on our Level 3 other assets are reported in other operating income. We transferred investments from Level 3 to Level 2 in the first quarter of 2009 because we were able to determine their fair value using inputs based on observable market data at March 31, 2009. There were no investments transferred between Level 1 and Level 2 for either period.

A security has an impairment loss when its fair value is less than its cost or amortized cost at the balance sheet date. We evaluate the securities in our fixed income securities portfolio for possible other-than-temporary impairment losses at each quarter end. During 2010 and 2009, our reviews covered all impaired securities where the loss exceeded \$0.5 million and the loss either exceeded 10% of cost or the security had been in a loss position for longer than twelve consecutive months.

For other-than-temporary impairment losses, we recognize an other-than-temporary impairment loss in earnings in the period that we determine: 1) we intend to sell the security, 2) it is more likely than not that we will be required to sell the security before recovery of its amortized cost basis or 3) the security has a credit loss. We recognized no other-than-temporary impairment losses in the first quarter of 2010, compared to \$3.1 million of other-than-temporary impairment credit losses in the first quarter of 2009.

At March 31, 2010, we had \$5.0 million after-tax of other-than-temporary impairments, primarily related to mortgage-backed and asset-backed securities, included in accumulated other comprehensive income within shareholders' equity. The credit-related portion of our pretax other-than-temporary impairment loss recognized in earnings, for which a portion of the other-than-temporary loss was recognized in other comprehensive income, did not

change in the first quarter of 2010 and was \$3.8 million at March 31, 2010.

We do not consider the \$12.4 million of gross unrealized losses in our fixed income securities portfolio at March 31, 2010 to be other-than-temporary impairments as of that date because: 1) we received all contractual interest and principal payments on these securities as of March 31, 2010, 2) we do not intend to sell the securities, 3) it is more likely than not that we will not be required to sell the securities before recovery of their amortized cost bases and 4) the unrealized loss relates to non-credit factors, such as interest rate changes and market conditions.

HCC Insurance Holdings, Inc. and Subsidiaries

Dilutive effect of convertible debt (determined using treasury stock method)		255
Weighted-average common shares and potential common shares outstanding	114,124	113,289
Anti-dilutive stock options not included in treasury stock method computation	3,413	6,509

(5) Segment and Geographic Data

The performance of each segment is evaluated by our management based on net earnings. Net earnings is calculated on an after-tax basis and after corporate expense allocations, interest expense on debt incurred for acquired companies and intercompany eliminations have been charged or credited to our individual segments. All stock-based compensation is included in the corporate segment because it is not included in management's evaluation of the other segments. All contractual and discretionary bonuses are expensed in the respective employee's segment in the year the bonuses are earned. Any such bonuses that will be paid by restricted stock awards, which will be granted by the Compensation Committee in the following year, are reversed on the corporate segment, which will record the appropriate stock-based compensation expense as the awards vest in future years.

(6) Reinsurance

In the normal course of business, our insurance companies cede a portion of their premium to domestic and foreign reinsurers through treaty and facultative reinsurance agreements. Although ceding for reinsurance purposes does not discharge the direct insurer from liability to its policyholder, our insurance companies participate in such agreements in order to limit their loss exposure, protect them against catastrophic loss and diversify their business. The following table presents the effect of such reinsurance transactions on our premium and loss and loss adjustment expense.

	Written premium	Earned premium	Loss and loss adjustment expense
<u>Three months ended March 31, 2010</u>			
Direct business	\$ 509,192	\$ 571,962	\$ 360,951

(8) Commitments and Contingencies

Catastrophe Exposure and Loss

We have exposure to catastrophic losses caused by natural perils (such as hurricanes and earthquakes), as well as from man-made events (such as terrorist attacks). The incidence and severity of catastrophic losses is unpredictable. We assess our exposures in areas most vulnerable to natural catastrophes and apply procedures to ascertain our probable maximum loss from a single event. We maintain reinsurance protection that we believe is sufficient to limit our exposure to a foreseeable event. In the first quarter of 2010, we recognized gross losses from catastrophic events, primarily the Chilean earthquake, of \$31.9 million. After reinsurance, our pretax loss was \$20.6 million.

Litigation

We are a party to lawsuits, arbitrations and other proceedings that arise in the normal course of our business. Many of such lawsuits, arbitrations and other proceedings involve claims under policies that we underwrite as an insurer or reinsurer, the liabilities for which, we believe, have been adequately included in our loss reserves. Also, from time to time, we are a party to lawsuits, arbitrations and other proceedings that relate to disputes with third parties, or that involve alleged errors and omissions on the part of our subsidiaries. We have provided accruals for these items to the extent we deem the losses probable and reasonably estimable. Although the ultimate outcome of these matters cannot be determined at this time, based on present information, the availability of insurance coverage and advice received from our outside legal counsel, we believe the resolution of any such matters will not have a material adverse effect on our consolidated financial position, results of operations or cash flows.

Indemnifications

In conjunction with the sales of business assets and subsidiaries, we have provided indemnifications to the buyers. Certain indemnifications cover typical representations and warranties related to our responsibilities to perform under the sales contracts. Under other indemnifications, we agree to reimburse the purchasers for taxes or ERISA-related amounts, if any, assessed after the sale date but related to pre-sale activities. We cannot quantify the maximum potential exposure covered by all of our indemnifications because the indemnifications cover a variety of matters, operations and scenarios. Certain of these indemnifications have no time limit. For those with a time limit, the longest such indemnification expires in 2025. We accrue a loss when a valid claim is made by a purchaser and we believe we have potential exposure. At March 31, 2010, we have recorded a liability of \$13.0 million and have provided a \$3.0 million escrow account and \$9.7 million of letters of credit to cover our obligations or anticipated payments under these indemnifications.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following Management's Discussion and Analysis should be read in conjunction with the Condensed Consolidated Financial Statements and the related Notes thereto.

Overview

We are a specialty insurance group with offices in the United States, the United Kingdom, Spain and Ireland, transacting business in approximately 150 countries. Our group consists of insurance companies, underwriting agencies and participation in an active Lloyd's of London syndicate that we manage. Our shares trade on the New York Stock Exchange and closed at \$27.60 on March 31, 2010. We had a market capitalization of \$3.1 billion at April 30, 2010.

We underwrite a variety of relatively non-correlated specialty lines of business identified as diversified financial products; group life, accident and health; aviation; London market account; and other specialty lines of business. Products in each line are marketed by our insurance companies, agencies and the syndicate, through a network of independent agents and brokers, directly to customers or through third party administrators. The majority of our business is low limit or small premium business that has less intense price competition, as well as lower catastrophe and volatility risk. We reinsure a significant portion of our catastrophic exposure to hurricanes and earthquakes to minimize the impact on our net earnings and shareholders' equity.

Our major domestic and international insurance companies have a financial strength rating of AA (Very Strong) from Standard & Poor's Corporation. Our major domestic insurance companies have a financial strength rating of AA (Very Strong) from Fitch Ratings, A1 (Good Security) from Moody's Investors Service, Inc., and A+ (Superior) from A.M. Best Company, Inc.

Key facts about our consolidated group as of and for the quarter ended March 31, 2010 are as follows:

We had consolidated shareholders' equity of \$3.1 billion. Our book value per share increased to \$26.91.

We had net earnings of \$71.4 million, or \$0.62 per diluted share.

We produced \$594.3 million of total revenue.

We recognized \$20.6 million of net catastrophic losses, primarily related to the Chilean earthquake. This loss increased our first quarter loss ratio by 4.0 percentage points.

Our loss ratio, including the catastrophic losses, was 64.1% and our combined ratio was 90.3%.

We declared dividends of \$0.135 per share and paid \$15.5 million of dividends.

We hold a \$4.9 billion portfolio of fixed income securities with an average rating of AA+ and a total investment portfolio of \$5.5 billion.

Comparisons in the following sections refer to the first three months of 2010 compared to the same period of 2009, unless otherwise noted. Amounts in tables are in thousands, except for earnings per share, percentages, ratios and number of employees.

Results of Operations

Net earnings were \$71.4 million (\$0.62 per diluted share) in the first three months of 2010, compared to \$83.2 million (\$0.73 per diluted share) in the same period of 2009. The 2010 net earnings included \$20.6 million (pretax) of net catastrophic losses, primarily from the Chilean earthquake, partially offset by a \$5.0 million pretax gain, net of related expenses, that we realized from commuting a derivative contract. The 2009 net earnings included a \$15.6 million pretax gain, net of related expenses, from the commutation of the MGIC reinsurance contract.

These items are described more fully below:

In 2010, we incurred a gross loss of \$31.9 million and a net loss of \$20.6 million after reinsurance related to several catastrophic events that occurred in the first quarter, including the Chilean and Haitian earthquakes and the European windstorm Xynthia. The net catastrophic losses increased our first quarter 2010 loss ratio and combined ratio by 4.0 percentage points and decreased net earnings by \$0.12 per diluted share.

In 2010, we commuted our interest in a long-term mortgage impairment insurance contract that had been accounted for as a derivative financial instrument. The contract was denominated in British pound sterling. We received £5.6 million (\$8.3 million) of cash and recognized a gain of \$8.0 million, which was included in other operating income, and incurred related expenses of \$3.0 million, which were included in other operating expense in the condensed consolidated statements of earnings.

In 2009, we commuted, loss-free, all liability under a contract with Mortgage Guarantee Insurance Corporation (MGIC) to provide reinsurance coverage for certain residential mortgage guaranty contracts. We had been recording revenue under this contract using the deposit method of accounting because we determined the contract did not transfer significant underwriting risk. We received a cash termination payment of \$25.0 million in the first quarter. As a result of the termination, other operating income increased \$20.5 million, and fee and commission income increased \$5.0 million. This additional revenue was partially offset by \$9.9 million of expenses for reinsurance and other direct costs, which were recorded in other operating expense.

The following table sets forth the relationships of statement of earnings line items as a percent of total revenue.

	Three months ended March 31,	
	2010	2009
Net earned premium	85.8%	83.6%
Fee and commission income	3.5	5.0
Net investment income	8.3	7.5
Other operating income	1.6	3.9
Net realized investment gain	0.8	0.5
Other-than-temporary impairment loss		(0.5)
Total revenue	100.0	100.0
Loss and loss adjustment expense, net	55.0	52.5
Policy acquisition costs, net	15.6	14.8
Other operating expense	11.2	11.5
Interest expense	0.9	0.8
Earnings before income tax expense	17.3	20.4
Income tax expense	5.3	6.6
Net earnings	12.0%	13.8%

Revenue

Total revenue decreased \$6.5 million in 2010 due to: 1) the \$25.0 million from the 2009 commutation of the MGIC reinsurance contract, partially offset by 2) higher net earned premium in 2010 and 3) \$8.0 million of revenue in 2010 related to the gain on the commutation of a derivative contract.

Gross written premium, net written premium and net earned premium are detailed below. Growth in written premium occurred primarily in our London market account line of business, directly related to property treaty business that we began to write in late 2009. The increase in net earned premium was due to growth in our directors' and officers' liability business in 2009 and 2010. See the Insurance Company Segment section below for further discussion of the relationship and changes in premium revenue.

	Three months ended March 31,	
	2010	2009
Gross written premium	\$ 622,496	\$ 602,387
Net written premium	498,251	491,250
Net earned premium	509,587	502,388

The table below shows the source of our fee and commission income, which decreased 31% in 2010. The decrease primarily related to the sale of our U.K. reinsurance broker and the sale of the operations of our commercial marine agency business, both in 2009, and a \$5.0 million termination payment from the 2009 commutation of the MGIC reinsurance contract.

	Three months ended March 31,	
	2010	2009
Agencies	\$ 15,061	\$ 24,576
Insurance companies	5,932	5,718
Fee and commission income	\$ 20,993	\$ 30,294

The sources of net investment income are detailed below.

	Three months ended March 31,	
	2010	2009
Fixed income securities		
Taxable	\$ 26,868	\$ 25,105
Exempt from U.S. income taxes	21,731	20,333
Total fixed income securities	48,599	45,438
Short-term investments	190	884
Other	1,508	(52)
Total investment income	50,297	46,270
Investment expense	(1,048)	(1,052)
Net investment income	\$ 49,249	\$ 45,218

Net investment income increased 9% in 2010, primarily due to higher income from fixed income securities, generated from an increased amount of investments. Our fixed income securities portfolio increased 14% from \$4.3 billion at March 31, 2009 to \$4.9 billion at March 31, 2010. The growth in fixed income securities resulted primarily from cash flow from operations and reinvestment of funds that were held in short-term investments at December 31, 2009.

Short-term investment income declined in the first quarter of 2010, due to lower short-term market interest rates.

Other interest income in 2010 included \$0.6 million of interest related to a tax refund, and in 2009 included a \$1.0 million loss on hedge fund investments, which were liquidated in late 2008.

Other operating income was \$9.9 million in 2010 compared to \$22.9 million in 2009. The 2010 amount included an \$8.0 million gain related to commuting a derivative contract. The 2009 income included \$20.5 million from the commutation of the MGIC reinsurance contract. Period to period comparisons of our other operating income may vary substantially, depending on earnings generated by new transactions or investments, income or loss related to changes

in the fair value of certain investments, and gains or losses related to dispositions. The following table details the components of our other operating income.

	Three months ended March	
	2010	2009
	31,	
Contract using deposit accounting	\$	\$ 20,532
Strategic investments	410	750
Financial instruments	8,200	363
Other	1,296	1,251
Other operating income	\$ 9,906	\$ 22,896

Expenses

Loss and loss adjustment expense increased year-over-year primarily due to the \$20.6 million of net catastrophic losses incurred in 2010. Excluding the catastrophic losses, the 2010 loss and loss adjustment expense was 3% lower than in 2009. Our loss ratio was 64.1% for 2010 (which included 4.0 percentage points for the catastrophes), compared to 62.8% in 2009. Policy acquisition costs increased in 2010 due to: 1) our 2009 policy acquisition costs being lower due to the effect of a \$3.8 million premium deficiency reserve recorded at December 31, 2008, which reduced the amount of policy acquisition costs recognized throughout 2009 and 2) the higher amount of premium earned in 2010. See the Insurance Company Segment section below for further discussion of the changes in our loss and loss adjustment expense and policy acquisition costs.

Other operating expense, which includes compensation expense, decreased 3% in 2010. We had 1,874 employees at March 31, 2010 compared to 1,937 a year earlier. In 2009, we sold our U.K. reinsurance broker and the operations of our commercial marine agency business, which primarily accounts for the reduction in other operating expense and the number of employees in 2010. In addition, other operating expense for 2010 and 2009 included \$3.0 million and \$9.9 million of expense for costs directly related to the commutations of a derivative contract and the MGIC reinsurance contract, respectively. Currency conversion expense was \$1.5 million in 2010, compared to a \$0.1 million benefit in 2009.

Other operating expense includes \$3.2 million and \$3.7 million in 2010 and 2009, respectively, of stock-based compensation expense, after the effect of the deferral and amortization of policy acquisition costs related to stock-based compensation for our underwriters. In the first quarter of 2010, we granted \$17.6 million of restricted stock awards and units, with a weighted-average life of 6.2 years. At March 31, 2010, there was approximately \$28.8 million of total unrecognized compensation expense related to unvested options and restricted stock awards and units that is expected to be recognized over a weighted-average period of 4.1 years.

Our effective income tax rate was 30.7% for 2010, compared to 32.3% for 2009. The lower effective rate in 2010 related to the increased benefit from tax-exempt investment income relative to a lower pretax income base.

At March 31, 2010, total assets were \$8.9 billion and shareholders' equity was \$3.1 billion, compared to \$8.8 billion and \$3.0 billion, respectively, at December 31, 2009. Our book value per share was \$26.91, which increased from \$26.58 at December 31, 2009.

Segments

Insurance Company Segment

Net earnings of our insurance company segment decreased \$9.2 million, or 11%, in the first quarter of 2010. We recognized catastrophe losses in 2010 of \$20.6 million (pretax and net of reinsurance). In addition, the commutation of the MGIC reinsurance contract generated \$20.5 million in insurance company revenue in 2009. These two items more than offset the effect of higher net earned premium and greater investment income recognized in 2010, as well as the gain in 2010 from the commutation of a derivative contract.

Premium

Gross written premium was 3% higher in 2010 due to the addition of our property treaty business, which we began writing in late 2009, partially offset by reductions in other lines of business due to the soft insurance market. The overall percentage of retained premium, as measured by the percent of net written premium to gross written premium, was 80% and 82% in the first quarter of 2010 and 2009, respectively.

The following tables provide premium information by line of business.

The changes in premium volume and retention levels between quarters resulted principally from the following factors:

Diversified financial products Gross written premium was higher in 2009 because we wrote more directors and officers liability and errors and omissions business due to the perception of some of our competitors in the market place at that time. The pricing for credit insurance improved in 2010, and our premium has increased accordingly. Our retention rate was lower in 2010 due to lower quota share retention on our international directors and officers liability business and higher excess of loss premium. Net earned premium increased in 2010 primarily due to the high volume of directors and officers liability business written in 2009, primarily in the second half of the year.

Group life, accident and health The decrease in premium was due to our discontinuance of the provider excess business in late 2009.

Aviation We wrote less aviation premium in 2010 due to continuing competition for U.S. business and lack of growth in the aviation industry. Our international writings were stable due to improved pricing in the international market.

London market account Premium increased primarily due to our new property treaty business, which we started writing in late 2009. On a full year basis, our retained premium on the property treaty business is expected to approximate 80%.

Other specialty lines Although premium and retention ratios by product changed quarter-over-quarter, due to changes in the mix of business, total premium and the overall retention rate were essentially flat for our other specialty lines.

Losses and Loss Adjustment Expenses

Our gross loss ratio was 64.5% and 65.1% in 2010 and 2009, respectively. The 2010 gross loss ratio included 5.0 percentage points related to the catastrophes in 2010.

The table below shows the composition of net incurred loss and loss adjustment expense.

	Three months ended March 31, 2010		2009	
	Amount	Loss ratio	Amount	Loss ratio
2010 catastrophes	\$ 20,588	4.0%	\$	%
Adverse reserve development	5,010	1.0	4,727	0.9
All other net incurred loss and loss adjustment expense	300,923	59.1	310,839	61.9
Net incurred loss and loss adjustment expense	\$ 326,521	64.1%	\$ 315,566	62.8%

The adverse reserve development relating to prior year losses was approximately the same amount in both the first quarter of 2010 and 2009. The development in each year primarily resulted from the re-estimation of our net claim exposure for products primarily in the life, accident and health line of business. Deficiencies and redundancies in reserves occur as we review our loss reserves with our actuaries, increasing or reducing loss reserves as a result of such reviews and as losses are finally settled or claims exposures change.

We write directors and officers liability, errors and omissions liability and fiduciary liability coverage for public and private companies and not-for-profit organizations and continue to closely monitor our exposure to subprime lending issues. We provide coverage for certain financial institutions, which have potential exposure to shareholders lawsuits. At March 31, 2010, we had 17 Side A only and 77 non-Side A only directors and officers liability, errors and omissions liability and fiduciary liability claims related to subprime issues, compared to 17 and 75 claims, respectively, at December 31, 2009. Based on our present knowledge, we believe our ultimate losses from these coverages will be contained within our current overall loss reserves for these lines of business.

We have no material exposure to environmental or asbestos losses.

We believe we have provided for all material net incurred losses as of March 31, 2010. In addition, we have no material exposure to the Transocean event in April 2010, due to our facultative reinsurance coverage for this large loss.

The following table provides comparative net loss ratios by line of business and major product lines.

	Three months ended March 31, 2010		2009	
	Net earned premium	Net loss ratio	Net earned premium	Net loss ratio

comparison

The changes in net loss ratios between periods resulted principally from the following factors:

London market account The 2010 net loss ratios for all major product lines included the effect of the first quarter catastrophe losses, which increased the total London market account loss ratio by 56.9 percentage points. The 2009 net loss ratios included redundant reserve development on prior year hurricanes, which reduced the total London market account loss ratio by 4.2 percentage points.

Other specialty lines We incurred large losses on our film completion and film production businesses in 2009, which increased the total other specialty lines net loss ratio by 19.7 percentage points.

The table below provides a reconciliation of our reserves for loss and loss adjustment expense payable, net of reinsurance ceded, the amount of our paid claims and our net paid loss ratios.

	Three months ended March 31,	
	2010	2009
Net reserves for loss and loss adjustment expense payable at beginning of period	\$ 2,555,840	\$ 2,416,271
Net reserve additions from reinsurance to close of our Lloyd's syndicate business	8,110	30,209
Foreign currency adjustment	(27,113)	(18,272)
Incurred loss and loss adjustment expense	326,521	315,566
Loss and loss adjustment expense payments	(307,688)	(271,299)
Net reserves for loss and loss adjustment expense payable at end of period	\$ 2,555,670	\$ 2,472,475
Net paid loss ratio	60.4%	54.0%

The net paid loss ratio is the percentage of losses paid, net of reinsurance, divided by net earned premium for the period. The net paid loss ratio was higher in 2010, primarily due to a higher amount of claims payments for our directors' and officers' liability, credit and medical stop-loss businesses than in the prior year quarter.

Policy Acquisition Costs

Policy acquisition costs, which are reported net of the related portion of commissions on reinsurance ceded, as a percentage of net earned premium increased to 18.2% in 2010 from 17.7% in the first quarter of 2009, principally due to the effect of a \$3.8 million premium deficiency reserve recorded at December 31, 2008, which reduced the amount of policy acquisition costs recognized throughout 2009. The GAAP expense ratio of 26.2% in 2010 exceeded the expense ratio of 24.5% in the first quarter of 2009 primarily due to higher expenses related to our international business and higher currency conversion expense. In addition, the 2009 expense ratio included a benefit from reversing a provision for uncollectible reinsurance.

Agency Segment

Revenue from our agency segment was \$28.9 million in 2010, compared to \$48.1 million in 2009. The reduction was expected due to the sale of our U.K. reinsurance broker and the sale of the operations of our commercial marine agency business in 2009. In addition, we had \$5.0 million of revenue in 2009 from a termination payment from the commutation of the MGIC reinsurance contract. As a result of this lower revenue, the segment had a net loss of \$4.4 million in 2010 compared to net earnings of \$3.4 million in 2009. We expect the agency segment will generate net earnings for full year 2010 due to the seasonality of business written by our largest agency.

Other Operations Segment

Revenue and net earnings from our other operations segment were \$2.1 million and \$0.8 million, respectively, in 2010 compared to \$2.5 million and \$1.0 million, respectively, in 2009. Results of this segment may vary substantially period to period depending on our investment in or disposition of strategic investments.

Liquidity and Capital Resources

Credit market disruptions in recent years have resulted in a tightening of available sources of credit and significant liquidity concerns for many companies. We believe we have sufficient sources of liquidity at a reasonable cost at the present time, based on the following:

We held \$636.5 million of cash and liquid short-term investments at March 31, 2010, compared to \$940.1 million at December 31, 2009. We reinvested \$234.1 million of short-term investments in higher yielding fixed income securities in the first quarter of 2010.

Our insurance companies have sufficient resources to pay potential claims in 2010. As of December 31, 2009, we projected they will pay \$1.2 billion of claims and collect approximately \$314.7 million of reinsurance recoveries in 2010. At December 31, 2009, our insurance companies had approximately \$1.2 billion of cash, short-term investments, maturing bonds, and principal payments from asset-backed and mortgage-backed securities that will be available to pay these expected claims in 2010. There has been no significant change in our expectations of our subsidiaries' ability to pay claims as of March 31, 2010.

Our available for sale bond portfolio had a fair value of \$4.8 billion at March 31, 2010, compared to \$4.5 billion at December 31, 2009, and has an average rating of AA+. We intend to hold these securities until their maturity, but we would be able to sell securities to generate cash if the need arises. Should we sell certain securities in the portfolio before their maturity, we cannot be assured that we would recoup the full reported fair value of the securities sold at the time of sale.

Our debt consists of \$300.0 million principal amount of unsecured 6.30% Senior Notes due November 15, 2019. Our debt to total capital ratio was 8.8% at March 31, 2010 and 9.0% at December 31, 2009.

We have a committed \$575.0 million Revolving Loan Facility at a rate of 30-day LIBOR plus 25 basis points that matures December 19, 2011. At March 31, 2010, we had \$553.4 million of unused capacity, which we can draw against at any time at our request. If we do, we believe that the banks will be able and willing to perform on their commitments to us. The facility agreement contains two restrictive financial covenants, with which we were in compliance at March 31, 2010.

In the first quarter of 2010, we transferred \$22.2 million of outstanding letters of credit, which had been issued in 2009 on behalf of certain of our subsidiaries, to our Revolving Loan Facility. This transfer released \$26.4 million of fixed income securities that had previously been held as collateral for these letters of credit. The letters of credit now reduce available borrowing capacity under our Revolving Loan Facility.

During 2010, there was no significant change in our Standby Letter of Credit Facility used to guarantee our performance in our Lloyd's of London syndicates.

Our domestic insurance subsidiaries have the ability to pay \$217.8 million in dividends in 2010 to our holding company without obtaining special permission from state regulatory authorities. Our underwriting agencies have no restrictions on the amount of dividends that can be paid to our holding company. The holding company can utilize these dividends for any purpose, including to pay down debt, pay dividends to shareholders, fund acquisitions, repurchase common stock and pay operating expenses. Cash flow available to the holding company in 2010 is expected to be more than ample to cover the holding company's required cash disbursements.

We have a Universal Shelf registration statement that provides for the issuance of an aggregate of \$1.0 billion of securities, of which we have \$700.0 million of remaining capacity. These securities may be debt securities, equity securities, trust preferred securities, or a combination thereof. The shelf registration statement provides us the means to access the debt and equity markets relatively quickly, if we are satisfied with the current pricing in the financial market.

Cash Flow

We receive substantial cash from premiums, reinsurance recoverables, outward commutations, fee and commission income, proceeds from sales and redemptions of investments and investment income. Our principal cash outflows are for the payment of claims and loss adjustment expenses, premium payments to reinsurers, inward commutations, purchases of investments, debt service, policy acquisition costs, operating expenses, taxes and dividends. Cash provided by operating activities can fluctuate due to timing differences in the collection of premiums and reinsurance recoverables and the payment of losses and premium and reinsurance balances payable and the completion of

commutations.

We generated cash from operations of \$42.5 million and \$133.6 million in the first three months of 2010 and 2009, respectively. The components of our net operating cash flows are summarized in the following table.

	Three months ended March 31,	
	2010	2009
Net earnings	\$ 71,354	\$ 83,170
Change in premium, claims and other receivables, net of reinsurance, other payables and restricted cash	(29,390)	(8,379)
Change in unearned premium, net	(10,052)	(11,552)
Change in loss and loss adjustment expense payable, net of reinsurance recoverables	7,082	37,571
(Gain) loss on investments	(5,011)	1,020
Other, net	8,493	31,772
Cash provided by operating activities	\$ 42,476	\$ 133,602

We had \$36.4 million of higher claims payments in 2010, compared to 2009, which was the largest contributor to the reduction in cash provided by operating activities. Timing differences in the payment of reinsurance balances payable reduced our 2010 cash provided by operating activities by \$35.4 million compared to the first quarter of 2009. In 2010, we received \$8.3 million of cash to commute a derivative contract and, in 2009, we received \$25.0 million to commute the MGIC reinsurance contract. Cash provided by operating activities can fluctuate due to timing differences in the collection of premium and reinsurance recoverables and the payment of claims and premium and reinsurance balances payable.

We maintain a substantial level of cash and liquid short-term investments to meet anticipated payment obligations. During January 2010, we paid the final \$64.5 million due to previous holders of our 1.3% Convertible Notes that were submitted for conversion in December 2009, using cash held as of December 31, 2009. Our combined cash and short-term investments totaled \$636.5 million at March 31, 2010.

Investments

At March 31, 2010, we had \$5.5 billion of total investments, an increase of \$63.1 million from December 31, 2009. This table summarizes our investments by type, substantially all of which are reported at fair value, at March 31, 2010 and December 31, 2009.

	March 31, 2010		December 31, 2009	
	Amount	%	Amount	%
Short-term investments	\$ 576,576	11%	\$ 810,673	15%
U.S. government and government agency securities	369,995	7	328,535	6
Fixed income securities of states, municipalities and political subdivisions	1,110,823	20	1,059,426	19
Special purpose revenue bonds of states, municipalities and political subdivisions	1,262,201	23	1,146,334	21
Corporate fixed income securities	562,257	10	559,824	10
Residential mortgage-backed securities	1,014,909	18	944,182	17
Commercial mortgage-backed securities	149,574	3	146,217	3
Asset-backed securities	11,972		14,365	
Foreign government securities	289,304	5	307,891	6
Foreign non-government securities	167,169	3	134,091	3
Other investments	4,535		4,691	

Total investments	\$ 5,519,315	100%	\$ 5,456,229	100%

This table shows the average amount of investments, net income earned, related yields and duration, and average rating of our fixed income securities.

	Three months ended March 31,	
	2010	2009
Average investments, at cost	\$ 5,327,676	\$ 4,874,738
Net investment income *	49,249	45,218
Average short-term yield *	0.1%	1.2%
Average long-term yield *	4.2%	4.3%
Average long-term tax equivalent yield *	5.0%	5.2%
Average combined tax equivalent yield *	4.4%	4.7%
Weighted-average life of fixed income securities	6.6 years	6.1 years
Weighted-average duration of fixed income securities	5.0 years	4.8 years
Weighted-average combined duration	4.5 years	4.2 years
Average rating of fixed income securities	AA+	AA+

* Excluding realized and unrealized gains and losses.

This table summarizes our investments in fixed income securities by their rating category at March 31, 2010.

	Available for sale at fair value		Held to maturity at amortized cost	
	Amount	%	Amount	%
AAA	\$ 2,267,486	47%	\$ 135,619	100%
AA	1,697,665	35		
A	691,650	15		
BBB	112,549	2		
BB and below	33,235	1		
Total fixed income securities	\$ 4,802,585	100%	\$ 135,619	100%

The overall rating of our municipal bonds (consisting of our fixed income securities of states, municipalities and political subdivisions and our special purpose revenue bonds of states, municipalities and political subdivisions) was AA at March 31, 2010. Our portfolio of special purpose revenue bonds at March 31, 2010 and December 31, 2009 included \$112.5 million and \$138.7 million, respectively, of pre-refunded bonds that are supported by U.S. government debt obligations. The remaining special purpose bonds are secured by revenue sources specific to each security, such as water, sewer and utility fees; highway tolls; airport usage fees; property, sales and fuel taxes; college tuition and services fees; electric utilities and lease income. The table below summarizes our percentage holdings of special purpose revenue bonds by revenue source:

	March 31, 2010	December 31, 2009
Water and sewer	27%	27%
Education	16	14

Transportation	13	13
Special tax	10	11
Pre-refunded	9	13
Leasing	8	8
Electric	7	7
Other	10	7
Total	100%	100%

Many of our special purpose revenue bonds are insured by mono-line insurance companies or supported by credit enhancement programs of various states and municipalities. We view bond insurance as credit enhancement and not credit substitution. We base our investment decision on the strength of the issuer. A credit review is performed on each issuer and on the sustainability of the revenue source before we acquire a special purpose revenue bond and periodically, on an ongoing basis, thereafter. The underlying average credit rating of our special purpose revenue bond issuers, excluding any bond insurance, was AA at March 31, 2010. Although recent

economic conditions in the United States may reduce the source of revenue to support certain of these securities, the majority are supported by revenue from essential sources, such as water and sewer, education and transportation fees, which we believe generate a stable source of revenue.

At March 31, 2010, we held a corporate bond portfolio with a fair value of \$562.3 million, an overall rating of A, and a weighted-average life of approximately 3.1 years.

At March 31, 2010, we also held a portfolio of residential mortgage-backed securities (MBSs) and collateralized mortgage-obligations (CMOs) with a fair value of \$1.0 billion. Within our residential MBS/CMO portfolio, \$950.6 million of securities, or 95%, were issued by the Federal National Mortgage Association (Fannie Mae), the Government National Mortgage Association (GNMA) and the Federal Home Loan Mortgage Corporation (Freddie Mac), which are backed by the U.S. government. Of the remaining \$64.3 million of residential mortgage-backed securities, 92% were collateralized by prime mortgages.

At March 31, 2010, we held a commercial MBS securities portfolio with a fair value of \$149.6 million, an average rating of AA+, an average loan-to-value ratio of 70%, and a weighted-average life of approximately 4.7 years. We owned no collateralized debt obligations (CDOs) or collateralized loan obligations (CLOs), and we have never been counterparty to any credit default swap transactions.

This table indicates the expected maturity distribution of our fixed income securities at March 31, 2010.

	Available for sale at amortized cost		Asset-backed and mortgage-backed at amortized cost		Held to maturity at amortized cost		Total fixed income securities	
	Amount	%	Amount	%	Amount	%	Amount	%
One year or less	\$ 309,014	9%	\$ 305,647	27%	\$ 38,205	28%	\$ 652,866	14%
One year to five years	1,104,920	31	834,198	73	87,012	64	2,026,130	42
Five years to ten years	803,390	23			10,402	8	813,792	17
Ten years to fifteen years	687,406	20					687,406	14
More than fifteen years	594,127	17					594,127	13
Total fixed income securities	\$ 3,498,857	100%	\$ 1,139,845	100%	\$ 135,619	100%	\$ 4,774,321	100%

A security has an impairment loss when its fair value is less than its cost or amortized cost at the balance sheet date. The gross unrealized losses of the individual securities within our available for sale fixed income securities portfolios were \$12.4 million at March 31, 2010, compared to \$18.9 million at December 31, 2009. We evaluate the securities in our fixed income securities portfolio for possible other-than-temporary impairment losses at each quarter end. For a description of the accounting policies and procedures that we use to determine our other-than-temporary impairment losses, see Footnote 3, Investments, in the notes to these condensed consolidated financial statements and Critical Accounting Policies Other-than-temporary Impairments in Investments in Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the year ended December 31, 2009. We recognized no other-than-temporary impairment losses in the first quarter of 2010 and \$3.1 million of other-than-temporary impairment credit losses in the first quarter of 2009.

At March 31, 2010, the net unrealized gain on our available for sale fixed income securities portfolio was \$163.9 million, compared to \$156.3 million at December 31, 2009. The change in the net unrealized gain, net of the related income tax effect, is recorded in other comprehensive income and fluctuates with changes in market interest

rates. Our general policy has been to hold our fixed income securities, most of which are primarily classified as available for sale, through periods of fluctuating interest rates and to not realize significant gains or losses from their sale. We recognized \$4.5 million and \$3.1 million of net realized investment gains in 2010 and 2009, respectively.

Accounting Guidance Adopted in 2010

A new accounting standard, originally issued as SFAS No. 167, *Amendments to FASB Interpretation No. 46(R)*, became effective January 1, 2010. The guidance, which was incorporated into Accounting Standards Codification Topic 810, *Consolidation*, changes various aspects of accounting for and disclosures of interests in variable interest entities. Our adoption of this guidance as of January 1, 2010 had no material impact on our condensed consolidated financial statements.

Effective January 1, 2010, we adopted Accounting Standards Update No. 2010-06, which incorporated changes in disclosure requirements into ASC Topic 820, *Fair Value Measurements and Disclosures*. When applicable, we have included the additional required disclosures in the notes to our condensed consolidated financial statements.

Critical Accounting Policies

We have made no changes in the identification or methods of application of our critical accounting policies from the information provided in Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies*, in our Annual Report on Form 10-K for the year ended December 31, 2009.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes in market risk from the information provided in Item 7A, *Quantitative and Qualitative Disclosures About Market Risk*, in our Annual Report on Form 10-K for the year ended December 31, 2009.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Act)) that are designed to ensure that required information is recorded, processed, summarized and reported within the required timeframe, as specified in rules set forth by the Securities and Exchange Commission. Our disclosure controls and procedures are also designed to ensure that information required to be disclosed is accumulated and communicated to management, including our Chief Executive Officer (CEO) and Chief Financial Officer (CFO), to allow timely decisions regarding required disclosures.

Our management, with the participation of our CEO and CFO, evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of March 31, 2010. Based on this evaluation, our CEO and CFO concluded that our disclosure controls and procedures were effective as of March 31, 2010.

(b) Changes in Internal Control over Financial Reporting

During the first quarter of 2010, there were no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II Other Information

Item 1. Legal Proceedings

We are a party to lawsuits, arbitrations and other proceedings that arise in the normal course of our business. Many of such lawsuits, arbitrations and other proceedings involve claims under policies that we underwrite as an insurer or reinsurer, the liabilities for which, we believe, have been adequately included in our loss reserves. Also, from time to time, we are a party to lawsuits, arbitrations and other proceedings that relate to disputes with third parties, or that involve alleged errors and omissions on the part of our subsidiaries. We have provided accruals for these items to the extent we deem the losses probable and reasonably estimable. Although the ultimate outcome of these matters cannot be determined at this time, based on present information, the availability of insurance coverage and advice received from our outside legal counsel, we believe the resolution of any such matters will not have a material adverse effect on our consolidated financial position, results of operations or cash flows.

Item 1A. Risk Factors

There have been no material changes in the risk factors described in our Annual Report on Form 10-K for the year ended December 31, 2009.

Item 6. Exhibits

a. Exhibits

- 3.1 Restated Certificate of Incorporation and Certificate of Amendment of Certificate of Incorporation of HCC Insurance Holdings, Inc., filed with the Delaware Secretary of State on July 23, 1996 and May 21, 1998, respectively (incorporated by reference to Exhibit 4.1 to our Registration Statement of Form S-8 (Registration No. 333-61687) filed August 17, 1998).
- 3.2 Amended and Restated Bylaws of HCC Insurance Holdings, Inc., as amended, (incorporated by reference to Exhibit 3.1 to our Form 8-K filed April 3, 2008).
- 10.1 First Amendment to Employment Agreement effective April 19, 2010, between HCC Insurance Holdings, Inc. and William T. Whamond (incorporated by reference to Exhibit 10.01 to our Form 8-K filed on April 19, 2010).
- 12 Statement of Ratio of Earnings to Fixed Charges.
- 31.1 Certification by Chief Executive Officer.
- 31.2 Certification by Chief Financial Officer.
- 32 Certification with Respect to Quarterly Report.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
