LJ International Inc. While the Company is based in Hong Kong, its manufacturing operations are in the People's Republic of China (PRC) and most of its sales are currently in the United States of America (US). The Group also owns certain commercial and residential properties located in Hong Kong, which are held primarily for investment purposes. The unaudited condensed consolidated financial statements included the accounts of LJ International Inc. and its subsidiaries. All material intercompany accounts and transactions have been eliminated on consolidation. The information furnished reflects, in the opinion of the management of the Company, all adjustments, consisting of normal recurring accruals, which are necessary to present a fair statement of the results for the interim periods presented.

The interim figures are not necessarily indicative of the results to be expected for the fiscal year due to the seasonal nature of the business.

Certain prior period amounts have been reclassified to conform to current period presentation.

The company has restated the financial statements for the three months and nine months ended September 30, 2005 and the same periods ended September 30, 2006 as a result of change of accounting treatment for the step acquisition in fiscal year 2005 and restatement of other revenues to be reflected as operating revenue and expenses. The following financial statements line items were affected by the change.

4. STOCK BASED COMPENSATION**The 1998 Stock Compensation Plan**

Table of Contents

of issuance of such options. The plan provides that incentive stock options and/or nonqualified stock options may be granted to our officers, directors, employees and advisors selected by the compensation committee. A total of 4,000,000 shares of common stock are authorized and reserved for issuance during the term of the plan, which expires in June 2008. The compensation committee has the sole authority to interpret the plan and make all determinations necessary or advisable for administering the plan. The exercise price for any incentive option must be at least equal to the fair market value of the shares as of the date of grant. Upon the exercise of the option, the exercise price must be paid in full either in cash, shares of our stock or a combination. If any option is not exercised for any reason, such shares shall again become available for the purposes of the plan.

On October 17, 2000, the Company offered each option holder the opportunity to cancel all or some of the stock options previously granted in exchange for the granting on April 30, 2001 of options to acquire an equal number of shares with an exercise price equal to the then last sale price of the stock on April 30, 2001, for a new term of seven years expiring April 30, 2008.

As of September 30, 2006, 3,139,500 options had been exercised and the following options to purchase shares of our common stock under the plan remained outstanding:

- o stock options to purchase 449,000 and 20,000 shares at \$2.00 per share through April 30, 2008 and June 30, 2013 respectively, and 391,500 shares of \$2.25 per share through April 30, 2008, of which 795,500 shares are held by the directors and officers as a group.

The 2003 Stock Compensation Plan

Effective July 1, 2003, the Company adopted and approved the 2003 Stock Compensation Plan, which the shareholders approved on December 5, 2003. The purpose of the plan is to:

- o encourage ownership of the common stock by the Company's officers, directors, employees and advisors;
- o provide additional incentive for them to promote the Company's success and the Company's business; and
- o encourage them to remain in employment by providing them an opportunity to benefit from any appreciation of the Company's common stock through the issuance of stock options.

Options constitute either incentive stock options within the meaning of Section 422 of the United States Internal Revenue Code of 1986, as amended, or options which constitute nonqualified options at the time of issuance of such options. The plan provides that incentive stock options and/or nonqualified stock options may be granted to our officers, directors, employees and advisors selected by the compensation committee. A total of 4,000,000 shares of common stock are authorized and reserved for issuance during the term of the plan, which expires in June 2013. The compensation committee has the sole authority to interpret the plan and make all determinations necessary or advisable for administering the plan. The exercise price for any incentive option or nonqualified option may be less than the fair market value of the shares as of the date of grant. Upon the exercise of the option, the exercise price must be paid in full either in cash, shares of our stock or a combination. If any option is not exercised for any reason, such shares shall again become available for the purposes of the plan.

As of September 30, 2006, 3,005,000 options had been exercised and the following options to purchase shares of the common stock under the plan remained outstanding:

Table of Contents**The 2005 Stock Compensation Plan**

Effective July 1, 2005, the Company adopted and approved the 2005 Stock Compensation Plan, which the shareholders approved on September 26, 2005. The purpose of the plan is to:

- o encourage ownership of the common stock by the Company's officers, directors, employees and advisors;
- o provide additional incentive for them to promote the Company's success and the Company's business; and
- o encourage them to remain in employment by providing them an opportunity to benefit from any appreciation of the Company's common stock through the issuance of stock options.

Options constitute either incentive stock options within the meaning of Section 422 of the United States Internal Revenue Code of 1986, as amended, or options which constitute nonqualified options at the time of issuance of such options. The plan provides that incentive stock options and/or nonqualified stock options may be granted to our officers, directors, employees and advisors selected by the compensation committee. A total of 4,000,000 shares of common stock are authorized and reserved for issuance during the term of the plan, which expires in June 2015. The compensation committee has the sole authority to interpret the plan and make all determinations necessary or advisable for administering the plan. The exercise price for any incentive option or nonqualified option may be less than the fair market value of the shares as of the date of grant. Upon the exercise of the option, the exercise price must be paid in full either in cash, shares of our stock or a combination. If any option is not exercised for any reason, such shares shall again become available for the purposes of the plan.

As of September 30, 2006, no options had been granted under the plan.

As of December 31, 2005, the Company recorded compensation expense for stock-based employee compensation plans using the intrinsic value method pursuant to APB Opinion No. 25 in which compensation expense was measured as the excess of the market price of the stock over the exercise price of the award on the measurement date.

Compensation expense was charged to income as when incurred if the benefit was fully vested at the date of grant or was recognized proportionately over the vesting period. No compensation expense was recognized for these stock options granted to employees at exercise price which was same as or higher than the market price of the underlying stock on the date of grant.

Had the compensation expenses for the stock options been determined based on the fair value of the date of grant and been amortized over the period from the date of grant to the award was vested, consistent with the provisions of SFAS No. 123, the Company's net income and earnings per share for the three months and nine months ended September 30, 2005 would have been reported as follows:

	Three months ended September 30, 2005 US\$	Nine months ended September 30, 2005 US\$

There was no effect of change on cash flows from operations and cash flows from financing activities as there is no tax effect on the stock compensation cost recognized.

Effective January 1, 2006, the Company began recording compensation expense associated with stock-based awards and other forms of equity compensation in accordance with Statement of Financial Accounting Standards No. 123-R, Share-Based Payment, (SFAS 123R) as interpreted by SEC Staff Accounting Bulletin No. 107. The Company adopted the modified prospective transition method provided for under SFAS 123R, and consequently has not retroactively adjusted results from prior periods. Under this transition method, compensation cost associated with stock-based awards recognized for the year ended December 31, 2006 now includes: (1) amortization related to the remaining unvested portion of stock-based awards granted prior to January 1, 2006, based on the grant date fair value estimated in accordance with the original provisions of Statement of Financial Accounting Standards No. 123, Accounting for Stock-Based Compensation, (SFAS 123); and (2) amortization related to stock-based awards granted subsequent to January 1, 2006, based on the grant-date fair value estimated in accordance with the provisions of SFAS 123R.

There was no stock option granted to employees during the nine months period ended September 30, 2006, no compensation cost associated with stock-based awards was recognised. However, under the transition method, the Company had to recognise compensation cost associated with stock-based awards related to the amortization of the remaining unvested portion of stock-based awards granted prior to January 1, 2006. This compensation cost was recognised at the year ended December 31, 2006.

There was no effect of change on cash flows from operations and cash flows from financing activities as there is no stock compensation cost recognized for the three months and nine months ended September 30, 2006.

LJ INTERNATIONAL INC.
MANAGEMENT'S DISCUSSION AND ANALYSIS
OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
(INFORMATION SUBSEQUENT TO DECEMBER 31, 2005 IS UNAUDITED)

We are a totally vertically integrated company that designs, brands, markets and distributes a complete range of fine jewelry. While we specialize in the colored jewelry segment, we also offer high-end pieces set in yellow gold, white gold, platinum or sterling silver and adorned with colored stones, diamonds, pearls and precious stones. We distribute mainly to fine jewelers, department stores, national jewelry chains and TV shopping channels and discount chain stores throughout North America, Western Europe, Australia and Japan. Our product lines incorporate all major categories sought by major retailers, including earrings, necklaces, pendants, rings and bracelets.

We believe that our vertically integrated structure provides significant advantages over our competitors. All profits from value added processes are captured internally, rather than shared with third party manufacturers. This results in very competitive pricing for the retailer and enhanced profits for us. Innovative processes in stone cutting and manufacturing further enhance our competitive position.

We employ an international design team and all of our designs and merchandising strategies are proprietary. Our exclusive and innovative concepts that we create offer brand potential. Our primary marketing focus has been in North America where we have sold directly to certain high volume customers who need specialized product development services and through a marketing relationship with International Jewelry Connection for those customers that need higher levels of service and training.

We organize our marketing and distribution strategies by retail distribution channels. Concepts are developed for the specific needs of different market segments. We have identified the following as prime retail targets:

- fine jewelers;
- national jewelry chains;
- department stores;
- TV shopping channels; and
- discount chain stores.

Operating Activities:

Net cash used in operating activities during the nine months period ended September 30, 2006 was \$10,837,000, compared to net cash used in operating activities of \$11,982,000 in the same period last year. The net cash used in operating activities reflected the accumulation of inventory in anticipation of significant increase in sales, and the build up of inventory for the growing retail business in Hong Kong, Macau and China, and rental deposits paid for retail stores. The rise in cost of gold and gemstones also attributed to the increase in net cash used in operating activities.

Investing Activities:

Net cash used in investing activities during the nine months period ended September 30, 2006 was \$1,616,000, which was primarily attributed to the capital expenditures for retail business. For the same period last year, net cash used in investing activities of \$3,853,000 was attributable to the increase in capital expenditure, and purchases of capital guaranteed fund form banks for securing new banking facilities, and partially offset by the reduction in restricted cash.

Financing Activities:

Net cash provided by financing activities during the nine months period ended September 30, 2006 was \$15,839,000, which represented the increase of bank overdrafts, proceeds from issuance of shares upon exercise of stock options and warrants, net proceeds from private placement, new bank loans acquired, and offset by the repayment of matured bank loans, and increase in letter of credit and factoring. For the same period last year, net cash provided by financing activities was \$14,291,000.

Financing Sources**Banking Facilities and Notes Payables:**

We have various letters of credit and overdraft under banking facilities. The banking facilities are collateralized by land and buildings, investment properties, restricted cash deposits, factored receivables and personal guarantees of a director.

The letters of credit and bank overdrafts are denominated in H.K. dollars and U.S. dollars, bear interest at the floating commercial bank lending rates of the lender in which it operates, and are renewable annually with the consent of the relevant banks.

Notes payable:

	As of September 30 2006 US\$ 000	As of December 31 2005 US\$ 000
Notes payable	4,878	3,079

We have term loans classified under notes payable which are related to the Group's properties. These loans are denominated in H.K. dollars and Renminbi, bear interest at pre-fixed rates in Hong Kong and China upon renewal.

Gold Loan Facilities:

	As of September 30 2006 US\$ 000	As of December 31 2005 US\$ 000
Gold loan outstanding (in \$)	11,079	10,756
Gold loan outstanding (in troy ounces)	26,920	27,920
Gold loan interest rate	2.7%-3.1%	2.4%-2.6%

We have also secured gold loan facilities with various banks in Hong Kong, which bear a below-market interest rate. Due to lower interest rates charged for gold loans, our cost through our gold loan program has been substantially less than the costs that would have been incurred if we were to finance the purchase of all of our gold requirements with borrowings under our letter of credit facility or other credit arrangements. The gold loan, however, does expose us to certain market risks associated with potential future increases in the price of gold, so in 2003, we have put in place mechanisms to hedge against such risks. Under the gold loan arrangements, we may defer the purchase until such time as we deem appropriate, the price to be paid being the current market price at time of payment. At the close of each reporting period, the gold loan is valued at fair value with changes reflected on the income statement.
