CHAIRMAN'S STATEMENT  
-----

Dear Shareholders:

We are pleased to present the Annual Report of The Taiwan Fund, Inc. (the "Fund") for the fiscal year ended August 31, 2002. During this period, the Fund's net asset value ("NAV") increased by 5.21% in U.S. dollar terms and by 3.72% in New Taiwan ("NT") dollar terms. During the same period, the Taiwan Stock Exchange Index (the "TAIEX") increased by 5.67% in NT dollar terms. The NT dollar appreciated over the U.S. dollar by 0.97% during this period.

## Edgar Filing: TAIWAN FUND INC - Form N-30D

On August 31, 2002, the Fund's shares were trading at US\$9.27 per share, reflecting a discount of 18.04% to the Fund's NAV per share of US\$11.31. The Fund's shares were trading at a discount of 8.09% on August 31, 2001.

The year began well, as the global economy rebounded sharply from its low in 2001. U.S. Gross Domestic Product ("GDP") rose at an annual rate of 2.7% in the fourth quarter of 2001, up from a decline of 0.3% in the third quarter of 2001. After dipping into a recession in early 2001 due to a massive inventory correction, the resilient U.S. economy regained its momentum in late 2001 and helped in a global recovery. The key to this recovery was continued consumer demand in the U.S., which was surprisingly strong in the aftermath of the 9-11 terrorist attacks. Low interest rates, growing personal income, stabilizing stock markets, and a strong housing sector all contributed to the strength of U.S. consumer spending. As U.S. businesses replenished their inventories, Taiwan's economy rebounded with strong export growth in the second half of 2001.

Nevertheless, the pace of the global recovery seemed to slow down in the second quarter of 2002. U.S. GDP growth in the second quarter declined to just 1.1%, down from 5% in the first quarter. While business investments made a turnaround with positive growth, consumer spending lost its momentum and experienced weaker growth for the second consecutive quarter. If consumer spending plateaus, the global recovery may take more time to resume a stable upward trend. With global demand easing, Taiwan's export growth is expected to decline during late 2002.

Taiwan's economic activity in 2002 was in line with global activity, with exports recovering in the fourth quarter of 2001. Driven by stronger export growth, Taiwan's GDP growth increased from -4.42% in the third quarter of 2001, to a projected 4.06% in the third quarter of 2002, according to recent government estimates. In light of a slower global economy, however, we expect to see softening results in Taiwan's economic activities, including export orders and industrial production.

2

-----

Nevertheless, we remain optimistic about Taiwan's economy for the coming year. Although the global recovery may be slow, we believe it will continue in 2003. U.S. business investments, for example, have been stabilizing since the fourth quarter of 2001. Business inventories have been controlled at a reasonable level after massive corrections in 2001. A stronger recovery is therefore expected for 2003, when businesses increase their investments in areas such as PC upgrades, and consumers come back into stores to spend with more confidence.

In addition, we believe that Taiwan can benefit significantly from its increasing ties to the booming Chinese economy. Taiwan is China's fourth largest foreign investor, and the second largest importer. With its projected GDP growth of over 7% in 2002 and over 5% in 2003, China is capturing the world's attention with its enormous potential. Taiwan's exports to China (including via Hong Kong) as a percentage of total exports have risen significantly from approximately 18% in 2000 to the current level of 25%. With the current mixed global outlook, China provides Taiwan a great support to rely on for the foreseeable future.

A positive factor on the economic front, China is nonetheless a negative factor on the political front. Although political events seldom generate a long-term impact upon the economy, the stock market may from time-to-time suffer their consequences. In the next twelve months, however, we do not foresee cross-strait tensions escalating significantly. In fact, the market appears relatively immune

## Edgar Filing: TAIWAN FUND INC - Form N-30D

to such issues after being affected by the "one country on each side" statement, when President Chen Shui-bian delivered his speech back in August. It should also be noted that the official reactions to this event, in China, the U.S. and Taiwan, confirmed that no leaders wanted to increase political tensions at this time. Economic issues are expected to remain a top priority for policymakers across the strait.

However, the most important political factor affecting the global market is the increasing likelihood of a war between the U.S. and Iraq. Confidence will wane during a period of prolonged warfare, deterring businesses from making their expected investments. Consumer demand will also weaken. Financial markets are likely to stay volatile with the impending threat of war.

During the past year, the Fund's shares were trading at an average discount of around 10.3%. The discount varied primarily due to changes in market sentiment. We are confident that with the Fund's strong portfolio management team, the discount should gradually narrow over the long term.

3

---

### CHAIRMAN'S STATEMENT

---

We expect the TAIEX to break out of its downward trend in the near term, as most of the bad news, such as the slowing economic recovery and the threat of war in the Middle East, is already reflected in current share prices. Taiwan's long-term economic outlook, in our opinion, remains promising. The current low valuation only provides another buying opportunity for prudent investors. We remain positive on the future performance of the Fund, which has provided satisfactory results after the Fund's investment adviser implemented its new portfolio strategy in May. The Board maintains its confidence in the Fund's long-term performance, and we thank you for your continued support.

Sincerely,

/s/ S.Y. Wang

### REPORT OF THE INVESTMENT MANAGER

---

#### INVESTMENT PERFORMANCE

The Fund's net asset value ("NAV") increased by 5.21% in U.S. dollar terms and by 3.72% in New Taiwan ("NT") dollar terms during the fiscal year ended August 31, 2002. The Taiwan Stock Exchange Index (the "TAIEX") increased by 5.67% in NT dollar terms during the same period. The Fund's performance during this period

## Edgar Filing: TAIWAN FUND INC - Form N-30D

reflected drastic changes in the performance of the technology sector.

As of August 31, 2001, the Fund had allocated 62.9% of its NAV to the technology sector, compared to the index weighting of about 56%. During the following six months, the Fund posted a return of 30.1% in NT dollar terms, outperforming the TAIEX by 3.8%. The technology sector was the main contributor, with the Electronics Sub-Index beating the TAIEX by 11.9% during the same period. The Fund's exposure to the technology sector increased to 72.9% as of February 28, 2002, but the technology sector did not outperform the TAIEX in the following months. In the ensuing three months, the Fund's NAV declined by 6.7% in NT dollar terms, compared to the 0.36% decline of the TAIEX. The technology sector was the main reason, with the Electronics Sub-Index falling 7.9% during this period. The following table outlines the relative performance of the Fund, the Electronics Sub-Index and the TAIEX during the indicated periods.

Performance Comparison (percentage change in NT dollar terms)

	8/31/2001- 2/28/2002	2/28/2002- 5/31/2002	5/31/2002- 8/31/2002
The Fund	+30.09%	-6.70%	-14.55%
Electronics Sub-Index	+38.18%	-7.89%	-21.84%
TAIEX	+26.32%	-0.36%	-16.05%

Since May, however, the Fund's performance improved as we took over the management of the Fund's portfolio and consequently changed the Fund's sector weighting to match the market's latest developments. We believed that the technology sector was under pressure because of weakening consumer demand since late in the first quarter. On the other hand, basic materials stocks were still trading at high levels, fueled by strong demand in areas such as automobiles and real estate transactions at lowered interest rates. Therefore, we increased the weighting in the plastics sector and the rubber sector, and reduced our weighting in the technology sector. As it turned out, the plastics sector outperformed the TAIEX by 19.4% and the rubber sector outperformed the TAIEX by 33.7% during the three-month period ended August 31, 2002. As a result, we were able to outperform our benchmark during that period.

5

### REPORT OF THE INVESTMENT MANAGER (CONTINUED)

In addition, since May, the Fund has implemented a new investment process in our portfolio strategy. This process aims to increase investment efficiency and to utilize the outstanding research quality put together by our in-house investment team. In short, we divide our portfolio, as in the past, into the "core portfolio" and the "active portfolio". The core portfolio is designed to track the performance of the TAIEX. It aims to capture the fundamentals of Taiwan, which we believe are sound and promising for the long run.

## Edgar Filing: TAIWAN FUND INC - Form N-30D

As for the active portfolio, we follow a model portfolio created and maintained by our research team. The active portfolio is constructed in the following manner. In each sector, research analysts identify their top investment targets in a carefully selected universe of stocks, and assign investment weightings to those targets. Investment managers form an investment committee and together make decisions on the portfolio proposed by analysts, as well as sector weightings. The investment committee also decides on additional changes for the portfolio and weightings within sectors, when requested by analysts. We believe such a team effort helps generate an optimal portfolio that reflects the collective strength of our investment research. In fact, the active portfolio has successfully beaten the benchmark since its inception. We expect this trend to continue.

### INVESTMENT OUTLOOK

For the stock market, the calendar year began with a rebound at the start and later fell into a downward spiral. Now the question is: will next year produce another relapse? Or simply put, have we really seen the worst?

On the one hand, we see on-going downward pressure on the market in the near term, as weaker consumer demand threatens to dampen the global economy. On the other hand, we think that the current downturn provides great buying opportunities for long-term investors, as we believe the global economy will eventually survive the troubled waters and will revive later in 2003.

Looking forward, the global economy is still promising despite negative readings on recent economic indicators in the U.S., such as deteriorating consumer sentiment and the troublesome reports of the ISM index for business activity. The apparent weakness of U.S. consumer spending, which represents two-thirds of U.S. GDP, certainly cast clouds on the global economic outlook. There is no doubt that U.S. consumers have become more cautious in spending now, given the bad news of corporate scandals, falling stock prices and growing fears of a war. In determining consumers' long-term spending power, what is really important is their financial soundness, as measured by their job security and income level. In August, the U.S. Labor Department reported four straight months of na-

6

-----  
tional job gains. The U.S. unemployment rate in August fell to 5.7% from 5.9%. In addition, continued improvements in productivity have kept wages and salaries rising, making the case of continuing growth of personal income for U.S. workers. In light of the above, we believe consumer demand will be back on its normal track as people recover their confidence.

The corporate front is also starting to show signs of life. Although the profit outlook remains unclear, companies have stopped cutting back capital spending since the fourth quarter of 2001. It seems that the inevitable IT replacement cycle has quietly taken place. According to a CIO Magazine Tech Poll, there is a growing percentage of corporate IT managers who plan to increase spending in computer hardware over the next twelve months. As older PCs become more and more obsolete, chances are high that the much-anticipated PC upgrade cycle will start in 2003 after a long four-year drought. And since inventory levels remain low, a kick-off in IT demand driven by businesses may turn the technology sector around in the next couple of months. We believe it's time to buy while prices are low before the market comes to reflect this potential development.

## Edgar Filing: TAIWAN FUND INC - Form N-30D

For the TAIEX, it is even more tempting now to stay on the buy side. First, Taiwan has a great connection with China, which offers unparalleled growth opportunities, especially in today's global economic environment. Second, Taiwan is receiving an increasing number of outsourcing orders from U.S. and Japanese companies seeking cost reduction. In other words, Taiwan will survive a downturn, should that happen, and prosper in the ensuing upturn. Together with China, Taiwan has established its position as the world's factory. Third, Taiwan has a banking industry that is developing quickly into the lucrative consumer banking areas where markets are still relatively unexplored. Also, the government is reforming this industry at an unprecedented pace that promises to increase the long-term attractiveness of well-managed banks. Fourth, many Taiwanese companies have successfully developed new products that are still growing fast even in a sluggish economic environment. Finally, the valuation of the TAIEX is now at its lower end. In terms of price-to-book ratio, the market was trading at 1.5 times book value at the end of August. We believe at this level the market has limited downside risks, considering that Taiwan's long-term outlook remains promising. Moreover, liquidity is at an all time high with the Central Bank's Negotiable Certificate of Deposits outstanding approaching NT\$2 trillion. A boost of confidence is needed now and may come at any time.

We have set out four investment themes to focus on the areas described above. They include: 1) China Harvest Plays 2) Outsourc-

7

### REPORT OF THE INVESTMENT MANAGER (CONTINUED)

ing Winners 3) Consumer Banking and 4) New Products. Our top ten holdings in the active portfolio mostly fall into these categories. The following table provides a brief comment on each of these companies and shows their connection to our investment themes.

#### ACTIVE PORTFOLIO\* TOP TEN HOLDINGS

Company (Core Number)	Active Portfolio Weighting	Investment Theme	Comment
TSMC (2330)	7.90%	Outsourcing Winner	1. Foundry leader with strong competitive e 2. IDM outsourcing to accelerate on constr fab investments 3. World class corporate governance
Cheng Shin Rubber (2105)	5.62%	China Harvest Play	1. MAXXIS brand, world's No. 13 tire maker 2. China's No. 1 tire maker, to fully enjoy car market 3. Capacity in full run, now building new p in all of its China plants
Mediatek (2454)	4.41%	New Product	1. Leader in optical storage driver ICs 2. Continued advance in technology 3. New growth drivers ahead (combo drive, D handset chipset)
Hon Hai Precision	4.32%	Outsourcing Winner	1. Largest OEM player in Taiwan

## NOTES TO FINANCIAL STATEMENTS

### 1. SIGNIFICANT ACCOUNTING POLICIES

The Taiwan Fund, Inc. (the "Fund"), a Delaware corporation, is registered under the Investment Company Act of 1940, as amended (the "Act"), as a diversified closed-end management investment company.

The Fund is not permitted to invest directly in the securities of Republic of China ("ROC") companies. Therefore, it invests through a contractual securities investment trust fund arrangement. This arrangement was established by means of the Securities Investment Trust, Investment Management and Custodian Contract ("Management Contract") among HSBC Asset Management (Taiwan) Limited ("Adviser") (formerly "China Securities Investment Trust Corp." or "CSITC"), the International Commercial Bank of China (Custodian) and the Fund. Under the Management Contract the Adviser manages and invests the assets of the Fund and the Custodian holds the assets. The Fund is the sole beneficiary of the assets held under the Management Contract and, as required by ROC regulations, its interest in the assets is evidenced by units of beneficial interest.

The Fund concentrates its investments in the securities listed on the Taiwan Stock Exchange. Because of this concentration, the Fund may be subject to additional risks resulting from future political or economic conditions in Taiwan and the possible imposition of adverse governmental laws of currency exchange restrictions affecting Taiwan.

The Fund is treated as a Qualified Foreign Institutional Investor ("QFII"), which allows the Fund to own 100% of a company's shares. However, all Funds

## Edgar Filing: TAIWAN FUND INC - Form N-30D

managed by the Adviser are limited in aggregate to 10% ownership of a company's shares.

Taiwan's Affiliation Rules. ROC investment management company regulations currently prohibit an investment adviser from investing in securities issued by companies which are "affiliated parties" of such investment adviser. Recently, the ROC Securities and Futures Commission (the "SFC") interpreted "affiliated parties" broadly to include entities with directors or supervisors appointed by the same third party. As a result of the sale by China Development Industrial Bank of its interest in the Adviser on August 6, 2001, the Fund no longer holds any securities issued by "affiliated parties".

The policies described below are consistently followed by the Fund in the preparation of its financial statements in conformity with accounting principles generally accepted in the United States of America.

Security Valuation. All securities, including those traded over-the-counter, for which market quotations are readily available are valued at the last sales price prior to the time of determination of the Fund's net asset value per share or, if there were no sales on such date, at the closing price quoted for such securities (but if bid and asked quotations are available, at the mean between the last current bid and asked prices, rather than such quoted closing price). In certain instances where the price determined above may not represent fair market value, the value is determined in such manner as the Board of Directors may prescribe. Short-term investments, having a maturity of 60 days or less are valued at amortized cost, which approximates market value, with accrued interest or discount earned included in interest receivable.

Foreign Currency Translation. The financial accounting records of the Fund are maintained in U.S. dollars. Investment securities, other assets and liabilities denominated in a foreign currency are translated into U.S. dollars at the current exchange rate. Purchases and sales of securities, income receipts and expense payments are translated into U.S. dollars at the exchange rate on the dates of the transactions.

Reported net realized gains and losses on foreign currency transactions represent net gains and losses from disposition of foreign currencies, currency gains and losses realized between the trade dates and settlement dates of security transactions, and the difference between the amount of net investment income accrued and the

18

---

### NOTES TO FINANCIAL STATEMENTS (continued)

---

#### 1. SIGNIFICANT ACCOUNTING POLICIES - continued

U.S. dollar amount actually received. The effects of changes in foreign currency exchange rates on investments in securities are not segregated in the Statement of Operations from the effects of changes in market prices of those securities, but are included in realized and unrealized gain or loss on investments in securities.

Forward Foreign Currency Transactions. A forward foreign currency contract ("Forward") is an agreement between two parties to buy or sell currency at a set price on a future date.

The Fund may enter into Forwards in order to hedge foreign currency risk or for other risk management purposes. Realized gains or losses on Forwards include net

## Edgar Filing: TAIWAN FUND INC - Form N-30D

gains or losses on contracts that have matured or which the Fund has terminated by entering into an offsetting closing transaction. Unrealized appreciation or depreciation of Forwards is included in the Statement of Assets and Liabilities and is carried on a net basis. The portfolio could be exposed to risk of loss if the counterparty is unable to meet the terms of the contract or if the value of the currency changes unfavorably. As of August 31, 2002 the Fund had no open Forwards.

**Taxes.** As a qualified regulated investment company under Subchapter M of the Internal Revenue Code, the Fund is not subject to income taxes to the extent that it distributes all of its investment company taxable income and net realized capital gains for its fiscal year. In addition to federal income tax for which the Fund is liable on undistributed amounts, the Fund is subject to federal excise tax on undistributed investment company taxable income and net realized capital gains. The Schedule of Investments includes information regarding income taxes under the caption "Income Tax Information." The Fund is organized in Delaware and as such is required to pay Delaware an annual franchise tax. Also, the Fund is currently subject to a Taiwan security transaction tax of 0.3% on equities and 0.1% on corporate bonds and mutual fund shares of the transaction amount.

The Fund's functional currency for tax reporting purposes is the New Taiwan dollar.

**Investment Income.** Dividend income is recorded on the ex-dividend date, certain dividends from foreign securities are recorded as soon as the Fund is informed of the ex-dividend date.

Taiwanese companies typically declare dividends in the Fund's third fiscal quarter of each year. As a result, the Fund receives substantially less dividend income in the first half of its year. Interest income, which includes accretion of original discount, is accrued as earned.

Dividend and interest income generated in Taiwan is subject to a 20% withholding tax. Stock dividends received (except those which have resulted from capitalization of capital surplus) are taxable at 20% of the par value of the stock dividends received.

**Distributions to Shareholders.** The distributable income from the assets held under the Management Contract, which is limited to cash dividends and interest income received, may be distributed to the Fund only once in each year at the Fund's discretion and is recorded on the ex-dividend date. Realized capital gains and stock dividends may also be distributed to the Fund. Within the above limitations the Fund will, under current ROC regulations, be able to remit out of the ROC the proceeds of income and capital gains distributions, unit redemptions and other distributions of assets held under the Management Contract.

The Fund distributes to shareholders at least annually, substantially all of its taxable ordinary income and expects to distribute its taxable net realized gains. Certain foreign currency gains (losses) are taxable as ordinary income and, therefore, increase (decrease) taxable ordinary income available for distribution. Pursuant to the Dividend Reinvestment and Cash Purchase Plan (the "Plan"), shareholders may elect to have all distributions automatically reinvested in Fund shares. (See the summary of the Plan.) Shareholders who do not participate in the Plan will re-

1. SIGNIFICANT ACCOUNTING POLICIES - continued

ceive all distributions in cash paid by check in U.S. dollars. Income and capital gain distributions are determined in accordance with income tax regulations, which may differ from generally accepted accounting principles. These differences are primarily due to differing treatments for foreign currency transactions, losses deferred due to wash sales and excise tax regulations. Permanent book and tax basis differences relating to shareholder distributions will result in reclassifications to the Fund's components of net assets.

Security Transactions. Security transactions are accounted for as of the trade date. Gains and losses on securities sold are determined on the basis of identified cost.

Use of Estimates. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

2. PURCHASES AND SALES OF SECURITIES

For the fiscal year ended August 31, 2002, purchases and sales of securities, other than short-term securities, aggregated \$316,756,692 and \$312,087,772, respectively.

3. FEES AND OTHER TRANSACTIONS WITH AFFILIATES

Management Fee. As the Fund's investment adviser, the Adviser receives a fee that is computed daily at an annual rate of 1.30% of the Fund's average net assets. The basic fee is subject to a performance adjustment (up to a maximum of 0.30%) based on the Fund's investment performance as compared to the Taiwan Stock Exchange Index over a rolling 36-month period.

For the year ended August 31, 2002, the management fee, including the performance adjustments, was equivalent to an annual rate of 1.26% of average net assets.

Directors Fees. No director, officer or employee of the Adviser or its affiliates will receive any compensation from the Fund for serving as an officer or director of the Fund. The Fund pays each of its directors who is not a director, officer or employee of the Adviser an annual fee of \$10,000 plus \$1,000 for each Board of Directors' meeting or Audit Committee meeting attended. In addition, the Fund will reimburse each of the directors for travel and out-of-pocket expenses incurred in connection with Board of Directors' meetings.

Administration Fees. State Street Bank and Trust Company ("State Street") provides, or arranges for the provision of certain administrative and accounting services for the Fund, including maintaining the books and records of the Fund, and preparing certain reports and other documents required by federal and/or state laws and regulations. The Fund pays State Street a fee at the annual rate of 0.11% of the Fund's average daily net assets up to \$150 million, 0.08% of the next \$150 million, and 0.05% of those assets in excess of \$300 million, subject to certain minimum requirements.

4. FUND SHARES

At August 31, 2002, there were 20,000,000 shares of \$0.01 par value capital stock authorized, of which 16,365,572 were issued and outstanding. There were no shares issued or redeemed for the year ended August 31, 2002.

## Edgar Filing: TAIWAN FUND INC - Form N-30D

### 5. DISTRIBUTIONS

The Fund did not pay any distributions to shareholders during the year ended August 31, 2002. As of August 31, 2002, the components of distributable earnings on a tax basis were \$0 for Undistributed Ordinary Income, \$0 for Undistributed Long-Term Capital Gain, \$16,932,197 for Unrealized Appreciation (Depreciation), and \$(76,943,482) for accumulated capital and other losses.

The difference between book basis and tax basis unrealized appreciation and depreciation is attributable primarily to the tax deferral of losses on wash sales.

### INDEPENDENT AUDITORS' REPORT

---

THE BOARD OF DIRECTORS AND SHAREHOLDERS  
THE TAIWAN FUND, INC.:

We have audited the accompanying statement of assets and liabilities of The Taiwan Fund, Inc., including the Fund's investments, as of August 31, 2002, and the related statements of operations for the year then ended, and changes in net assets and financial highlights for each of the years in the two-year period then ended. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audit. The financial highlights for each of the years in the three-year period ended August 31, 2000 were audited by other auditors whose report, dated October 12, 2000, expressed an unqualified opinion on those financial highlights.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of August 31, 2002 by correspondence with the custodian. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of The Taiwan Fund, Inc. as of August 31, 2002, the results of its operations for the year then ended, and the changes in its net assets and financial highlights for each of the years in the two-year period then ended, in conformity with accounting principles generally accepted in the United States of America.

-----  
 OTHER INFORMATION  
 -----

SHARE REPURCHASE PROGRAM

The Board of Directors of the Fund, at a meeting held on April 23, 2001, authorized the Fund to repurchase up to 15% of the Fund's outstanding shares of common stock. The Fund will purchase such shares in the open market at times and prices determined by management of the Fund to be in the best interest of stockholders of the Fund. As of August 31, 2002, no shares have been repurchased by the Fund.

PRIVACY POLICY

-----  
 PRIVACY NOTICE  
 -----

The Taiwan Fund, Inc. collects nonpublic personal information about its shareholders from the following sources:

- [ ] Information it receives from shareholders on applications or other forms;
- [ ] Information about shareholder transactions with the Fund, its affiliates, or others; and
- [ ] Information it receives from a consumer reporting agency.

THE FUND'S POLICY IS TO NOT DISCLOSE NONPUBLIC PERSONAL INFORMATION ABOUT ITS SHAREHOLDERS TO NONAFFILIATED THIRD PARTIES (OTHER THAN DISCLOSURES PERMITTED BY LAW).

The Fund restricts access to nonpublic personal information about its shareholders to those agents of the Fund who need to know that information to provide products or services to shareholders. The Fund maintains physical, electronic, and procedural safeguards that comply with federal standards to guard its shareholders' nonpublic personal information.

 SUMMARY OF DIVIDEND REINVESTMENT AND

CASH PURCHASE PLAN  
 -----

WHAT IS THE DIVIDEND REINVESTMENT AND CASH PURCHASE PLAN?

The Dividend Reinvestment and Cash Purchase Plan (the "Plan") offers shareholders of The Taiwan Fund, Inc. (the "Fund") a prompt and simple way to reinvest their dividends and capital gains distributions in shares of the Fund. The Fund will distribute to shareholders, at least annually, substantially all of its net income and expects to distribute annually its net realized capital gains. State Street Bank and Trust Company acts as Plan Agent for shareholders in administering the Plan. The Plan also allows you to make optional cash investments in Fund shares through the Plan Agent.

WHO CAN PARTICIPATE IN THE PLAN?

If you own shares in your own name, you can elect to participate directly in the

## Edgar Filing: TAIWAN FUND INC - Form N-30D

Plan. If you own shares that are held in the name of a brokerage firm, bank, or other nominee, you should contact your nominee to arrange for them to participate on your behalf.

### WHAT DOES THE PLAN OFFER?

The Plan has two components; reinvestment of dividends and capital gains distributions, and a voluntary cash purchase feature.

### REINVESTMENT OF DIVIDENDS AND CAPITAL GAINS DISTRIBUTIONS

If you choose to participate in the Plan, your dividends and capital gains distributions will be promptly invested for you, automatically increasing your holdings in the Fund. If the Fund declares a dividend or capital gains distribution payable in cash, you will automatically receive shares purchased by the Plan Agent on the New York Stock Exchange or otherwise on the open market.

If a distribution is declared which is payable in shares or cash at the option of the shareholder and if on the valuation date (generally the payable date) the market price of shares is equal to or exceeds their net asset value, the Fund will issue new shares to you at the greater of the following: (a) net asset value per share or (b) 95% of the market price per share. If the market price per share on the valuation date is less than the net asset value per share, the Fund will issue new shares to you at the market price per share on the valuation date.

All reinvestments are in full and fractional shares, carried to three decimal places. In the case of foreign (non-U.S.) shareholders, reinvestment will be made net of applicable withholding tax.

### VOLUNTARY CASH PURCHASE OPTION

Plan participants have the option of making investments in Fund shares through the Plan Agent. You may invest any amount from \$100 to \$3,000 semi-annually. The Plan Agent will purchase shares for you on the New York Stock Exchange or otherwise on the open market on or about February 15 and August 15. If you hold shares in your own name, you should deal directly with the Plan Agent. We suggest you send your check to the following address to be received on or about February 5 or August 5 to allow time for processing: State Street Bank and Trust Company, P.O. Box 8200, Boston, MA 02266. The Plan Agent will return any cash payments received more than thirty days prior to February 15 or August 15, and you will not receive interest on uninvested cash payments. If you own shares that are held in the name of a brokerage firm, bank, or other nominee, you should contact your nominee to arrange for them to participate in the cash purchase option on your behalf.

23

---

### SUMMARY OF DIVIDEND REINVESTMENT AND

### CASH PURCHASE PLAN (continued)

---

### IS THERE A COST TO PARTICIPATE?

Each participant will pay a pro rata portion of brokerage commissions payable with respect to purchases of shares by the Plan Agent on the New York Stock Exchange or otherwise on the open market. Otherwise, there is no charge to participants for reinvesting dividends and capital gains distributions, since the Plan Agent's fees are paid by the Fund. Brokerage charges for purchasing shares through the Plan are expected to be less than the usual brokerage charges

## Edgar Filing: TAIWAN FUND INC - Form N-30D

for individual transactions, because the Plan Agent will purchase stock for all participants in blocks, resulting in lower commissions for each individual participant.

For purchases from voluntary cash payments, participants are charged a service fee of \$.75 for each investment and a pro rata share of the brokerage commissions.

Brokerage commissions and service fees, if any, will be deducted from amounts to be invested.

### WHAT ARE THE TAX IMPLICATIONS FOR PARTICIPANTS?

You will receive tax information annually for your personal records and to help you prepare your federal income tax return. The automatic reinvestment of dividends and capital gains distributions does not relieve you of any income tax which may be payable on dividends or distributions.

If the Fund issues shares upon reinvestment of a dividend or capital gains distribution, for U.S. federal income tax purposes, the amount reportable in respect of the reinvested amount of the dividend or distribution will be the fair market value of the shares received as of the payment date, which will be reportable as ordinary dividend income and/or long term capital gains. The shares will have a tax basis equal to such fair market value, and the holding period for the shares will begin on the day after the payment date. State, local and foreign taxes may also be applicable.

### ONCE ENROLLED IN THE PLAN, MAY I WITHDRAW FROM IT?

You may withdraw from the Plan without penalty at any time by written notice to the Plan Agent.

If you withdraw, you will receive, without charge, stock certificates issued in your name for all full shares, or, if you wish, the Plan Agent will sell your shares and send you the proceeds, less a service fee of \$2.50 and less brokerage commissions. The Plan Agent will convert any fractional shares you hold at the time of your withdrawal to cash at the current market price and send you a check for the proceeds.

### WHOM SHOULD I CONTACT FOR ADDITIONAL INFORMATION?

If you hold shares in your own name, please address all notices, correspondence, questions, or other communications regarding the Plan to: State Street Bank and Trust Company, P.O. Box 8200, Boston, MA 02266, 1-800-426-5523. If your shares are not held in your name, you should contact your brokerage firm, bank, or other nominee for more information and to arrange for them to participate in the Plan on your behalf.

Either the Fund or the Plan Agent may amend or terminate the Plan. Except in the case of amendments necessary or appropriate to comply with applicable law, rules or policies or a regulatory authority, participants will be mailed written notice at least 90 days before the effective date of any amendment. In the case of termination, participants will be mailed written notice at least 90 days before the record date of any dividend or capital gains distribution by the Fund.
