BSD MEDICAL CORPORATION Notes to Condensed Financial Statements

Note 1. Basis of Presentation

The Condensed Balance Sheet as of November 30, 2004 and the Condensed Statements of Operations and the Condensed Statements of Cash Flow for the three months ended November 30, 2004 and November 30, 2003, have been prepared by the Company without audit. In the opinion of management, all adjustments to the books and accounts (which include only normal recurring adjustments) necessary to present fairly the financial position, results of operations, and changes in financial position of the Company as of November 30, 2004, have been made.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. The results of operations for the period ended November 30, 2004, are not necessarily indicative of the results to be expected for the full year.

Note 2. Net Loss Per Common Share

Net loss per common share for the quarters ended November 30, 2004 and 2003, is based on the weighted average number of shares outstanding during the respective periods. Diluted earnings per share is based upon the weighted average share per common stock equivalent. When common stock equivalents are anti dilutive they are not included.

Note 3. Related Party Transactions

During the periods ended November 30, 2004 and 2003, the Company had sales to an unconsolidated affiliate and an entity controlled by a significant stockholder of \$7,154 and \$487,225, respectively. These related party transactions represents 3% and 72 % of total sales. Related party revenue from TherMatrx was \$0 in the period ended November 30, 2004 compared to \$20,572 in period ended November 30, 2003.

At November 30, 2004, receivables includes \$71,594 due from an entity controlled by a significant stockholder.

Note 4. Common Stock

During the period ended November 30, 2003, the Company completed the sale of an aggregate of 1,820,000 shares of common stock to three institutional investors. The shares of common stock were sold for cash consideration of \$1.10 per share, or a total of \$2,002,000, pursuant to the terms of the Securities Purchase Agreement. These gross proceeds were off-set by \$165,653 of accrued offering costs and commissions. In connection with this sale the Company issued a three-year warrant to the placement agent to purchase up to 91,000 shares of the Company's common stock at an exercise price per share of \$1.80 per share.

Note 5. Stock-Based Compensation

The Company accounts for stock options granted to employees under the recognition and measurement principles of APB Opinion No. 25, Accounting for Stock Issued to Employees, and related Interpretations, and has adopted the disclosure-only provisions of Statement of Financial Accounting Standards (SFAS) No. 123, "Accounting for Stock-Based Compensation." Accordingly, only the intrinsic value has been recognized in the financial statements as expense. Had the Company's options been determined based on the fair value method, the

Edgar Filing: BSD MEDICAL CORP - Form 10QSB

results of operations would have been reduced to the pro forma amounts indicated below for the three months ended November 30:

4

	2004	2003
Net loss - as reported	\$ (504,336)	\$ (24,136)
Add: Stock-based employee compensation expense included in reported net income, net of related tax effects	15,750	8,250
Deduct total stock based employee compensation expense determined under fair value based method for all awards, net of related taxes	(103,089)	(33,250)
Net loss - pro forma	\$ (591,675)	\$ (49,136)
Basic and Diluted income (loss) per share - as reported	\$ (.03)	\$.00
Basic and Diluted income (loss) per share - pro-forma	\$ (.03)	\$.00

The fair value of each option granted for the three months ended November 30, 2004 and 2003 is estimated on the date of grant using the Black-Scholes option pricing model with the following assumptions:

	2004	2003
Expected dividend yield	\$ -	\$ -
Expected stock price volatility	83%	114%
Risk-free interest rate	3.32%	4.2%
Expected life of options	10 years	5 years

The weighted average fair value of options granted during the three months ended November 30, 2004 and 2003 were \$1.20 and \$.64, respectively.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This Management's Discussion and Analysis of Financial Condition and Results of Operations and other parts of this report contain forward-looking statements that involve risks and uncertainties. Forward-looking statements can also be identified by words such as "anticipates," "expects," "believes," "plans," "predicts," and similar terms. Forward-looking statements are not guarantees of future performance and our actual results may differ significantly from the results discussed in the forward-looking statements. Factors that might cause such differences include, but are not limited to, those discussed in the

Edgar Filing: BSD MEDICAL CORP - Form 10QSB

subsections entitled "Forward-Looking Statements" below. The following discussion should be read in conjunction with our consolidated financial statements and notes thereto included in this report. All information presented herein is based on our quarter ended November 30, 2004. We assume no obligation to revise or update any forward-looking statements for any reason, except as required by law.

General

We develop, manufacture, market and service systems that deliver focused electromagnetic energy for use in a variety of medical therapies and applications. Our objective is to commercialize our developed products and further expand the application of our technology into new markets. We pioneered the use of microwave thermal therapy for the treatment of the symptoms

5

associated with enlarged prostate, and are responsible for much of the technology that has created a substantial medical industry using that therapy. Our longest-term development has been the application of focused electromagnetic energy for the treatment of cancer.

One of our significant contributions to the advancement of medical therapy has been our pioneering efforts in developing a new treatment for conditions associated with enlargement of the prostate that afflicts most men as they age. As the prostate enlarges it constricts urine flow. The condition is known medically as benign prostatic hyperplasia or BPH. We developed a technology that allows men to be treated for BPH through an outpatient procedure as an alternative to surgery or a lengthy regimen of medication.

We determined early in our planning that we would treat our BPH development as a spin-off business with the intent of providing an asset that could help fund our other business plans. As a result, we introduced the opportunity to investment groups and subsequently on October 31, 1997 entered into an agreement with investors Oracle Strategic Partners, L.P. and Charles Manker. Together we established a new company, TherMatrx, which was independently managed.

On July 15, 2004, TherMatrx was sold to American Medical Systems, Inc. (AMS). Our portion of the initial payment from this sale was nearly \$9 million, with additional payments contingent on the quarterly sales of TherMatrx through the fourth calendar quarter of 2005. We have estimated that our portion of the total payout from this sale will be approximately \$40 million. If TherMatrx sales exceed our projections, the maximum payout that we could receive from the sale is \$62.5 million. If TherMatrx sales fall under our projections, there is no guarantee of any further payment beyond the initial payment, which is non-refundable.

Since the inception of our company we have engineered systems designed to increase the effectiveness of cancer treatment through the use of focused electromagnetic energy. From this development our current BSD-500 and BSD-2000 systems have emerged. We have also developed enhancements to our BSD-2000 system, including the BSD-2000/3D that is designed to allow three dimensional steering of deep focused energy and heat to targeted tumors and tissue and the BSD-2000/3D/MR that includes an interface for magnetic resonance imaging. These systems are sold with supporting software and may also be sold with support services.

Our accumulated deficit since inception decreased from \$20,570,242 as of November 30, 2003 to \$12,577,482 as of November 30, 2004 due to net income

Edgar Filing: BSD MEDICAL CORP - Form 10QSB

recorded during our fiscal year ended August 31, 2004 as a result of our sale of our interest in TherMatrix. We recorded a net loss for the first quarter of fiscal 2005 of \$504,336.

We recognize revenue from the sale of cancer treatment systems, the sale of parts and accessories related to the cancer treatment systems, the sale of software license rights, providing manufacturing services, training, and service support contracts. Product sales were \$215,458 and \$633,820 for the first quarters of fiscal 2005 and 2004, respectively. Service revenue was \$42,475 and \$47,314 for the first quarters of fiscal 2005 and 2004, respectively.

We derived \$7,154, or 3%, of our revenue for the first quarter of fiscal 2005, from sales to a related party, Medizin-Technik GmbH. Dr. Gerhard Sennewald, one of our directors, is a stockholder, executive officer and a director of Medizin-Technik GmbH.

In the first quarter of fiscal 2005, we derived \$250,779, or 97%, of our revenue from sales to unrelated parties. These revenues consisted of product sales of approximately \$207,000, consulting services of approximately \$29,000, service contracts of approximately \$13,000, and other miscellaneous revenue of approximately \$2,000.

6

Cost of sales for the first quarter of fiscal 2005, included raw material and labor costs. Research and development expenses include expenditures for new product development and development of enhancements to existing products.

Critical Accounting Policies and Estimates

The following is a discussion of our critical accounting policies and estimates that management believes are material to an understanding of our results of operations and which involve the exercise of judgment or estimates by management.

Revenue Recognition. Revenue from the sale of cancer treatment systems is recognized when a purchase order has been received, the system has been shipped, the selling price is fixed or determinable, and collection is reasonably assured. Most system sales are F.O.B. shipping point; therefore, shipment is deemed to have occurred when the product is delivered to the transportation carrier. Most system sales do not include installation. If installation is included as part of the contract, revenue is not recognized until installation has occurred, or until any remaining installation obligation is deemed to be perfunctory. Some sales of cancer treatment systems may include training as part of the sale. In such cases, the portion of the revenue related to the training, calculated based on the amount charged for training on a stand-alone basis, is deferred and recognized when the training has been provided. The sales of our cancer treatment systems do not require specific customer acceptance provisions and do not include the right of return except in cases where the product does not function as guaranteed by BSD. We provide a reserve allowance for estimated returns. To date, returns have not been significant.

Revenue from manufacturing services is recorded when an agreement with the customer exists for such services, the services have been provided, and collection is reasonably assured. Revenue from training services is recorded when an agreement with the customer exists for such training, the training services have been provided, and collection is reasonably assured. Revenue from

Edgar Filing: BSD MEDICAL CORP - Form 10QSB

service support contracts is recognized on a straight-line basis over the term of the contract, which approximates recognizing it as it is earned.

Our revenue recognition policy is the same for sales to both related parties and non-related parties. We provide the same products and services under the same terms for non-related parties as with related parties. Sales to distributors are recognized in the same manner as sales to end-user customers. Deferred revenue and customer deposits payable include amounts from service contracts as well as cash received for the sales of products, which have not been shipped.

Inventory Reserves. As of November 30, 2004, we had recorded a reserve for potential inventory impairment of \$80,000. We periodically review our inventory levels and usage, paying particular attention to slower-moving items. If projected sales for fiscal 2005 do not materialize or if our hyperthermia systems do not receive increased market acceptance, we may be required to increase the reserve for inventory in future periods. We have projected no orders to be placed with us for TherMatrx systems, and do not project a requirement for any inventory impairment based on this decline. In the past we have purchased inventory only after receiving orders for TherMatrx systems, and only in quantities sufficient to fulfill those orders. We have no inventory for TherMatrx systems that is currently at risk, whether or not future orders are placed with us for TherMatrx systems.

Product Warranty. We provide product warranties on our BSD-500 and BSD-2000 systems. These warranties vary from contract to contract, but generally consist of parts and labor warranties for one year from the date of sale. To date, expenses resulting from such warranties have not been material. We record a warranty expense at the time of each sale. This reserve is estimated based on prior history of service expense associated with similar units sold in the past.

Allowance for Doubtful Accounts. We provide our customers with payment terms that vary from contract to contract. Our allowance for doubtful accounts at November 30, 2004 was \$0. Bad debt expense for the quarter ended November 30,

7

2004 was approximately \$9,000. We perform ongoing credit evaluations of our customers and maintain allowances for possible losses. Allowance estimates are recorded on a customer-by-customer basis and are determined based on the age of the receivable, compliance with payment terms, and prior history with existing clients. The non-payment of a receivable related to the sale of a BSD-500 or BSD-2000 could have a material adverse impact on our results of operations.

Results of Operations

Three Months Ended November 30, 2004 compared to the Three Months Ended November 30, 2003

Revenue. Revenue for the first quarter of fiscal 2005 was \$257,933 compared to \$681,134 for the first quarter of fiscal 2004, a decrease of \$423,201, or approximately 62%. The decrease in total revenue was primarily due to a decrease in sales to related parties. Sales to Medizin-Technik totaled \$7,154 in the first quarter of fiscal 2005 compared to \$466,633 in the first quarter of fiscal 2004. Dr. Gerhard Sennewald, one of our directors, is a stockholder, executive officer and a director of Medizin-Technik GmbH. Sales to Medizin-Technik may fluctuate significantly depending on Medizin-Technik's anticipated sales and ability to place orders in Europe. Our revenue can fluctuate significantly from period to period because we have historically sold relatively few BSD-2000 and BSD-500 systems as these systems are expensive.

Edgar Filing: BSD MEDICAL CORP - Form 10QSB

Sales of a few systems can cause a large change in the revenue from period to period as noted in the decrease in sales to Medizin-Technik from the first quarter of fiscal 2004 to the first quarter of fiscal 2005. Product sales decreased to \$215,458 in the first quarter of fiscal 2005 from \$633,820 in the first quarter of fiscal 2004, a decrease of \$418,362, or 66%.

Related Party Revenue. We derived \$7,154, or 3%, of our revenue in the first quarter of fiscal 2005 from sales to related parties as compared to \$487,225, or 72%, in the first quarter of fiscal 2004. All of the related party revenue in the 2005 period was from sales of component parts to Medizin-Technik. During the 2004 period, \$466,633 of the related party revenue was from sales to Medizin-Technik. The remaining amount of related party revenue in the 2004 period was from services provided to TherMatrx. Since the sale of TherMatrx in July 2004, TherMatrx is no longer considered a related party. The significant decrease in sales to Medizin-Technik in the first quarter of fiscal 2005 was due to the sale of one BSD-2000 system in the 2004 period compared to none in the 2005 period. Sales to Medizin-Technik may fluctuate significantly from period to period due to the high cost of a BSD-2000 or BSD-500 system. Sales increases of one or two systems can have a material effect on our revenue.

Non-related Party Revenue. In the first quarter of fiscal 2004, we derived \$250,779, or 97%, of our total revenue as compared to approximately \$193,909, or 29%, for the first quarter of fiscal 2004 from non-related party sales. Our first quarter of fiscal 2004 non-related party revenue consisted of product sales of approximately \$207,000. The balance of our non-related party revenue consisted of consulting services of approximately \$29,000, service contracts of approximately \$13,000, and miscellaneous other revenue of approximately \$2,000.

Gross Profit. Gross profit for the first quarter of fiscal 2005 was \$(12,438), or (5)%, as compared to \$351,004, or 52%, of total product sales for the first quarter of fiscal 2004. The decline in gross profit margin was primarily due to the cost of excess production employees resulting from the decrease in sales. Because we have not had employee layoffs and because of the fixed costs associated with production, as our sales declined, it resulted in the costs of sales exceeding the sales during the first quarter of fiscal 2005.

Selling, General and Administrative Expenses. Selling, general and administrative expenses increased to \$380,500 in the first quarter of fiscal 2005, from \$212,575 for the first quarter of fiscal 2004 an increase of \$167,925 or 79%. This increase was primarily due to higher sales and marketing costs due to greater emphasis on marketing, higher legal and accounting costs, higher consulting costs related to marketing and preparation of FDA submissions and an increase in payroll costs.

8

Research and Development Expenses. Research and development expenses were \$182,513 for the first quarter of fiscal 2005, as compared to \$162,558 for the first quarter of fiscal 2004 an increase of \$19,955, or 12%, primarily due to an increase in payroll and consulting costs. Research and development expenses for the first quarter of fiscal 2005 related primarily to the conversion of systems software to foreign languages for international use and to new developments in the areas of thermal therapy and thermal ablation.

Interest income. Interest income increased to \$70,592 for the first quarter of fiscal 2005 as compared to \$101 for the first quarter of fiscal 2004 due to the significantly higher levels of cash resulting from the sale of TherMatrx.

Net loss. The net loss for the first quarter of fiscal 2005, was

Edgar Filing: BSD MEDICAL CORP - Form 10QSB

\$504,336 as compared with a net loss of \$24,136 for the first quarter of fiscal 2004. The increase in the net loss was primarily due to lower sales volume and an increase in the general and administrative expenses as described above.

Fluctuation in Operating Results. Our results of operations have fluctuated in the past and may fluctuate in the future from year to year as well as from quarter to quarter. Revenue may fluctuate as a result of factors relating to the demand for thermotherapy systems and component parts supplied by us to TherMatrx, market acceptance of our BSD hyperthermia systems, changes in the medical capital equipment market, changes in order mix and product order configurations, competition, regulatory developments and other matters. Operating expenses may fluctuate as a result of the timing of sales and marketing activities, research and development and clinical trial expenses, and general and administrative expenses associated with our potential growth. For these and other reasons described elsewhere, our results of operations for a particular period may not be indicative of operating results for any other period.

Liquidity and Capital Resources

Our accumulated deficit since inception decreased from \$20,570,242 as of November 30, 2003 to \$12,577,482 as of November 30, 2004 due to net income recorded during our fiscal year ended August 31, 2004 as a result of our sale of our interest in TherMatrx. We have historically financed our operations through cash from operations, licensing of technological assets and issuance of common stock and through the sale of our TherMatrx shares. We have projected substantial payments yet to be made to us as a result of the sale of our TherMatrx shares. However, these payments are contingent on the product sales that TherMatrx achieves through December 31, 2005. We believe these payments, if received, will contribute significantly to our future capital resources.

We used \$691,978 in cash from operating activities during the first quarter of fiscal 2005 compared to \$86,827 for the first quarter of fiscal 2004. Cash flow from operating activities decreased for the quarter of fiscal 2005 primarily because of lower sales volume compared to the prior year period. Our investing activities for the first quarter of fiscal 2005 resulted in net cash used of \$21,040 relating to the purchase of certain property and equipment. Total cash decreased from \$9,697,154 at August 31, 2004 to \$9,025,386 at November 30, 2004.

We expect to use the payments from the sale of our TherMatrx shares, including any contingent payments, for general corporate purposes, including the sales and marketing effort for our FDA approved cancer therapy products, supporting the FDA application for our cancer therapy products under investigational status, the development of new products used in medical therapy and the possibility of acquiring new companies or technology.

We expect to incur additional expenses related to the commercial introduction of our BSD-500 systems, which will precede any revenue from the sale of such systems. Due to additional participation at trade shows, expenditures on publicity, additional travel, higher sales commissions and other related expenses, we project that our sales and marketing expenses will be approximately \$500,000 higher in fiscal 2005 than in the prior year to support the commercial introduction of the BSD-500 systems. In addition, we anticipate that we will incur expenses of approximately \$200,000 related to governmental

and regulatory, including FDA, approvals during fiscal 2005 in excess of fiscal 2004. We are making these investments in sales and marketing and on government

Edgar Filing: BSD MEDICAL CORP - Form 10QSB

and regulatory activities to increase our revenue from sales of our BSD-500 system and, upon receipt of FDA approval, from the sale of our BSD-2000 system in the United States. These increased marketing and regulatory expenses are an investment in generating offsetting revenue against the decline in TherMatrx sales that we have projected, and to provide future revenue growth over the long term. We also project that we will incur approximately \$250,000 in additional new development expenses associated with developments for the treatment of non-cancerous diseases and medical conditions.

We believe any cash shortfall during fiscal 2005 that results from a decrease in revenues and increase in expenses can be covered through the cash raised in our November and December 2003 private placements and with the cash from the sale of our TherMatrx shares. We believe we can cover any cash shortfall with cost cutting or available cash. If we cannot cover any such cash shortfall with cost cutting or available cash, we would need to obtain additional financing. We cannot be certain that any financing will be available when needed or will be available on terms acceptable to us. Insufficient funds may require us to delay, scale back or eliminate some or all of our programs designed to facilitate the commercial introduction of our systems or entry into new markets.

FORWARD-LOOKING STATEMENTS

With the exception of historical facts, the statements contained in sections entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations" are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, which reflect our current expectations and beliefs regarding our future results of operations, performance and achievements. These statements are subject to risks and uncertainties and are based upon assumptions and beliefs that may or may not materialize. These forward-looking statements include, but are not limited to, statements concerning:

- o our anticipated financial performance and business plan;
- o our expectations regarding the commercial introduction of the BSD-500 system;
- o our expectations and efforts regarding receipt of FDA approvals relating to the BSD-2000 system;
- o our technological developments to the BSD-500 and BSD-2000 systems;
- o our ability to successfully develop our technology for new applications and the expense of such developments;
- o our development or acquisition of new technologies;
- o our expectation that sales to TherMatrx may decline to zero in future periods;
- o the amount of expenses we will incur for the commercial introduction of the BSD-500 system;
- o the amount of expenses we will incur for governmental and regulatory, including FDA, approvals;
- o our expectation that related party revenue will continue to be a significant portion of our total revenue;
- o our belief that sales of BSD-500 and BSD-2000 systems will increase through our future sales and marketing efforts;
- o our belief that our current working capital and cash from operations will be sufficient to fund our anticipated operations for fiscal 2005;
- o our assumption that we will receive contingent payments, and the amount of such payments, in connection with the sale of our ownership in TherMatrx to AMS; and
- o our anticipated use of proceeds from the sale of our ownership in TherMatrx to AMS.

We wish to caution readers that the forward-looking statements and our operating results are subject to various risks and uncertainties that could cause our actual results and outcomes to differ materially from those discussed or anticipated, including the factors set forth in the section entitled "Risk Factors" included in our Annual Report on Form 10-KSB for the year ended August 31, 2004 and our other filings with the Securities and Exchange Commission. We also wish to advise readers not to place any undue reliance on the forward-looking statements contained in this report, which reflect our beliefs and expectations only as of the date of this report. We assume no obligation to update or revise these forward-looking statements to reflect new events or circumstances or any changes in our beliefs or expectations, other than as required by law.

Item 3. Controls and Procedures

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")). Based upon that evaluation, the principal executive officer and principal financial officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective and adequately designed to ensure that information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in applicable rules and forms.

During the quarter ended November 30, 2004, there has been no change in our internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART ii - OTHER INFORMATION

Item 1. Legal Proceedings

None.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds
